PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood and Robert Musgrave Coates, solicitors' clerks; Samuel Goodman Crowell, George Hamilton Cassels, John Francis Lash and Robert Cecil Hamilton Cassels, barristers-at-law, and Samuel Maximilian Mehr, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or any energy and to use the same in connection with their business and to transmit the same, and sell. lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting. heating or other plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purpose of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power or for any other purpose of the company; (c) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (d) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (e) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers, upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (f) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of Section 44 of the said Act; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any Government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact. make or grant. and to pay for, aid in and contribute towards carrying the same into effect. and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation or to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (o) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (q) To amalgamate with any other company having objects similar to those of this company; (r) To do all acts and exercise powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcelona Traction Light and Power Company, Limited," with a capital stock of forty million dollars divided into 400,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of September, 1911.

THOMAS MULVEY,
Under-Secretary of State.

12-2

Dated at Toronto this 19th day of September, A.D. 1011.

Blake, Lash, Anglin & Cassels,
Solicitors for
BARCELONA TRACTION LIGHT AND POWER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood, Robert Musgrave Coates, solicitors' clerks; Samuel Maximilian Mehr, student-at-law; Samuel Goodman Crowell, and George Hamilton Cassels, solicitors, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein, and water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms, or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric gas or other light, heat and power; Provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (c) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells,

LIFE ASSURANCE COMPANIES

YOU are in the insurance business to make money; but if you are doing a GENERAL insurance business are you earning as much as you might if you devoted your entire time to Life underwriting? Many representatives of the Equitable who formerly transacted a "fire" or "miscellaneous" insurance business have tripled their incomes by devoting their entire time to life insurance work. In the life insurance field, every man and woman is a possible customer and if you become identified with the Equitable you can offer the most truly liberal policies coupled with the utmost security.

For agency positions, address

G. T. WILSON,
2nd Vice-President,
120 Broadway, New York.

First British Insurance Office Established in Canada, 1804

INTENDING ASSURERS

Should read the "THREE MINUTES" Leaflet of the

PHOENIX ASSURANCE CO., Limited

OF LONDON, ENGLAND (Founded 1782).

Copies of this and full information regarding the Company's system, its equitable principles and liberal policies, may be obtained at the Head Office

100 ST. FRANCOIS-XAVIER STREET, MONTREAL

The Company offers to the Public every advantage which

LIFE ASSURANCE

conducted under the most favorable conditions is capable of affording.

At the BONUS DIVISION for the five years ending 31st DECEMBER, 1910,

(1) A UNIFORM ADDITION of $85 per $1,000 was declared on all classes of Full-Bonus Policies.

(2) A GUARANTEED BONUS was also declared of $12.50 per $1,000 per annum on Full-Bonus Policies becoming claims by death, and $17 per $1,000 per annum on Endowment Assurances maturing before 31st December, 1915. These bonuses apply to new as well as existing policies.

H. B. F. BINGHAM, Life Superintendent.

R. MacD. PATERSON, J. B. PATERSON, } Joint Managers.

AGENTS WANTED

The Tower Canadian Oiled Clothing Company, Limited, has changed its name to Tower Canadian, Limited.

The Insurance Company of the State of Pennsylvania, with capital of $800,000, has been registered in Alberta and Saskatchewan.

The Fire and Light Committee of the city council of Toronto have decided to amend the building by-law in order to give the city architect control over all buildings that may be erected within the city limits. The question of making periodical inspections of all grand stands in athletic fields, parks, rinks, and galleries in all public buildings, was referred to the city architect and fire chief for report.

The capital stock of the Pratt Letchwork Company, Limited, has been increased from $350,000 to $400,000.

The Hupp Motor Car Company will locate a branch in Windsor, Ont. The A. E. White Machine Works of Eau Claire, Wis., will also locate in the city.

The New Zealand Parliament has agreed to a resolution empowering the government, in conjunction with Canada, to establish a four-weekly mail steamship service from Vancouver to Auckland for a period of five years. The subsidy to be paid by New Zealand is not to exceed £20,000 a year and the time between the two ports is limited to nineteen days.

LEGAL NOTICE

(Continued from Page 1651.)

roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (e) To carry on the business of treating, smelting and refining mineral ores or other substances by means of electrolytic process or the application of electric power in any manner or form, and for such purpose to install all necessary plant, machinery and apparatus and to purchase, sell and otherwise deal in ores of various kinds, or other substances capable of being treated by electrolytic process, and to buy, sell and deal in any products or by-products of such ores or substances; (f) To carry on business as a manufacturer of and dealer in all kinds of chemicals and chemical products and by-products thereof; (g) To aid and assist by way of bonus, advances or money or otherwise with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (l) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, right or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out, and enjoy any statute, ordinance, order, license, power, authority, franchise, concessions, right, or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (p) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (q) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (u) To do all or any of the above things as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Ebro Irrigation and Power Company, Limited," with a capital stock of two million five hundred thousand dollars divided into 25,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

SOME ALLURING OFFERS ANALYSED.

It will be recollected that The Monetary Times recently called attention to the proposed Great Northern Life Insurance Company, in which it was understood that Mr. J. M. Spence was interested. "Canadian Finance," our contemporary at Winnipeg, says in its last issue:—When brief reference was made a fortnight ago to the projected Great Northern Life Insurance Company, with proposed head office in Winnipeg, there had been opportunity for only a cursory glance at the prospectus issued by the Continental Securities Company. (En passant it may be noted how all-comprehensive are the titles connected with both these new Western insurance companies). A more careful reading of the prospectus confirms the impression of its naive ignorance—or something less ingenuous. Apart from its cocksure prediction that the Dominion Government's claims as to supervision of insurance companies are to be knocked into a cocked hat by the Privy Council, it asserts that a provincial charter is manifestly superior. The Canada Life, the Mutual Life and sundry other companies, were originally organized under provincial charters. They have been successful. Ergo, the Great Northern must be.

"Investors are respectfully reminded" (respectfully is good) that because stock in established Canadian, English or American companies can now only be bought at high prices, therefore, the most favorable time to invest is when the company reaches the state of that enjoyed by the Great Northern Life Insurance Company. Which state, according to the parenthesis under the prospectus title, is simply that of being "Proposed."

But the best is yet to come. "Owing to the large rate of interest obtainable in the Western country, and the low mortality, the shareholders should reap handsome profits from their investment; in fact, every company which has reached the dividend stage has proven that fact." Nothing is said of the seven or so Canadian life companies who have not yet reached "this stage."

Then as grande finale comes a tabulation of ten outstanding United States companies with the profits they have made for stockholders. Jumping from which exhibit, with marvelous disregard for any logical nexus, there comes the conclusion:

"These facts clearly demonstrate that an investment of the capital stock of the Great Northern Life Insurance Company, head office, Winnipeg, Canada, should be exceedingly profitable."

It is to be feared that (encouraged by the readiness with which the West has on some occasions responded to the appeal to back up the organization of local financial and insurance institutions) this proposed life company will trade upon its being a Western company.

INVESTMENT AND LOAN COMPANIES

The Basis of the Nation's Wealth

Real Estate is the basis of the Nation's Wealth. It produces that which both man and beast must have to sustain life. With our rapidly increasing population comes the demand for a corresponding increase in the products of the soil, and this demand will never be less than now. Land cannot be destroyed, and with proper care, its producing power may be maintained intact. Land values, therefore, possess that element of permanency that reduces the speculative feature to the minimum.

This Corporation's borrowed funds (Deposits and Debentures) and by far the larger proportion of its shareholders' moneys (Capital Stock and Reserve) are invested in first mortgages on improved, productive real estate. To afford an opportunity to all of investing their money with such absolute safety, we issue our Debentures in sums of one hundred dollars. They are a security in which Trustees are authorized to invest Trust Funds. Write for specimen Debenture and copy of Annual Report.

TRADE WITH SOUTH AMERICA.

There is a tendency to focus commercial attention on the possibilities of trade in South America. Opinions agree as to the prospects and as to the comparative lack of interest in them, but there is disagreement as to what are the difficulties of trade extension. Sir George Ross recently wrote in The Monetary Times of the importance of the appointment of two trade commissioners for South America, one to be settled at Buenos Ayres, in Argentina, and the other at Rio de Janeiro, in Brazil. With the rapid development of the Argentine Republic we are not entering any too soon into this new field of competition. Argentina contains a population of nearly seven millions, and is fast becoming a strong competitor with Canada and the United States in the British market, particularly in wheat and cattle. Out of a total trade last year of $722,000,000, Canada's share was only $5,870,000. So soon as we receive the reports of the new Trade Commissioner, now on his way to the capital of the Republic, we will be in a better position to judge what commodities are most in demand, and it will be for Canadian enterprise to meet that demand promptly and efficiently.

With the steady growth of our industries, a foreign market must be found for the surplus of our factories if the Canadian artisan is to find steady and remunerative employment. Argentina and Brazil should take part of this surplus. The United States has seven consuls or vice-consuls in Argentina and twelve in Brazil. And it is worthy of consideration whether a single trade commissioner in each of these countries will be able to meet satisfactorily the necessities of Canadian commerce. We are making a beginning, and that is something to our credit.

The other day an American trade conference was held in New York and attracted so little attention, that Senor Santamarina, who was a delegate from Argentina to the Pan-American Conference in Washington last winter, complained of the small audience and the slight notice that had been taken of the event. There seemed to him to be a strange indifference in the United States to trade with South America. Speaking of the growth of the trade of the Argentine Republic in recent years, he said that the pity of it was that the United States shares in all that business to such a small extent, while England has improved the opportunity, and "there is not a large business house in any of the European cities that has not its representative at Buenos Ayres." "Knowledge of the South American trade mechanism," he said, "is the only medium whereby the United States manufacturers and exporters can possibly establish firm connections and sound increase of trade." "The means must be comprehended if closer commercial and friendly intercourse is desirable." It is implied in all this that it is only necessary to take a keener interest and to make a closer study of the methods of promoting trade with those distant countries to secure the results. Mr. John Barrett, director-general of the Pan-American Union, declared that the "annexation bogey" had killed reciprocity with Canada, and wished the word to be spread that there is in the United States "no spirit of territorial aggrandizement" to obstruct the way to reciprocity, which he wished to see established "with Argentina, with Peru, Chili, Brazil and Mexico."

Steamship communication and banking facilities are good in connection with South America. The New York Journal of Commerce thinks that the fundamental difficulty in fostering greater trade between the United States and South America is that a policy has been long pursued in the neighboring republic which discourages rather than stimulates the desire and the power to trade abroad, except by selling surplus products of the soil which foreign nations seek to buy. "All stress has been laid upon the 'home market' for manufactures and its protection against foreign competition, in order that industries might be developed by high prices and large profits. This was natural in a young country of large area, great natural resources and small population which aspired to multiply industries and be self-sustaining. That stage is past, but the habit of mind which it fostered remains and the policy of protecting the home market is adhered to, with the necessary result of maintaining high costs and high prices. Foreign markets have been sacrificed for the benefit of the home market."

This may be true of the United States, but it is important that Canada should develop its valuable home markets, although at the same time we may well encourage, to the proper extent, the foreign markets.

WHEN JUDICIAL DOCTORS DISAGREE.

The York Radial Railway Company desired a double track in place of a single one on Yonge Street, Toronto. The Ontario Railway and Municipal Board said they had no power to grant this concession, and that the town of North Toronto could only give or withhold permission. The town refused permission. The railway company then applied to the board for permission to lengthen its switches on Yonge Street and to lay a new switch. Two of the three members of the board, Messrs. Ingram and Kittson, think that this application should be refused, as switches of approximately 2,000 feet long, at comparatively brief distances, practically equals a double track. The third member, and the chairman of the board, Mr. J. T. Leitch, K.C., disagrees, stating his opinion that under the company's franchise, it has a right to enlarge the switches when the traffic conditions demand it, and that both under its contract and under the common law, the company has not only the right to carry freight, but is compelled to carry freight if it is offered. This is the situation in brief created by a modern K.C. at the bat. According to a daily contemporary, Mr. Leitch has also said that he could not allow such an important matter to be tied by the opinions of a couple of laymen.

It looks as though the application for such lengthy switches is simply a roundabout way to obtain to what amounts to a double track. The intricacies of the position will no doubt be dissected in the Court of Appeal.

In the meantime, relations between Messrs. Ingram and Kittson, who gave a dissenting judgment, and Mr. Leitch, K.C., the chairman of the board, are probably strained. Mr. Leitch has decided opinions as to his power. "I can only say," he remarks, "that the act creating our board says that where, in my opinion—in my opinion, mind—an application involves a question of law it is to be settled by me, and my finding is final." This raises the question as to whether or not a commission of three can give full value when required, if the finding of any particular one is final in any particular case.

SMALL CHANGE.

The New Liskeard fair was a further demonstration of the great possibilities of Ontario's Northland.

* * * *

Mr. Borden has added osculation with fair bouquet presenters as a new premierial accomplishment of charm.

* * * *

A Montreal paper prints a story headed, "Pole with bullet in ribs, refuses aid and walks home." A correspondent suggests that the Pole was one of reinforced concrete.

* * * *

Every year Canada's fire waste totals not less than $24,000,000. In four years the fire destruction, therefore, amounts to $100,000,000. Which means that once every four years we burn the value of the wheat crop of the three prairie provinces.

* * * *

If some of the hundreds who, with a wink, say they know where Dr. Beattie Nesbitt is located, would earn two hundred dollars, he might be brought to the bar of justice. A stain on the escutcheon of the Ontario attorney-general would also be removed.

* * * *

Viscount Templeton was honorary president of the Farmers Bank, now being wound up. Viscount Templeton was a director of the Atlantic, Quebec and Western Railway, financed by the Charing Cross Bank, London, now being wound up. Viscount Templeton should pick with greater care his directorial company. These incidents tend to prove that a nobleman's name does not guarantee dividends.

* * * *

Once more the power of finance has been used in an endeavor to suppress war and revolution. The Chinese government appears to have enough ready money for a campaign of about two months, but, anxious for a reserve fund in view of the possibility of a more extended conflict with the revolutionists, applied for a loan of 5,000,000 taels, or about $3,000,000, to the international bankers who arranged the $50,000,000 currency reform loan. The group of financiers who represent four nations, the United States, Great Britain, Germany and France, were unable to agree to do this, and the loan was refused.

* * * *

Some time ago, Professor Miller, provincial geologist of Ontario, examined ore at Cobalt in an endeavor to find mercury. He was unsuccessful. The other week quicksilver was found in silver ore at the Nipissing Mines, and the experts of the Bureau of Mines are investigating the discovery. They will determine in what combinations of mineral bodies it is found and whether it is in large enough quantities to make the discovery commercially important. Canada appears to have almost all the minerals, and many of them in large quantities. Indeed, we have such a wealth of resources that our stocktaking will occupy many years.

LA BANQUE INTERNATIONALE OPENS DOORS.

Treasury Board Has Granted Certificate—Names of the Directors.

The treasury board, Ottawa, on Monday, granted a certificate to La Banque Internationale du Canada, empowering it to begin business in accordance with the charter granted at the last session of parliament. The bank opened its doors for business immediately upon receipt of word from Ottawa that the license had been granted by the treasury department.

MR. RODOLPHE FORGET, M.P.,

President of La Banque Internationale du Canada. Mr. Forget has interested considerable French money in Canadian enterprises.

The capital of the bank is $10,000,000, of which about $7,000,000 is French money. Mr. Rodolphe Forget was chiefly responsible for the inauguration of the new institution. In selling exchange in his own business since he has established financial relations with France on a large scale, Mr. Forget recently said that in many instances he had received replies to the effect that banks were not in the market, so he is of the opinion that another large bank will relieve the situation generally. The fact of our French directors sitting on the board and keeping in touch with the financial and commercial pulse of the Dominion cannot do otherwise than bring the resources and general development of the country into greater prominence amongst the financiers of England and the Continent, and especially in France. The new bank has nine directors, five in Montreal and four representing the European interests.

Directors of the Bank.

The following is a list of the directors of the new bank:—

Mr. Stanislas Badel, of Messrs. Frères & Company, bankers of Paris, Paris.

Mr. R. Bickerdike, member to the federal parliament, ex-vice-president of the Bank of Hochelaga, Montreal.

Mr. S. V. Chomereau-Lamothe, officer of the Legion of Honor, Honorary Governor of the Banque de France, administrator of Credit-Foncier de France, Paris.

Mr. Rodolphe Forget, member to the federal parliament, vice-president of the Montreal Light, Heat & Power Company, president of the Richelieu & Ontario Company, president of the Quebec Railway, Light & Power Company, Montreal.

Sir Georges Garneau, Chevalier of the Legion of Honor, ex-mayor of the city of Quebec, Quebec.

Mr. J. N. Greenshields, King's Counsellor, director of the Wabasso Cotton Company, director of the Quebec Railway, Light, Heat & Power Company, Montreal.

Mr. Georges Martin, Chevalier of the Legion of Honor, ex-inspector of the Finances, president of the Compagnie Francaise d'Etudes au Canada, administrator of the Cie Générale Francaise des Tramways, vice-president of the Confiance-Vie, Paris.

Mr. Raoul Saulter, of Messrs. Odier, Saulter & Company, bankers, administrators of the Cie des Phosphates et Chemin de Fer de Gafsa, Paris.

Hon. L. O. Taillon, member of the private council of His Majesty, Montreal.

As this institution has considerable French capital, the question has been raised as to the enforcement of the double liability clause in the event of failure, a most unlikely happening, judging by the financial and directorial strength of La Banque Internationale du Canada. As The Monetary Times pointed out last week, under the procedure of the winding-up act a list is prepared by an official referee of all those shareholders liable as such contributories. It is open to any shareholder to contest his liability to be placed on the said list and the referee's finding, subject to appeal to the higher courts, is equivalent to a judgment of the court and is final.

A foreign shareholder, however, who had not appeared before the referee to defend and thereby submitted to the jurisdiction of the Canadian Court, would still have the right to contest his liability in the courts of his own country, but the grounds of defence there would be somewhat restricted as under the rules of the international law the question should be decided in accordance with the Canadian law. Under our law a contributory is not allowed to set up all defences against the liquidator which he might have been allowed to set up against the bank itself in an action for calls, and, generally speaking, after a winding-up order is made a shareholder cannot evade liability by setting up misrepresentations and fraud in the purchase or acquiring of his shares.

Twenty-Eight Banks Now.

There are now 28 chartered banks in Canada, two of them having commenced business this year, namely, the Weyburn Security Bank with head office at Weyburn, Sask., and La Banque Internationale du Canada, with head office at Montreal, which commences business during prosperous times and with the best of prospects.

General Manager and Assistant.

Mr. Godfrey Bird, who during the past thirty years has been on the staff of the Bank of Toronto, and manager of many of its more important branches, has assumed the duties of general manager of the new bank, and has appointed Mr. F. G. Ramsdon, also of the Bank of Toronto, as chief inspector. The Paris interests have sent to Canada Mr. A. D. Desenn, to take entire charge of the foreign exchange department. Mr. Desenn has had extensive experience, having been sub-manager of the Credit Lyonnais at Cairo, Bombay, and Constantinople, and afterwards was connected with this bank's foreign exchange department in Paris. Mr. L. G. Balcer, formerly of the Quebec Bank, has been appointed assistant manager of the Montreal office.

MR. ROBERT BICKERDIKE, M.P.,

Vice-President of La Banque Internationale du Canada, which opened its doors for business this week.

Among the bank's correspondents, in different parts of the world, are the following:—

England—Royal Bank, Credit Lyonnais.

France—La Banque Francais pour Commerce, and Industrie, Comptoir National, de Compte de Paris.

Germany—Dresdner Bank, Direction der Gesellschaft.

Italy—Banca Commerciale Italiano, Creditto Italiano.

Russia—Banque Internationale de Commerce at St. Petersburg, Banque de Commerce de Lazoff.

Africa—Imperial Ottoman, Banque de Lalgerie.

Asia—Imperial Ottoman, Bank Hongkong and Shanghai Banking Corporation.

United States—Hanover National Bank, New York; National Shawmut Bank, Boston.

Canada and Newfoundland—Royal Bank of Canada.

WESTERN CANADA.

Good Weather Awakens Optimism—Business Good—In the Wheat Markets.

Monetary Times Office,
Winnipeg, October 18th.

After the pessimistic reports of the condition of the grain, it is gratifying to have advices from numerous points which tend to show that the damage from the recent wet weather is not so serious as was at first anticipated. There is an improvement all along the line. The splendid weather of the last two weeks has had the effect of maturing the grain, and has enabled farmers and threshers to make rapid progress with the crop. Large areas, like Saskatoon and Goose Lake districts, report that the yield is heavy in wheat, oats and flax. The wheat grade is generally low, but on the whole the quality is much better than was expected from the long period of wet weather. The railways are putting forth every effort to handle the biggest crop in a decade, and although some difficulty is being experienced at certain points where threshing has been going on rapidly, the transportation companies are making adequate provision to cope with the situation and relieve congestion. Some districts report a shortage of labor, and while this does not seem to be generally acute, steps have been taken to meet the situation in this respect also.

Business Takes Further Forward Movement.

With a more optimistic outlook so far as the grain yield is concerned, trade conditions in the West show a healthy revival. The volume of business is well maintained, and an increasing demand for staple commodities is anticipated. The return of normal fall weather has also affected the real estate market favorably, and a large number of big deals have been put through. Extreme activity also marks the building trade, and advantage is being taken of the fine weather to rush work to a conclusion.

Work on the new lines now under construction in the West is being proceeded with as rapidly as possible, and no halt will be called in grading and the laying of steel until the cold weather puts an end to operations. The programme of work mapped out for the season by the various railway companies will be carried to a finish.

Union Stockyards Now in Sight.

The long-deferred question of the proposed Union stockyards in the city seems now on a fair way to a satisfactory settlement, an agreement having been arrived at as the result of a conference between the provincial government and representatives of the various railway companies interested. The indications are that the Union stockyards are to be operated by a commission, but are to be controlled by the provincial government in the matter of rates and charges. Under the new arrangement all the roads will have equal representation. The site chosen is an admirable one of 215 acres in St. Boniface, and is equally convenient to all the railway lines. Plans of the new stockyards and abattoirs show a structure of five stories high, modern in every respect, with a floor space of 200,000 feet.

In the Wheat Markets.

There was fairly good action in the wheat markets during the week, and several bullish factors caused temporary strength and advance in prices. The strength was mainly due to the reported shortage of 240,000,000 bushels in the wheat production of Russia, while the United States report for October was more bullish than anticipated. In addition there were persistent advices of frost damage to part of the Argentine crop, and at the same time the world's statistics tended to hold values up. All these influences had the effect of stimulating the market, though it did not respond to the extent the trade expected. The one really bearish feature at present seems to be the big increase in the United States visible supply, which is now over 56 million bushels. Heavy receipts at the end of the week had the effect of easing the market somewhat, but with so many cross influences at work the course of the market is uncertain and erratic.

Good Business Locally.

There was some active trading on our local exchange during the week, with an excellent cash demand for practically every grade. Though little actual export business was reported, there was a distinct improvement in the tone of enquiry and in actual bids. Vessel agents announced a better demand for charters, and shipments this week will be in greater volume than hitherto. The movement from the country is in full swing, and the figures now show to advantage as compared with last year's returns. In spite of the large receipts offerings continue moderate, as farmers seem inclined to hold for higher prices. The Canadian visible is only half of what it was a year ago, while stocks at the head of the lakes are nearly three millions less than corresponding date last year, but these will increase from now on.

Already 15,000,000 bushels of wheat have been marketed to date on the western lines of the Canadian Pacific Railway, in addition to 2,000,000 bushels of coarse grains. The total loading has amounted to 11,000 cars.

DOMINION FINANCES.

The statement of the revenue and expenditure of the Dominion for the first half of the fiscal year, being from April 1st to September 30th, makes new records in the revenue for a half year, and also in the expenditure. The figures follow, those for the same period of 1910 being given for comparison:—

Revenue.

	1910.	1911.
Customs	$36,185,416	$42,284,535
Excise	7,898,552	8,799,535
Post-office	3,675,000	4,150,000
Public works, railways, canals	5,607,145	5,873,637
Total	$56,148,193	$64,069,524

Expenditure.

	1910.	1911.
Ordinary account	$35,108,672	$35,933,456
Capital account	12,430,136	12,318,816
Total	$47,538,136	$48,251,483

There are liabilities for public works, etc., incurred during the past two months to be charged against the income.

The statement of the debt and offsetting assets follows:—

Liabilities.

Funded debt—	
Payable in Canada	$ 4,865,260
Payable in London	263,121,429
Bank circulation redemption fund	4,654,316
Dominion notes	99,308,945
Savings banks	57,433,599
Province accounts	11,920,582
Miscellaneous and banking accounts	26,227,283
Total gross debt	$477,256,141

Assets.

Investments—	
Sinking funds	$ 11,714,007
Other investments	28,776,851
Province accounts	2,296,429
Miscellaneous and banking accounts	110,530,085
Total assets	$153,317,372
Total net debt 30th September	323,938,768

ANOTHER BIG MERGER.

Another industrial amalgamation is being arranged by the merging of three large Canadian packing housese, with capital stock of $5,000,000. The companies included in the merger are George Matthews, Limited, with plants at Hull, Peterboro, and Brantford; the Laing Packing & Provision Company, Limited, of Montreal, and the Park-Blackwell Company of Toronto. The new company is awaiting the receipt of a charter and will probably start business as an amalgamation about November 5th. Several organization meetings have yet to be held.

Messrs. Meredith and Company, have purchased $1,000,000 bonds of the new company. This will afford funds for improving the various plants as the intention of the company is to increase its plant and equipment and to extend its business in many directions.

The name of the new corporation has not been settled, the one suggested by our daily contemporaries, viz.: Matthews Laing, Limited, being unlikely, as it does not include reference to the Park-Blackwell firm. The name will probably be Matthews, Blackwell and Laing, Limited.

Mr. W. E. Matthews will be president, while the board of directors will be chosen from the officers of the various companies, whose business will be carried on as before.

This is the fortieth industrial amalgamation in Canada since January, 1909.

FROM COAST TO COAST.

Three Rivers, Quebec, will install an electric car service.

The capital stock of the Harry Webb Company, of Toronto, Limited, has been increased from $90,000 to $250,000.

The following companies holding Ontario charters have increased their capital stock:—The Art Tailoring Company, Limited, from $40,000 to $100,000; and the Telephone City Oil and Gas Company, Limited, from $25,000 to $90,000.

The Canadian Bank of Commerce has opened a branch at Briercrest, Sask., under the supervision of the manager at Drinkwater. Briercrest is on the Mayfield extension of the Canadian Northern Railway about 30 miles southeast of Moose Jaw.

Mr. R. Home Smith's offer of a gift to the city of Toronto of 105 acres in the Humber valley in connection with the boulevard driveway scheme has been accepted by the city council, after some changes made in the conditions laid down by Mr. Smith.

At the next session of the Alberta Legislature the Canadian Northern Railway will seek the right to build and operate several new railway lines in that province. One of the most important is a line to be built from Athabasca Landing to Peace River Crossing.

An application is to be made shortly by Tooke Brothers, Limited, to have their securities listed on the Montreal Stock Exchange. The capital consists of $1,250,000, of which $600,000 has been subscribed and paid up, and $1,250,000 preferred, of which $800,000 is subscribed and paid up. The net earnings of the company for the year ending May 31st, 1911, were $405,762, as against $109,406 in 1910.

The Monetary Times has received a copy of "Extra-Provincial Corporations," a sketch of the operation and effect of extra-provincial licensing acts in force in the various provinces of Canada. The little volume, which is written by Mr. F. W. Wegenast, LL.B., of the Ontario bar, gives an excellent summary of the position in this matter in the different provinces. It is being circulated by the legal department of the Canadian Manufacturers' Association. Price 50 cents.

Canal traffic in Canada shows a decline during the past season, but the decrease is almost wholly at the Soo. Figures to September 1 show a total for all canals of 22,936,881 tons, as against 27,896,682 in the same period last year, a decrease of 4,959,801 tons. The decrease at the Soo Canal was 5,188,044 tons, and there were also declines on the Chambly, Ottawa, and St. Peter's Canal, while the Welland and St. Lawrence increased, the former by 136,000, and the latter by 189,000 tons.

The case of A. N. Warfield versus W. A. Bugg has been entered for trial at the Stratford fall assizes. It is an action to recover certain money, being proceeds of the sale of stock in the Peoples Railway Company, and for a declaration that certain stock is the property of the plaintiff. Another case is also entered, viz.: A. N. Warfield, versus Peoples Railway Company, being an action for salary. The Peoples Railway is an enterprise about which The Monetary Times has had considerable misgiving, duly recorded in these columns.

There is little change in the affairs of the Central Canada Meat Packing Company, in liquidation. Under the order of the court, the Union Trust Company offered the packing company for sale by tender, but there was only one bid for a portion of the machinery and the offer was not considered. The court has now directed that the property be offered for sale by public auction, subject to a reserve bid, and this will probably be carried out in the course of five or six weeks. There is some inquiry being made for the plant by opposition packers, but what the outcome will be is problematical.

The telephone committee of the Montreal city council is applying to the Dominion Railway Commission for an order requiring the Bell Telephone Company to abolish its present charges in the limits of Montreal and substitute the following tariff:—$50 per annum for business telephones and $30 for residential telephones, the abolition of present mileage rate of $5 per annum for each quarter of a mile or fraction thereof for instruments beyond six miles of the east end exchange, or one mile beyond the Westmount exchange, and to order that no payment be collected from persons using the pay telephones unless they secure the desired connection with the persons called.

PERSONAL NOTES.

Mr. E. D. Warren has been elected a member of the Toronto Stock Exchange.

Mr. Eugene Dahne of Rio Janeiro has been appointed Trade Commissioner for Brazil to Canada and the United States.

Mr. George E. Bouratteau, of Montreal, may establish a boat building and marine engine manufacturing plant in Vancouver.

Mr. Andre Lazard, of Messrs. Lazard Freres, Paris, and Mr. R. M. Kindersley, of the London, England, office of the firm are visiting Vancouver.

Mr. James A. Roosevelt, of New York, a cousin of ex-President Roosevelt, has been appointed transportation manager of the British Columbia Electric Railway.

Messrs. Carrere and Hastings and Eustace G. Bird, New York architects, have had their plans approved by the Sterling Bank of Canada, for the bank's new offices in Montreal.

Mr. A. Homer Vipond, president of the Dominion Association of Life Underwriters, was the guest of the London, Ontario, life underwriters at their recent meeting.

Mr. David McNicholl, vice-president of the Canadian Pacific Railway, has been elected a director of the Molsons Bank, succeeding Mr. J. C. Cleghorn, who resigned because of failing health.

Lieutenant-Colonel Sydney C. D. Roper, at one time commander of the Governor-General's Footguards, and honorary A.D.C. to Earl Grey, is dead. He was employed in the Dominion Customs department.

Mr. C. Norie-Miller, joint general manager at the Philadelphia office of the General Accident Assurance Corporation, sailed on Wednesday from New York on a visit to the company's home office at Perth, Scotland.

Mr. H. H. Macrae, managing-director of the British & Colonial Land & Securities Company, Limited, Traders Bank Building, Toronto, is leaving for England on business of the company and will return about Christmas.

Mr. Norton Griffiths, M.P., urges British manufacturers to start branches in Canada the same as American firms are doing. There is not a single trade in Great Britain which could not successfully be established in Canada, he said.

Messrs. Henry Fester, Sr., George and E. G. Fester, of London and Antwerp, are on a visit to Western Canada, for the purpose of selecting a point at which they will establish a Canadian branch of their business which is re-insurance. They have branches of their company in London, St. Petersburg, Hamburg, Antwerp, Liverpool, and New York.

Mr. Massey Morris, manager of the Toronto branch of the Canadian Bank of Commerce, has been forced by ill-health to take a place on the list of reserve managers. His successor will be Mr. Donald A. Cameron, who was formerly inspector, and whose place will be filled by Mr. R. A. Russey, formerly assistant manager of the Winnipeg branch.

Mr. W. H. Plummer, ex-mayor of Sault Ste. Marie, is dead. For a great number of years he took a conspicuous part in the development of the District of Algoma, and possessed many interests, mining and agricultural, in that part of Ontario. For a number of years he was also superintendent of Indian Affairs on Lake Huron and Lake Superior.

Sir Wm. J. Crossley, formerly M.P. for Altrincham division of Cheshire, England, is dead. The deceased served his apprenticeship as engineer in the famous Elswick works, and afterwards founded the well-known firm of Manchester engineers that bears his name. He was a director of the Manchester Ship Canal and an active worker on the committees of several philanthropic bodies.

Mr. William Molson Macpherson, president of The Molsons Bank, has been elected a director on the Canadian board of the Liverpool & London & Globe Insurance Company, Limited. The Board now consists of Sir Edward S. Clouston, Bart., chairman, Mr. Geo. E. Drummond, Mr. F. W. Thompson, Sir Alexandre Lacoste, Mr. M. Chevalier, and Mr. William Molson Macpherson.

Mr. W. H. Hearst, the new Minister of Lands, Forests and Mines in the Ontario Government, in succession to Hon. Frank Cochrane, is a practising lawyer at Sault Ste. Marie, Ontario, and was first elected to the Legislature in June, 1908. Mr. Hearst is well versed in mining and has a practical knowledge of Northern Ontario. He was born in Bruce County in February, 1864, and was educated at the Tara Public School and Collingwood Collegiate Institute. He studied law, was called to the bar in 1888, and created a King's Counsel in 1908.

FORGED CERTIFIED CHEQUES.

Many Forgeries in Canada Tend to Show that the Certified Cheque is Not Suitable in Many Cases.

BY H. M. P. ECKARDT.

The banks on both sides of the Canada-United States boundary line have latterly been troubled with forgers making a specialty of the certification of cheques. Not so very long ago a bank branch in British Columbia was victimized to the extent of $2,000 by one of these experts. And in the past year and a half instances of their activity have been forthcoming in Toronto, Winnipeg, and other cities. The press in Canada has already taken notice of the large amounts recently secured in New York by the stranger who presented certified cheques on a bank in Hood River, Oregon. The certification on the cheques was fraudulent of course, but the forger did not ask the New York bank to pay cash for the cheque presented. Oh, no. He merely wanted to open an account and deposit the money. But he took good care to draw out the most of the funds before the spurious cheque could reach its domicile in Oregon.

Has Discredited System.

The activity of the certification-forger has already served to discredit to some extent this particular method of intimating that the drawer of a cheque has the requisite amount of funds at his credit. It cannot be said that the mode of attack on the banks is novel or that it is difficult to resist. Where this particular trick is successfully tried in Canada it usually owes its success to inattention to rules or carelessness on the part of the bank officials immediately concerned.

For many years there has been a rule in the well regulated banks forbidding the tellers to cash for strangers certified cheques on other banks. It is a simple matter to get a certification stamp similar to those used by the banks; and as for the ledger-keeper's initial, that is never known in a distant town or city. So, when a stranger presents himself at the counter and hands in a certified cheque on a bank in some other town or city, up-to-date banking practice calls upon the bank officer to whom such cheque is tendered to ignore entirely the purported certification on the instrument and to refuse to pay cash or accord credit until the bank has absolutely secured itself against loss, by the endorsement of a responsible party whom it knows or by some other means.

One way to do It.

The bank might safeguard itself satisfactorily by placing the amount to the credit of stranger's account, providing he was identified, on the strict condition that no part of the credit balance thus created should be withdrawn in any form until the bank had positive evidence that the certified cheque was duly paid or that it would be paid on presentation at the bank on which it was drawn. To place the amount of a doubtful cheque of this description at the credit of the payee without imposing this condition would be practically equivalent to paying cash for it over the counter.

When the cheque which is presented purports to bear the certification of another bank in the same town that alters the circumstances in some degree. For then the teller who is asked to pay cash or give credit will probably be familiar with the initial of the certifying clerk who signs for the other bank. At any rate he will have had the opportunity of scanning it half-a-dozen or more times every day, and he should therefore be familiar with it. In a case of this kind the forger would almost invariably demand cash.

It would not suit his purpose at all to have the amount of the fraudulent document placed to his credit in current account, because the cheque would go in the ordinary course next morning into the bank on which it was drawn, and presumably the fraud would be unmasked. The proper defence of a teller against a demand for cash by a stranger presenting a certified cheque on another bank in town is to send him straight to the bank on which the cheque is drawn. He has no business to undertake such a transaction at all.

Stealing Some Circulation Sustained.

In the past, banks have had losses through doing this kind of business with the design of stealing a little circulation from a competitor. Latterly, since the bank note issues have been crowding close upon the legal maximum, the banks probably place less value upon circulation gained in this manner. If the bank has none of its own circulation to pay out and it is obliged to plan and contrive expedients for providing itself with currency for counter purposes, its officers are not likely to undertake payments of currency which should be made by other banks.

The prominence given to these recent forgeries is likely to have an effect in impressing upon the mind of the business community the fact that the certified cheque is not suitable or proper as a means of remittance to a party in another town or neighborhood unless he is known to the banks in his town as a responsible person. If he is a stranger or traveller unable to get a local endorser, he may have difficulty in negotiating his cheque. In a case of that kind it is desirable that the responsibility of the bank holding the funds to be transferred shall be attested with more formality and distinctness than a mere certification stamp and a ledgerkeeper's initial can supply.

DEVELOPMENT AT EDMONTON.

Messrs. P. Burns & Company have commenced work on a meat packing enterprise which they will establish at Edmonton.

The immediate expenditure on this enterprise may amount to a million dollars, but the investment will probably considerably exceed that figure within the next few years. The plant will commence operations with a staff of about 200 hands.

The Fitzhugh Stone Company is being organized by a party of Edmonton business men. This company has large holdings of valuable stone deposits in the immediate neighborhood of Fitzhugh, the present limit of train service on the Grand Trunk Pacific to the west of Edmonton. The company will begin immediate development work and propose to bring in stone for building purposes, as well as to use the limestone for the manufacture of lime. The development of this industry is of very great importance to Edmonton as in the past there has always been difficulty in obtaining sufficient supplies of stone for building purposes here. All the stock in this company has been taken up by the parties associated in the promotion and none is being offered to the public.

A report is current to the effect that the Canadian Pacific Railway have closed a transaction whereby they acquire the unsubdivided portion of the Hagmann estate. This consists of 140 acres, and is in the northwestern quarter of the city, south of the main yards of the Grand Trunk Pacific. It is understood that the Canadian Pacific Railway have acquired this property for their Edmonton terminals.

It is also reported that parties representing the Grand Trunk Pacific Railway have recently acquired options on a large area of city property representing an enormous valuation, which they require for their passenger depot and city freight yards. The property in question lies to the south of the Grand Trunk Pacific tracks between 1st Street and Syndicate. It is understood that the total value of property involved is in the neighborhood of half a million dollars.

CANADIAN-AUSTRALIAN ROYAL MAIL LINE.

The fleet of steamers in the run across the Pacific from Vancouver to Sydney (and vice versa) via Honolulu, Suva and Auckland, has been much improved during the last three years, writes Mr. D. H. Ross, Canadian Trade Commissioner at Melbourne, each of the three old steamers having been withdrawn and replaced by modern steamers of a much higher standard and greater capacity. Further improvements are being effected, as the steamer Maunganui of over 7,000 tons has just been launched on the Clyde, and, when put into commission early in 1912, will be found replete with all the latest conveniences and appliances for comfortable travelling. A further order has recently been placed by the contractors for a steamer of some 12,000 to 13,000 tons for this service. No expense will be spared to make the vessel's general equipment superior to that of any steamship outside of the Atlantic trade. The new steamer will establish a record in point of size, speed and convenience for the trade between Canada and Australasia. The growing popularity of the Canadian route is evidenced by the fact that accommodation will be provided in this new steamer for over 700 passengers.

The town council and board of trade of Cobourg, Ont., have under consideration an offer from an industry manufacturing tacks, nails and rivets, to establish their factory there on account of Cobourg being the nearest shipping point to Pittsburg, Pa., where they get their raw material. They ask the town to guarantee their bonds to the extent of $65,000, and in return offer to erect a $120,000 plant employing from 200 to 500 hands, they to repay the bonds with interest in twenty years.

ANALYSIS OF TRAMWAYS MERGER.

Basis of the Offer—Stock Market Value—Profits from Bond Sale.

Monetary Times Office,
Montreal, October 17th.

In connection with the Montreal Tramways merger noted in last week's Monetary Times, the proceeds of the bond sale of $10,000,000 was $9,500,000. Out of this was provided the cash which was included in the offer to the Street Railway shareholders of, among other things, $87.50 per share. As the capital of the Montreal Street Railway is $10,000,000, the amount involved in this cash offer would be $8,750,000, so that the cash received for the sale of its bonds by the Tramways Company would be $750,000 over the amount paid out in the exchange of shares.

In addition to the $87.50 offered by the Tramways Company in exchange for each share of the Montreal Street Railway, the Tramways Company would give $160 par value of its 5 per cent. debenture stock, and $20 par value of common stock. For those who prefer to take securities of the Tramways Company in exchange, without any cash, the offer will be $250 in 5 per cent. debenture stock, and, as before, $20 in common stock.

Assuming that it was intended that these alternative offers should be equal, it is clear that the basis of the offer is approximately $97.25 per share of debenture stock. This would figure as follows:—

For the stock and cash offer:—

$160 debenture stock at 97¼ per cent. par..	$155.60
Cash	87.50
	$243.10

All stock offer:—

$250 debenture stock at 97¼ per cent. par..	$243.12

Evidence of the Stock Market.

If to the above is added the value of 1/5 share of common stock, for which $35 is now being bid on the exchange—making a value of $7 for 1/5 share—the basis of the alternative offers is about $250.10. The evidence of the stock market, is that the public is not placing such a high value as this upon Street Railway shares, sales taking place at present at $230 per share, and $235 being about the highest which has been paid for a considerable time. On a basis of the present market value of Street Railway shares, therefore, it is evident that the public is placing a value of about 90 on the new debenture stock and 25 on the new common stock, as will be seen from the following:—

Stock and cash offer:—

$160 Montreal Tramways debenture stock at 90 per cent.	$144.00
Cash	87.50
1/5 share common stock at 30 per cent. of par	5.00
	$236.50

All-stock offer:—

$250 debenture stock at 90 per cent. of par...	$225.00
1/5 share of common stock at 25 per cent. of par	5.00
	$230.00

May Favor Stock and Cash.

It is impossible to say at this stage which of the two offers will be favored by the holders of Street Railway. but it is generally thought that the stock and cash offer will receive the preference. Assuming this to be the case, the future charges against the earnings of the company, as compared with those of the past, will be as follows:—

$10,000,000 of 5 per cent. debenture bonds	$500,000
$16,000,000 of 5 per cent. debenture stock	800,000
Future annual charge	$1,300,000
Old annual charge—10 per cent. on $10,000,000 Street Railway stock	$1,000,000
Annual increase	$300,000

The Street Railway during the past year has probably earned more than sufficient to meet this additional charge, thus indicating its ability for the future. In addition, the Railway profits by the sale of its debenture bonds and exchange of cash to the extent of $750,000, which sum will be of assistance in the financing.

From the last table, it is evident that shareholders who formerly drew $100 per year in dividends will draw $130 under the new arrangement, in addition to the actual cash of 87½ per cent., which they receive in exchange for their old holdings. The Railway still has to settle a number of outstanding difficulties with the city. An entirely new arrangement will be arrived at under which will have to be considered the extension of lines, addition to rolling stock, snow removal, street watering, freight service, and frequency and speed of passenger service, and the city's share of earnings, all of which will be taken into consideration in the conference which will occur in connection with the new franchise.

BIG SHAREHOLDER OBJECTS TO MONTREAL TRAMWAYS DEAL.

Claiming that the Street Railway amalgamation was not in the interests of the public, Senator Beique appeared before the Public Utilities Commission this week and asked the Commissioners to further delay hearing the matter pending injunction proceedings.

Senator Beique represented himself as a shareholder of the Montreal Street Railway, possessing 1,000 shares of stock, and as being absolutely opposed to the amalgamation. He based his objections on the books of the company. He stated that a writ of injunction was to be immediately issued in the Superior Court, requesting that the companies concerned be restrained from entering into the amalgamation.

Mr. Geoffrion, K.C., also asked the Commission to stay further consideration in view of pending proceedings.

Mr. Atwater, K.C., as city attorney, also asked for a further postponement. He said the Board of Control considered that the proposed amalgamation seriously affected the citizens of Montreal. If the amalgamation took place, they would not even possess the same control as they did over the Montreal Street Railway. They were putting forward a recommendation to this effect to the City Council for their consideration at their next meeting on Monday and he consequently asked the Commission to grant at least another week's delay. During the course of his remarks, Mr. Atwater referred to "the enormous amount of water in the stock," and the proposed issue of debentures.

After further discussion, Colonel Hibbard, K.C., the chairman, declared the meeting further adjourned till Tuesday, October 24.

WOOD-USING INDUSTRIES.

The Forestry Branch of the Department of the Interior is conducting an exhaustive statistical study of the industries in Ontario which in any way use wood in the manufacture of their products. This report will cover practically every manufacturer in Ontario, for besides those using wood directly, as in the manufacture of vehicles, cars, boats, automobiles, furniture and interior finish, it is also expected that reports will be secured from every industry consuming wood for boxes and shipping crates. Information forms will shortly be sent out, and the data obtained will be published in bulletin form, including a classified list of co-operating firms, a technical discussion of the various woods used, as well as statistics on the consumption and cost of each species. All individual information will be held strictly confidential by the department. Such a work will be of benefit to every producer and consumer of wood in the province. To the mill-owner it will show the purpose for which certain species are used, the quality of wood required and the prices paid. The manufacturer can ascertain what is the relative importance of his class of industry and the total consumption and value of wood used in manufacture. Every manufacturer reporting will receive a copy of the bulletin when published. All those receiving schedules are asked to co-operate by reporting fully and promptly.

◆

The numerous friends throughout Canada of Mr. A. St. L. Trigge, secretary of the Canadian Bank of Commerce, will be sorry to learn that he is indisposed and confined to his house.

The Ottawa Assurance Company has received a license to transact fire insurance in Canada. The head office is at Toronto, and Messrs. Burnett, Ormsby and Clapp, Limited, have been appointed chief agents.

The Western Canada Power Company, largely financed in Montreal, developing a power on the Stave River, British Columbia, will be ready by December first to deliver power into Vancouver and New Westminster.

BRITISH COLUMBIA.

Electric Railway Company's Franchise is Under Consideration—Vancouver Would Like Municipal Control of Railway.

(Staff Correspondence.)

Vancouver, October 14th.

The franchise of the British Columbia Electric Railway Company in this city is occupying considerable attention. It expires in 1918, and according to agreement with the city, the municipality will have an option to purchase. With new lines in the surrounding districts, into which the overflow population of Vancouver has gone, the company has sought to obtain a consolidation of its franchises. This matter has been discussed with the civic authorities on several occasions but no definite decision has been arrived at. In the early days of the city, one of the pioneer mayors favored municipal control of the street railway and other public utilities, but apart from the water system nothing was acquired. Since British capital took hold of the system of railways in Vancouver and between Vancouver and New Westminster, including therein the lines in New Westminster and Victoria, steady progress has been made. The street railway has made much money, and with prospect of continued and larger traffic has extended the line in all directions. Now that the system is paying well, there is much talk about municipal control. At the recent council meeting the aldermen favored buying the railway in 1918, but the proposal to start getting the money by issuing $500,000 worth of debentures next year, to be followed by the same amount in succeeding years, was not approved.

Suggest Franchise Should be Allowed to Lapse.

A special committee of the board of trade, which has had the matter under consideration for some time, reported against the extension of the franchise after 1918, and also that the lines in this city and surrounding municipalities should be consolidated under municipal control. The suggestion was made by a member of the board that the franchise should be allowed to lapse as he believed that with modern progress different facilities of transportation than those existing would be used in a few years.

The city will face a big proposition when it undertakes to acquire the British Columbia Electric system. If South Vancouver, Point Grey and Burnaby are not annexed before that time, coincident action will have to be taken by each corporation in the matter of securing control. If all this were arranged satisfactorily, there is also the proposition of separating the lighting system, the source of power being the same. And with all preliminary arrangements complete, there will be the matter of cost. Rapid development on the lower mainland has resulted in vast expenditure, and the outlook is that for several years, Vancouver at least, will run to its limit of borrowing to secure money for current needs. The money investment of the British Columbia Electric Railway Company for all purposes is between $20,000,000 and $25,000,000 cash, and what the franchises are worth, especially with their safeguarding clauses, might astonish a few people if the actual figures were known. Still, the suggestion of municipal control is strongly supported throughout the city.

In the meantime, the company is going steadily ahead. This week announcement was made of the appointment as manager of transportation and the sales department of Mr. James A. Roosevelt, cousin of ex-president Roosevelt. He will have direction of the operation of all the company's lines in Vancouver, the lower mainland and Victoria. Another appointee is Mr. S. B. Thompson, who will be mechanical superintendent, with supervision over the rolling stock and electrical equipment.

Financiers at the Coast Studying Conditions.

That the Canadian West as a field for investment is regarded as good is indicated again this week by the presence of several bankers on the coast. They state they have come west to get in touch with development and observe conditions. The largest party was of the Eastern Townships Bank. It comprises Messrs. William Farwell, president; F. N. McRae, M.P.; J. S. Mitchell, B. C. Howard, Sherbrooke; J. J. Foster, Montreal; G. Stevens, Waterloo; C. H. Cahan, Rock Island; James Mackinnon, general manager, Sherbrooke, and W. L. Ball, manager of the Winnipeg branch. They were met here by Mr. A. C. Flumerfelt, a director, and Mr. W. H. Hargraves, manager of the branch in Vancouver.

Other visitors were Mr. D. Murphy, a director of the Bank of Ottawa, and Mr. D. M. Finnie, assistant general manager. Further indications of bank activity are the purchase of twenty-five feet on Hastings Street, by the Molsons Bank for $100,000 net, creating a new standard for property on Hastings Street East; and the awarding of the contract for the erection of a six-story office building for the Union Bank in Victoria, to cost $200,000.

Bankers representing French capital here this week were Mr. Andre Lazard, of Paris, and Mr. R. M. Kindersley, his London partner, and manager of the London branch. Under the escort of Colonel Davidson, of Toronto, they visited the Mackenzie and Mann coal properties on Vancouver Island, and the timber limits at Comox, and returning to the mainland looked over the mill of the Canadian Western Lumber Company at New Westminster. The banking firm in which Mr. Lazard is interested has floated several bond issues of the Canadian Northern, and is largely interested in the industrial enterprises of Mackenzie & Mann in this province. The opinion expressed was that unless something unforeseen happens British and French capital will continue to come to Canada, for the West is wonderfully rich in wealth-producing factors.

Other investigators of investment possibilities were Mr. A. I. E. Smith, of the London brokerage house of Messrs. F. W. Bentley & Company, and Mr. John H. Noble, C.E., of the British Counties Exchange, Limited, of Liverpool.

Mr. Thomas Skinner, deputy-governor of the Hudson's Bay Company, and Mr. Leonard Conliffe, a director, who visited the coast this week, reannounced the new aggressive policy of the company throughout the West. Mr. Skinner, who is the British executive agent of the Canadian Pacific Railway, is more enthusiastic than ever over the commercial outlook of Canada.

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore for the month of September, 1911:—

Mine.	Tons.
Beaver	30.3
Buffalo	53.5
Cobalt Lake	214.4
Cobalt Provincial	25.1
Cobalt Townsite	133.
Coniagas	112.3
Crown Reserve	78.6
Drummond	180.
Hudson Bay	63.
Kerr Lake	91.2
La Rose	398.5
McKinley-Darragh	337.6
Nipissing	174.5
O'Brien	35.2
Right of Way	89.
Temiskaming	51.2
Tretheway	82.7
Total	2,149.9

The total shipments for August were 2,766 tons.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station for the week ended October 6th:—La Rose, 209,720; Cobalt Lake, 190,990; McKinley-Darragh, 119,650; Coniagas, 139,820; Nipissing, 63,000; Crown Reserve, 48,300; Buffalo, 58,770; Colonial, 48,000; Tretheway, 64,800; Kerr Lake, 64,100; Drummond, 60,000; Temiskaming, 64,020; total, 1,131,170 pounds or 565 tons.

The following are the shipments for the week ended October 13th: McKinley-Darragh, 252,340; Cobalt Lake, 205,810; Hudson Bay, 65,000; Buffalo Mines, 65,500; Right-of-Way, 62,700; O'Brien, 74,620; La Rose, 64,790; Nipissing, 64,630; Drummond, 50,000; total, 915,390 pounds, or 457 tons.

The total shipments since January 1st are now 40,608,138 pounds, or 20,304 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

Regina's rate of taxation for 1911 is 18.05 mills, an increase of one-twentieth of a mill over last year's rate.

MANITOBA PRESSED BRICK COMPANY.

Stock Offering is Made, but Information Requested by The Monetary Times Has Not Been Given by the Company Yet.

The Manitoba White Granite Pressed Brick Company, Limited, with head office at Winnipeg, is making an offering of stock. A number of matters should be explained by the promoters of this company before the stock can be recommended. A letter addressed to the company by The Monetary Times brought a very brief reply with little information. The Monetary Times on September 29th addressed a further communication to the company, to which no reply has been received. The following are extracts from that letter:—

"We are in receipt of your letter of the 23rd inst., regarding the proposed page advertisement of the sale of stock of your company, for insertion in The Monetary Times and our action in refusing to accept the same without further inquiry. The information given in your communication does not afford us the details we desire to have in order to judge of the merits of your stock offering and the business prospects of your company.

Is Plant Still in Operation?

"We note you state that the Vancouver plant has been in operation since March. We should be glad if you would give us the name of the company operating this plant, a note of its capitalization and of the amount paid-up, together with the following information:—Amount of bond issue if any, amount of stock held by directors or officers, names of directors and officers, dividend, if any, upon stock or probable dividend, capacity of plant, actual output of plant since inception, details of some contracts obtained by the Vancouver company, qualifications of the technical manager of the company, amount of organization expenses and to whom paid, amount paid, if any, for the Steger and Stefar patents, and to whom paid; names of all men with technical knowledge of brick making who are actively identified with the company; cost of erecting plant and the amount of indebtedness, if any, against same; amount of commission paid or to be paid to person or firm selling stock, and the reason for the proposed advance of stock.

What of the Other Companies?

"We should be obliged if you would give us similar information with respect to the Calgary company and the Winnipeg company, so far as the items apply in view of the different stages in which these three companies are to-day.

"As to the Steger or Stefar system, we cannot see that there is any great value to be attached to a particular system for making pressed bricks. Most makers have a special way of manufacturing this article, but we do not know of any manufacturer previously having patented a method for making pressed bricks. The value of the patent seems to us to be somewhat problematical. It is the actual quality of the bricks that counts, whatever be its system of manufacture.

Necessary to Know.

"It is necessary that we should be in possession of the fullest information before we could recommend this stock by the insertion of your advertisement in the columns of The Monetary Times."

It is necessary, in the opinion of The Monetary Times, to have this information before the bona fides and prospects of the company and the value of its stock can be properly considered. We await the reply of the company.

◆

Mr. C. E. Corbold has been appointed manager for Ontario of the Canada National Fire Insurance Company, with head office in Winnipeg. This company has sold practically all of its $2,000,000 of stock and has obtained a federal charter. Policies are now being written in Western Canada. Mr. W. E. Fudger, formerly representative in Toronto of the St. Paul Fire and Marine Insurance Company, is in charge of the Canada National's Western Organization. Mr. Corbold has had considerable financial and insurance experience. He was for sixteen years with the Lancashire of Manchester, England, in their Canadian branch, starting as junior and working up to chief clerk, having held every position including that of accountant, and was for many years associated with Mr. Gardner Thompson, who was manager and who is now resident general manager in Canada for the London and Liverpool and Globe. When the amalgamation with the Royal took place Mr. Corbold joined the staff of the Canadian Fire Underwriters' Association, taking up the first trials made of the present method of specific rating of risks, now in force. He has also acted for several years as secretary of the Imperial Trust Company, Toronto. The Canada National Fire Insurance Company, desires to secure agents for the Ontario field.

MR. E. E. BOREHAM GOES TO LONDON.

Mr. E. E. Boreham, manager of the Imperial Securities Company, Montreal, will leave that city shortly to act as the representative in London of the Dominion Bond Company. Mr. Boreham is well known throughout Canada, having previously acted as the Nova Scotia manager of the North American Life Insurance Company, and later holding a position with that company in Toronto. He is a past vice-president of the Dominion Life Underwriters' Association, and has invariably put energy and ability into his work. His many Canadian friends will be sorry to lose him, but will join in wishing him success in his new sphere.

MR. E. E. BOREHAM,

Who leaves Montreal shortly as the London representative of the Dominion Bond Company.

◆

OGILVIE FLOUR MILLS COMPANY.

The net profits of the Ogilvie Flour Mills Company, for the year ended August 31st, 1911, amounted to $481,309. The interest on bonds and dividends on preferred and common stock amounted to $445,000. The balance carried forward was $434,051. Total active assets are valued in the company's statement at $3,340,058. The company's real estate, waterpowers and mill plants in Montreal, Winnipeg and Fort William, elevators in Western Canada, and property in St. John and Ottawa, are valued at $4,283,489.

The management considered it advisable to carry over a large supply of last year's high-grade wheat in order to secure the maintenance of the high standard of the company's various brands, as owing to the exceptionally late harvest in the West there is much uncertainty as to the grading of the new crop. While it has been impossible up to the present time to arrive at any accurate estimate of the total yield it promises to be the largest on record, but unfortunately the percentage of high grade wheat will be limited.

The company own and operate 119 interior elevators in the West, all of which are located to good advantage. The enlargement of the oatmeal plant at Winnipeg has been completed and is in successful operation.

◆

WESTERN LOAN COMPANIES' BUSINESS.

According to carefully compiled statistics the regular loan companies operating in the three western provinces increased their investments in this field by $15,006,821 during the year 1910. The statements cover the operations of 75 companies, and show that at December 31, 1910, there was loaned on real estate mortgages $71,322,556, as against $56,315,735 at December 31, 1909, the increase for the year being equal to 26 per cent. The increase in Manitoba was $5,806,241, or 39.8 per cent.; in Saskatchewan $6,648,211, or 17.3 per cent., and in Alberta $2,552,369 or 42 per cent. Last year was exceptionally active from a loaning standpoint and while large sums have been loaned by all regular companies this year, the best authorities doubt if the increase will be as great as during 1910.

CANADIAN RAILWAY'S PROSPECTS.

Proprietor of Charing Cross Bank, Which Financed the Atlantic, Quebec and Western Railway, is Committed for Trial.

Mr. A. W. Carpenter, who was charged on remand, in London, England, with obtaining money and credit by false pretences from depositors in the Charing Cross Bank, of which he was the founder and proprietor, has been committed for trial.

In the recent hearing Mr. Muir was examining Mr. Edward Bruce Reed, a director of the Demerara Railway Company, as to his opinion of the prospects of the defendant's railway enterprise and lumber business in Canada, when Mr. Bodkin raised an objection to that class of evidence.

Deficit of Million Pounds.

The magistrate pointed out that the evidence for the prosecution was that the bank's advertisements stated that there was a large surplus at a time when there was a deficit of at least a million pounds. The value of the Atlantic, Quebec and Western Railway was not the question now before the court, and he would not admit evidence on that point.

Mr. Muir said the magistrate's ruling excluded evidence which, if accepted, would be an absolute defence to the charges brought against the defendant. Mr. Frank Leslie Ball, a solicitor, gave evidence that he acted as clerk to his father, who was the sole partner in the firm of Messrs. Coote and Ball, Cursitor Street. In 1907 the witness interviewed several directors of the Atlantic, Quebec and Western Railway, including Mr. E. B. Reed, Viscount Templeton, and Mr. Moffatt, and they agreed that when the line was completed it was likely to be a great commercial success. Carpenter wanted to call in an accountant to ascertain his real financial position. The witness consulted counsel on the subject, and he advised that the figures in the advertisement should remain as they were pending the hearing of a libel action. In May, 1910, Carpenter spoke about reducing the rate of interest to depositors.

Sir Charles Mathews's Intervention.

Mr. John Macmin, a member of the firm of Messrs. King, Adams and Company, solicitors, Cannon Street, who had acted for the defendant, said that on October 14, 1910, he was sent for by the Director of Public Prosecutions (Sir Charles Mathews), who informed him that he had materials before him on which he could apply at Bow Street for a warrant against Carpenter, but he was not anxious to take that course, as it would bring disaster to depositors. The witness said he knew that Carpenter considered his railway was a very valuable asset, and Sir Charles replied that he had good authority for saying that that asset was practically worthless. After discussion Sir Charles said that he should have to take the most drastic measures if Carpenter did not comply with his requirements, which were that all advertisements in the press were to cease from that day; no further deposits to be received; a circular to be sent out calling the creditors together; and an undertaking to be given not to touch the money standing to the credit of the bank—£90,000 at Parr's Bank and £10,000 at Coutt's Bank. The witness communicated the effect of this interview to Carpenter, who said he was an old man and did not wish to be arrested and he would place himself entirely in the hands of the Director of Public Prosecutions. Eventually, at the suggestion of Sir Charles, Carpenter filed his own petition in bankruptcy.

◆

NEW BRUNSWICK'S CABINET.

The new Government has been sworn in as follows:—

Hon. J. K. Flemming, Premier and Surveyor-General.
Hon. W. C. H. Grimmer, Attorney-General.
Hon. H. F. McLeod, Provincial Secretary.
Hon. John Morrisy, Public Works Commissioner.
Hon. Mr. Landry, Agricultural Commissioner.
Hon. Robert Maxwell and J. A. Murray, without portfolio.
Solicitor-Generalship not filled.

◆

The Canadian Pacific Railway has acquired a water-power on the Adams River, B.C., which flows into South Thompson River, near the west end of Shuhswah Lake. The title has been vested in the name of Mr. J. S. Dennis, land commissioner of the company.

THRESHING REPORTS.

Good Weather Continues—Yields May be Larger Than Reported—Business is Good.

Brandon, October 14th.

At this date about 30% of the crop has been threshed, but with the good weather that the country is now enjoying the hum of the threshing machine can be heard on every hand. In the Portage la Prairie district the weather has been very backward and only a small proportion of the crop has been threshed, and if bright dry weather had not come the situation was beginning to be serious. The town is now deserted and everybody is hard at it and merchants are feeling better.

Some reports of yields are much better than was expected; 30 bushels of wheat per acre is common on the Portage plains, and while wheat may grade a little lower than usual, the situation if the weather holds good for two or three weeks will be much brighter than was the general opinion ten days ago.

Brandon, in so far as threshing is concerned, is in about the same position as Portage, and now that threshing has started in earnest the general feeling is much better. Reports direct from the thresher go to show here that the yield is a great deal better than was expected after so much cold and wet weather.

No Feeling of Anxiety.

There is very little feeling of anxiety in and around Brandon, and if present conditions continue the crop will be threshed and marketed within the allotted time. Brandon merchants are hopeful and have had a good fall trade. Money, they say, is coming in very satisfactorily and in talking over conditions with a loan company manager, he was confident that payments in the Brandon district would be met as promptly as usual, possibly a little later than in past years.

Brandon as a city is making rapid strides, the ceremony of driving the first spike on a street railway system for the city was celebrated on Monday, October 9th, amid great enthusiasm, and it is expected that early in the new year street cars will be running in the wheat city.

Some fine buildings have been erected this season and taken altogether the city shows a marked advance during the year, and with the advent of street cars a new impetus will be given to property values in and around the city. The new Canadian Northern Railway hotel is rapidly nearing completion and will open to receive guests by 1st January, 1912.

Brandon Has Three Insurance Companies.

Brandon is the head office of two fire insurance companies, the Central Canada and the Canadian Phœnix, and a third is shortly to be organized. The Pioneers' Fire Insurance Company is being liquidated. A re-insurance agreement was effected on May 3rd last whereby the Ontario Fire took over all the Pioneers' business. Brandon is the head office of one trust company, the Canadian Guaranty, which has built up a large business. There is a goodly array of wholesale firms located in Brandon with some really fine warehouse buildings. That of Mr. A. E. McKenzie, seed merchant, is one of the finest in the Dominion being absolutely fireproof in every particular.—G.W.G.

◆

MAY ADMIT PULP AND PAPER FREE.

The question of admitting wood pulp and paper into the United States from all countries free of duty under the "most favored nation" clause of commercial treaties, as a result of the only operative section of the Canadian reciprocity agreement, has been officially raised in the Treasury Department at Washington.

The surveyor of customs at Atlanta, Ga., asked the department if Swedish wrapping paper was entitled to free entry in consideration of "most favored nation" treatment. As it was not clear from the telegram whether a shipment of such paper had been received, with the importer claiming equal privileges with the citizens of Canada, the surveyor was asked for additional information.

Under section 2 of the act of Congress embodying the Canadian reciprocity agreement, wood pulp, newsprint paper and "other paper" come into this country from Canada free in all cases, where there is no restriction upon the exportation of these articles. This was the only section of the act not conditional upon tariff legislation by Canada. It went into effect immediately upon the passage of the law.

RAILROAD AND COMPANY EARNINGS.

Canadian Pacific Railway Shows Good Profit—Many Companies Have Increases.

The following are the railroad earnings for the week ended September 30th:—

	1910.	1911.	Increase or decrease.
C.P.R.	$2,933,000	$3,061,000	+ $128,000
G.T.R.	1,237,013	1,330,952	+ 93,939
C.N.R.	453,300	506,000	+ 52,700
T. & N.O.	30,465	59,566	+ 29,100
Halifax Electric ..	6,775	6,174	— 601

The following are the railroad earnings for September:—

	1910.	1911.	Increase or decrease.
C.P.R.	$9,115,000	$9,834,000	+ $719,000
G.T.R.	4,107,963	4,409,559	+ 301,596
C.N.R.	1,279,900	1,576,400	+ 296,500
T. & N.O.	110,132	185,623	+ 75,691
Halifax Electric ..	21,140	24,863	+ 3,723

According to its annual report the Temiskaming & Hudson's Bay Mining Company during the year produced 804,624.80 ounces of silver at a total cost of $120,054.86, leaving a profit of $288,972.74, or about 70 per cent. The cost of producing silver was 14.9 cents an ounce. A concentrator was erected on the property which has been working since April. The company has a balance of $111,188. Its revenue was $230,000.

The Grand Trunk August statement shows gross receipts of Trunk proper increased £98,750; working expenses increased £78,900; Canada Atlantic net profit increased £1,850; Trunk Western net profit increased £50; Grand Haven net profit increased £5,550. The total net profit for the whole system increased £27,300.

Canadian Pacific Shows Good Profit.

The Laurentide Paper Company's profits for the year ended June 30th, 1911, after interest and other charges, were $713,539.89. This is equal to nearly twenty per cent. on the capital outstanding at the close of the year. After dividends and $20,000 to depreciation reserve, there was a balance of $362,171.14 to be carried forward from the operations of the year. With the amount brought forward from 1910 the surplus now is $981,917.

Canadian Pacific Railway gross earnings for August were $10,421,904. working expenses, $346,333; net profits, $4,075,571. In August, 1910, net profits were $3,691,672, and for two months ended August 31st, 1911, figures are as follows:—

Gross earnings, $20,083,723; working expenses, $12,305,123; net profits, $7,778,600.

For two months ended August 31st, 1910, there was a net profit of $7,176,292. The increase in net profits over the same period last year is therefore for August, $383,899, and for two months ended August 31st, there was an increase of $602,307.

The Quebec Railway, Light and Power Company gross earnings for the year are $1,380,126, operating expenses, $661,907, leaving a net balance of $718,219. Fixed charges amounted to $445,219, with surplus at $273,000. Following are the figures for 1911, with comparisons:—

	1910.	1911.	Increase.
Gross earnings	$1,127,952	$1,380,126	$252,174
Operating expenses ..	644,563	661,907	17,343
Net fixed charges ..	442,644	445,219	2,575
Surplus	40,744	273,000	232,256

Toronto Street Railway Earnings.

Gross earnings of the Toronto Railway for August amount to $421,253, an increase of $41,000 over last year. The increase in net for the eight months to August 31st is $167,612, about 12 per cent.

The figures for August are:—

	1910.	1911.	Increase.
Gross	$380,934	$421,953	$41,019
Operation	195,883	210,962	15,079
Net	$185,051	$210,991	$25,940

And for the eight months:—

Gross	$2,767,358	$3,052,968	$285,610
Operation	1,533,380	1,551,378	117,998
Net	$1,333,978	$1,501,590	$167,612

The Canada North-West Land Company, Limited, farm land sales were as follows:—

For September, 1911	4,163.11	acres for	$58,799.20
" 1910	4,475.62	"	54,327.44
Dec.	312.51	Inc.	$4,471.76
From Jan. 1 to Sept. 30, 1911	35,193.28	acres for	$485,714.60
From Jan. 1 to Sept. 30, 1910	46,389.95	"	555,492.97
Dec.	11,196.67	Dec.	$69,778.37

Sherbrooke Street Railway.

For May, June, July and August, gross earnings of the Sherbrooke Sreet Railway were $18,054, an increase of $4,530, or 33.5 per cent., over last year. Including the Power Company, the figures for the four months are:—

Gross earnings	$22,364.73
Operating expenses	12,792.24
Net earnings	$9,572.49

In the statement no account is taken of the electric light earnings of the Eastern Township Electric Company, the Stanstead Electric Company, and the Lennoxville Light & Power Company, recently acquired by the Sherbrooke concern.

The British Columbia Lumber Corporation has issued a statement of its operations for September, and the year to date:—

	Sept., 1911. Feet.	Year to date, Feet.
Lumber—		
Manufactured	5,858,393	33,613,009
Sold	4,660,265	31,654,041
Shingles—		
Manufactured	4,133,000	21,737,000
Sold	3,818,000	29,354,000
Lath—		
Manufactured	1,487,000	10,453,000
Sold	1,340,000	9,796,000

N.B.—The average price obtained at the mills during September was $18.98 per 1,000 feet.

The president of the company is Senator Mackay, the vice-president, Mr. G. F. Johnston, and the other directors, Messrs. G. S. Mayes, F. L. Buckley, C. Jackson Booth, Barclay Bouthorne, H. J. Allison, and H. E. Hopper.

◆

THINGS HUMMING AT MOOSE JAW.

By the organization of the Saskatchewan Bridge and Iron Company, Limited, Moose Jaw will have located a concern capitalized at $250,000 covering fifty-four city lots and being the largest of its kind in the three Western provinces. The organization of this company was brought about by the growth of the Moose Jaw Machine Company, Limited, whose business since their organization five years ago has grown to an extent which makes it imperative to work along broader lines. The new company will manufacture principally bridge and structural iron work, augmented by large machine, boiler and repair shops. The class of machinery which will be installed is clearly indicated by the fact that one of the friction saws will be capable of melting its way through an 18-inch I-beam in 38 seconds. It is estimated that the new plant will employ in the neighborhood of 400 men.

The opening of coal mines forty miles south of Moose Jaw will greatly lessen the cost of steam power. The new mines are being watched with great interest by the citizens, who have no fears of a coal shortage during the coming winter. The quality of coal is equal to or better than the best quality of Touris coal, and has proved to be a first-class steam coal. The mines will be served by a branch of the Canadian Pacific Railway, which will be laid to the mouth of the pit, a double track having already been laid at the mines. The equipment now includes coal sheds, bunk houses, scales, machine shops and power plant.

◆

An offer of $2,000,000 has been made for the property of the St. James' Methodist Church, St. Catherine Street, Montreal, and it is surmised that the purchase is for the purpose of providing a site for the new station which must be built in a central portion of the city, for the Canadian Northern Railway.

MINING IN ONTARIO LAST YEAR

Gave a Production Valued at Thirty-nine Million Dollars—Details of the Mineral Wealth.

Returns to the Ontario Bureau of Mines show that the products of the mines and mineral works of the Province for the twelve months ended 31st December, 1910, had a value of $39,313,895. For 1909 the value was $32,981,375, the increase for the year being thus $6,332,520, or over 19 per cent. As compared with 1908, the increase was $13,676,278, or 53 per cent.

During the last few years, the advance in production has been very marked, as the following figures make plain:—

Year.	Value of Production.
1905	$17,854,296
1906	22,388,383
1907	25,019,373
1908	25,637,617
1909	32,981,375
1910	39,313,895

The only year during this period which did not show a substantial gain over its predecessor was 1908, when there was a slackening in the rate of progress, due to a lessened output of nickel, pig-iron, Portland cement and petroleum. The total increase during the term was 122 per cent.

Non-Metallic List.

Previous to 1905, the non-metallic list provided the larger share of the production, but owing to the very decided developments in silver and nickel, the metals have come to be responsible for nearly three-fourths of the entire value, the proportions in 1910 being, metals 72 per cent., non-metals 28 per cent. Metals rose from $10,201,010 in 1905 to $28,161,678 in 1910, and non-metals from $7,653,286 to $11,152,217.

For 1910 all the metallic products, save cobalt, iron ore and zinc ore, show an increased output as compared with 1909, the principal advances being in silver, $3,016,600; nickel, $1,215,163; copper, $247,088; pig-iron, $673,890. In non-metals, brick (common) shows an excess of $458,140, stone of $301,396, Portland cement of $246,995, and natural gas, $303,060. Drain tile fell off $45,106, pressed brick, $31,975, and petroleum, $191,325. The items contributing most largely to the output for the year were, silver, 39 per cent.; pig-iron, 17 per cent.; nickel, 10 per cent.; Portland cement, 8 per cent.; brick, 7 per cent.; natural gas, 4 per cent.; copper, 3 per cent. The remainder, say 12 per cent., was provided by 24 other products, largely non-metallic.

Development of the Mining Industry.

The statistician is rarely justified in venturing on the realm of prophecy, but the upward tendency of the curve described by the growth of mining in Ontario points strongly to still greater things in the future. It can hardly be doubted that the extension of prospecting into Northern Ontario, now being rendered possible through railway construction, will bring to light new mineral fields probably as rich as any that have yet been found. The discovery of one such field leads almost as by a law of nature to the discovery of others. Silver Islet led to Rabbit Mountain and Beaver; Copper Cliff and Stobie to Creighton and Crean Hill and Garson; the Helen mine to the Josephine and Magpie; Sultana to Mikado; Cobalt to South Lorrain and Gowganda, and latest of all to Porcupine. Nor do the pre-Cambrian formations possess a monopoly of mineral wealth; the Devonian and Silurian strata of southwestern Ontario have for years yielded goodly supplies of petroleum, natural gas, salt and gypsum. Petroleum may be declining in production, but that there are reservoirs, great or small, yet untouched, seems to be shown by the striking of oil in paying quantities a short time ago in Onondaga Township, and the field for profitable production of natural gas appears to be steadily widening until it promises to cover a large part, if not the whole, of the northern and eastern shores of Lake Erie. These stratified rocks have their counterparts on the slope leading down to James Bay. Already gypsum in large deposits has been located there, and it would seem not unreasonable to entertain the hope that the future inhabitants of the clay belt north of the height of land may find it possible to light their homes with oil, cook their food with natural gas, and cure their pork with salt, all derived from the rocks underlying the farms from which they harvest their crops.

Mineral Production Last Year.

The following table contains a summary of the mineral production for 1910:—

Product.	Quantity.	Value. $
Metallic:—		
Gold ....ounces	3,619	68,498
Silver .... "	30,651,417	15,481,322
Cobalt ....tons	1,098	54,699
Nickel .... "	19,140	4,005,961
Copper .... "	9,630	1,374,103
Iron ore .... "	230,656	513,721
Pig-iron .... "	447,351	6,975,418
Zinc ore .... "	576	5,760
	....	28,479,482
Less Ontario iron ore (143,284 tons) smelted into pig-iron	....	317,804
Net metallic production.	....	28,161,678
Non-metallic:—		
Actinolite	32	320
Arsenic, refined ....tons	1,524	70,709
" crude .... "	3,373	....
Brick, common ....No.	304,988,000	2,374,287
Tile, drain .... "	21,028,000	318,456
Brick, pressed .... "	44,204,295	458,596
" paving .... "	3,799,005	70,648
Building and crushed stone..	....	761,126
Calcium carbide ....tons	3,072	184,323
Cement, Portland ......bbl.	2,471,837	3,144,343

Lime ....bush.	2,889,235	474,531
Mica ....tons	513	85,294
Natural gas	....	1,491,239
Peat ....tons	851	1,284
Petroleum ....Imp. gal.	11,004,357	368,153
Pottery	....	51,485
Quartz ....tons	90,685	87,424
Salt .... "	84,071	414,978
Sewer pipe	....	357,087
Talc ....tons.	5,824	46,592
	....	11,152,217
Add metallic production.	....	28,161,678
Total production	....	39,313,895

There were 16,688 employees engaged in mining or making the several products last year, and the sum paid them as wages was $10,532,257.

◆

AN EARLY BEGINNING.

The work of preparation for the annual statistical review and outlook issue of The Monetary Times is in hand. This yearly number has become the recognized publication for the business man of Canada and others interested in Canada, who desire to know what has happened during the past year and what are the prospects for the coming year. The usual statistical tables will be printed together with many new and equally valuable tabulations. Special articles will be contributed on banking, life, fire and general insurance matters, stock exchange movements, Western loans and mortgages, the wheat markets, the Porcupine gold camp, the investment of foreign money in Canada, railway construction, the prices of commodities, municipal and corporation bonds and numerous other subjects. Experts will deal with each topic. In addition, there are to be also many interesting articles by staff writers and correspondents of The Monetary Times. An unusually complete analysis of the industrial amalgamation movement will be another leading feature.

This issue will be the biggest, and we hope, the best, published from The Monetary Times office during the past forty-five years. It is a striking testimony to the position won by our annual statistical outlook and review number that nearly half of the advertising space has already been sold, including many of the best positions, although there are some of these still left for early comers

◆

The Canadian Bank of Commerce has opened a branch at Mount Royal, a suburb of Calgary, Alta.

The Bank of Toronto has opened a branch at Ottawa, Ontario.

CANADA'S POPULATION

Is Over Seven Millions, an Increase of Two Millions in the Past Decade.

The population of Canada is about 7,100,000, an increase of nearly two millions in ten years. These are the official census figures handed out on Tuesday by the Honorable Martin Burrell, Minister of Agriculture. The figures will be slightly increased when the full returns have been received.

The following are the population figures by provinces:

	1901.	1911.
Alberta	73,022	372,919
British Columbia (not complete)	178,657	362,768
Manitoba	255,211	454,681
New Brunswick	331,120	351,815
Nova Scotia (not complete)	459,574	461,847
Ontario	2,182,947	2,519,902
Prince Edward Island	103,259	*93,722
Quebec (not complete)	1,648,898	2,000,697
Saskatchewan (not complete)	91,279	453,508
Northwest Territories	20,129	10,000
Yukon	27,219	....
Grand totals (not complete)	5,371,315	7,081,869

*Decrease

Unit of Parliamentary Representation.

The new unit of representation in the Commons will be on the basis of the population of Quebec, 30,780. On this basis Nova Scotia will lose two members, New Brunswick two, Prince Edward Island one, and Ontario four.

Manitoba will gain five members, Saskatchewan five, Alberta five and British Columbia five. The east will therefore lose nine members and the west will gain twenty members.

The total membership of the new House will be 232 members as compared with 221 at present.

Cities and Towns.

The following are the figures of several large cities and towns for 1901 and 1911 compared:

City or Town.	1901.	1911.	Increase.
Montreal	267,730	466,197	198,467
Toronto	208,040	376,240	168,200
Winnipeg	42,340	135,440	93,090
Vancouver	27,010	100,333	73,323
Ottawa	59,928	86,340	26,412
Hamilton	52,634	81,879	29,245
London	37,976	46,177	8,201
Calgary	4,097	43,736	39,639
Halifax	40,832	46,081	5,249
St. John	40,711	42,363	1,652
Victoria	20,816	31,620	10,804
Regina	2,249	30,210	27,961
Saskatoon	113	12,002	11,889

As will be seen there is a remarkable increase in certain towns.

Natural gas and petroleum have been struck by drillers in Deleware Township, Ont.

Messrs. Abraham Nassar and William Nassar are suing the Equity Fire Insurance Company, of Canada, to recover $3,000 for loss under a policy on billiard and pool tables, typewriter, cash register, pictures, mirrors, etc., at 77 Queen Street west, Toronto.

At a meeting of the directors of the British Columbia Permanent Loan Company Mr. R. J. Robertson was elected to the directorate to fill the vacancy occasioned by the death of the late Mr. R. H. Duke. Mr. Robertson first became connected with the British Columbia Permanent in 1898, and in the following year was appointed manager in Victoria. From there he was moved to St. John, N.B.. In 1907 Mr. Robertson was appointed supervisor of all the agencies. His experience in loan company matters, his knowledge of towns and all localities where the company conducts its operations, and his acquaintanceship with the shareholders will stand Mr. Robertson in good stead, and should enable him to give valuable advice as a director. On several occasions Mr. Robertson has inspected the securities of the British Columbia Permanent. Mr. Robertson accompanied the president, Mr. T. T. Langlois, on his recent trip to the Old Country, and while there was instrumental in establishing a connection for the sale of sterling debentures.

FRIENDLY COMPETITION FOR CANADA'S IMPORTS.

Desire is to Maintain and, if Possible, Enlarge Volume of British Trade with Canada.

It is seldom that a public utterance is made by Mr. R. Grigg, His Majesty's Trade Commissioner in Canada. This is due, we presume, to the diplomatic etiquette of Great Britain which might well be modified in order that the thoughts and words of the Motherland could be learned and heard overseas through the medium of the high officials of the Imperial Government. A guest at the banquet last week of the Canadian Manufacturers' Association, Mr. Grigg said that probably he alone represented there the element of external competition. "So long," he said, "as the production of Canada in regard to manufactured articles is not equal to the market afforded by the country, you must have imports of manufactured goods. The question which interests you and interests me is from what quarter are such manufactured goods to be obtained. I represent a desire to maintain, and if possible enlarge, the volume of British trade in friendly competition with all importers, and while it is unavoidable that such competition may sometimes seem to be directed against home production yet I can say that my desire, for whatever it is worth, is to encourage competition rather against imported goods than against the products of Canadian manufacture.

What is Told the Britisher.

"And this fact must be remembered, that in order to convey to the British manufacturer and merchant the size and character of the Canadian market, it is my pleasure as well as my duty to convey also to him an idea of the natural resources and industry of the Dominion which will indicate the magnitude, present and future, of the market, a part of which he desires to supply. I hope it will be felt that the British Trade Commissioner has not failed in his duty in reflecting the actual conditions and the probabilities of the future in this great country.

"It is sometimes said that the Britisher does not know as much as he might do about Canada. That is a common remark in every country of every other country, and if severe critics of the poor Britisher were asked geographical questions about Great Britain they would appear to very little better advantage than the Britisher does about Canada.

British Industry is Growing.

"Of late years it has become the fashion to speak of the decadence of British industry. Well, gentlemen, one of the ablest of your ex-Provincial Premiers once told me that 'to be wise a man must live upon biscuits and Blue Books.' Judging from the character of your hospitality to-night I cannot think that Canadians live to any great extent upon that diet, but if they did the figures which I venture to briefly lay before you would interest them.

"In the year 1902 the products of British industry exported to all countries amounted in round figures to $1,379,000,000; a steady progress has been maintained through the intervening years, until in 1910 the export of British industry reached the largest figures ever known—viz., $2,094,000,000, and the increase of the five years from 1905 to 1910 amounted to no less than thirty per cent.

Canada and Great Britain.

"These figures rival Canadian progress and make it very difficult to say that the Britisher has gone to sleep and has had his day. On the contrary, you believe, and I believe, that Great Britain with her sturdy sons around her will long continue to grow and prosper. And each and every member of that family will rejoice to see their own ever-widening successes welcomed, reflected and encouraged by the heart of the motherland."

Mr. Herman Affelat living at Centreville near Berlin, Ontario, has been arrested on a charge of arson.

The agents of the Metropolitan Life Insurance Company recently held a successful banquet in Winnipeg, Man.

The new stock issue of the Bank of Montreal, authorized by a special meeting of shareholders on September 5, and consisting of 16,000 shares of $100 each, was allotted to shareholders on record at the closing of the transfer books last week, pro rata in proportion to their respective holdings, one share of new stock for every nine shares then held, at a premium of $75 on each share, being at the rate of $175 per share.

INSURANCE COMPANIES WANT PRIVY COUNCIL'S DECISION.

As to Respective Rights of Dominion and Provinces in the Matter of Legislation—Address of President Wright of Toronto Insurance Institute.

The first meeting of the Toronto Insurance Institute was held this week, when Mr. Justice Riddell was the guest of honor. In the course of a stirring address, the theme being "Canada," Mr. Riddell expressed belief and hope that the next few years would see the inauguration of a real Imperial Parliament in Great Britain. He thought the Canadian system of Federal and Provincial Houses could hardly be improved upon as a model, and suggested that the Home Rule question could well be settled by the establishment of Provincial Legislatures in England, Scotland, Ireland, and even Wales; each to be subordinate, in company with the Parliaments of the dominions and colonies of the Empire, to the Imperial Parliament in London.

Railway Companies and Damage.

Mr. Alfred Wright, the president of the institute, presented a lengthy inaugural address dealing with many subjects of interest to insurance men throughout Canada. He called attention to an amendment of the Railway Act, which was passed in 1910, and has the effect of removing the right of subrogation to insurance companies of the interest of owners of property that may have been destroyed through the negligence of a railway company, and recommended its consideration by the insurance companies.

MR. ALFRED WRIGHT,

President of the Insurance Institute of Toronto, and the well-known manager for Canada of the London and Lancashire Fire Insurance Company.

In Canada, he said, the legal conditions affecting fire, and also accident insurance, are not very satisfactory, inasmuch as it has not been definitely decided whether the Dominion or the province has the right to legislate. As a matter of fact, both the Dominion and the provinces have passed acts.

"I believe," he continued, "that some steps have been taken towards obtaining a decision of the Privy Council as to the extent and meaning of the British North America Act, which is supposed to define which legislative subjects (if I may use the expression) are properly under the jurisdiction of the Dominion and which may be dealt with by the provinces, and, in order to obtain this decision, a number of questions are to be submitted for the determination of the Privy Council. These initial steps were taken over a year ago, but, so far as I can ascertain, the matter has not been pressed, either by the Dominion or provincial authorities. It would be very unfortunate if the case were not proceeded with, and insurance companies should use their influence with the Dominion and Provincial Governments towards that end.

"The business of insurance has become so important and so necessary to modern commercial conditions that it seems desirable, both from the point of view of companies and also of the insuring public, that there should be one set of laws and conditions for the whole Dominion, and, even if the Privy Council should decide that only the provinces have the right to legislate, it would be better that it should be known and the situation thus cleared up.

"There are other considerations involved and other classes of business than insurance affected. The Canadian Manufacturers' Association have considered this question of conflicting legislation, and it is hoped that the Dominion and provincial authorities will proceed to lay the case before the Privy Council."

Referring to insurance legislation passed by some of the provinces during the present year, Mr. Wright recalled that in April the New Brunswick legislature passed an act designed better to regulate the placing of fire insurance with unlicensed companies. In Ontario no amendments in the law have come into force, but a bill was introduced by Colonel Clark in February which proposed to make a number of radical changes in the law respecting fire insurance policies. It was proposed to adopt the principle of a standard policy, and to prohibit any variations except those expressly authorized by the Act.

Proposed Changes in Ontario Act.

A number of the proposed changes were opposed by the representatives of the various companies and the bill was referred to a special committee, which considered the matter at some length and made some recommendations in the form of a report. At the same time the committee of judges engaged in the regular ten-yearly revision of the Statutes had the Insurance Act under consideration, and it is understood that they have prepared a bill which differs both from the existing law and the act proposed by Colonel Clark. This bill is not yet available to the public, but is expected to be brought forward at the next session of the legislature.

The present Ontario Act, by Section 85(a) authorizes the Department to issue permits for the insurance of specific risks for one year with unlicensed insurers upon it being proved that insurance thereon cannot be obtained at ordinary rates by licensed companies. It is understood that at the next session of the legislature it will be proposed to substitute for this provision clauses authorizing the licensing of brokers to place surplus lines, and companies who have taken out license under the new law and pay taxes and submit to inspections will no doubt watch with interest the new proposed changes along this line.

Amendments of Manitoba Act.

In March, the Manitoba Insurance Act was amended by the insertion of provision requiring from the companies in making up their annual statement, a statement showing the unearned premium liability upon all policies if in a Manitoba company; and if an extra-provincial company, all the unearned premium upon all its policies upon property in the province. It is also made the duty of the officers of the company to furnish the department with full particulars of this liability. Sections have also been added requiring every company licensed in Manitoba to maintain assets in Manitoba at all times at least equal to the amount of its full unearned premium liability in Manitoba, together with the amount of its loss claims and all other liabilities in Manitoba. No dividend must be paid while the company's capital is impaired or which would impair its capital. If these sections are not complied with it is the duty of the inspector of insurance to report the fact to the minister, and the company is to be called upon to make up the deficiency or have its license cancelled. If the deficiency equals or exceeds 20 per cent. of the unearned premiums, or if the company has wrongfully paid a dividend, the company's licenses shall be cancelled by order-in-council.

It is to be noted that the above provisions do not apply to companies holding a Dominion license for which the province issues certificates of registration instead of licenses.

Changes in British Columbia's Legislation.

In February, British Columbia adopted a general insurance act constituting an insurance department, and requiring all companies doing business in the province, except the local mutuals, to take out a license. The deposit required is $20,000, with a proviso that the minister may accept a bond of a guarantee company. A company must maintain assets in the province sufficient to offset all its liabilities in the province, including the unearned premium reserve. It is not quite clear to me what is intended by this clause, but I am of the opinion that this provision does not apply to licensees of the Dominion government, who are keeping up deposits at Ottawa to cover their liability in the whole of Canada.

The provisions relating to the provincial superintendent of insurance are adopted from the Dominion Act, and confer upon him powers within the province similar to those exercised by the Dominion superintendent. He is also given authority to make investigations of fires, to order arrests for arson, to inspect buildings, to compel the attendance of witnesses, and to order the removal of accumulations of combustible material. The provisions as to insurance in unlicensed companies are similar to those in the Dominion Act, and the superintendent is given power to issue licenses under regulations to be made by the Lieutenant-Governor to representatives of unlicensed companies to inspect risks and adjust losses within the province. The act imposes a tax of 2 per cent. on premiums on risks in the province to be paid by the licensed companies or by the assured where the risk is placed with unlicensed insurers. The tax is substituted for the one formerly imposed under the Assessment Act, and no municipality hereafter may require a local license to be taken out by any insurance company. An annual statement is required from the companies licensed under the act, the form to be determined by the superintendent.

Questions Left at Large.

The principal provisions of the act, said Mr. Wright, are borrowed partly from the Dominion legislation and partly from the Insurance Act in force in Manitoba and Ontario. A number of questions seem to have been left at large, for example—the act is made to apply to Dominion licensees only, in so far as its provisions are within the jurisdiction of the province. The province, however, has been fortunate in securing as its first superintendent Mr. Guenther, who was formerly associated with one of the companies in Toronto and whose practical knowledge of fire insurance will no doubt be of great assistance to the government of the province in administering the act. None of the other provinces have legislated on the subject of insurance during the past year.

Policy conditions of the various provinces as compared with Ontario's, were next analysed and summarized by Mr. Wright who then spoke briefly of recent legislation in some of the provinces affecting employers' liability.

Left Out of Manitoba Act.

"It seems to me," said Mr. Wright, "that a considerable amount of work of a very hazardous nature, which is carried on for the purpose of gain, is excluded from the operations of the Manitoba Act simply because the work is being done on or about a farm; and it appears inconsistent that a contractor contracting to build houses in the city should be compelled to provide compensation for his workmen while on the other hand he may be engaged in equally dangerous operations upon a farm and where his workmen, in the event of serious injury, cannot recover compensation." "I merely point this out," continued Mr. Wright, "as one of the inconsistencies to be found in provincial legislation regarding compensation to injured workmen—all workmen should be placed on the same footing, and this can only be done by a Dominion Act. There are other features, of course, which may be regarded as more favorable from an insurance point of view. For instance, compensation is limited to dependants resident within the province at the time of the accident, temporary absence from the province excepted. This obviates the serious trouble which often arises in obtaining settlement of claims, particularly when the relatives of the deceased reside abroad, say, in Italy, Denmark, or Sweden, etc."

Workmen's Compensation in Saskatchewan.

With reference to the Saskatchewan Workmen's Compensation Act that there is no schedule of indemnities restricting payment in the event of incapacity to half wages or a maximum amount per week, and eliminating the first two weeks from the period for which indemnity is claimable—which has a tendency to stimulate a workman to return to his duties as soon as possible; but the Act provides full wages, medical, hospital and other expenses and any additional sums which the Court may award. This will no doubt enormously increase the claims for damages, both as to the number and the amount demanded. It will also lead to malingering which will doubtless be encouraged by unscrupulous doctors and lawyers, who will be benefited by prolonging and exaggerating claims, and which will be, thinks Mr. Wright, very costly to the insurance companies.

The meeting was most successful and bodes well for the coming session.

The following are the officers of the Canadian Manufacturers' Association for the coming year: President, N. Curry, Montreal; vice-president, R. S. Gourlay, Toronto; Ontario vice-president, R. McLaughlin, Oshawa; Quebec vice-president, C. B. Gordon, Montreal; Manitoba vice-president, M. E. Christie, Winnipeg; British Columbia vice-president, James Ramsay, Vancouver; Nova Scotia vice-president J. P. Edwards, Londonderry; New Brunswick and Prince Edward Island vice-president, John Palmer, Fredericton; Alberta and Saskatchewan vice-president, W. H. Clarke, Edmonton; treasurer, George Booth, Toronto.

PREVENTION AND RELIEF OF ACCIDENTS.

Permanent Programme Requires Definite Principles—Every Inquiry Should be Compensated.

"The Prevention and Relief of Accidents," was the subject of an interesting paper read by Mr. F. C. Schwedtman of the National Association of Manufacturers of the United States and chairman of the special commission of that body which has recently concluded exhaustive research on the subject before the members of the Canadian Manufacturers' Association at Toronto recently. Mr. Schwedtman's lecture was illustrated by lantern slides showing charts, tables and diagrams, and he furnished a comprehensive array of accident statistics compiled in several European countries.

Permanent Programme Requires Definite Principles.

Though the subject had engaged the attention of legislative bodies the world over for 30 years past, said the lecturer, the United States and Canada were, on the whole, far behind other civilized nations in questions concerning injured workers' compensation, employers' liability and accident prevention. Experts agreed that nearly one-half of all work accidents could be eliminated by systematic endeavor, and consequently their prevention was of prime importance.

It might take years of educational work to establish a permanent programme in all parts of the country and in all callings. A permanent programme required definite cardinal principles, and such cardinal principles had been adopted at the last annual meeting of the speaker's association. The first of these was "all legislation must be for compensation," with the explanation added, "every kind of employers' liability legislation has proved a failure in every civilized nation."

Used as a Political Football.

"Compensation legislation must cover every wage worker," was another principle, with the explanation, "The man who, without his own fault, loses his hand in a farm machine, is as much entitled to compensation as the man who loses his hand in an engine gear." It was of little use to construct laws not covering the farmer. Any law which covered the farmer would never be enforced in a radical manner, while one covering the manufacturer alone was liable to be used as a political football.

Another principle was, "Compensation should be assured; it must be as certain as government bonds, state, mutual, and stock insurance, as well as relief systems covering individual shops, should be encouraged, and none of them must be barred." The intent of this provision was to benefit alike employers and wage workers, and to distribute the cost of unpreventable accidents over all consumers. "Compensation must be efficient," was the next principle. "Not less than 75 cents out of every dollar paid into the insurance fund should go to injured workers or their dependents."

Every Injury Should be Compensated.

Careful investigators declared that only 25 to 40 cents in the dollar expended in Canada and the United States for liability insurance went to the injured workers. The inefficiency of present schemes and the dissatisfaction created by their administration arose largely in squabbles as to the extent of the responsibility of parties involved, hence the next principle, "Every injury except those due to intention, criminal carelessness, or drunkenness on the part of the workers, should be compensated."

Mr. Schwedtman declared himself firmly opposed to any system of voluntary prevention and compensation, which had signally failed of success in a number of attempts to introduce such a system in Europe. The trend of scientific thought everywhere now tended towards compulsory systems, and in this matter Canada had a distinct advantage by virtue of the absence of constitutional limitations in this country.

A GOOD COURSE FOR BOOK-KEEPERS.

The Chartered Accountants' Students Association of Toronto have arranged an excellent course consisting of 44 lectures on book-keeping principles and accounting problems. Cost, accounting, arithmetic, business investigation, statute, company and commercial law, auditing, municipal, law and accounting systems. The fee for the complete course is $15, and the lectures are to enable all book-keepers, who desire to improve their knowledge of book-keeping and accounting and so qualify for better positions. Mr. G. W. F. Hodgins, 43 King Street West, Toronto, is the secretary and will be pleased to furnish full particulars to all interested.

LONG SERVICE PENSIONS

Should be Adopted by Life Insurance Companies—The Three Parties Most Interested.

The subject of Long Service Pensions was discussed by Mr. J. W. V. Lawlor, branch manager of the New York Life Insurance Company, St. John, N.B., at the recent convention of Maritime Life Underwriters. The paper caused considerable interest and it was resolved to send a copy to the head office of each of the Canadian Life Insurance Companies. Mr. Lawlor said that section 57, clause 2, of the Canadian Insurance Act, 1910, provides that: "For the purpose of conducting affairs of the company in the most efficient manner in the interests of the policyholders and shareholders, the directors may make by-laws, providing for the creation of a staff pension fund, but such by-laws shall, before becoming effective, be submitted to and approved of at an annual meeting of the company, or at a special general meeting of the members thereof, notice of the intention to consider such by-laws having been in either case duly given." This makes it clear that in Canada it is perfectly legal to make provision for pensions for those engaged in this profession and the fact that such provision was made after the careful consideration given to "The Insurance Act, 1910," by both the House of Commons and the Senate clearly shows that our legislators of this country, after most painstaking investigation, were convinced that pensions should and would be provided by the life insurance companies in this Dominion.

Should be Adopted by Life Insurance Companies.

Long service pensions are becoming so general in the present day in the civil service, banks, colleges, great industrial plants, etc., in Great Britain and America, that if the idea is adopted by the life insurance companies of Canada, as provided for in this act, the effect cannot but be most salutary to every department of each company's organization, and would in no respect be detrimental to, but rather to the advantage of the policyholders and the shareholders.

A fieldman lately stated that his observations were that the members of our calling do not accumulate the sinking fund for old age and failing health about which we talk so glibly to prospective clients. As a matter of fact he could not recall an insurance man, local manager or agent, in the Maritime provinces, who, after 20 or more years of continuous work had acquired a competency, or indeed more than a living. Personally he had not, nor did he hope to do so. He also observed that he could recall numerous instances in support of the statement, that the nature of the occupation of the life insurance solicitor is such that persistence in it for a long period of years totally unfits him for other commercial pursuits in the afternoon of life.

To bring in concrete form to your notice the benefits of pensions in a maritime institution, of which we are all proud, let me mention the system adopted by the Bank of Nova Scotia. The bank sets aside yearly a variable sum, depending upon the profits of the year's business. The employees contribute 4 per cent. of their salary to the pension fund. Should they leave the bank their contributions are returned with 3 per cent. compound interest. A branch manager informs me that he has been in the service of the bank 23 years. His salary is $4,000. If he were retired to-day he would receive 23/50ths of his present salary, or, if in 35 years, 35/50ths of his salary as at the date of retirement. As the majority of fieldmen work on commission instead of salary, some different plan would probably be used.

A Staff Savings Fund.

Possibly several life companies have pensions or other funds to be used for benefits of old or incapacitated, faithful long service employees, but unfortunately it is not easy to get facts re same so to two only will reference be made.

The Metropolitan Life Insurance Company, have what they term a "Staff Savings Fund," made up from subscriptions by the company deposits of employees, and interest additions. It is managed by a board of trustees, seven in number.

The New York Life have for many years had what is known as "Nylic"; a fund established to give permanency and character to the work of the fieldman and for his benefit as well as to the ultimate benefit of the policy-holders.

The Dominion parliament would not by legislation approve of pensions, nor two great insurance companies, as above outlined, have pensions provided, unless certain that it was in the best interests of all concerned. Three classes are interested, the Companies, the insured, the fieldman. Let us see how they would be affected. The companies' main object is to get the business at least cost, and to see that it stays on the books. The insured wants absolute security at reasonable cost with all possible profits, and the fieldman wants all commissions he can earn as well as a large satisfied clientele. We will examine these different requirements. The more permanent and profitable a calling becomes, the more men will be attracted to it, and generally they will be the better men. The more that seek rate books the less should be the expense of the company. The more fieldmen that remain for years with their company, the less new help would have to be sought, hence the saving. If a company keeps adding a few good permanent men to lists of agents every year, it stands to reason that in a few years the company would find a material saving in cost of procuring solicitors. The fact that a fieldman remains with one company for years, becomes an advertisement and a credit to both.

Permanent Field Force Would Decrease Lapses.

No argument need be advanced in support of the statement that a permanent field force would materially prevent lapses. Where agents remain but a short time with a company, they are apt to have friends drop their policies, and go with them to their new company, and even where the policyholder may not change, a "Hard company story" by the ex-agent has a tendency to dissatisfy policyholders and increase lapses. A word from an agent, who for years has represented same company, goes a long way towards inducing insured to keep his policy at a critical time, like during the investigations of 1905-1906, whereas the ever changing agent would not carry influence.

The insured, seeing the agent who insured him remain with same company, feels more confidence in it, and feeling so, naturally becomes more of a booster for that company and agent than would otherwise be the case, he hears fewer detrimental statements, and feels more secure and as company would be saving he certainly would share in its greater prosperity.

The Three Parties most Interested.

The three parties most interested will all be gainers by a closer alliance or bond between company and agent, and there is nothing more effective than a pension to not only bring the best men to the business but to keep a large number for their full working years.

We must hope that the time is not far distant when all life insurance companies will adopt this system, and the agents would heartily unite in contributing to the funds if required, for, one of the beneficial results would be the tremendous uplift and outlook it will give to the toilers in office and field, who have long been faithful in the company's service, and who, until now, have had no other expectations when old age and infirmity overtake them but dismissal to make room for younger and more energetic men.

◆

HUDSON'S BAY COMPANY'S POLICY.

The Hudson's Bay Company will adopt more modern methods to cope with the needs and growth of Western Canada. This is the statement of Mr. Thomas Skinner, deputy governor of the company, who has completed a trip through the West. "The policy of ultra-conservatism heretofore observed by our company" he says, "will be relaxed to a certain extent, for we expect to play a more energetic part in the development of the West. Wherever there arises a necessity for new buildings and stores they will be erected and we intend to push our trade with a great deal of energy and zeal.

"Canada is the country of the present and immediate future, and Europe's eyes are centred upon it. It is the land of golden promise, and a veritable earthly paradise. The Hudson Bay Company realizes all this, and will henceforth be a most important factor in the development of Great Britain's fairest dominion. We hold a large acreage in Edmonton and on the Saskatchewan River, and we do not alone intend to develop this, but to give over part of it to the city of Edmonton for park purposes. We are ready to enter the field energetically, and when we do so we are not satisfied with half-way measures."

The sales of farm lands by the Hudson's Bay Company for the quarter ended September 30, amounted approximately to 14,600 acres for £54,800, as compared with 15,800 acres for £48,000; and the sales of town lots to £37,700, as compared with £3,200 for the corresponding period of 1910. The receipts are £68,700, as against £49,800 in 1910. The sales for the six months ended September 30, are 24,100 acres for £88,900, and town lots were sold for £70,700, as compared with sales of farm lands, 72,200 acres for £218,400 and town lots for £21,400 for the corresponding period of 1910. The total receipts for the six months ended September 30, amount to £178,000, as compared with £136,500 for the corresponding half of 1910.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Montreal, Que.—October 12th.—Hotel Dieu slightly damaged. Loss and origin unknown.

Simcoe, Ont.—October 9th.—Livery stable of Mr. Lewis Green destroyed. Loss and origin unknown.

Brighton, Ont.—October 10th.—Residence of Mr. J. W. Gordon damaged. Loss and origin unknown.

Arden, Man.—October 6th.—Livery stable of Mr. Nelson Harper destroyed. Loss and origin unknown.

Port Arthur, Ont.—October 10th.—Tug Gordon Gauthier destroyed. Loss about $2,000. Origin unknown.

London, Ont.—October 17th.—Apartments at 556 Dundas Street damaged. Loss about $400. Origin unknown.

Belleville, Ont.—October 15th.—Ontario Printing Office badly damaged. Loss about $3,000. Origin unknown.

Woodstock, Ont.—October 10th.—Barns of North American hotel destroyed. Loss about $2,500. Origin unknown.

Dauphin, Man.—October 11th.—Planing mill of Mr. T. A. Burrows, Birch River, destroyed. Loss and origin unknown.

Kingston, Ont.—October 17th.—Stables of Canadian Horse Artillery, Place d'Armes, damaged. Loss and origin unknown.

Borden, Sask.—October 14th.—Barn owned by Mr. Charles Orchard, and 16 horses destroyed. Loss and origin unknown.

St. John, N.B.—October 10th.—House of Mr. Fred. Kinsman, 27 St. Patrick Street, badly damaged. Loss about $200. Origin unknown.

Caron, Sask.—October 10th.—Residence of Dr. Gray destroyed, Miss Gray burned to death. Loss unknown. Origin, gasoline explosion.

Guelph, Ont.—October 10th.—Residence of Mr. H. H. O. Stull, 2 Huskisson Street, badly damaged. Loss unknown. Origin, lamp explosion.

Blenheim, Ont.—October 18th.—Lumber mill of Mr. Neil Watson, Mull, destroyed. Loss about $6,000, insurance $1,500. Origin unknown.

Toronto, Ont.—October 15th.—Home of Mr. Wm. T. Thorpe, 131 Argyle Street, badly damaged. Loss about $350. Origin, upset oil lamp.

Medicine Hat, Alta.—October 4th.—Barn of Mr. R. B. Taylor, Main Street North, destroyed, also three horses and one cow. Loss and origin unknown.

Clandeboye, Ont.—October 10th.—Garage of Mr. Weatherspoon badly damaged, and two automobiles destroyed. Loss about $4,000. Origin, gasoline explosion.

Corrie, Ont.—October 5th.—Barns of Mr. Walter Renwick, 17th Concession Howick, destroyed, also two horses and fifty pigs. Loss unknown. Origin, spark from engine.

Ingersoll, Ont.—October 8th.—Workshop of Mr. A. B. Hingston, collar maker, destroyed. Loss about $500. Origin, mice nibbling matches.

Aberdeen, Sask.—October 6th.—Prairie and stubble fire destroyed 50 acres of crop and buildings of Mr. T. G. Moore. Loss unknown. Origin, supposed cigar stub carelessly thrown.

Markdale, Ont.—October 13th.—Outbuildings of Mr. James Bell destroyed, also two horses, 150 hens, 2,000 bushels grain, seven tons hay, and harness, etc. Loss about $12,000. Origin, incendiarism.

St. Catharines, Ont.—October 15th.—Summer house of Mr. Frank Darby destroyed. Mr. Darby burned to death. Loss unknown. Origin, smoking in bed. Establishment of Bissonnette, Case & Company destroyed. Loss about $20,000. Origin unknown.

Weymouth, N.S.—October 5th.—Blackader mills totally destroyed. The Sissiboi Lumber Company and the Blanchard Lumber Company had quantity of lumber destroyed. Loss and origin unknown. The insurance was as follows, subject to revision:—Springfield, $1,000; Royal, $1,500; Queen, $1,500; Union Insurance Company, $2,000; Royal Exchange, $3,000; Sun, $2,000; Phoenix of London, $2,000; Royal, $2,000; Queen, $2,000.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Toronto, Ont.—The loss sustained by Mr. J. Brass, 148 Yonge Street, was $5,000 on stock, and $2,000 on buildings. Insured with London, Liverpool & Globe.

Montreal, Que.—Mr. Thos. H. Skelcher sustained loss of $431 on furniture, etc.; $293 on buildings, and $40 on rental. Insured in following companies:—Furniture, etc., Insurance Company of North America; buildings and rentals, Royal Insurance Company.

Regina, Sask.—Messrs. McMillan Brothers' livery stable. Insurance on building, Queen's, $1,250; Sun, $1,250; Guardian, $2,500; German-American, $1,000; total, $6,000; insurance on contents, Guardian, $1,500; loss on building, $333.40; loss on contents, $113.03.

◆

VANCOUVER FIRE RECORD FOR SEPTEMBER, 1911.

The total loss by fire during September was $30,655; of this amount $27,065 was covered by insurance, leaving the loss above insurance paid, $3,590. The total value of property involved was $150,230. The department responded to 35 alarms during the month divided as follows:—False alarms, 5; exhibition runs, 2; chimney fires, 2; bush fires, 1; fires where damage occurred, 11; small fires where no damage resulted, 14. 12,700 feet of hose was laid and 1,092 gallons of chemical was used to extinguish the fires. The three principal fires the department had to contend with were at Messrs. Shelly Brothers' bake ovens on Ash Street, Hoffar Motor Boat Company's plant on Georgia Street and Mr. Henry Darling's paint warehouse on Powell Street. The damage sustained at these fires being $5,570, $12,000, and $9,000 respectively. A list of fires where damage resulted follows: 2nd—Fire in Messrs Shelly Brothers' bake oven at 2,533 Ash Street. The blaze was in the upper front portion of the building where the flour was stored and directly over the oven. Both building and stock being considerably damaged before the fire was extinguished. Cause of fire unknown. Damage $5,570 party covered by insurance. 3rd—Fire in frame cottage at 110 Shore Street, caused by grease boiling over on to the stove. The blaze started in the kitchen and had a good hold on arrival of the fire apparatus. Building owned by Mr. Mills and occupied by Miss Kate Clark. Damage $3,250 covered by insurance. 4th—Fire in frame shed at 795 Powell Street, owned by Mr. C. W. Johnston and occupied by Mr. Apostle Grium and used as a fruit and candy store. Fire apparently of incendiary origin. Damage $100.00. 7th—Fire in some old sign boards in rear of 430 Cordova Street West, owned by Messrs. Hopps & Duker. Damage $30. 16th.—Fire at the Hoffar Motor Boat Company's premises at 1,933 Georgia Street. The building, which was a one story frame structure, was a mass of flames on arrival of the fire department and both building and contents were a total loss. Damage about $12,000 partly covered by insurance. 17th—Small fire at 768 Hamilton Street, caused by a lamp being placed too close to a window curtain. Building owned by Mrs. Lawson and occupied by Mrs. Howard. Damage $45.00 covered by insurance. 18th—Fire in awning at 339 Hastings Street West caused by a lighted cigar being dropped from an upstair window. Building occupied by Messrs. E. P. Charlton & Company's 10 and 15 cent store. Damage $150.00 covered by insurance. 19th.—Small fire at 1,190 Seaton Street, caused by a defective chimney. Building owned and occupied by Mr. J. G. MacKinlay. Damage $460.00 covered by insurance. 23rd—Fire in Mr. Henry Darling's paint warehouse at 28 Powell Street, from some unknown cause and owing to the very inflammable nature of the contents soon gained a good headway. Considerable damage resulting to both building and contents before the fire was brought under control. Building owned by Mrs. Tie. Damage $9,000 covered by insurance. Small fire at 417 Richards Street caused by an overheated electric iron burning a hole in the table. Building owned by Mr. Botteger and occupied by Grant & McDonald and used as a tailor shop. Damage $30.00. 30th—Small fire at 515 Hamilton Street, caused by an electric iron. Building occupied by Mr. Jones and used as a clothes cleaning establishment. Damage $20.00.

NEW INCORPORATIONS.

Forty-two New Concerns Have Been Granted Charters—Many of an Industrial Nature.

Forty-two companies were incorporated last week with a total capitalization of $13,114,000. Six of the companies have capital of a million dollars and over as follows: Utica Mines, Kaslo, B.C., $2,000,000; Pither & Leiser, Victoria, B.C., $2,000,000; Arkansas-Vancouver Timber and Lumber Company, Vancouver, B.C., $2,000,000; Dominion Match Company, Vancouver, B.C., $1,000,000; Northern Land and Loan Company, Winnipeg, $1,000,000; Canadian Lumber Yards, Montreal, $1,000,000.

The majority of the companies granted charters were of an industrial nature, there being 33, while land companies totalled 5, investment 2, and mining 2.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kaslo, B.C.—Utica Mines, $2,000,000.

Golden, B.C.—Windsor Hotel Company, $10,000.

Ottawa, Ont.—Stapleton Realty Company, $100,000.

Welland, Ont.—White & White, $40,000. H. A. White, E. V. White, H. J. White.

Milton, Ont.—Williams & Son, $40,000. J. W. Williams, J. R. Williams, L. G. Williams.

Berlin, Ont.—Writeaway Fountain Pen Company, $40,000. T. A. Witzel, J. Johnstone, A. Weir.

Carleton Place, Ont.—Carleton Place Rink Company, $15,000. D. Findlay, A. E. Cram, W. Baird.

St. Boniface, Man.—Western Concrete Company, $50,000. J. Mouvet, E. Marchand, F. LeQuerrie.

Breakeyville, Que.—Chaudiere Mill Store Company, $20,000. G. Breakey, M. Begin, G. D. Anderson.

St. John's, Que.—E. R. Smith Company, $75,000. G. W. MacDougall, L. Macfarlane, C. A. Pope, Montreal.

South Porcupine, Ont.—King George Hotel Company, $50,000. W. A. Gordon, F. A. Day, C. H. Day, Haileybury.

Moose Creek, Ont.—Roxborough Independent Telephone Company, $10,000. D. A. MacGregor, N. McRae, R. Shanks.

Hebertville Station, Que.—La Compagnie de Conserves d'Hebertville, $20,000. A. R. Hudon, J. E. Simard, L. N. Michaud.

McAuley, Man.—McAuley Curling and Skating Rink Company, $1,000. D. D. Smith, W. M. Stewart, H. Chipperfield.

Hervey Junction, Que.—Gatineau Industrial Company, $200,000. H. Doheny, Montreal; T. Malone, Three Rivers; A. Beck, Hervey Junction.

Millerton, N.B.—Reorganized Miller's Tanning Extract Company, $48,000. H. W. Just, Montreal; A. H. Hanington, St. John; F. N. Beveridge, Millerton.

Victoria, B.C.—R. Harris & Company, $25,000. Sunset Manufacturing Company, $25,000. Victoria Steam Laundry Company, $60,000. Pither & Leiser, $2,000,000.

Montreal, Que.—Fit Rite Tailoring, $20,000. A. W. Murray, F. L. Martel, F. R. Chabot. Abbey Realty Company, $500,000. W. J. Carrique, J. W. Abbey, W. F. Thompson. Canadian Lumber Yards, $1,000,000. G. V. Cousins, E. G. T. Penny, S. T. Mains. T. R. Gaines, $50,000. T. R. Gaines, L. A. Dubrule, R. DeSerres.

Winnipeg, Man.—Northern Land and Loan Company, $1,000,000. J. MacGregor, D. K. Elliott, A. M. Nanton. Winnipeg Construction Company, $100,000. F. S. Thoms, J. Thoms, L. O. Bailey. Mackenzie & Mackenzie, $15,000. S. E. Richards, A. G. Kemp, A. Farquhar. Tucker Piano and Music Company, $70,000. J. R. Tucker, A. J. Prockter, W. S. Hemphill.

Vancouver, B.C. — Arkansas-Vancouver Timber and Lumber Company, $2,000,000. Dominion Match Company, $1,000,000. British Columbia Brass, $50,000. Builders' Trust Corporation, $100,000. Maple Apartments, $100,000. Northern Investment Company, $10,000. Canadian Power and Land Company, $10,000. Kolts & Taylor Company, $100,000. Nanoose Harbor Land Company, $750,000.

Toronto.—Ontario Estates, $500,000. C. Kappele, J. J. Hoidge, A. E. Adams. Electric Motor Truck Company, $100,000. S. C. Wood, jr., H. T. Hunter, W. Nally. Willing Mining Company, $700,000. G. R. Forneret, E. G. McMillan, J. R. Corkery. Hygienic Button Company, $100,000. W. H. Irving, H. H. Davis, J. R. Rumball. J. Walter Thompson Company, $10,000. A. J. Thomson, R. H. Parmenter, W. S. Morlock.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Cooke, No. 2489, $1,500. J. T. Cooke, Munson.
Midvale, No. 2413, $1,500. G. Price, Haneyville.
Camrose, No. 1315, $5,400. H. J. Dahl, Camrose.
Metitize, No. 2310, $400. G. Deeprose, Mecheche.
Camrose, No. 1315, $23,000. H. J. Dahl, Camrose.
Creole Belle, No. 2347, $2,000. E. S. Rose, Steveville.
Morgan, No. 2458, $1,300. S. W. Oxford, Hardisty.
Barwood, No. 2213, $1,300. W. J. Croston, Drumheller.
Brookland, No. 2302, $800. N. W. Little, Heaton Moor.
White Rose, No. 2398, $1,500. W. S. Jacobs, Munson.
Battersea, No. 2431, $1,800. H. B. Kane, Iron Springs.
Crystal Lake, No. 2449, $2,500. J. T. Ingram, Lethbridge.
Golden Valley, No. 2514, $1,500. J. G. Barclay, Rising Sun.

Saskatchewan.

Greenbank, No. 692, $2,500. R. Frame, Kelso.
Melville, No. 2187, $950. F. E. Culp, Melville.
Nedora, No. 230, $2,000. W. T. Whittle, Amulet.
St. Denis, No. 166, $1,500. A. Gauthier, Vonda.
Tynder, No. 216, $2,500. H. M. McIntyre, Tyner.
Elmwood, No. 2733, $1,500. S. A. York, Cadillac.
Biberdorf, No. 2517, $1,500. R. Graham, Jansen.
Norfolk, No. 47, $1,500. C. B. Cook, Grismerville.
Ear Lake, No. 2739, $1,600. H. L. Bowlby, Unity.
Birnamwood, No. 2690, $1,000. S. Perry, Medstead.
Oxford Plains, No. 2799, $1,200. J. W. Cline, Zelma.
Poplar Dell, No. 210, $1,400. W. E. Pogson, Mervin.
Fraser, No. 2752, $1,800. L. W. Williamson, Heward.
Red Deer, No. 2676, $1,000. W. E. Collins, Charlotte.
Shellbrook, No. 252, $7,000. D. M. Ford, Shellbrook.
Ulmer, No. 287, $1,200. G. E. Vanderburgh, Neudorf.
Loch Lomond, No. 2816, $1,500. L. R. Hill, Cressman.
Verdant Valley, No. 233, $800. Mary E. Tetlock, Verigin.

NOTES OF BIDDING.

Six Toronto bond firms bid for the Sandwich, Ontario, $16,300 5 per cent. 10 and 20-year debentures, which were awarded to the Dominion Securities Corporation.

For the $100,000 5 per cent. 30-year debentures of Portage la Prairie, Man., eight bids were received, five from Toronto bond firms, one from Montreal and two from Regina. The offer of the Ontario Securities Company, Toronto, was accepted.

Ten offers were received for the Moose Jaw, Sask., $125,000 4½ per cent. 30-year school debentures, eight bids being from Toronto bond houses, one from Regina and one from Winnipeg. As previously noted, the award was made to the Dominion Securities Corporation, Toronto.

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended October 20th, 1910; October 12th, and October 19th, 1911, with percentage change:—

	Oct. 20, '10.	Oct. 12, '11.	Oct. 19, '11.	Chg. %
Montreal ..	$43,707,771	$51,906,863	$50,877,148	+ 16.4
Toronto ...	34,838,939	37,264,516	37,008,109	+ 6.2

SEPTEMBER BANK STATEMENT.

As we go to press, the September bank statement comes to hand, showing a small increase in current loans during the month of $14,383,645. Call loans abroad were withdrawn to the extent of $8,196,000, and demand deposits increased by $2,473,000. The following are the principal items and changes:—

	Sept. 30, 1911.	Changes in Sept., 1911.
Deposits on demand	$313,584,893	+ $2,473,225
Deposits after notice	577,591,045	+ 1,850,089
Call loans in Canada	67,717,991	+ 2,611,881
Call loans elsewhere	93,517,076	+ 8,196,744
Current loans in Canada	749,067,607	+ 14,383,645
Current loans elsewhere	35,587,127	+ 1,897,931
Circulation	97,197,176	+ 6,566,646

The statement will be printed in full in next week's Monetary Times, together with an analysis.

◆

SPANISH RIVER PULP AND PAPER MILLS.

The unsold balance of $200,000 6 per cent. first mortgage sinking fund bonds of the Spanish River Pulp & Paper Mills, Limited, is being offered by the Dominion Bond Company. The operations of the company have been successful. The net earnings after interest charges and depreciation had been deducted, amounted in 1909 to $169,555, and in 1910 to $207,899. The earnings for the year 1911, based on results for the first nine months, to September 30th, and estimated for the three remaining months, will amount to over $250,000. The general manager of the company has estimated that the net profits of the company, after the installation of the paper mill will amount to at least $450,000 per annum.

The bonds are a first mortgage on all the properties owned by the company. Through the operation of a sinking fund the bonds are retired before maturity, thereby creating an ever increasing equity behind the issue. The pulp industry is destined to be one of the most important in Canada. The cost of producing pulp at the company's mill has steadily decreased, and owing to increased demand, the price has steadily increased. The company has found a ready market for all the pulp it has manufactured in the middle Western States. Statistics show that these States consume one-third of the total consumption in the United States. This bond offering appears to be an attractive one.

◆

THE MOLSONS BANK.

An excellent report was presented at the fifty-sixth annual general meeting of the shareholders of the Molsons Bank held in Montreal yesterday. In addition to pleasing results of the year's operations recorded the address of Mr. W. M. MacPherson, the bank's president, was unusually interesting in regard to the general outlook. The profits of the bank for the year ended September 30th, 1911, amounted to $712,539. After paying the increased dividend of 11 per cent., taxes, expenditures on branch buildings, and usual subscription to the pension fund, there was added from profit and loss account $200,000 to reserve fund, raising it to $4,600,000, and leaving still at profit and loss a balance of $119,306. The bank's general business, deposits and loans, all show satisfactory growth with good prospects of continuance.

A shareholder asked if the new capital issued last year and floated in the British market had been well employed and an affirmative answer was given. Mr. MacPherson suggested that in order to increase the power of the bank to help in promptly marketing the harvest, it would be well to make September 1st, instead of October 1st, each year the date when the extra issue of circulation may be permitted. The bank, he said, had shared in the splendid growth of the whole country and now that we can more safely count on no unsettling changes being made in the tariff, continued progress in wealth and well-being may reasonably be expected.

The bank's deposit now amounts to $1,041,000,000, a larger total than last year by $81,000,000. The shareholders, directorate and management of the Molsons Bank have every reason to be proud and satisfied at the position of their institution, the results of its operations last year, and its prospects.

◆

Messrs. Bearinger and Chapin, Toronto, who purchased the Montgomery timber limits at Dalhousie, N.B., here a few years ago, sold same to the Dominion Iron and Steel Company of Sydney, recently, for $250,000. Besides one square mile in the town of Dalhousie, there are eighty miles of timber limits as well as booms, tugboats, etc. The new owners plan extensive improvements.

THE WEST IS PROSPEROUS.

Mr. W. C. Noxon, of Messrs. Brent, Noxon & Company, has returned from an extensive trip through the West, including the principal centres and the country surrounding them. On the whole Mr. Noxon found the country in a satisfactory position. The farmers in all provinces will come out of the season with a profit and a fair one in most cases. While this year's crop will doubtless fall far below what was estimated, it is nevertheless a large increase over last year. Prices are good and reasonable prosperity is more than assured. Settlement is rapid owing to the opening up of the new railway lines. Indications point to a continuance of railway construction and the opening of new territory. There seems to be a demand for all the land available. The operation of large tracts of land is increasing. Agricultural land has shown a steady enhancement in value. Undoubtedly the high figures pertaining to land in many of the centres are partially maintained by the operations of a large number of real estate agents and whatever those in the East may think of such values, the future alone will demonstrate the justice or otherwise of them. Building operations are active, and when the next census is taken in 1921, our Western Provinces will have exceeded the past ten years' good record.

◆

PROVINCIAL GOVERNMENT PURCHASES COCHRANE BONDS.

The Ontario Government recently purchased from the town of Cochrane $38,500 of their bonds on a 4 per cent. basis in order to extend some additional assistance to them since the unfortunate fire. The money received from the government is intended to repair and rebuild sidewalks, school house, jail, municipal buildings, etc., and in addition to provide payment of the outstanding debentures and their interest for the next few years, by which time it is fully expected that the town will have recovered itself and will be in a position to meet its obligations promptly as they always have done.

Another important feature in this connection is that a large amount of the money which was contributed toward the loss and suffering from the fire was, we understand, expended by the board of trade in placing the settlers of the district back on their land. The government owns a large amount of land in Cochrane and it is necessary that there should be an important business centre created in the district. There is no better position for it than the junction of the Ontario Government's railway and the Grand Trunk Pacific which meet at Cochrane, and which will form the basis of a very large railway centre similar in many ways to that of North Bay. The country and district surrounding Cochrane is in the centre of the Northern clay belt, and the quality of the land for all purposes is unsurpassed.

The government's action in assisting the community in their misfortune has the approval of the province as a whole. It is felt that every reasonable assistance to increase the population and extend farming operations in the district will more than repay the province in a few years. It should be remembered that the government is giving assistance to the town so that the civic authorities can replace what the town possessed before the fire. Cochrane will then be able to commence again at the stage where the fire stopped progress.

◆

The United Gold Fields of British Columbia, Limited, will apply for the authority to change to their office from Frank to Blairmore, Alta.

The Canadian Northern Railway will construct a tunnel through Mount Royal, Montreal, in order to gain easy access to the city. The cost will be about $25,000,000.

Mr. J. R. Little, Mr. A. Fraser, of the Canadian Guarantee Company, Brandon, and Mr. Thorning, president of the Cochrane Board of Trade, were visitors at The Monetary Times head office this week.

At a meeting of the Quebec Central Railway Company in London, England, this week, the directors proposed to pay 3 per cent. on the share capital, carrying forward a balance. This company's lines are leased to the Canadian Pacific Railway Company for 99 years.

The annual meeting of the Stratford Board of Trade was held recently when the following officers were elected:—President, Mr. J. H. Gordon; vice-president, Mr. J. L. Bradshaw; secretary, Mr. F. A. Copus; auditor, Mr. Geo. Kay; council, Messrs. W. Maynard, Geo. McLagan, J. R. Macdonald, J. D. McCrimmon, H. W. Studley, W. P. Zick, D. M. Ferguson, R. T. Orr, J. A. Duggan, Thos. Ballantyne, Wm. Preston and C. McIlhargey.

THE HIGHEST BID.

The Brandon school board has caused a flutter of excitement by inviting tenders for a debenture issue and making the award to the second highest bidder, a well-known and reputable house near at hand. The board had a right to do this. The explanation sent to The Monetary Times by their secretary-treasurer, Mr. J. B. Beveridge, is that, the time being so short, it was decided, as the second highest bidder was within a short distance, it would be well to make the award in that direction, as delivery could be made and the money paid over in time for the school board to meet their obligations promptly. It was necessary to have the funds on hand to pay these debentures when presented. "Had we accepted the offer of the highest bidder," says Mr. Beveridge, "it would have taken some time to complete the delivery and we would have been out of pocket in the end." We believe that many, if not all, of the Eastern bidders could have given the Brandon school board satisfaction in the shape of immediate delivery of the cash required. There may be little objection to the award to any particular bond house not the highest bidder, but we think that all the circumstances described by Mr. Beveridge being known to the school board at the time the debentures were advertised, it was unfair to invite tenders and then take the course adopted.

REJECTION OF BOND TENDERS.

A large number of municipalities throughout Canada have advertised debentures for sale, and, having received a goodly number of tenders, these have been opened, considered unsatisfactory, rejected, and in many cases again advertised. This has become common practice of late. The two chief points in the position are apparently that the bond house and the municipality have different views of the value of the securities for sale, and that the municipality imagines readvertising will bring better bids. It is questionable whether a municipality, after having put the financial houses to some trouble, should not give very serious consideration to the offers received. Keen competition there is among the bond houses for every issue of value.

When the town or city clerk opens a dozen tenders, he has before him a dozen individual opinions of the worth of the town's debentures, plus the small commission and profit charges of the bond house. He has a dozen individual opinions as to the condition of the bond market. Usually, too, he has additional proof of things as they are, in the fact that a dozen financial houses, while strenuous competitors of one another, are practically agreed on price, for the highest and the lowest bids as a rule vary little.

The municipality has a right to reject tenders, but the rejection of a list of bids should have the best thought and consideration of municipalities before taking such action. In the numerous cases in mind, we cannot find the vestige of a good reason for the non-acceptance of one of the many offers received in each instance.

A $55,000 issue of first mortgage 6 per cent. bonds of the Mathews Steamship Company, Limited, is being made by Messrs. Æmilius Jarvis & Company, Toronto. The bonds are an obligation of the Mathews Steamship Company as a whole, and are specially secured by a first mortgage on the steel steamship Yorkton, which was built this year in England, and has only been in operation about three months. The total of the first mortgage bonds on the Yorkton is $55,000, whereas the boat is valued at $130,000, and is insured for $115,000. The insurance policies are held by a trustee to protect the bond holders.

Investments in British Columbia will be made for the Duke of Portland by his commissioner, Mr. J. H. Turner, who is spending some time on the coast.

TORONTO NOT IN LONDON MARKET.

Will be, Though, Next Year—Real Estate Bond Offering—Municipal Notes.

A cable message was received this week from London as follows: "What some authorities regard as a sign of the times is the private sale of £250,000 city of Toronto 4 per cent. stock, which can scarcely have netted the city more than 96¼, as the bonds are being offered by the market at 98." City Treasurer Cody tells The Monetary Times that he has no knowledge of such an issue. Toronto is not in the market, but will probably be early next year.

In connection with the advance in Steel Company of Canada common stock, reports are current that the company is about to make an issue in London.

Real Estate Bonds.

Five per cent. consolidated first mortgage bonds of the City Central Real Estate Company, Limited, are being offered by Messrs. Greenshields & Company, Montreal. The authorized bonds are $1,000,000, of which $850,000 has been issued, and the authorized $1,000,000, of which a similar amount has been issued. Of the $850,000 bonds issued, $300,000 are in escrow to retire a mortgage of £54,100. There is outstanding in the hands of the public $550,000,

The bonds are secured by a mortgage on the company's property, constituting a first lien on that property subject only to a mortgage of £44,100 in favor of the Commercial Union Assurance Company of England, against which $300,000 of the $850,000 issue is held in escrow by the trustee. Under the terms of the latter mortgage it will be discharged by the City Central Real Estate Company by annual payments extending up to April 1st, 1914. The company owns the real estate and building, having a frontage of 97 feet on St. James Street, Montreal, and 61 feet on Notre Dame. The company also owns $150,000 of the $350,000 capital stock of Freeman's, Limited. The building owned is a modern eight-storey hotel. The ground floor is used as a restaurant, with stores on the St. James Street frontage. This property is valued in excess of the bond issue, and is appreciating owing to the growth of Montreal. The rental is insured by the City Central Company for $50,000, thus securing the bond interest against all contingencies. The building is also insured against fire for $225,000. In addition to this, Freeman's, Limited, carries $150,000 on the furnishings of the hotel. After three months' operation Freeman's, Limited, was earning an average of $300 a day, net.

Canadian Northern Bond Guarantee.

Application will be made at the next session of the provincial legislature by Sir Donald Mann and associates for assistance in the way of guarantee of bonds for the construction of the extension of the Canadian North-eastern Railway, formerly known as the Portland Canal Short Line. The line will be extended into the Naas River country, a party of explorers being there this season securing data as to resources, etc.

The city of Portage la Prairie has taken over the plant of the Electric Light Company, a deal recently approved by the citizens. When The Monetary Times' representative called on Secretary-treasurer F. W. Clayton this week, he was busy signing the $110,000 issue of debentures for that purpose. The ownership of this plant by the city gives day power to Portage for both illuminating and commercial purposes. A new unit is being installed to assist in the latter purpose.

Municipal Assessment Notes.

The report of the Montreal assessment department shows the gross assessed value of property in the city to be $499,926,049. The exemptions amount to $119,228,417. The net assessment is, therefore, $380,697,632. This shows a gain of $61,356,016 in the valuation of the taxable property, and a total increase in exemption of $9,975,918. The total increase in the gross assessment is $71,131,934.

According to the report of Assessor Sharman, Stratford's population is now 14,596, a decrease of 252 from last year's figures. The real assessment is $8,534,885, an increase of $364,895 over that of last year.

The assessment figures of Galt, Ont., give the population of the town as 10,333, an increase of 615. The total assessment is $6,315,060, an increase of $219,462. About $70,000 was added because the assessors made a special effort to get after the taxable income, which for some years past had not been included in the returns. The returns for this year do not include two recently annexed districts with a population of about 100 and an approximate assessed value of $80,000.

A water power on the Adams river has been acquired by the Canadian Pacific Railway.

We Offer the Unsold Balance of $200,000 6% First Mortgage Sinking Fund Bonds of

The Spanish River Pulp & Paper Mills, Limited

Dated December 1st, 1910. Due December 1st. 1931.

EARNINGS

The operations of the Company have been very successful. The net earnings after interest charges and depreciation had been deducted, amounted in the year 1909 to $169,555.30, and in 1910 to $207,890.93. The earnings for the year 1911, based on results for the first nine months, to Sept. 30th, and estimated for the three remaining months, will amount to over $250,000.

The General Manager of the Company has estimated that the net profits of the Company, after the installation of the paper mill will amount to at least $450,000 per annum. No provision has been made in this estimate as to profits on railway ties and jack pine lumber.

SUMMARY

1. The Bonds are a first Mortgage on all the properties owned by the Company.
2. Conservative value of property, $13,512,184, or nearly six and a half times the value of outstanding Bonds.
3. The estimated net earnings for 1911 will show over twice the amount of interest required on $2,100,000 of Bonds, which includes the present issue for the paper mill installation, and from which no earnings are as yet derived.
4. Through the operation of a Sinking Fund the Bonds are retired before maturity, thereby creating an ever increasing equity behind the issue.
5. The pulp industry is destined to be one of the most important in Canada. The cost of producing pulp at the Company's mill has steadily decreased, and owing to the increased demand, the price has steadily increased.
6. The Company has found a ready market for all the Pulp it has manufactured in the middle Western States. Statistics show that these States consume one-third of the total consumption in the United States.
7. The Company's area is 6,000 square miles. The capacity of the Pulp Mills is 160 tons, and the Paper Mill, 100 tons per day.

PRICE : 98 and interest yielding over 6⅛ per cent.

Yorkton, Sask.—The town will shortly market debentures to the total value of $108,300. These are for waterworks, sewerage, concrete sidewalks and electric light extensions, and for the purchase of a gravel pit and other property recently acquired by the town.

Saskatchewan.—The following villages have been empowered to borrow money for permanent improvements. The particulars are given in order, name of village, amount and name of secretary-treasurer: Amulet, $2,000, O. M. Olson; Simpson, $1,500, A. Boyd; Odessa, $1,000, C. Pickrem; Kerrobert, $12,000, A. E. Hetherington; Radville, $2,500, E. J. Moor.

Berlin, Ont.—At a special meeting of the county council by-laws were passed to raise $12,000 by debentures for the purposes of granting $5,000 to the Galt and Berlin-Waterloo Hospitals, toward the erection of proposed new additions, and $2,000 for a new vault in the registry office, and another by-law to raise $3,000 by debentures for the purchase of a road roller and stone crusher for the improvement of the county highways.

◆

REGINA SELLS BIG BOND ISSUE.

A block of $932,800 debentures of the city of Regina has been awarded to the Merchants Bank, the price being 98.16, and $100,000 school debentures to Messrs. Wood, Gundy & Company, the price being 97.02. The Royal Securities Corporation offered 98.27 for $400,000, these being the street railway debentures. The following are the details of the issue:—

Street Railway	$400,000
Trunk Sewers	150,000
Waterworks	150,000
C.P.R. Broad Street Subway	120,000
Pavements	64,400
Sidewalks	13,400
Exhibition Buildings	35,000
Public Schools	100,000
Total	$1,032,800

All the above bear 4½ per cent. interest and all except Pavements, Sidewalks and Public Schools mature in 40 years. The "Pavements" Debentures mature in 15 years, and "Sidewalks" and "Public Schools" in 20 years.

Here is the list of the bids received:—

Merchants Bank	98.16
Nay & James	98.02
Wood, Gundy & Company	97.02
Canadian Agency	97.
Dominion Securities	96.83
Æmilius Jarvis & Company	96.18
National Finance Company	96.625
G. A. Stimson & Company	95.52
H. O'Hara & Company	95.
Royal Securities Corporation	98.27

As stated above, the bid of the Royal Securities Corporation was for $400,000 only of the total issue. Since 1905, Regina has been in the London market twice, having floated £111,000 4½ per cent. debentures in July, 1907, and £93,600 4½ per cent. debentures at 101 in August, 1910.

◆

DEBENTURES AWARDED.

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

A large and responsible Western Land and Investment Company has sold over a million dollars of First Mortgages to private investors, and has had no defaults either in principal or interest. It would undertake to guarantee to those having money to invest a net return of 6% on the best security the country affords, and the guarantee of company having a capital and surplus of over half a million dollars. Address Box 301, Monetary Times.

WANTED.—Immediately, two special agents; one for Saskatchewan and one for Manitoba, by a Canadian fire insurance company. Must have had previous experience in cultivating field. In replying give past experience, references and salary expected. Reply Box 431, Monetary Times Office.

WANTED:—Real estate and insurance agent opening office in Moose Jaw wants good board fire company and loan company. Five years' experience, and well acquainted in city. Good references. Apply Box 437, Monetary Times.

WANTED AT ONCE—A clerk for fire insurance office; one possessing a good, all-round knowledge of the business. State age, experience, salary required and references. Box 441, Monetary Times.

WANTED.—By up-to-date real estate loan and insurance firm, city agencies or provincial managership of well known board fire insurance company, and exclusive agency for good loan company. Good business guaranteed. Bankers' references. Write S. &. C., Box 541, Calgary, Alta.

PORT MANN.

The Pacific Terminal Port of the Canadian Northern Railway. Official announcement is made that the townsite lots will be on sale within sixty days. As was the case in Prince Rupert, record prices will reign, some say $15,000 to $20,000 per lot. The lots nearest to what will be the highest priced railway lots are those across the road belonging to us. They are big 50 feet by 164 feet lots, to a 20-foot lane, and are about 300 yards off the waterfront. Prices now asked are only from $1,500 up with 3-year terms. These show opportunities for greatest quick profits ever offered in the country. No private subdivision in this Terminal can ever be so close as ours. Remember the highest prices at the sale will set the value to our lots. We recommend speedy action as only about fifty lots remain unsold. Ask us for maps and prices. Sole agents, the Selwyn Investment Company, Limited, 311 Dominion Trust Building, Vancouver, B.C.

WANTED—Position as inspector by an up-to-date insurance man who desires to make a change. Large experience and A1 references. Address Box 439, Monetary Times.

WANTED—Stock solicitor for special campaign to sell stock of new manufacturing concern. References necessary. P.O. Box 905, Owen Sound.

DIVIDEND NOTICES

MAPLE LEAF MILLING COMPANY, LIMITED.

Dividend Notice.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) has been declared on the preferred stock of Maple Leaf Milling Company, Limited, for the quarter ending October 4th, 1911, payable October 18th, 1911, to shareholders of record October 4th, 1911. Transfer books will be closed from October 4th to October 17th, inclusive.

By order of the Board,
J. CARRICK,
Secretary.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

Notice is hereby given that a dividend has been declared of three and one-half per cent. (3½%), being at the rate of 7 per cent. per annum, on the preference shares in the capital stock of the Mexican Light and Power Company, Limited, payable November 1st, 1911, to shareholders of record at the close of business on the 16th day of October, 1911.

The stock transfer books of the Company for the preference shares will be closed from October 17th, 1911, to October 31st, 1911, both days inclusive.

Dividend cheques for the shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, N.Y.; London, England; Mexico City, Mexico, and its branches.

By order of the Board.
W. E. DAVIDSON,
Toronto, Canada, Sept. 23rd, 1911. Secretary.

THE CONSUMERS' GAS COMPANY OF TORONTO.

The Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto to receive the report of the Directors and for the election of Directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on **Tuesday, the 31st of October, 1911, at 12 o'clock noon.**

ARTHUR HEWITT,
General Manager

CARRIAGE FACTORIES, LIMITED.

Preferred Stockholders' Dividend No. 5.

Notice is hereby given that a dividend of 1¾ per cent. for the quarter ended 15th October, 1911, being at the rate of 7 per cent. per annum on the paid-up Preferred Stock of this company has been declared, and that the same will be paid on the 31st day of October to the Preferred Shareholders of record on the said 15th day of October, 1911.

By order of the Directors.
W. F. HENEY,
Secretary.

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%), being at the rate of 7 per cent. per annum, has been declared on the Capital Stock of the Mexico Tramways Company for the quarter ending September 30th, 1911, payable on the 1st day of November to shareholders of record at the close of business on the 14th day of October, 1911, and that the transfer books of the Company will be closed from the 16th to the 31st day of October, 1911, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, N.Y.; Mexico City, Mexico; London, England, and its branches.

The holders of bearer share warrants, on detaching from their share warrant Coupon No. 10, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, or London, England, on or after the 1st day of November, 1911, will receive in exchange for each coupon the sum of one dollar and seventy-five cents ($1.75), representing the amount of the dividend.

By order of the Board.
W. E. DAVIDSON,
Secretary.
Toronto, Canada, Sept. 23rd, 1911.

With all crop scares, Saskatchewan raised 20,000,000 bushels more of wheat and 40,000,000 bushels more corn than last year. Ought to pay us a capitation allowance on the farmers she takes from the United States.—Wall Street Journal. That's all right, but Canada has already given those farmers soil far more fertile than they can get at home and law and order ahead of those in their own country.

A HIGH YIELD BOND
WITH AMPLE SECURITY

The cost of living has been increasing so rapidly that the average investor has been forced to try to secure a larger yield on his money and at the same time have a sound investment.

We can offer a number of high-grade Industrial and Public Utility Bonds in denominations of $100 and $500, at prices to yield an annual income of 6% and over on the investment.

Circular dealing with different issues mailed on request.

COURTESY IN BUSINESS.

From time to time our attention is called by business men and others to the growing lack of courtesy in business. Sometimes the complaints refer more especially to the answering of telephone calls. Sometimes it is the incivility and indifference of clerks and office staff, and at other times it is the lack of courtesy on the part of the employer himself. Whatever the cause, it is to be regretted that this tendency towards discourtesy is growing. Undoubtedly the present is an age of hurry. The man or business that does not hustle is left behind in the race. Competition is keen and competitors often unfair in their methods. While we acknowledge the keenness of business competition and the age of hurry in which we live, we still contend that there is time for the little courtesies which make our business life pleasant. These little courtesies are to business what oil is to machinery. It takes very little more time to give a courteous answer than it does to shout a rude reply.—Exchange.

FINANCIAL

CO-OPERATIVE INVESTMENTS, Ltd.

(Capital Stock $50,000, divided into 500 shares of $100 each.)

BOARD OF DIRECTORS:

President:
WILLIAM P. DUTTON,
Manager Great West Lumber Co.

Vice-President and Managing Director:
ALBERT H. OAKES,
Mang'r Oakes Land Co., Pres. Torrens Security Investments, Ltd., and Vice-Pres. Winnipeg Real Estate Exchange.

Sec.-Treas.:

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Corporation, Limited

Automobile Liability
Teams Liability
Elevator Liability and Industrial Insurance

OUR MOTTO: Prompt and Just Treatment of Claims.

FIRE INSURANCE COMPANY MUST PAY POLICY AMOUNT.

Judgment against The Provincial Mutual Fire Insurance Company of Montreal was rendered recently in an action for $1,000. The Kline Company of Quincy, Florida, dealers in tobacco, were the plaintiffs, who stated that they had taken a policy of one thousand dollars with the defendant company and a fire followed shortly after. When they called on the insurance company for the payment of their risk, they were told that their policy was not valid and payment was refused. The insurance company pleaded that its charter being a provincial one did not give it the right to take risks out of the province of Quebec; that a few weeks after the risk had been written the company had advised the insured of the fact, and when the claim was made the insurance company had offered to reimburse the premium.

Mr. Justice Demers ruled that the defendant had failed to establish that the company had no right to take risks outside of the province of Quebec, that the alleged note of cancellation signified to the plaintiff was not a real notice of cancellation of the policy, and that the company had to pay the sum of one thousand dollars.

◆

For the first time, shares of the Cockshutt Plow Company were traded in on the Toronto Stock Exchange Curb recently. Seven hundred shares of the common stock sold between 64¾ and 66.

Paid-up Capital $1,825,000
Assets 4,000,000
Reserve 520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

LAKE OF THE WOODS MILLING COMPANY.

The profit for the year ended August 31st, 1911, of the Lake of the Woods Milling Company, Limited, amounted to $412,153, and the amount at the credit of surplus account at the same date was $857,457. The company's capital stock is $2,500,000 and deducting $400,000 in the treasury there is thus outstanding $2,100,000 and 7 per cent. preferred stock of $1,500,000, making a total of $3,600,000. There is also an issue of $1,000,000 of 6 per cent. bonds, maturing in June 1923. The Lake of the Woods Milling Company, guarantees, the Keewatin Flour Mills Company bonds for $750,000 and interest at 6 per cent. Among the assets is included an advance to the Keewatin Company of $189,461.

This is a satisfactory statement, but it would have been interesting to have had made public the views of the management and directors as to the milling outlook in Canada.

◆

BONDS AS INVESTMENT SECURITIES.

One of the best books published on the subject of bonds has been received by The Monetary Times. Under the title of "Bonds as Investment Securities," there are gathered together twenty articles by various writers on different phases of the bond business. The value of the book will best be judged by a glance at the titles of its chapters. These are:—The Proper Basis of Bond Accounts When Held for Investment; The Valuation of Bonds on an Income Basis; Bond Redemption and Sinking Funds; Value of a Bond Department to a Bank or Trust Company; Tables of Bond Values—Theory and Use; Essential Recitals in the Various Kinds of Bonds; Organization and Management of a Bond House; Bond Salesmanship; Selling American Bonds in Europe; Methods of Auditing and Accounting in a Bond House; Bonds as Additional Banking Reserve; Railroad Bonds as an Investment Security; Electric Interurban Railway Bonds as Investments; Real Estate Bonds as an Investment Security; Industrial Bonds as an Investment; The Physical Condition of a Municipality Issuing Bonds; Municipal Bond Issues Explained; Protection of Municipal Bonds; Classification and Description of Bonds; Bonds in their Relation to Corporate Finance. Orders for this book may be placed with The Monetary Times. Price, $1.00, paper cover; $1.50, cloth cover.

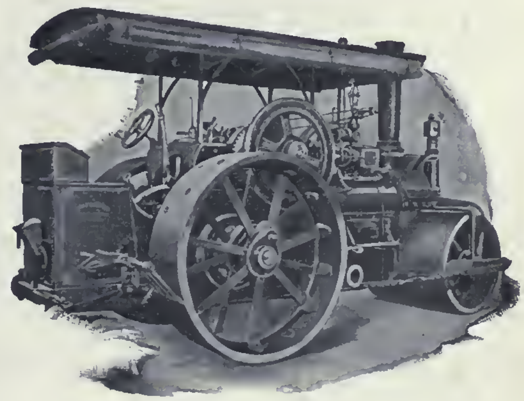
The Waterous
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling rnad material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the gnvernor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to nune.

Ask the man on the machine.

LEGAL NOTICES

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of September, 1911, incorporating John Richard Corkery, James Moffat Forgie and Edward Gordon McMillan, law students, Harry Riley and Willis Bertram Sturrup, law clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, charter, hire, build or otherwise acquire steam and other ships or vessels with all equipments and furniture and to employ the same in the conveyance of freight, including coal, ores, grain, live stock, meat and other produce and merchandise of all kinds between such ports as may seem expedient; (b) To carry on the business of merchants, carriers by land or water, ship owners, wharfingers, barge owners, lightermen, forwarding agents, ice merchants and refrigerating store keepers; (c) To acquire, own and operate either by steam, electric or other power, tramways and railway sidings on or over lands owned or controlled by the company or on or over lands adjacent to the lands of the company with the consent of the owner or holder thereof; (d) To acquire and undertake the whole or any part of the business, properties and liabilities of any partnership, person or company, carrying on any business which the company is authorized to carry on, or carrying on any business which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights or possessed of property suitable for the purposes of the company; (e) To acquire, construct, carry on, improve, operate, maintain, develop or manage, carry out or control roads, ways, railway sidings, bridges, reservoirs, watercourses, packing houses, elevators and wharves, and to carry on the business or trade of warehousemen, storers, packers, and carriers of personal property and to issue warehouse receipts and bills of lading and to lend money upon the security of personal property warehoused or carried; (f) To issue paid-up shares, debenture stock, debentures, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be acquired by or for any service rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (g) To sell, lease or turn to account the undertaking or the whole or any branch or part of the business, undertakings, property, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having objects similar in whole or in part to those of this company; (h) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea, which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated, directly or indirectly, to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (i) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell, pledge or otherwise dispose of shares, stock, debentures, bonds, and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents, as the directors may appoint; (j) To enter into partnerships or into any arrangements for sharing profits, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise with any partnership, person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or into any business transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such partnership, person or company and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (k) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (l) To distribute in specie or otherwise as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company, formed to take over the whole or any part of the assets or liabilities of this company; (m) To enter into any arrangements with any governments or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (n) To do all or any of the matters hereby authorized either alone or in conjunction with, or as factors, trustees or agents for any other companies or persons or by or through any factors, trustees or agents; (o) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with the above, or any portion thereof, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (p) The powers in each paragraph to be held in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (q) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Coals Transportation, Limited," with a capital stock of two hundred thousand dollars divided into 2,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of September, 1911.

THOMAS MULVEY,
Under-Secretary of State.

14-2

Dated at Toronto this 17th day of October, A.D., 1911.

Bicknell, Bain, Strathy & MacKelcan, Solicitors for "Coal Transportation, Limited."

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood, Robert Musgrave Coates, solicitors' clerks; Samuel Maximilian Mehr, student-at-law; Samuel Goodman Crowell, and George Hamilton Cassels, solicitors, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein, and water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms, or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric gas or other light, heat and power; Provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (e) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (e) To carry on the business of treating, smelting and refining mineral ores or other substances by means of electrolytic process or the application of electric power in any manner or form, and for such purpose to install all necessary plant, machinery and apparatus and to purchase, sell and otherwise deal in ores of various kinds, or other substances capable of being treated by electrolytic process, and to buy, sell and deal in any products or by-products of such ores or substances; (f) To carry on business as a manufacturer of and dealer in all kinds of

PORT MANN

Port Mann has been officially announced as the Pacific Coast terminal of the Canadian Northern Railway Company's transcontinental line. We hold large tracts of land at this point, within the area selected by the railway company for its townsite. We would be pleased to send you reliable maps and general information relative to this new scene of development in British Columbia. As one of the pioneer investors at Port Mann, we believe you will be well advised to consult us before making any investments at this place.

With branch offices in various parts of the Province we are in touch with many good opportunities for investments that you might care to hear about.

62 Church Street, Toronto

YOU are in the insurance business to make money; but if you are doing a GENERAL insurance business are you earning as much as you might if you devoted your entire time to Life underwriting? Many representatives of the Equitable who formerly transacted a "fire" or "miscellaneous" insurance business have tripled their incomes by devoting their entire time to life insurance work. In the life insurance field, every man and woman is a possible customer and if you become identified with the Equitable you can offer the most truly liberal policies coupled with the utmost security.

For agency positions, address

G. T. WILSON,
2nd Vice-President,
120 Broadway, New York.

The Chief Difficulty

that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

More Policyholders in Canada than any other Canadian company.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

Calgary, Alta., has been chosen by the Canadian Pacific Railway for their new western shops.

The Canadian Railway Accident Insurance Company has received a license for the transaction in Canada of burglary, plate glass and automobile insurance, in addition to the business of accident and sickness insurance for which it is already licensed. The head office of the company is at Ottawa, and Mr. John Emo is the chief agent.

The formation of a Marine Insurance Association by the shipping interests of Canada, which would have fifty per cent. of its business guaranteed by the government, is the suggestion of a Montreal steamship agent as the only means by which a substantial reduction of marine insurance rates at present prevailing upon the St. Lawrence, and which for years have so effectively retarded the natural development of the port of Montreal, can be achieved.

"Pray observe that I do not advocate a higher tariff, or even a high tariff. Our association and the individual members who compose it would be ill-advised to ask for material increases in the rates of duty. The vote of the people cannot be distorted into a building permit to heighten the tariff wall, but it endorses the policy of reasonable, moderate, fair and practical protection; beyond that it does not go."—From the address of President Rowley of the Canadian Manufacturers' Association.

The first section of the Canadian Northern Railway Company Toronto-Montreal line, 110 miles, has been finally approved by the Railway Commission and has been opened for traffic between Toronto and Trenton. The new line is well built and opens considerable fruit country, which was formerly without direct service, and also affords an improved service between Toronto and such points as Cherrywood, Brooklyn, Oshawa, Bowmanville, Orono, Port Hope, Cobourg, Grafton, Colborne, Brighton, Picton, and all points on the Central Ontario Railway.

INVESTMENT AND LOAN COMPANIES

The Basis of the Nation's Wealth

Real Estate is the basis of the Nation's Wealth. It produces that which both man and beast must have to sustain life. With our rapidly increasing population comes the demand for a corresponding increase in the products of the soil, and this demand will never be less than now. Land cannot be destroyed, and with proper care, its producing power may be maintained intact. Land values, therefore, possess that element of permanency that reduces the speculative feature to the minimum.

This Corporation's borrowed funds (Deposits and Debentures) and by far the larger proportion of its shareholders' moneys (Capital Stock and Reserve) are invested in first mortgages on improved, productive real estate. To afford an opportunity to all of investing their money with such absolute safety, we issue our Debentures in sums of one hundred dollars. They are a security in which Trustees are authorized to invest Trust Funds. Write for specimen Debenture and copy of Annual Report.

NORTHERN ONTARIO.

The provincial government of Ontario will seek from the Dominion a bonus of a million and a half dollars for the Temiskaming and Northern Ontario Railway. They will ask for the usual bonus of $6,400 a mile for the main line from North Bay to Cochrane, and will, if possible, secure the bonus on the branch lines also. This is a request which should be granted by the Borden government without much hesitation. Sixteen million acres of valuable agricultural land await enterprise, capital and settlement in Northern Ontario. While the provincial government have not done what they might for the more rapid development of that region, Mr. J. L. Englehart, the chairman of the Temiskaming Railway Commission, has put into his labors the useful energy and enthusiasm of half a dozen men. Had all those upon whose shoulders rest the responsibility for the settlement of Ontario's great Northland, the knowledge and the appreciation of the North possessed by Mr. Englehart, the movement in the right direction would progress much more quickly. Northern Ontario has not had its proper share of attention either from governments, capitalists or settlers.

Again comes the suggestion of the appointment of a commission for the settlement of Northern Ontario. At present, the work of immigration, colonization, road building and land supervision is in the hands of three departments of the provincial government. The labor accomplished has resulted in growing interest in Ontario's wonderful Northland, but it has not done enough. The attractions of Western Canada to the immigrant and to the capitalist are strong, and they have been well advertised. The effect has been well settled lands, tilled soil, productive crops, growing population and the building of metropolitan communities.

While conditions in Ontario's Northland are different to those existing in the West, the possibilities and attractions are just as great in the hinterland of the old province. The Monetary Times thinks that the only practical way to solve the problem of the settlement of that country is to appoint a commission of men of ability, energy and knowledge of the North. It may be found, too, that a trial will have to be given ready-made farms, or at any rate semi-ready. This is an age of rapidity, and it is difficult to induce settlers to take up land from which they must clear heavy timber before crops can be grown.

THE BRITISH PREFERENCE.

Some journals are taking delight in recording the opinion expressed at the Canadian Manufacturers' Convention last week to the effect that the British preference had gone sufficiently far. While this was the first official utterance on the subject, few could have doubted the position of Canada's industrial captains. One delegate desired a formal resolution to be passed and forwarded to the Dominion Government, stating the position of Canada's manufacturers in this direction. Wiser counsel prevailed, as it was felt improper to hamper the action of the Dominion administration, especially in view of the probable appointment of a tariff commission.

Another delegate presented an interesting phase of the question which threw some doubt upon the statement that the British preference had gone as far as Canadian manufacturers desired. He had studied the official figures of Canadian trade and found a long list of items upon which the British preference might be increased without harm to the Canadian manufacturer. This is an important matter, for were it possible for the preference to be raised as indicated, it would to some extent satisfy the consumer's demands for lower prices, afford another indication of Canada's desire as an overseas Empire to strengthen reciprocal trade with the Mother Country, and at the same time retain for the Canadian manufacturer the protection he wishes. Other than that course, we do not see how Great Britain can hope for further tariff preference, unless it be that the duty on foreign imports be raised for the benefit of British imports, an unlikely step. Loyalty and trade make a good pair, but when it comes to running alone, trade takes precedence. That obviously is the position of the Canadian Manufacturers' Association.

TRADE WITH SOUTH AMERICA.

While our home markets are of great and increasing value, it is important that the preliminary bonds of trade should be established with growing foreign markets. Last week, the question of more Canadian business with South America was discussed. We now learn that Mr. G. J. Johnston, a well-known citizen of Montreal, is an enthusiast with that end in view. Having travelled in South America, Mr. Johnston feels that Canada is neglecting business opportunities there. His idea is that a Canadian export association should be formed to look after all possible overseas markets. It would be the purpose of the association to establish an intelligence department, and, through the agency of accredited correspondents, who would supply ruling prices, point out new markets and fresh sources for the purchase of our raw material. This work is to a great extent being performed by the Canadian trade commissioners.

"In looking over all the countries' trade with each of the republics of South America," says Mr. Johnston, "I believe that our trade of 1910 with the Argentine might be duplicated in each one of the other republics if we put the proper trade machinery into operation. Canada in the last few years has been developing her export trade at a very rapid rate. This desirable result has been accomplished partly because of favorable trade treaties with Germany and France and a preferential tariff with Great Britain, and in other cases by the establishment of direct lines of steamships.

"I would like to see our Government assist in establishing a direct line of steamships with South America. This would facilitate the work of an energetic and patriotic Canadian export association. In many ways South America presents a very attractive field for Canadian business men, and, I believe, as one personally acquainted with South America and its business, that there is no doubt a large trade could be worked up if proper attention were paid to cultivating the republics of South America. As everyone knows, South Americans of the most part are not competitors of Canada. They buy what we have to sell and sell us commodities which we require. The only exception to this statement is the Argentine Republic."

We have now trade commissioners in the South American field who will tell the Canadian exporter from time to time of the openings which exist for new business. Mr. Johnston desires to go further, and, after hearing from the manufacturers, will ask the government to appoint a Canadian representative in every republic in South America, and to obtain a government bonus for a direct line of steamships to the West Indies and to South America.

HOW FARES J. M. SPENCE?

"If any company licensed or registered under this Act to carry on the business of life insurance on the assessment system has filed in the Department notice of its intention, after the date mentioned in the said notice, to maintain in respect of all policies issued after the said date, in the case of a Canadian company, or in respect of all policies issued in Canada after the said date, in the case of a company other than a Canadian company, the reserve required by this Act to be maintained by ordinary life insurance companies upon contracts of life insurance with fixed and definite premiums, such company shall, with respect to all policies issued after the said date, if a Canadian company, and with respect to all policies issued in Canada after the said date, if a company other than a Canadian company, maintain for the security of the holders of the said policies the said reserve, and comply with all other provisions of this Act applicable thereto, as if it were licensed under this Act as an ordinary life insurance company."

This clause (103) of the Dominion Insurance Act is probably troubling the mind of J. M. Spence, of Edmonton. It will be recalled that this enterprising underwriter was president of the Canadian Guardian Life Insurance Company, Toronto. The Department of Insurance refused to renew its charter, for very good reasons already detailed in these columns. A limited license was granted for closing the company's affairs. To do this, Spence obtained the provincial charter of the International Insurance Company of Edmonton, became its managing director, and now seeks to induce shareholders of his old company to take stock in his new, and policyholders of his old company to reinsure in his new—indeed, a scheme of great thought and genius. Obviously the law should prevent the consummation of the deal. Whether it will be able to do so, depends largely upon the law, the sense of the share and policyholders, and the shrewd capabilities of Mr. Spence.

The clause quoted above prevents the transfer of Canadian Life policies to the International, because the former company is chartered by the Dominion, and the latter by a provincial act. The alternative is to "obtain the surrender of the policies, as far as practicable." This, Mr. Spence is apparently doing, and we await with interest details of his success or otherwise. Even should a majority of the policyholders surrender to Mr. Spence, that gentleman may discover an unpleasant obstacle at Ottawa when he hands in an affidavit as to the surrenders. The Department may properly inquire whether the Canadian Guardian policyholders have received proper value for the surrender of their policies.

In the meantime, the course of the Canadian Guardian policyholders is clear. They can go to the Department of Insurance at Ottawa and obtain, in due course, the net surrender value of their policy. This will give them sufficient cash to obtain life insurance in a company which insures lives, rather than (as was the case with the Canadian Guardian) shows an operating deficit in seventy-two months of $61,223, adopts extraordinary methods to conceal that loss, and finally has its charter withdrawn by the Department of Insurance.

COST OF DESTRUCTIVE FIRES.

At last, there appears to be an awakening in the United States and Canada as to the expensiveness of the destructive fires, great and small, that so frequently devastate towns and villages. More attention is being paid, we are glad to believe, to measures preventive of fire, and an impression is even being made upon the common carelessness that permits fire-inviting conditions to exist.

An interesting paper, of especial interest to manufacturers, has been submitted to the Insurance Institute of Manchester by Mr. Walter Carter, who calls attention to the following particulars:—

"Many kinds of refuse have an inherent risk: the shavings and sawdust in woodworking risks; the dust, flyings and waste in textile risks; the paper clippings in printers' risks; and the cleaning rags or fibres which become saturated with oil, employed wherever machinery is used—are all of so readily combustible a character as to render obvious the undesirability of their remaining in the buildings longer than is necessary." Laxity of management in a factory is severely scored by the author of this paper, who insists upon the need of attention, by superintendents especially, to what are regarded as "commonplace occurrences," the little fire dangers of every day. It may be helpful towards a safer state of things if what he says about cleanliness and order are quoted: "Many and varied hazards arise from laxity of management and lack of thoughtfulness in works control. In all classes of risk a lack of cleanliness is a distinct source of hazard. Trade refuse should always be removed at frequent and regular intervals, and, if worthless, burnt or destroyed. The insistence upon cleanliness and order not only removes a hazard from the works, but assists in the formation of careful habits in the workmen, and is of material advantage in its moral effect."

SMALL CHANGE.

The crop of government blue books, now being harvested, requires considerable threshing to obtain the grain.

* * * *

With a properly qualified fiscal agent, the city of Montreal will receive no more smacks at its financial pride.

* * * *

If all the optimistic towns and cities of Canada persist in taking their own census, Canada will likely have a population of 70,000,000 instead of 7,000,000.

* * * *

President Taft says he will veto any bill that does not appeal to him, whether or not he looks like King George III. or any other king. The question is, will the people veto the big Bill in 1912?

* * * *

In the casual revenue of the receiver-general appears an item of $56.00 received for water supplied tug at Victoria, which compares favorably to what others will receive for whiskey supplied in a carload of hay at Cochrane.

* * * *

Earl Grey continues to give Canada some well-deserved advertising. His advice to those Englishmen who have become somewhat insular, is worth repetition. "Believe me," he said this week at the Royal Colonial Institute, "it is absolutely impossible, however vivid your imagination, to understand Canada by remaining on this side of the Atlantic. I am satisfied that just as in the case of Canadians visiting the United Kingdom, so in the case of Englishmen visiting the Dominion, all will go back prouder than ever of British citizenship, and more confident of a bright and glorious future."

* * * *

The ninth report of the Geographic Board of Canada contains names that will fill with gladness the heart of the orthographer. Kammitikaskwa, Kiskisink, Nemikachi, Renbugten and Kabistachuan are a few examples. The average man will glance at the volume, cross his fingers, and devoutly wish that he may never become "a conductor on that line."

* * * *

Two English companies with Canadian interests are not in a happy position. Their story is written on another page. When a Canadian enterprise is placed before the British investor, he should seek independent and reliable advice at home and in Canada, respecting the undertaking. Then he need not act later as its undertaker.

* * * *

One of the city commissioners of Edmonton, praising the new fire alarm system of that place, went on to say that, having this improvement, and having such a splendid fire department, "I see no reason why the step should not be taken of the city becoming their own insurers." He will see it some day (should the city do anything so foolish), when the deposits for a fire fund amount to only $40,000 or so, and a $100,000 fire comes along. He will probably change his present opinion that "it would be a great deal cheaper than our present system of being insured outside." The experiment has been tried often enough to discourage those who attempted it.

* * * *

Six merchants appeared before Superintendent of Police Rogers at Cochrane recently to press charges against William McD. Douglas, an agent of the Cosmopolitan and the Metropolitan Fire Insurance Companies of Pennsylvania. The evidence showed that after the fire, when the merchants tried to collect upon their policies they found both companies were bankrupt. The Insurance Department at Toronto was asked to investigate, and Mr. W. J. Vale, deputy inspector of insurance, discovered that neither company was registered in Ontario. Douglas pleaded guilty to doing business for unregistered companies, and was fined $20 and costs on each count. One day Canada will proceed in this manner against unlicensed as well as against unregistered insurance companies.

* * * *

Last year, the value of manufactures produced in the United States was $20,672,052,000, a stupendous amount. The figures show the great strides being taken by the neighboring republic as a manufacturing nation. Their manufactured products are now more than double in value what their farmers produce. In 1910 the value of farm products, according to Secretary Wilson, was $8,926,000,000, compared with $20,672,000,000 as the value of manufactures. According to the census statement the value of manufactured products increased 40 per cent. between 1905 and 1910; capital increased 45 per cent., and the cost of materials advanced 43 per cent. Population increased about 10 per cent. In the same period the number of wage earners increased 21 per cent., while the amount paid in wages rose 31 per cent. These figures emphasize the rapidity with which the United States has passed from an agricultural country to a manufacturing country. We can scarcely blame our cousins, under these circumstances, for keeping a watchful eye upon the Canadian market. Canada has two eyes on it.

CANADA'S FINANCES.

Surplus of Thirty Millions—Debt of Dominion is Three Hundred and Forty Millions—What We Spent Last Year.

The public accounts of Canada, for the fiscal year ended March 31, 1911, make an interesting bluebook. The receipts on account of consolidated fund for the year amounted to $117,780,409, and the expenditure on the same account to $87,774,198. The surplus of receipts over expenditure on this account was therefore $30,006,211.

In addition to the consolidated fund expenditure, the following outlays were made and charged to capital:—

Railways	$24,760,771
Canals	2,349,474
Public works	3,742,717
Total capital expenditure	$30,852,962

The biggest item in the railways account was the National Transcontinental which absorbed $23,487,986. The Quebec bridge loss is put at $227,563. The Trent canal accounted for $1,682,449 and the largest public works expenditures were $1,056,123 on Port Arthur and Fort William harbors and $1,070,037 on the St. Lawrence ship canal.

Railway Subsidies.

Railway subsidies to the amount of $1,284,892 were paid on account of the following:—

Atlantic, Quebec and Western Railway Company	$31,334
International Railway Company of New Brunswick	169,536
Central Ontario Railway Company	24,601
Quebec Central Railway Company	129,320
Liverpool and Milton Railway Company, Limited	32,000
Manitoulin and North Shore Railway Company	68,638
Grand Trunk Pacific Railway Company	302,679
Quebec, Montreal and Southern Railway Company	60,000
Canada and Gulf Terminal Railway Company	144,803
St. Maurice Valley Railway Company	60,480
Canadian Northern Quebec Railway Company	144,608
Canadian Northern Ontario Railway Company	116,889
	*$1,284,892

The Atlantic, Quebec and Western Railway was financed by the Charing Cross Bank, London, England, now in liquidation. The Quebec Central was leased recently to the Canadian Pacific Railway for a term of 99 years.

Bounties to Industries.

The sum of $1,597,663.48 was paid on account of bounties on the following:—

Iron and steel	$1,138,748
Lead	248,534
Binder twine	49,784
Crude petroleum	160,596
Total bounties	*$1,597,663

At the close of the fiscal year, the balance at the credit of depositors in the post office and government savings banks amounted to $58,094,331, a decrease of $169,898 as compared with the balance held on March, 1910. The withdrawals during the year exceeded the deposits by $1,855,973, while $1,686,074 was added for interest accrued, thus making a net decrease of $169,898.

Investments on account of the sinking funds of the various loans were made during the year to the amount of $1,203,416. Dominion securities held in the sinking funds to the extent of $4,789,203, on account of the 4 per cent. guaranteed loan of 1875-8, were, on the maturity of the 1875 portion of that loan on October 1st, 1910, taken over from the sinking fund account and cancelled. Accordingly, the total of the investments at the credit of the sinking funds, which stood at $14,782,613 on March 31, 1910, at the conclusion of the fiscal year 1911 amounted to $11,196,825.

Debt of the Dominion.

The net debt of the Dominion at the close of the fiscal year was $340,042,052, or an increase of $3,773,505 to the net debt as it stood on March 31, 1910. The increase is accounted for as follows:—

Capital expenditure on National Transcontinental Railway	$23,487,986	
Capital expenditure on other railways, canals and public works	7,364,977	
Railway subsidies	1,284,892	
Bounties	1,597,663	
Consolidated fund transfers	1,286,911	
	*$35,022,430	
Less:—		
Surplus of consolidated fund receipts over consolidated fund expenditure	$30,006,211	
Sinking funds	1,203,416	
Refunds on account of Northwest Territories rebellion	33,688	
Refunds on account of Dominion Lands	5,508	
Refunds on account of Georgian Bay Canal	100	
		31,248,924
		*$3,773,505

*Cents omitted in details.

Bond Guarantees.

The list of bonds guaranteed by the Dominion is as follows:—

The Canadian Northern Railway Company.—The guarantee is for the principal of £1,923,287 sterling, and interest thereon at the rate of 3 per cent. per annum for fifty years. A second guarantee is for the principal of £1,622,586 19s. 9d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from July 20, 1908, interest payable half yearly.

The Grand Trunk Pacific Railway Company.—The guarantee is for a sum equal to 75 per cent. of the cost of construction of the Western Division of the National Transcontinental Railway, but not exceeding $13,000 per mile in respect of the Prairie section of the said railway. The amount of bonds issued and guaranteed is £7,200,000, of which £3,200,000 were issued in 1905, £2,000,000 in 1909, and £2,000,000 in 1910.

Advances were made under statute to the Montreal Harbor commissioners amounting to $1,290,000.

The circulation of Dominion notes has advanced to $89,994,270, or an increase over the circulation at the close of last year of $2,860,201, with a corresponding increase in the gold reserve.

As to Matured Loans.

On July 1, 1910, the 4 per cent. 1910/35 loan for £3,727,861 18s. 11d. or $18,142,261.46 was redeemed and dealt with as follows:—

Redeemed in cash	$9,177,316.62
Converted into 3½ per cent. loan 1930/50 (January, 1910, issue)	7,527,951.24
Converted into 3½ per cent. loan 1930/50 (May, 1910, issue)	1,436,993.60
	$18,142,261.46

The above loan was issued in London for £4,000,000 in 1885 to run for fifty years with, however, an option to the Government to redeem at any time after twenty-five years, upon giving six months' notice. The Government availed itself of this option and after due notice had been given the loan was redeemed on 1st July, 1910.

On October 1, 1910, the 1875 portion of the guaranteed loan of 1875/78, amounting to £1,500,000 or $7,300,000, matured and was dealt with as follows:—

Redeemed in cash	$6,528,146.67
Converted into 3½ per cent. loan 1930/50 (May, 1910, issue)	771,853.33
	$7,300,000.00

◆

QUEBEC RAILWAY REPORT.

The pamphlet report of the Quebec Railway, Light, Heat & Power Company, for the year ended June 30, shows the gross earnings for the year were $1,280,126.76, as compared with $1,127,952.42 in 1910, an increase of $152,174.34.

The operating expenses were $661,907.15 as compared with $644,563.60 in 1910, an increase of $17,343.55.

The net earnings were $618,219.61, an increase of $134,830.79 over 1910.

After adding miscellaneous income from subsidiary companies' earnings prior to 1st July, 1910, and deducting fixed charges of $456,329.02, two (2) dividends payable 15th July and 15th April, 1911, amounting to $199,990, organization expenses of $10,681.47, and less sundry interest earned of $11,109.48, there remained a surplus of $62,328.60.

A feature of the financial report is the increase in gross earnings of $152,174, with an increase in operating expenses of only $17,343. The report points out that the various extensions, improvements and economies made during the year will only commence to bear fruit during the present year and will be reflected in the next annual report.

The statement of assets as of June 30 shows cash in banks, etc., of $2,500,000.

ENGLISH COMPANIES WITH CANADIAN INTERESTS.

Two are in Trouble—Results of Standard Oil Company Unsatisfactory—Shareholders of "Trust" Company Refuse to Pass Accounts.

While the Standard Oil Company of the United States is cutting itself into 34 parts, by order of the Supreme Court, (and losing no sleep about it), the Standard Oil Company of Canada, with head office in London, is having troubles of a different nature. The directors, in their report made up to August 31st, state: "Although the certificate from the Registrar of Joint Stock Companies entitling the company to commence business was obtained on May 7, 1910, various delays occasioned by the necessary verification of titles ensued, and it was not until August 1, 1910, that possession of the leases could be obtained. Difficulties as regards the management in Canada subsequently occurred, and it was not until November, when the present chairman (Mr. L. R. C. Boyle) went over and appointed a new field manager, that a vigorous development policy was rendered possible. At that time the severe winter season was just commencing, thus retarding operations still further. As a result of certain negotiations which were conducted by Mr. L. R. C. Boyle on behalf of your board, the purchase consideration was reduced by £24,000, namely, £11,000 in cash and 52,000 shares, a reduction which is of substantial benefit to the company.

Oil Actually Produced.

"The actual quantity of oil produced since your company took possession has been 496,153 gallons. The directors, however, are hopeful that the prospects of a second oil-pay—referred to in the report of Dr. Young, who made a special visit to the oilfields for the purpose of making an independent report—may be realized.

"The directors, in printing Dr. Young's report, are actuated by the desire to place the true facts of the future prospects of the company before the shareholders, and although they regret that the results to date have not proved as good as originally anticipated, they, nevertheless, are satisfied that there is more than a possibility of this second oil-pay proving profitable, whilst gas in large quantities has been found in the new Webb field, in the Ottawa district, and the directors hope that this gas field may be one of great commercial value, as, on account of its vicinity to Ottawa, the demand is assured.

Owing to Difficulties.

"Owing to the difficulties of obtaining machinery, stores, and explosives at a moment's notice, delays are of constant occurrence. It is the intention of the chairman to proceed to Canada immediately after this annual general meeting, with a view to making certain alterations to facilitate the more rapid development of the company's properties."

Dr. Young, in his report, refers to the possible second pay at Fletcher.

As noted previously in these columns, the shareholders of the Dominion of Canada Trust Corporation, at the adjourned general meeting of the company in London, refused to pass the report and accounts.

This Shareholder was Frank.

At this meeting Mr. R. T. Gould said he would oppose with all his power the adoption of the report and accounts and the election to the board of any nominee of the directors. He —a country solicitor—had put in his own money, and had advised clients to do so, because he was told that the board was a first-class one and would carry on perfectly sound business. This view had been confirmed by brokers in various parts of the country. He took it that the whole essence of a trust company was that one was entitled to believe that by investing in it one spread one's investment risks, but the directors' report before them showed that this was not the case. The board had applied the whole of the company's resources to one double-barrelled proposition—the construction of a railway and the purchase of a large lumber property through which the railway was to pass.

What They Were Told.

They were told that a charter had been obtained for the railway, and that the Dominion and Nova Scotian governments would pay substantial subsidies to the company. What went wrong he did not know. He could not understand how, if a charter was granted and subsidies agreed to, it could ever pay the Dominion Government to build a competing line; but they must take the directors' statement that the charter had become waste paper, and as against it they had a claim against the Canadian Government and the lumber property. That property caused him considerable anxiety. The amount paid for their interest in it was £205,000 odd, and advances to and payments on account of the Maritime Lumber Company represented £14,282 more, making a total of £219,631. What was included in the £14,282 he did not know; but what troubled him was that £132,737 of the total of £219,631 was not paid. That was the danger spot. Such a business must be slow to develop, and experience showed that mortgagees or debenture holders had a way of stepping in just when a little longer time was needed, and the benefit of the original purchase disappeared.

Big Preliminary Expenses.

The directors, however, had been successful in not cheeseparing. Preliminary expenses were £15,557, and there was a very large amount of general expenditure for office accommodation, secretarial, legal and general charges, directors' fees in England (£2,063), directors' fees in Canada (£1,350), &c., all of which was debited to capital account, while the income was only £479. He was in earnest in this matter, and whatever his success at that meeting, it would not be the end of it.

Mr. Chapman said it appeared that the corporation was a trust for the benefit of the directors, not the shareholders. While there was practically no income, directors' fees and other expenses stood at upwards of £7,000, and the shareholders had received no assurance as to the course which the directors would pursue in the future. The only investment which could properly be said to be of a "trust" nature was £82 in Alexander, Limited, a company of which he could learn nothing.

Utterly Opposed to Practice.

Commenting upon this meeting, which was adjourned sine die, the London Financial Times says: "In particular, the power of the directors of an investment trust company to employ practically the whole of their resources in connection with 'one double-barrelled proposition' instead of spreading the capital over a number of securities was called in question. It is, of course, a vital principle in the management of such concerns that the shareholders' money shall be distributed over as wide an area as possible, so that the course adopted by the directors of this concern has been utterly opposed to the practice followed by other similar undertakings."

◆

MILEAGE OF GRAND TRUNK PACIFIC.

The following lines are at present in operation on the new transcontinental: Fort William, Northwest via Winnipeg, Saskatoon, Edmonton and Edison to Fitzhugh, 1,472 miles; Prince Rupert to Copper River, 100 miles; Canora via Yorkton and Melville to Regina, 151 miles; Tofield, Alta., to Mirror, 70 miles. Total, 1,853 miles. There is also a total mileage of about 900 on other sections of the Northern Division, which is in partial operation by construction trains. The following lines are under construction: Fitzhugh, Alta., to Copper River, B.C., 618 miles; Regina, Sask., via Moose Jaw, northwest, 93 miles; Regina, Sask., to International boundary, 90 miles; Young to Prince Albert, Sask., 120 miles; Oban to Battleford, Sask., 50 miles; Mirror, Alta., to Calgary, 124 miles; Biggar, Sask., south-west, 50 miles; Alberta Coal Branch, 60 miles.

◆

OUR NEIGHBOR'S TWENTY BEST CUSTOMERS.

Here is a list of the twenty heaviest buyers of United States goods, as indicated by the value of exports from the United States during the fiscal years 1910-11 and 1909-10:—

	1910-11	1909-10
England	$536,591,730	$458,142,570
Germany	287,495,814	246,786,846
Canada	269,806,013	202,548,023
France	135,271,648	114,665,589
Netherlands	96,103,376	84,393,539
Mexico	61,281,715	57,345,549
Cuba	60,700,062	53,048,226
Italy	60,580,766	51,704,848
Belgium	45,016,622	40,364,342
Argentina	43,018,511	40,234,674
Australasia	37,524,586	27,559,042
Japan	36,721,409	25,870,269

Russia	23,524,267	18,899,125
Panama	20,867,919	16,780,030
China	20,223,077	16,252,071
Austria	19,514,787	14,962,731
Denmark	13,196,950	13,644,903

ONTARIO IS A BIG MINERAL PRODUCER.

Silver, Pig Iron and Nickel Have Contributed Most to Total Value—Gold and Silver Production Last Year.

Ontario has produced altogether minerals valued at $161,486,051, including 98,872,911 ounces of silver, 3,180,656 tons of iron ore and 2,656,105 tons of pig iron. These facts, with many others of interest, are revealed in the twentieth annual report of the Ontario bureau of mines. The following table gives details of the total production of minerals in Ontario:—

Product.		Quantity.	Value.
Gold	oz.	163,336	$2,577,990
Silver	"	98,872,911	63,550,476
Platinum and Palladium	"	3,364	62,784
Cobalt	tons	5,215	585,470
Nickel	"	118,673	32,611,829
Copper	"	99,098	14,374,103
Iron Ore	"	3,180,656	6,039,571
Pig iron	"	2,656,105	41,475,418
Lead ore	"	3,351	20,000
Pig lead	"	1,143	96,000
Zinc ore	"	7,704	92,410
Total		....	161,486,051

Gold from Nine Properties.

There were nine properties from which gold bullion was recovered in 1910, the output being 3,619 ounces, valued at $68,498. This is an improvement over 1909, when the yield was 2,042 ounces worth $32,445. The producing mines were the Gilmour, in Hastings county; Havilah, formerly the Ophir, in Galbraith township, north shore of Lake Huron; Canadian Exploration Company's at Long Lake on the Sault branch of the Canadian Pacific Railway; Mikado, on Shoal Lake, Lake of the Woods; Le Page and Norwalk, Michipicoten; Swastika in Otto township, Temiskaming and Northern Ontario Railway; and Hollinger and Dome, Porcupine. The Porcupine mines were responsible for more than one-half the production.

The gold discoveries in the township of Munro and neighborhood, lying east of the Temiskaming and Northern Ontario Railway, have been undergoing development, and considerable machinery was placed upon some of them during the winter of 1910-11. At the Swastika mine, Otto township, work seems to have proven the existence of gold at some depth. Gold is also reported from the vicinity of Hobon, where the Algoma Central and Hudson Bay Railway will join the main line of the Canadian Pacific Railway, but there is as yet little information concerning the occurrence here or the nature of the rock formations. The interest evoked by the Porcupine finds has extended to some of the older fields, including that of Hastings county, where the old Belmont or Cordova mine has passed into the control of Mr. P. Kirkegaard, long connected with the mining and treatment of the auriferous mispickel deposits at Deloro in the same county. It is proposed by Mr. Kirkegaard to re-open the mine, on which there is a fully-equipped 30-stamp mill ready for operation. There was no production from the Sturgeon lake.

Yield of Silver.

The yield of the silver mines of Ontario in 1910 was 30,651,417 fine ounces, the money return from which to the mining companies was $15,481,322. As compared with 1909, the output was 4,747,432 ounces, and the value $3,016,600 greater. Practically the whole of the production was from the mines of Cobalt, including in that term South Lorrain, Elk Lake and Gowganda.

The mines of Cobalt camp from the beginning up to 31st December, 1910, have added upwards of 94 million ounces to the world's stock of silver. The number of the producing mines was 39, of which 38 were at Cobalt, the remaining one being the Hanson Consolidated, the only mine in the Port Arthur silver region which returned any production last year. The full list of the productive mines is as follows, and after the names of most is given the output for the year 1910:—

Mine.	Production, 1910. Oz.
Nipissing	5,590,080
La Rose (including Lawson)	3,484,754
Crown Reserve (including Silver Leaf)	3,255,567
Kerr Lake	2,877,299
Coniagas	2,621,681
McKinley-Darragh-Savage	2,606,891
Temiskaming	1,994,226
Buffalo	1,629,328
Hudson Bay	985,552
Tretheway	846,579
Right of Way	455,986
Millerett	322,000
City of Cobalt	305,216
Wettlaufer-Lorrain	199,920
Cobalt Town Site	195,597
Beaver	181,450

Notes of Other Producers.

Other producers were O'Brien, Nova Scotia, Little Nipissing, Silver Cliff, Cobalt Lake, Chambers-Ferland, Hargrave, Colonial, Drummond, King Edward, Wyandoh, Rochester, Provincial, Waldman, Boyd-Gordon, Dobie-Reeve, Miller Lake-O'Brien, Bonsall, Lucky Godfrey, Bellellen and Casey Cobalt.

From two mines in South Lorrain, the Bellellen and Wettlaufer-Lorrain, there were shipped 233 tons of ore containing 221,233 ounces of silver, and from six in Gowganda and Elk Lake, namely, Boyd-Gordon, Dobie-Reeve, Miller Lake-O'Brien, Milerett, Bonsall and Lucky Godfrey, 480 tons, containing 481,523 ounces. The remainder was from Cobalt proper, excepting small returns from Casey Cobalt, which geographically is quite outside the recognized Cobalt area, and Hanson Consolidated, situated west of Port Arthur.

Good Quality of Ore.

There were shipped from the mines 27,485 tons of ore and 6,874 tons of concentrates; also 980,633 ounces of bullion obtained partly by cyanidation and partly by the smelting of nuggets and metallic silver. The ore shipped contained an average of 821 ounces of silver per ton, and the concentrates 1,030 ounces; or taken together, ore and concentrates carried 863.5 ounces per ton. In 1909 the corresponding figures were: ore, 809 ounces, concentrates, 1,165 ounces per ton; or together 842.6 ounces per ton. Notwithstanding the fact that a very considerable quantity of low-grade silicious ore was shipped to such smelting points as Denver, Colorado, where it is utilized in mixing with ores of a more basic character, the general quality of the material shipped by the mines of Cobalt, as indicated by these figures, shows no symptoms of a lowering in quality. If the metallics melted down to form a part of the bullion sent out by the mines had been included in the ore, they would have still further heightened its grade.

◆

BRANDON'S INTERESTING STATISTICS.

The following figures of the capitalized assessment and taxes of Brandon, Man., give some idea of the steady growth of the wheat city of the West:—

Year.	Amount.	Rate.	Taxes.
1891	$2,649,006	20	$52,980
1897	3,024,829	20	60,496
1903	2,578,818	33	85,100
1907	8,385,663	20	167,713
1910	9,573,740	22	210,622

The tax rate for 1911 is 21 mills on the dollar. Real property amounts to $9,062,775, personal property to $150,125, and the annual rental value is placed at $292,099.

In August, 1910, the clearing house returns were $2,050,105, and for the same month of this year $2,310,490, an increase of $260,285. In September, 1910, the figures totalled $2,038,024 against $2,158,161 for the corresponding period of 1911.

That the figures relating to customs and inland revenue are gratifying examples of business growth, will be seen from the following:—**Inland revenue,** 1901-2, $34,697; 1907-8, $73,535; 1910-11, $87,113. **Customs,** 1903, $123,000; 1907, $200,000; 1910, $313,751.

Building permits were issued in 1909 for $350,120; 1910, $982,385; and 1911, (first nine months), $979,759; while the increase in population may be noted from the following:—1901, 5,620; 1906, 10,408; 1908, 11,282; 1909, 13,000; 1910, 13,500; 1911, 15,000.

The municipal debt statistics for 1910 were, assessment, $9,573,740; gross debenture debt, $1,369,985.96; floating debt: Waterworks construction, $21,400; stabling, $12,000; less cemetery, $5,000; less waterworks debt, $395,000; less local improvement debt, $436,236; less sinking fund (general), $78,055.74; total, $909,292.70; net debt, $489,193.26. The business rate is 10 per cent.

Every week 346 passenger trains are in and out of Brandon, while the freight trains total 478.

These figures show that Brandon is with other western cities enjoying prosperity and making steady progress.

MONTREAL TRAMWAYS DEAL.

Further Analysis of the Proposed Amalgamation—What the Proposed Change Involves.

Monetary Times Office,
Montreal, October 25th, 1911.

The directors of the Montreal Street Railway are not having the most pleasant experience in carrying out their project for the reconstruction of the finances of the company A special meeting of the shareholders of the company was held a couple of weeks ago, and a statement was there made of the progress which had been made towards the re-financing. It was stated that the Montreal Tramways Company had been formed to take over the Street Railway and its subsidiary companies under the one name. The Street Railway shareholders were offered $87.50 in cash, $160 in debenture stock of the Montreal Tramways Company, as well as $20 in common stock of that company for each share of Street Railway stock held by them. An alternate offer was made to those who preferred not to accept cash, of $250 in debenture stock of the Montreal Tramways Company and $20 in its common stock. Subsequently these offers were confirmed.

As To Bond Sale.

It was also explained at the meeting that an arrangement had been made with Messrs. N. W. Harris & Company, of Boston, to take $10,000,000 of the debenture bonds of the Tramways Company. The debenture stock referred to above was 5 per cent. stock, and the bonds sold to Harris & Company were 5 per cent. bonds.

A day or so before the announcement of the terms to be offered the Street Railway shareholders, the Street Railway stock rose to $236. After the offer was explained, it sold back to around $230, where it has been holding for some months past. Although the alternative offers referred to would indicate that the Street Railway directors placed the value at about $97 on the debenture stock, and although the price at which the Tramway common stock was selling on the Exchange would give a value of $7 to each fifth share given in exchange for the Street Railway stock, (thus making the offer to the Street Railway shareholders the equivalent of about $250), the public does not seem to value the Street Railway stock at more than $230.

Opposition to Deal.

The explanation of a recent break in prices was the announcement that opposition had been made to the deal as formulated by the directors. One of the opponents was Senator Beique who opposed it at the special meeting and asked for a delay in order that the matter might be given further consideration. Senator Beique appeared before the Public Utilities Commission with the claim that the amalgamation was not in the interests of the public, and asked that the Commissioners delay the hearing of the matter pending injunction proceedings. The Senator is the owner of one thousand shares of the stock. In addition to the opposition from Senator Beique, Mr. Atwater, K.C., as city attorney, requested a further postponement. He represented that the Board of Control considered that the proposed amalgamation seriously affected the citizens of Montreal, inasmuch as they did not possess the same control over the railway.

Analysis of the Figures.

Another presentation of the capitalization of the Montreal Tramways Company, and of the manner in which the exchange of securities would affect the situation is as follows:—

Capitalization:	Authorized.	Issued.	In Treasury.
Bonds, 5%	Unlimited	$10,000,000	
Debentures, 5%	$20,000,000	$16,000,000	$4,000,000
Common Stock	20,000,000	2,000,000	18,000,000
		$28,000,000	

The company has the right to issue further bonds for debentures up to the value of 75 per cent. of extensions or betterments.

The basis of exchange of Montreal Street Railway shares is as follows:—

Cash	$87.50
5 per cent. debentures	160.00
Common stock	20.00
Par value	$267.50

or, alternatively,

5 per cent. debentures	$250.00
Common stock	20.00
	$270.00

Underlying and prior lien securities as at September 30, 1910:—Montreal Street Railway

4½% bonds, August, 1922	$681,333.33
4½% bonds, November, 1922 ...	1,500,000.00
4½% bonds, May, 1922	2,238,666.67
Montreal Park & Island Railway bonds	1,025,000.00
Montreal Terminal Railway bonds	613,000.00
Suburban Tram. Company (now public service corporation) ...	850,000.00
	$6,908,000.00
Less	2,588,000.00
Outstanding	$3,320,000.00

Assuming conversion of present Montreal Street Railway capital stock into Tramway securities as noted, the annual fixed charges will be as follows:—

5% bonds at say 95—5.26% on $87.50 cash	$4.60
$160.00 debentures at 5% ...	8.00
$20.00 common	....
	$12.60 or $12.60%
Alternatively—	
$250.00 debenture 5%	$12.50
$20.00 common	....
	$12.50 or $12.50%

or taking the issued securities of the Tramway Company as noted, the required net earnings after all charges will be—

	Issued.	Annual.
5% bonds at 95—5.26	$10,000,000	$526,000
5% debentures at 5%	16,000,000	800,000
		$1,326,000—13.26%

on original Montreal Street Railway stock of $10,000,000.

Judge Charbonneau on Tuesday dismissed with costs the petition of Senator Beique, the reason being that there are special statutes adopted by the Legislature providing for the amalgamation of the Street Railway and the Montreal Street Tramway Company.

◆

CANADIAN NORTHERN RAILWAY IN PEACE RIVER REGION.

The most important line of the Canadian Northern Railway in its programme of Alberta construction, is that which is intended to connect the great agricultural prairie district which surrounds the Peace River and its tributaries, in Northern Alberta, with Edmonton and civilization. The pioneer settlers and their families who have taken up their abode in the region during the past three years are said to number over fifty thousand, and communication heretofore has been very primitive. A stage line connects Edmonton with Athabaska Landing, on the Athabaska River, a distance of 90 miles, where small steamboats run in the summer to the foot of Lesser Slave Lake, about 100 miles. Here a trail leads across the portage into the Peace River, and travelers have to go the rest of the way to their homesteads in their own boats. The Canadian Northern is now building a line from Edmonton to Athabaska Landing, which will probably be open before the end of the year, and the new scheme, as outlined in the application to be made to the Legislature in the name of the Canadian Northern Western Railway Company, calls for a further line from Athabaska Landing to Peace River Landing, in the heart of the district.

Another important line in the programme is that which it is proposed to construct in a south-westerly direction from Strathcona, across the river from Edmonton, for a distance of fifty miles. This will open up a rich country not now served by any railway at all. Some of the other proposals are: —A line northward for 70 miles from Calgary, nearly paralleling the Canadian Pacific: a projection of the branch between Big Valley and Stettler, to a junction with the main Saskatchewan-Calgary line: from Athabaska Landing northeasterly to Fort McMurray, on the Athabaska River, and thence easterly to Lac la Biche, now several hundred miles from civilization.

BRITISH COLUMBIA.

Lumber Industry is in Unsatisfactory Condition—Log Cut in Interior May be Large—Insurance Company May Increase its Loans.

(Staff Correspondence.)

Vancouver, October 21st.

Conditions in the lumber industry on the Pacific Coast are not satisfactory. This industry is the largest on the coast, and if the value of its product is not the greatest it certainly gives employment to the largest number of men. It is estimated that 85 per cent. of the cost of production is expended in labor. The success of the industry is dependent more on commercial prosperity and general good times than anything else. With mining, if money is available for development riches may be dug out of the ground and profitable operations result. With lumbering, capital may furnish the power to produce, but after that a market is needed before the profit becomes apparent. As soon as frost was reported from the wheat raising sections in August there was a perceptible lessening in lumber orders, and now that it looks as if there will not be much more than half a crop in Saskatchewan, with damage in parts of Manitoba, the business has considerably decreased. It will remain quiet at least until the first of the year. It is this domestic trade that is the mainstay of the lumber mills of the interior of British Columbia. Loss of business means a season lost. There will easily be enough business to pay interest on the investment. Timber will not increase in value, and stock will keep. But a slow season, with several of the mills closed down, means a large amount of money kept out of circulation, which would be paid employees. The lumber industry is quiet right down the Pacific coast, but the Canadian manufacturer is practically confined to his own limited territory, while the American has the right to come into Canada on even terms.

Log Cut in Interior May Be Large.

In the interior of the province, it is the usual thing for most of the mills to close during the winter, but it is doubtful if they will engage in log cutting operations on as large scale as they might, if things were looking good. A month or two ago, it was stated that the log cut in the interior would be large this winter, but there they have not the teredo that coast lumbermen have to fear in holding timber.

On the coast, the mills have the advantage of a brisk local demand. This is particularly good in Vancouver and it is also fair in New Westminster and Victoria. It is not anticipated that lumber mills will close other than for the annual overhauling, though shingle mills are getting quiet. There is a surplus of logs, with prices lower than for a long time past, the quotation being from $6.50 to $8, with buys even at $6. Foreign trade is not up to much, though there is lumber constantly shipped from the export mills. The lumber industry while affected quickly by any untoward condition is as quick to reassert itself when the slightest betterment is noticed. Present conditions, though not satisfactory, are by no means discouraging.

On Lulu Island, south of Vancouver, it is proposed to erect great docks, waterfrontage having been secured around the whole western shore of the island. The Vancouver Harbor and Dock Extension Company is the name of the concern mentioned in this connection, the local names appearing being Messrs. W. R. Arnold and C. F. Pretty. It is stated that British capital is interested. The incorporation figures are $10,000,000. The project is a large one, and much money will be needed to carry it through. The proposition includes reclamation of the Fraser River sandheads, which lie in front of the property. At low tide there is a vast area of tide flats at the mouth of the Fraser River, and a very large area could be reclaimed with comparatively moderate expense. Messrs. J. C. White & Company, Incorporated, New York, are the names of the engineers employed by the company.

Insurance Company Will Increase Its Loans.

Opportunities in the future are to be taken advantage of by the Union Steamship Company, operating out of this port. This is a pioneer concern, but has confined its operations to the coastal trade. With British capital, represented by Mr. J. H. Welsford, whose company runs several steamers out of Liverpool, the Union Steamship Company is increasing its operations. Mr. Welsford was elected president at a recent meeting, and thereafter followed the acquisition of the interests of the Boscowitz Steamship Company. Now it is announced that the Canadian-Mexican line will be taken over. To accommodate the greater shipping, 200 feet more of docks will be constructed and new offices built.

The Great-West Life Assurance Company is to increase its facilities for handling loans in this field, having found that investment conditions are satisfactory both here and in Victoria. Mr. J. H. Brock, managing director, is paying one of his regular visits to the coast, and states that his company has been investing here ever since it entered the field in 1892 and has never lost a dollar. Now it is preparing to engage more vigorously than ever and will also lay out capital in Victoria.

◆

PERSONAL NOTES.

Mr. J. M. Jellett, of the staff of the Dominion Bank, Toronto, has been transferred to Vancouver.

Mr. John H. Towe, accountant, Bank of Toronto, Berlin, has been appointed manager of the Colborne, Ont., branch.

Mr. R. J. Robertson has been appointed a director of British Columbia Permanent Loan and Savings Company, in the place of Mr. R. H. Duke, deceased.

M. J. M. McDougall, K.C., of Hull, Que., has been appointed judge of the Supreme Court of the district of Ottawa, in place of the late Judge Champagne.

Mr. W. H. Harvey, manager of the Sterling Bank of Canada at Kerwood, Ont., has been transferred to Sebringville. His friends presented him with a handsome travelling bag and address.

Mr. Reuben W. Leonard, of St. Catharines, Ont., has been appointed chairman of the National Transcontinental Railway Commission, in succession to Honorable S. N. Parent, who resigned.

Honorable L. O. Taillon, postmaster-general in the Dominion government in 1896, and a former Premier of Quebec, will be the new postmaster of Montreal, succeeding the late Mr. H. S. Harwood.

Mr. B. G. McNabb, manager of the new business department Montreal Light, Heat & Power Company, was killed by the accidental discharge of his gun while on a hunting expedition at Lake St. Peter.

Mr. I. E. Segur, head of the Segur Refineries, Limited, which is putting up an oil refinery on Burrard Inlet, has returned to Vancouver after a trip through the east to inspect construction methods in operating refineries.

Lord Cowdry recently stated that a branch of Messrs. S. Pearson & Sons, of London, England, might be located in Toronto. This firm, of which Lord Cowdry is head, is one of the largest railroad and dock contracting companies in Great Britain.

Sir Thos. G. Shaughnessy, has been elected president of the Dominion Atlantic Railway. Mr. David McNicoll is vice-president and Mr. H. C. Oswald, secretary. At the annual meeting the shareholders elected Sir Thomas Shaughnessy, Mr. R. B. Angus, Mr. Thomas Skinner, Mr. David McNicoll and Mr. I. G. Ogden directors.

Mr. Dennis Murphy, ex-M.L.A., and Mr. D. M. Finnie, of Ottawa, director and assistant general manager respectively of the Bank of Ottawa, visited Vancouver recently. Mr. Murphy is, among others, a director of the Shawinigan Water and Power Company, Canada Cement Company, Canadian Railway Accident Company, Nipissing Mines Company, and also the Prudential Investment Company, Limited.

The Duke of Sutherland, who has completed a tour of Canada, intends promoting the immigration of Scottish and English farmers to the North-West. A tract of land comprising 2,500 acres has been secured in southern Alberta, near Clyde, on the line of the Canadian Pacific Railway. The second part of the immigration scheme is represented by 1,500 acres of land near Edmonton, to which his Grace proposes to send laborers from Scotland.

Mr. J. D. McArthur, railway contractor, of Winnipeg, and associates have acquired a charter for a railway extending from Edmonton to Fort George, B.C. The proposed line will traverse the richest portion of the Peace River district, entering British Columbia via Pine River Pass, north of Yellow Head Pass. It will be over one thousand miles long and will take the shape of two sides of a triangle whose apex will be at Pine River Pass, which has a low altitude. An exploratory survey party is now going over the route to secure data preliminary to undertaking the location work.

SEPTEMBER BANK STATEMENT

Reflects Crop Movement Activity—Loans and Deposits Continue to Increase

	September, 1910.	August, 1911.	September, 1911.	Year's Inc. or dec.	Month's Inc. or dec.
Deposits on demand	$273,529,461	$311,111,668	$313,584,893	+14.6	+0.7
Deposits after notice	545,630,667	575,740,956	577,591,045	+ 5.8	+0.3
Current loans in Canada	668,976,522	734,683,962	749,007,607	+11.9	+1.9
Current loans elsewhere	40,190,240	33,689,196	35,587,127	—11.4	+5.6
Call loans in Canada	62,428,576	65,106,110	67,717,991	+ 8.4	+4.01
Call loans elsewhere	103,534,884	101,713,820	93,517,076	— 9.6	—8.7
Circulation	87,256,332	90,630,530	97,197,176	+11.3	+7.2

The above are the principal items of the September bank statement. Increases occurred during the month in all the accounts noted with the exception of call loans abroad, which declined $8,000,000, or 8.7 per cent. The two largest gains were in domestic call loans and foreign current loans, the increases being $2,600,000 and $2,000,000, or 4.01 and 5.6 per cent. respectively. Current loans in Canada reflect the activity of the crop movement. That account gained $14,000,000, or 1.9 per cent. during the month. Deposits continue to grow at a rapid pace, those on demand and after notice both having increased by about $2,000,000, gains of 0.7 and 0.3 per cent. respectively.

Of the Loaning Situation.

The following table shows the loaning situation during the past thirteen months:—

Loans	Current in Canada.	Call in Canada.
1910—September ..	$668,976,522	$62,428,576
October	679,820,039	64,561,641
November	677,617,478	62,866,513
December	677,064,829	63,983,912
1911—January	682,506,695	60,200,781
February	689,234,781	59,132,692
March	710,604,072	58,369,712
April	712,032,758	57,832,690
May	708,093,677	57,709,853
June	717,869,386	61,507,268
July	723,765,358	65,339,288
August	734,683,962	65,106,110
September	749,007,607	67,717,991

Current Loans Greater.

Current loans in Canada last month were $80,000,000, or 11.9 per cent. greater than a year ago. Three times only in the past twelve months has this item exhibited a decline, and then but small ones. Domestic call loans at the end of September were $5,300,000, or 8.4 per cent. larger than in the same month of 1910. The lowest point to which this account dropped during the year was $57,709,853. There were six losses in this call loans item during the thirteen months under review.

The growth in the loan accounts is best seen in the following comparative table compiled by The Monetary Times:—

	On demand	After notice
1910—September .	$273,529,461	$545,630,667
October	280,838,612	549,016,725
November	289,759,025	551,113,835
December	280,910,695	544,220,710
1911—January	270,178,480	549,774,479
February	268,360,503	551,424,373
March	278,171,792	553,032,466
April	281,964,369	555,822,930
May	298,784,206	562,209,148
June	309,804,854	564,867,554
July	316,973,780	570,789,435
August	311,111,668	575,740,956
September	313,584,893	577,591,045

Savings Per Capita.

Deposits on demand were $40,000,000, or 14.6 per cent. greater last month than a year ago. Four times in the past thirteen months, they have shown a small decrease. Those after notice generally understood to be the people's savings were at the end of September $32,000,000, or 5.8 per cent. larger than a year ago. This account has declined but once in the past thirteen months, and then by less than $2,000,000. The average deposits per capita in Canada, in chartered banks and elsewhere, were recently estimated at $89. This was on a basis of 8,000,000 population, so with a population actually of little more than 7,000,000, the saving per capita will be larger. How the savings account of our chartered banks has grown in the past four years is vividly shown in the following table compiled by The Monetary Times:—

September.	On Demand.	After Notice.	Total.
1907	$167,069,497	$421,147,701	$588,217,198
1908	183,207,740	410,332,819	593,540,559
1909	239,967,052	474,103,799	714,070,851
1910	273,529,461	545,630,667	819,160,128
1911	313,584,893	577,591,045	891,175,938

With but one decrease in the four years period, the deposits after notice have increased from $421,000,000 to $577,000,000, gain of $156,000,000, or 37.05 per cent. Demand or commercial deposits have grown, without a single decline, from $167,000,000 in September, 1907, to $313,000,000 in 1911, an appreciation of $146,000,000 or 87.4 per cent. Total deposits four years ago were $588,000,000 and to-day are $891,000,000, a gain of $303,000,000 or 51.4 per cent.

	Sept., 1907.	Sept., 1908.	Sept., 1909.	Sept., 1910.	Sept., 1911.
Current loans in Canada	$578,207,277	$516,960,003	$560,206,621	$668,976,522	$749,007,607
Current elsewhere	25,794,092	26,994,946	32,981,183	40,190,240	35,587,127
Call in Canada	47,298,694	42,084,145	56,124,620	62,428,576	67,717,991
Call elsewhere	63,158,601	59,834,979	131,634,384	103,534,884	93,517,076

Some Big Increases.

Domestic current loans in four years have increased from $578,000,000 to $749,000,000, a gain of $171,000,000 or 29.5 per cent. Our call loans changed in the same period from $47,000,000 to $67,000,000, an improvement of $20,000,000 or 42.5 per cent. Both accounts exhibited marked losses in September, 1908, the tail-end of the trade depression and financial stringency. Since then, the gain has been steady and continued. Current loans abroad showed little variation in the four years period, the smallest amount being $25,000,000 in September, 1907, and the largest $40,000,000 in September, 1910. Foreign call loans exhibit considerable fluctuation. In September, 1907, the amount on call abroad was approximately $63,000,000; in September, 1908, $59,000,000; in 1909, $131,000,000; in 1910, $103,500,000; and in 1911, $93,500,000. Our flotations abroad were heavy in 1909 and 1910 and the industrial amalgamation movement was at its height in those years, both factors with some effect on loans abroad, although the earning power in the New York money market was naturally an important consideration.

Course of Deposits.

The following table illustrates the course of the deposits account:—

Work of Crop Movement.

The work of the crop movement is seen in the increase in current loans last month by $14,000,000 and apparently also by the withdrawal of $8,000,000 call loans from abroad. The beginning of October brought to the chartered banks the right to issue circulating notes in excess of their paid-up capital to the extent of 15 per cent. of their combined unimpaired paid-up capital and rest or reserve fund. This right expires on January 31st each year. At the end of September, according to the bank statement for that month, just issued, the circulation was within $8,000,000 of the legal limit, which meant a narrower margin by $4,000,000 than obtained at the same period last year. The note circulation of the banks increased $6,500,000 in September.

The liquidation of the Sovereign Bank continues slowly. The September statement shows notes in circulation of $35,890; total liabilities, $4,152,689; railway and other bonds, $1,000,000; total assets, $4,801,956. It will be recalled that a company was formed to take over the assets and liabilities of this bank. All the shareholders have not yet turned in their holdings to the new company.

The Banque Internationale du Canada will make its first appearance in the government bank statement for October, to be published in the middle of November.

T. C. BOVILLE,

Deputy Minister of Finance

WESTERN CANADA.

Business Outlook is Satisfactory—In the Wheat Markets.

Monetary Times Office,
Winnipeg, October 24th.

Unfavorable weather continues to attend the ingathering and threshing of the Western crop, and although every advantage is being taken of spells of good weather to finish the threshing, a large percentage of the crop has still to pass through the threshing machines. As the result of the bad harvest conditions, considerable depreciation has taken place in the quality of the grain, and it is estimated that the damage has resulted in a reduction in the wheat yield of nine million bushels. Manitoba has suffered practically no loss in yield, but the grade in many cases has been reduced, while the provinces of Saskatchewan and Alberta are the chief sufferers through decrease in quantity and falling off in grade.

Supplementary crop estimates published by the Manitoba Free Press to-day, after losses sustained by the recent bad weather put Western Canada's wheat crop at 169,725,000 bushels, the oat crop at 185,570,000, barley at 33,300,000, and flax at 7,820,000. The depreciation in wheat therefore, due to the delay occasioned by unfavorable weather, is about 8,925,000. Even with this decrease in the yield the West still stands to harvest the largest crop in its history, though the wet weather and frost has caused vexatious delays in the moving of crops.

Small Depreciation.

The above estimate was compiled from the reports of correspondents at over two hundred widely different points throughout the three prairie provinces, and the general trend of the reports received was to the effect that while the wheat has been materially reduced, the quantity has suffered a comparatively small percentage of depreciation.

As regards the provinces, Manitoba came out best in the showing, most of her crop having been cut prior to the bad spell while Saskatchewan, the largest wheat producing province, has suffered the most severe damage from the bad harvesting weather. But even there, the opinion prevails that only about two per cent. would remain uncut owing to frosts.

Reports from Alberta show that practically all the crop was cut, with the exception of a little late flax.

Business Outlook is Satisfactory.

Business throughout the West continues satisfactory, although weather conditions are interfering somewhat with active trade. There is a liberal movement in most lines of staple merchandise, and the volume of general business shows encouraging increases. The location of new industries in Winnipeg and the continued building activity in all Western cities are not without their effect in sustaining the excellent trade movement.

The tone of the wheat market has been strong throughout the week, and there is a decided firming up in sentiment and a tendency to advance in value. Foreign news and statistics the past week were generally bearish, but these were ignored in view of the weather conditions over the West and the reduction in the volume of choice milling wheat on both sides of the Canadian line. The public is also showing a much larger interest in the trade, and the result is a broadening market and advance in prices. It is a hard market to guess, however, as one grain expert puts it, but much will now depend upon the progress of the Argentine and Australian crops, which are now at the critical stage, as any deterioration in these crops before harvest is reached would have a strong effect on world's prices.

Local Wheat Market Busy.

Our Winnipeg market was active and strong all week. Every grade of cash wheat was wanted, the higher grades being specially in demand for our milling trade, while all grades from 3 Northern downwards were in request for export. Offerings were more liberal, farmers not showing the disposition to hold, that was noticeable lately. Receipts are exceedingly heavy, and a record was established at Winnipeg on the 22nd, when 1,148 cars passed inspection. The quantity of contract grade coming along is very small. At this date last year there was in store at Fort William over six million bushels of contract wheat, while this year there is only half that amount. As there will be an enormous quantity of low grade wheat in the Canadian West, there should be a heavy demand from Europe for this wheat, looking to the large shortage in the Russian crop.

INSURANCE HAZARD OF HOME LIFE.

The Travellers' Insurance Company of Hartford has compiled a table showing the causes of accidents on which claims were paid by the company last year. The table is in the form of a percentage without regard to employment.

The high percentage of accidents while at home and walking is most noticeable. It would appear twenty-five times more dangerous to stay at home than to take a steamship journey. The table is as follows:

At home	25.9
Pedestrians	18.2
Automobiles	11.1
Recreation	11.0
Horses and vehicles	9.9
Street car travel	7.2
Railway travel	4.2
Bicycles	1.2
Steamship travel	1.0
Miscellaneous	10.2

The solution of the home hazard is apparently to live on a steamship.

◆

NEWS AND NOTES.

Chief Justice Sir William Meredith, who was appointed by the Ontario Government as a commissioner to make investigation regarding the laws of compensation to injured workmen, will hold a public sitting on October 23rd, in the Parliament Buildings, Toronto.

The Insurance Company of the State of Pennsylvania, Philadelphia, has been licensed to do business in Manitoba. The Spring Garden Insurance Company of Philadelphia has amalgamated with the Insurance Company of the State of Pennsylvania, which company has re-insured all outstanding policies of the Spring Garden Insurance Company.

President Plummer and ten directors of the Dominion Steel Corporation visited Sydney recently on an inspection tour of the steel plant and mines. The directors' party consisted of President Plummer, Sir H. Montagu Allan, Messrs. Gel. Caverhill, Wm. McMaster, Frederic Nicholls W. G. Ross, J. R. Wilson and Mark Workman, accompanied by Mr. Cameron, secretary of the company, and Mr. J. P. McNaughton, general sales agent.

The Hamilton Fire Insurance Company of Hamilton, Ont., is circulating a letter quoting speeches made at the Canadian Manufacturers Association Convention, illustrating the desire to support Canadian institutions. "You carry fire insurance," it continues. "We are a Canadian company in that business issuing a policy without any red ink variations to the Ontario statutory conditions and having, according to the government standard, a surplus over all liabilities to the insuring public and our rates are made consistent with the hazard."

In the most earnest way, Mr. Wentworth, the secretary of the National Fire Protection Association, combats the practice of sustaining the office of fire marshal with insurance companies' money. The people must not, he says, be upheld in the ignorant notion that underwriters are the only people affected by the fire waste. "I despair," he says, "of the American people ever being awakened to their impoverishment by mere preaching. We must bring into operation a more salutary educator, a much sterner schoolmaster, than the mild-mannered speaker on the fire waste; we must place responsibility for fires; we must come to consider every man who has a fire a public offender until he can prove to us that he is not responsible. To do this every State must have an official investigation of its fires. The fire marshal is an imperative public officer. He should be an educator, a statistician and a prosecutor."

The British Canadian Trust, Ltd., is a Dundee company, formed in March last, with a capital of £250,000, to do business specifically in Canada, the United States, Mexico, Brazil and Argentina, but, as the title indicates, Canada is the principal working area. The first accounts, made up to August last, show that £200,000 share capital has been issued—half in ordinary and half in 4½ per cent. preference shares—and is fully paid. When this capital had been invested the directors accepted money on short term debentures and on deposits, and at the date of the accounts £93,020 had been received in this form. The investments then stood at £294,969, £173,208 (59% of the total) being in mortgage loans on properties in Western Canada and in the United States, and the balance (£121,941) in investments in bonds and stocks, chiefly in Canadian, American and British railways.

NEW BRUNSWICK.

Lumber Cut is Reduced—Western Real Estate Company Purchases East St. John Property.

(Staff Correspondence.)

St. John, N.B.,
October 17th.

The lumber cut in New Brunswick will be considerably reduced this winter. The markets during the past year have not been profitable. It is worthy of note that the revenue derived by the province from its crown lands during the past year has been the largest on record. Already the receipts are more than $495,000, and the surveyor-general estimates that the total for the year will be about $520,000. This is nearly $200,000 more than the revenue received from crown lands four years ago. The total scale of logs this year will show collections on about 320,000,000 superficial feet compared with 280,000,000 feet last year. This is from crown lands alone, and large quantities of lumber are cut from private lands.

The fishermen of New Brunswick have had a rather poor year. There was a good deal of stormy weather with considerable destruction of fishing gear, and the dog-fish were much more plentiful than for some seasons past, interfering very much with the cod and haddock fisheries. Fortunately the run of sardine herring along the shores of St. John and Charlotte counties was unusually large this fall, and these little fish found a ready sale at a good price to vessels which conveyed them to the sardine factories at Eastport and Lubec. It is stated that in five days from August 2 to 7 sardine herring valued at $6,348 were shipped from Lepreaux to the Maine ports.

Press Association Visits Oil and Gas Wells.

The members of the Maritime Press Association last week visited the oil and gas wells in Albert County, not far from Moncton. They saw oil pumped from the wells and were given an illustration of the force of gas in others. It was stated that there was a flow of 12,000,000 cubic feet of gas per day from one well alone, and that the total daily flow available amounts to 60,000,000 cubic feet. This means that much cheap power is available there for heat, light and power purposes. The gas has been piped to Moncton, where a street railway is also nearly completed, and it is announced that the gas will be installed in Moncton this fall and the street railway in operation within the time stipulated in the contract. Moncton anticipates rapid industrial development as a result of its proximity to the gas wells.

The past summer has witnessed a complete transformation of the town of Campbellton. By winter time there will be very few traces of the great fire. Substantial residences are taking the place of the old shacks, and public buildings are rapidly nearing completion. The new town is much better laid out than the old one, and the buildings of a much better character. There are no idle men in the town, and the general condition of affairs is said to be prosperous.

Western Land Company Purchases St. John Property.

A land company, whose headquarters is in Saskatoon, has made some purchases of real estate at East St. John, where important developments are expected in connection with the terminals of the Grand Trunk Pacific Railway and other projected works. The fact that this western company is making an investment in St. John is regarded as an evidence that St. John is expected to enjoy an era of development as a national port and as an industrial centre.

Messrs. Ganong Brothers, of St. Stephen, now employ about three hundred and fifty people, and have increased their manufacturing business in confectionery from 20 to 25 per cent. this year. Their output for the year amounts to several million pounds of confectionery, and they are shipping it in increasing quantities to the West.

A Buffalo firm, manufacturing fertilizer, has established a branch factory at St. Stephen, N.B., to supply farmers in the St. John River section of the province.

A company known as the Eel River Light, Heat and Power Company, Limited, proposes to develop power from that river about forty miles above Fredericton and supply Fredericton, Woodstock, St. Stephen and McAdam. They have had expert engineers looking over the proposition. It is stated that the Canadian Pacific Railway has agreed to take one hundred thousand tons per year of Grand Lake coal, commencing next fall, when it is expected the branch railway from the coal fields to Fredericton will be completed, thus bringing them into connection with the whole Canadian Pacific Railway System.

The cotton mills at St. John have not been taken over by Canadian Cottons, Limited. There was a hitch in the proceedings, and the prospective purchasers declined to complete the deal. The directors announce they will continue to run the mills in the interests of the stockholders, and as the situation of cotton is now improved, they anticipate a profitable year.

W. E. A.

FROM COAST TO COAST.

Vancouver has accepted an option to purchase 4,000 acres of timbered land in the watershed of the Capilano River with the idea of conserving the water supply. A proposition is being entertained also to purchase 5,000 acres in the Seymour creek watershed at $17,000 for a similar purpose.

Directors appointed for the year of the Vancouver, Victoria and Eastern Railway & Navigation Company, under which charter the Great Northern operates in British Columbia, are: Messrs. L. W. Hill, president; W. H. Barker, E. E. Evans, A. H. MacNeill, K.C., K. J. Bruns, F. J. Bayfield, and J. E. Brown, the latter of Seattle.

Since May of the present year the Credit Foncier Franco-Canadien has negotiated in France $8,000,000, of which $2,000,000 has just been secured. Respecting the flotation made recently in France the additional $6,000,000 received this year has already been loaned, and the company has money to offer to borrowers as a result of the sale of debentures in France to the extent already referred to. For loans in the west there is available a large amount of French capital. At the end of 1910 the total loans of the Credit Foncier amounted to over $27,000,000, and up to date they are over $30,000,000.

"It is impossible to be too sanguine as to the future development of Canada. It is a splendid country, and it is going ahead as fast as anyone could desire. The more it increases in strength the greater will be the accession of the strength of the Empire. I am glad to be back in England, after seven eventful years. They have been seven happy years in the land of open sunshine, and although glad to be back among those who are carrying practically single-handed the whole burden of the British Empire, I confess I was sorry to leave the Dominion. As to the Canadian climate I can only say I thoroughly enjoyed it, whether in summer or winter."—Earl Grey at Liverpool.

An amalgamation has taken place of the International Association of Accident Underwriters and the Board of Casualty and Surety Underwriters in the United States. Mr. John T. Stone was chairman of the Merger Committee; he and Mr. W. F. Moore now are permanent chairman and secretary of the new body, which is known as the International Association of Casualty and Surety Underwriters. Thirty-six companies constitute the new body, which has seven sections. These are: 1. Personal Accident and Health; 2. Fidelity, Guaranty and Surety; 3. Liability; 4. Plate Glass; 5. Burglary; 6. Assessment Accident; 7. Steam Boiler and Fly-Wheel. The officers are: President, Wm. Bro Smith of the Travelers, Hartford; secretary, F. Robertson Jones of the Fidelity and Casualty, New York; treasurer, G. E. Taylor of the New Amsterdam Casualty, New York; librarian, H. B. Meininger of the German Commercial, Philadelphia; executive committee, Edson S. Lott, H. G. B. Alexander, John Emo, Chas. G. Daniel and Oscar Ising. A banquet was given, presided over by Edson S. Lott, which was notable for the fact that no speeches were made.

Fire Chief Tremblay, Montreal, has issued his annual warning to citizens regarding the danger of fires during the cold weather. His recommendations are:—1. Not to allow the accumulation of rubbish of any kind especially in cellars and near stoves, furnaces or heating pipes. 2. To deposit ashes in metal boxes, as prescribed in the municipal by-laws, instead of placing them on wooden floors as is too frequently done. 3. To turn off the electric current switch before leaving premises for night to avoid dangerous short circuits, principally in rainy and snowy weather. 4. To avoid placing inflammable goods too close to gas jets, etc. Gas brackets generally should be immovable. 6. Not to have lamps turned low and left burning all night, as they are liable to cause explosions. 6. Never leave your children alone in the house where there are matches or hot stoves or furnaces within reach. By-laws prescribe placing ashes in metal receptacles, the setting of steam or hot water furnaces or boilers on metal foundation, etc., and forbid all accumulation of rubbish, etc., the piling of merchandise, etc., in windows, doors, etc., and every person violating them will be immediately prosecuted.

PLAN FOR MONETARY LEGISLATION.

Aldrich Scheme is Revised—National Reserve Association with Big Capital is Proposed.

According to a Washington despatch, former Senator Nelson W. Aldrich, of Rhode Island, has submitted to the National Monetary Commission, of which he is chairman, a revision of his plan for monetary legislation. The commission may use it as the basis of its recommendations to Congress. The basic principles of the revised plan are substantially the same as those embodied in Mr. Aldrich's first proposal sent to the commission last January, which he said he expected would serve as a basis for national discussion. Important phases which were then unsettled and those which have since been evolved are treated in the recommendations sent to the commission to-day. Most of the questions are re-handled with great detail as the result of discussion and conferences which have been going on since the plan was first suggested.

National Reserve Association.

Briefly, the plan still provides for the organization of the national reserve association, with capital of approximately $300,000,000, in which the United States Government and the banks owning shares in the association shall be the only depositors. The plan of dividing the United States at first into fifteen financial districts remains unchanged. In each district the banks shall form local associations of their own, which in turn will be represented in the branches and finally in the central organization through a system of election of directors, which, it is said, will make it impossible for any section or set of bankers to control the whole.

To provide for the $730,000,000 of 2 per cent. Government bonds now owned by the national banks and used as the basis of the note circulation, which are to be absorbed by the reserve association, the following plan is proposed:

Will Exchange Bonds.

Upon the application of the reserve association the secretary of the Treasury shall exchange the 2 per cent. bonds, which the association will buy from the banks at par and accrued interest, for a new issue of 3 per cent. securities, payable 50 years after the date of issue.

The reserve association will pay to the Government a special franchise tax of 1½ per cent. per year on the amount of such bonds. As the Government's actual interest charge on the 2 per cents. is not actually 1½ per cent. since the banks pay back a half of one per cent., as a tax when the bonds are used as the basis of note circulation, this will reimburse the Government for the extra interest it will be called upon to pay as a result of exchanging the 2's for 3's.

Interest Bearing Public Debt.

One effect of the exchange will be to enable the Government to provide permanently for a large portion of the interest-bearing public debt at a net interest charge of 1½ per cent. This arrangement proposes a solution of what many financiers declared the greatest obstacle to the plan. It disposes permanently of the bond-secured currency without loss to the Government and without imposing upon the reserve association the ownership of the $730,000,000 2 per cent. bonds.

◆

RUSSELL MOTOR CAR COMPANY'S REPORT

The report of the Russell Motor Car Company, formerly the Canada Cycle Company, shows that for the year ended July 31st, the net profits were $177,529, which is slightly over 22 per cent. on the former capitalization of $800,000.

The directors' statement to shareholders reports an increase in the bicycle, the skate, and the motor departments at home, but the Australian business failed to show any increase. It is stated that during the year the factory was operated to its full capacity.

The financial statement shows underwriting and other expenses in connection with the $800,000 preferred stock issue to have been $67,466.

The balance sheet shows accounts and bills receivable $543,205, with accounts and bills payable, unsecured, $602,136. There is cash on hand $46,430. In the statement of assets the item "patents, trademarks, good-will, etc.," is placed at $261,616.62. Seven per cent. dividends are being paid on the common and preferred stock

LLOYD'S BANK OF CANADA.

Big English Institution is Taking Further Interest in the Dominion's Affairs—Its Important Figures.

As a further indication of the interest of Lloyd's Bank of London, in Canadian affairs, it is interesting to note that this well known institution has become a regular advertiser in The Monetary Times. It will be recalled that in June, action was taken by Lloyd's Bank, Limited, when at a special meeting the articles of the association were altered to "permit of the opening of branches or auxiliary institutions in New York, Canada, Paris and Hamburg, or to acquire interests in those places."

There has been some discussion as to how Lloyd's Bank, which has been concerned in many Canadian flotations in London, would enter the Canadian banking field. It could organize a new corporation in this country, the parent bank contributing the capital, or it could acquire control of one of the existing banks with a Canadian charter. It might also acquire an interest in the Dominion's banking field by purchasing a block of stock in one of our banks.

Large Authorized Capital.

The authorized capital of Lloyd's Bank is £30,000,000 divided into 600,000 shares of £50 each. Five hundred and twenty-four thousand and fifteen shares, or £26,200,750, has been subscribed, and £4,192,120 is paid up, being £8 per share on 524,015 shares. Though Lloyd's Bank represents some of the oldest private banks in Great Britain, as a joint stock company it dates back to 1865 only, being one of the results of the passing of the Limited Liability Act of 1862. The nominal capital was fixed at 40,000 shares of £50 each, of which 25,000 shares were issued, and not more than £12 10s. a share was to be called up. Lloyd's occupies the position of pioneers of bank amalgamations and absorptions, and it has taken over more businesses than any other concern. While it has not purchased every business that has been offered to it, no opportunity of securing sound businesses has been lost.

In 1884, entrance into London business was obtained by the acquisition of the businesses of Messrs. Barnetts, Hoares and Company, and Messrs. Bosanquet, Salt and Company, and it was not until this time that its career of expansion made a start. In 1865 the number of offices was 14; by 1880 it had increased to 45, and by 1884 to 53. But within 16 years from that date the number mounted up to no less than 312, and in 1903 to 411, while at the present time the number is 600. Another proof of the growth is seen in the deposits. At December 31, 1865, these amounted to £1,166,160. In twenty years' time they had increased to £9,644,229. In a further ten years they had trebled in amount, reaching £28,786,096. By 1899 they had risen to £39,926,898. As a result of the important absorptions in 1900 the deposits rose to £51,017,342. A steady rise followed, and at December 31, 1910, they stood at £78,116,468, the largest possessed by any bank in the United Kingdom.

Liabilities and Profits.

At the end of April last the bank's liabilities to the public amounted to £81,658,871. The proportions of its assets to liabilities were: Cash, 16.9 per cent.; investments, 13.4 per cent.; money at call, 9.2 per cent.; discounts, 8.4 per cent.; and advances, 54.9 per cent.

The profits earned by the bank are substantial, though not excessive considering the amount of labor necessary to secure them. In 1887, the bank's profits reached £129,654, the sum available for distribution being £126,373. This enabled a dividend of 15 per cent. to be paid. In 1896, the divisible profit had increased to £326,941, and the dividend to 15⅜ per cent. In 1899, the profits first exceeded the half-million, the divisible balance for that year being £513,833. The highest profits reached were those for last year, when a net working profit of £1,036,310 was reported, which was reduced by income tax payments to £982,102. This bears a proportion to the paid-up capital of 23.5 per cent., or, if the reserve be taken into account, of 13.7 per cent. The total working resources of the bank, consisting of capital, reserve, deposits, and acceptances, are £93,515,536, and the proportion of shown net profits to this sum is 1.05 per cent.

◆

The following companies operating under Manitoba charters have increased their capital stock:—Manitoba Glass Manufacturing Company, from $300,000 to $1,000,000; D. E. Adams Coal Company, from $100,000 to $500,000. The Canada Loan and Realty Company's capital has been increased from $100,000 to $500,000.

ONTARIO HYDRO-ELECTRIC COMMISSION'S FINANCES.

Chairman Beck Presents Figures Showing Present Position—Charges Made Against Capital.

Figures as to the financial position of the Ontario Hydro-Electric Commission have been announced by Hon. Adam Beck, chairman of the commission. The total estimated cost of the scheme was $4,006,927, and the line has been completed at a total investment of $3,921,167.97, with all interest charges paid up to November 1st. As apparent from the figures, there is a balance in hand of $85,760, and Mr. Beck said that not more than one-half of this amount would be required to cover all the construction and maintenance charges for the service for the fiscal year beginning November 1st, 1911, and ending November 1st, 1912.

Twenty-Eight Municipalities Have Made Contracts.

The service began with 12 municipalities taking 24,000 h.-p.; to-day 28 municipalities have made contracts for 33,000 h.-p., and have become tributaries to the enterprise. Almost every week municipalities are voting on the power question, and the service is increasing very much more than they had anticipated, said Mr. Beck. Computing their estimates on the present consumption and on the probable new contracts which will be assumed during the coming year, Mr. Beck said they were submitting to the Government a statement that the average load of power for 1912 will be 19,470 h.-p. On this basis of calculation, the total estimated revenue of the Hydro-Electric service for 1912 (that is, from November 1, 1911, to November 1, 1912,) will be $463,828.

Extra Power Was Sold.

The total average load of power carried for the past year was 13,470 h.-p., the total amount of power paid for at the Falls being 12,100 h.-p., so that enough extra power was sold to cover the cost of all line and transformer charges. Contrary to their original intention, Mr. Beck said, the charges had been made against capital instead of sinking fund, for the plants installed up to November 1, next. Thereafter the levy will be made against the sinking fund. But, Mr. Beck remarked, should any municipality desire it, the commission would waive these charges against sinking fund for one or two years more so long as the charges were met in 30 years' time. Municipalities that joined the service in 1914, under the 25 years' contract, would be required to pay an interest of 2.4, instead of 1.8, under the 30 years' contract, on sinking fund.

ANOTHER BRANCH FOR TOUCHE & COMPANY.

Messrs. George A. Touche & Company, chartered accountants of London, England and New York, have recently opened a branch office in the Metropolitan Building, Vancouver, where they have placed Mr. Campbell H. D. Robertson, A. C. A., in charge. This firm is already established in Toronto and Montreal. Mr. Touche, the head of the firm, represents one of the London constituencies in the Imperial Parliament, and is a well-known London financier, largely interested in the industrial development of this country. This firm announce that they have assumed as partners, Mr. Malcolm H. Robinson, A. C. A. (England and Ontario); Mr. J. Leonard Apedaile, C. A. (Scotland), and Mr. Campbell H. D. Robertson, A. C. A. (England), resident respectively Toronto, Montreal and Vancouver.

CANADA'S TRADE.

Trade returns for the six months ended Sept. 30, of the current fiscal year, indicate an increase of nearly $40,000,000 in the total trade of the Dominion for that period as compared with the first six months of the previous fiscal year, the figures being $400,270,855, as against $360.277,276. These include imports and exports of both Canadian and foreign products. The six months' imports amounted to $258,406,094, an increase of $35,000,000. Exports of Canadian products to $129,606,982, an increase of $2,000,000, and exports of foreign products from Canadian ports $12.257,779, an increase of $3,000,000. During the month of September the total trade increased by over $5,000,000 as compared with September, 1910.

THE MOLSONS BANK.

In commenting upon the annual report of The Molsons Bank for the year ended September 30th, 1911, it was stated that the "Bank's" deposit now amounts to $1,041,000,000, a much larger total than last year by $81,000,000. These figures obviously referred to all the chartered "banks'" deposits.

STERLING TRUSTS CORPORATION.

For over a year the members of the Sterling Trusts Corporation with headquarters in Regina, planned the details of the organization now completed. Two phases of the trust company demand great care,—firstly, the selection of a competent board of directors and an efficient management; secondly, the form of charter sought.

In choosing directors, a trust company must first have regard for the safety of its investments, choosing men of personal integrity and those whose experience fits them to handle the unlimited amount of detail that devolves on companies of this nature. The Sterling Trusts Corporation has as president, Mr. Edward Brown, of Winnipeg, known to all westerners more particularly as president of Browns' Limited, of Portage La Prairie; also president of The Canada West Securities Corporation; president of the British Northwestern Fire Insurance Company; vice-president of The William Pearson Company, Limited; director of The Netherlands Trans-Atlantic Mortgage Company, and director of The Western Canada Accident & Guarantee Insurance Company. The first vice-president of the company is the Honorable Amedee E. Forget, who was until last year Lieutenant-Governor of Saskatchewan since its formation as a province, and who was Governor of the Northwest Territories for ten years previous to 1905. He is now a member of the Senate of Canada and a director of the Prudential Investment Company, Limited. The long and prominent association of these two men with the development of the Middle West endorses any company with which they are associated. The second vice-president is Mr. Fred N. Norton, a lumberman of British Columbia and farm owner of South Saskatchewan, who has also large interests and many associations in Wisconsin. Among the other directors, Mr. J. W. Scott, of Listowel. Ontario, is known as a man whose financial interests are large and diverse. He is at the head of the banking firm of Scott & Sons, of Listowel, and is vice-president of the Continental Life Insurance Company, and director of The British Mortgage Company. The other members of the board are all Regina men, known to several Eastern companies for whom they have been making loans in Saskatchewan for some years back, and for whom the new trust company will continue to act. The Regina members of the board are:—Mr. W. M. Martin, M. P., and member of the law firm of Balfour, Martin, Casey & Blair; also director of the Canadian Guarantee Trust Company of Brandon, Manitoba; Mr. A. Clark, director of the Security Loan Company; Mr. H. L. Johnson, director of the Security Loan Company; Mr. P. Brockman, director of the Sterling Loan & Securities Company, Limited, and Mr. H. Tasker. director of the Security Loan Company, director of the Sterling Loan & Securities Company, Limited, and president of the Plainview Farming Company. Mr. Charles F. Millar, formerly of the Canadian Bank of Commerce, and well known in Toronto, is also a director.

The management of the new company will be vested in the executive committee which is composed of Mr. A. Clark, Mr. Arthur H. Tasker, Mr. Edward P. Brockman and Mr. H. L. Johnson. These men have been prominent in the Western loan field for many years and will be continuing the business they have established and conducted through the Security Loan Company, of Regina.

The charter of The Sterling Trusts Corporation as granted by the Parliament of Canada is conservative in its nature and distinctive from many of those granted by provincial legislation. We are told that, from the inception of the company, the members of the Sterling Trusts Corporation have had the advice and support of Eastern financiers.

On October 16th the company had $614,000 subscribed in its capital stock, of which $120,000 was already paid up, although the company did not commence business until early in the same month. Within a short while, the paid-up capital will be increased by payments on the capital now subscribed. A public issue of stock is being made in order to increase the security of the company's trust funds and also for the purpose of enlisting the interest of the general public, having regard for the trust business that will thus be influenced.

The company has over three hundred loan agencies in Saskatchewan and will confine itself to first mortgages on improved farm lands; no loans are made in excess of forty per cent. of a carefully inspected and conservative valuation.

WORKMEN'S COMPENSATION IN ONTARIO.

Sir William Meredith Begins Inquiry—How the British Act Worked Last Year.

Chief Justice Sir William Meredith held his first session this week at Toronto to receive suggestions from the various interested organizations for the proposed compensation to injured workmen act upon which he is working. The necessity for a radical change in the act was emphasized by the labor men, who for the most part were strongly in favor of the British system of arbitration. The Commissioner while expressing no definite preference, appeared to favor the system in the State of Washington, where injured workmen are given compensation out of a fund raised by the State by a tax upon the employers.

To Eliminate Waste.

Mr. F. W. Wegenast, representing the Canadian Manufacturers' Association, said that the members of the association were also anxious to secure proper legislation.

"The chief concern of the manufacturers is to eliminate waste," he said. "To get rid of the ambulance chasing lawyer and the dividend collector of the liability insurance company."

Sir William in closing the session pointed out the weakness of the English law in that it gave no absolute guarantee that the workman would receive his pension or compensation in the event of the employer becoming insolvent.

As to Washington State Law.

The legislation of the State of Washington made the payment a State matter, but he was not able to say whether the Legislature would care to go that far. He pointed out that the workmen should be asked to consider another phase of the question: the possibility that the employers might be handicapped in competing with those of another province where no compensation laws were in force.

How the British Act Worked.

In this connection, it is interesting to note that particulars of the payments and proceedings under the Workmen's Compensation Act and the Employers' Liability Act during 1910 were issued the other day by the Home Office in the form of a blue book. The report shows that returns have again been collected from the seven great groups of industries—mines, quarries, railways, factories, harbors and docks, constructional work and shipping. These returns furnish materials for a general review of the working of the Compensation Act of 1906 in relation to the main body of the industries of the United Kingdom. The number of employers included in the returns was 134,820, and the aggregate number of persons employed coming within the provisions of the Act was over seven millions, of whom nearly five millions come under the heading "factories." In these industries, in the year 1910, compensation was paid in 3,510 cases of death and in 378,340 cases of disablement. The average payment in case of death was £153, in case of disablement £5 14s.

Charge for Compensation.

The annual charge for compensation, taking the seven groups of industries together, averaged 7s. 8d. per person employed. It was the lowest in the case of persons employed in factories, being only 4s. 3d. per person; in the case of railways it was 8s.; it rose to 10s. 3d. in quarries, to 12s. 5d. in shipping and to 12s. 10d. in construction work; it was highest in mines, 20s. 2d., and in docks 20s. 6d. It is noteworthy that in the coal mining industry the charge arising under the Act works out at about 0.9d. only per ton of coal raised.

Total Compensation Paid.

The total amount of compensation paid under the Act in the seven groups of industries during the year was £2,700,325, as compared with £2,274,238 in 1909. When to this is added the costs of management, commission, legal and medical expenses, the total charge borne by the seven industries probably amounts to nearly £4,000,000.

The foregoing figures include, in addition to accidents, cases of the various industrial diseases (now twenty-four in number) included under the Workmen's Compensation Act. Compensation was paid, in the seven groups of industries, in 36 cases of death from disease and in 4,438 cases of disablement. The bulk of these cases, 85.2 per cent. of the total, occurred in the mining industry, and were due mainly to nystagmus, beat hand, beat knee and beat elbow. Of the remainder, 519 cases had lead-poisoning.

Notes of Court Proceedings.

Figures are given relating to the proceedings in the Courts, and these show that only a very small proportion of the claims under the Act become the subject of litigation. The total number of cases under the Workmen's Compensation Act which were taken into Court in England and Wales in 1910 was 6,666; many of these, however, were applications for dealing with allowances that had already been granted, and many were settled out of Court or otherwise disposed of, so that the total number of original claims for compensation finally settled within the cognizance of the Courts was only 3,862. In Scotland the corresponding figures were 1,514 and 486; in Ireland 1,034 and 658 respectively. Of the 5,006 cases settled judicially under the Act in the United Kingdom, the decision was in favor of the applicant—that is, the workman—in 3,938, or 78.6 per cent. The total number of cases under the Employers' Liability Act, 1880, taken into Court in the whole of the United Kingdom, which was 604 in 1907, declined to 406 in 1908, and to 298 in 1909, and in 1910 fell still further to 217. These figures show clearly the tendency of the remedy provided by the older Act to fall into disuse since the Act of 1906 came into full operation.

SUIT AGAINST LLOYDS.

Farmers Bank Has Entered Action to Recover Large Sum on Guaranties on General Manager Travers.

The Farmers Bank has entered action against 42 members of Lloyds to recover a sum on guaranties on general manager W. R. Travers.

The claim endorsed on each of the two writs is as follows:—

"The plaintiff's claim is on a policy of insurance for £5,000 dated the 29th day of December, 1909, whereby the defendants, each on his own part and not one for the other, bound themselves to make good to the plaintiff all such losses arising from theft, robbery, forgery, or defalcation by an employee of the plaintiff either at its head office or at its branches in excess of a guarantee bond given by the United States Fidelity and Guaranty Company on such employes, and the several defendants promised to pay to the extent of the amount underwritten by them on said policy only such losses as were not recoverable from the said United States Fidelity and Guaranty Company under its bond on such employes, and it was declared and agreed that in the event of loss under the said policy, payment should be made in Canadian currency at Toronto and that in apportioning the loss, if any, the sum insured should be calculated at the rate of $5 for every pound sterling.

Sum Sought to be Recovered.

The total amount sought to be recovered from the defendants is the sum of $25,000, being a sum less than the amount of losses incurred by the plaintiff arising from theft and defalcation of W. R. Travers, the general manager of the plaintiff during the term of such policy, and one of the employes referred to in the said policy after taking into account the amounts recoverable from the said United States Fidelity and Guaranty Company."

Furnished with Loss Proofs.

The writ sets forth the share under-written by each of the defendants. For instance:—

"By the defendant, C. E. Heath, one-seventh of £1,000 and one-half of £1,000.

"By the defendants, J. S. Follett, Bernard Head, G. Heath, A. D. Whatman, A. Burns and M. Evans, each one-seventh part of £1,000," etc.

The bank claims interest at 5 per cent. from January 19th, 1911, being 30 days after the defendants were furnished with proofs of losses.

Owing to the number of writs to be served they have been printed and will be served on Lloyds solicitors in London. The place of trial is Toronto.

WINNIPEG RAILWAY SOLD.

All holdings of the Winnipeg Electric Company, which supplies gas, power and street railway services to Winnipeg and vicinity, have been purchased by the E. R. Reese Engineering Company, an American concern. The details of the deal have yet to be arranged. The company, it is stated, will build rural lines throughout the Province. The Winnipeg Electric Company is one of the Mackenzie & Mann enterprises and the city of Winnipeg were negotiating for its purchase. Satisfactory terms, however, could not be reached and a few days ago the private company which has now acquired control stepped in and made an offer which has been finally accepted.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Bass River, Kent County, N.B.—Buildings of Mr. David Clark destroyed. Loss about $5,000. Origin unknown.

Ymir, B.C.—October 20th.—Ymir Mines, Limited, destroyed. Loss about $20,000. Origin unknown.

Nanton, Alta.—October 16th.—Building of Mr. A. R. C. Danning destroyed. Loss and origin unknown.

Victoria, B.C.—October 4th.—Store of Messrs. L. & G. A. Overton badly damaged. Loss and origin unknown.

Exeter, Ont.—October 20th.—Grand Trunk railway depot destroyed. Loss about $2,500. Origin, supposed incendiarism.

Wyoming, Ont.—October 19th.—Frame building of Mr. S. Saunders and adjoining buildings destroyed. Loss about $500. Origin unknown.

North Hartley, Que.—October 23rd.—Power house of the North Hartley Electric Light Company destroyed. Loss about $10,000. Origin unknown.

Woodstock, Ont.—October 19th.—Barn of Mr. Geo. Patterson, 11th line, East Zorra, destroyed. Loss about $4,000. Origin, suspected incendiarism.

Rigaurd, Que.—October 19th.—Building of Curtis & Harvey, high explosive factory, destroyed. Four men killed. Loss unknown. Origin, explosion.

Ripley, Ont.—October 23rd.—Barn of Mr. Archibald McAuley, 5th concession, Huron Township, destroyed, also contents and two horses, calf, pigs and 40 tons hay. Loss about $5,000. Origin, lightning.

Ottawa, Ont.—October 20th.—Residence of Mr. Wright, McKay's lake, Rockliffe, destroyed. Loss about $4,000. Origin unknown. October 23rd.— Ottawa Hunt clubhouse badly damaged. Loss about $4,000. Origin, overheated pipes.

Montreal, Que.—October 20th.—Contents and barn of Mr. Joseph Roy, St. Lambert, destroyed. Loss about $2,000. Origin, supposed careless tramp. October 25th.—Dry goods store of Messrs. C. Massie & Company, 141 Bernard Street, destroyed. Loss about $7,000. Origin unknown.

Toronto, Ont.—October 20th.—Building 786 King Street West damaged. Loss about $3,000. Origin, supposed incendiarism. October 21st.—Freight cars foot of Bathurst Street damaged. Loss unknown. Origin, collision. October 19th.—Premises of British American Oil Company, Cherry Street, damaged. Loss heavy. Origin, gasoline explosion.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Mull, Ont.—Mr. Neil Watson sustained loss of $100 on stock and $1,500 on machinery, etc. Insured with Crown for $1,500.

Montreal, Que.—The Star Shoe, Limited, sustained loss of $10,000. Insured with the following companies: Phœnix of London, Caledonian, Guardian, London and Liverpool and Globe, Hartford, $14,700; Royal Exchange, $7,000; Dominion, $2,200; Guardian, $5,800. Total, $27,000.

DEBENTURES AWARDED.

Hastings, Ont.—$6,000 5 per cent. 20 instalments to Mr. R. Walker, Warkworth.

Mimico, Ont.—$7,500 5 per cent. 30-years to Messrs. C. H. Burgess & Company, Toronto.

Minnedosa, Man.—$4,000 5 per cent. 30-years to Messrs. National Finance Company, Toronto.

Cornwall, Ont.—$5,225 5 per cent. 20 years to Messrs. Ontario Securities Corporation, Toronto.

Ingersoll, Ont.—$25,000 4½ per cent. 30-years to Messrs. Dominion Securities Corporation, Toronto.

Wainwright, Man.—$34,300 5½ per cent. 20 instalments to Messrs. H. O'Hara & Company, Toronto.

Raleigh Township, Ont.—$10,755 5 per cent. 10-years to Messrs. C. H. Burgess & Company, Toronto.

New Liskeard, Ont.—$7,000 5 per cent. 20 instalments to Messrs. C. H. Burgess & Company, Toronto.

Covan, Sask.—$5,000 6 per cent. 15 instalments to Messrs. Ontario Securities Corporation, Toronto.

Calgary R.C.S.D., Alta.—$60,000 4½ per cent. 30-years to Messrs. Canadian Debentures Corporation, Toronto.

Midland, Ont.—$6,500 5 per cent. 30 instalments, guaranteed by County of Simcoe, to Messrs. C. H. Burgess & Company, Toronto.

Kelowna, B.C.—$27,000 5 per cent., $18,500 in 20 years, $15,000 in 5 years, and $7,000 in 25 years to Messrs. National Finance Company, Toronto.

NEW INCORPORATIONS.

Seventy-three Companies Were Chartered—Many of an Industrial Nature.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Quebec, Que.—Compagnie de Marbre du Canada, $50,000. V. Cote, O. Parent, Quebec; J. Gingras, St. Marc des Carrieres.

Sault Ste. Marie, Ont.—Oakbine Park Riding and Driving Club, $50,000. H. Yates, Korah Township; T. Drury, W. O'Brien, Sault Ste. Marie.

Calgary, Alta.—Jackson's, $50,000. Kilbourn-Newton, $100,000. Polo Club, $10,000. Neal Institute Company of Calgary, $50,000. J. B. Royle Company, $9,000.

Hamilton, Ont.—Canadian Knitting Company, $300,000. R. K. Simpson, T. J. Stewart, W. H. Magill. Daughters of the Empire Club, Hamilton, $40,000. Mrs. M. Crerar, Mrs. E. Kennedy, Mrs. S. J. Davis.

Edmonton, Alta.—Athabasca Oils, $200,000. Trunk Realty Investment Company, $100,000. Peace Valley Land Company, $10,000. Enders, Payne & Conover, $20,000. Opportunity Investment Company, $50,000. Guides and Transport Company, $30,000. Fitzhugh Lime & Stone Company, $10,000.

Vancouver, B.C.—Canadian Workman's Club, $10,000. Healey-Young Company, $20,000. Duncan-Brown Company, $50,000. Pacific Market Gardens, $50,000. Silica Sand and Gravel Company, $100,000. Musicians Investment and Securities Society, $10,000. Columbia Valley Syndicate, $300,000. Short, Robertson & Seymour, $25,000.

Montreal.—Augustin Comte & Company, $20,000. L. P. Deslongchamps, P. M. Girard, A. A. Audet. L'Immobiliere du Canada, $500,000. E. F. Surveyer, E. G. T. Penny, A. H. Elder. Fritz Froehlich Company, $50,000. L. E. Masson, F. Froehlich, P. A. Masson. Montreal Insurance and Vessel Agency, $50,000. G. W. MacDougall, L. Macfarlane, C. A. Pope. British Canadian Venture Syndicate, $50,000. G. B. B. Paton, F. G. Bush, G. R. Drennan. Heenan and Froude of Canada, $50,000. C. G. Greenshields, E. R. Parkins, A. C. Calder. Summerlea Realty Company, $50,000. C. Larin, J. B. Martineau, F. X. Prenoveau. Dominion Western Land Corporation, $973,333. P. M. Buttler, T. A. Burgess, C. H. Burns, Ottawa. Rothesay Lumber Company, $20,000. H. S. Ross, R. Taschereau, T. Rinfret. Edison Correspondence System Company, $20,000. J. M. Lemieux, R. Bedard, E. Pensonnault.

Toronto.—Biscayne Tropical Fruit Company of Toronto, $18,000. T. Rae, T. Bewley, H. De Laspee. Coldwater Stone Quarry & Power Company, $100,000. A. B. Currey, E. La Fontaine, J. F. Lennox. House Cold Tire Setter Company, $100,000. H. H. Shaver, E. Chesney, C. Fraser. Kissel Kar Sales Company, $40,000. A. D. Gorrie, W. R. Charlton, D. C. Smith. Toronto Central Land Company, $100,000. D. Henderson, W. H. McGuire, E. Harris, Sr. Miln, Bingham Printing Company, $100,000. J. Miln, J. Miln, Jr., A. Miln. Tackaberry-Stone, $40,000. H. W. Tackaberry, G. A. Stone, W. M. Tackaberry. LA ROSE SURPLUS.

Directors Decided Not to Make Any Payment—Size of the Fund—What Will Be Done With It?

Monetary Times Office,
Montreal, Oct. 25th.

At a meeting of the directors of La Rose Consolidated Mining Company this week it was decided not to make any payment, before the close of the year, from the large surplus possessed by the company.

It is difficult to say how the average shareholder looks at this matter. The surplus has been increasing almost from the day Mr. D. Lorne McGibbon became president. At that time was inaugurated a policy of conserving the profits of the company with a view to carrying on active mining development, instead of paying these profits to shareholders in the hope of helping the price of the stock. Beginning with 1910, the value of the ore in transit and at smelters, the ore stacked at the mines ready for shipment and the cash in the bank was as follows:—

January 1st, 1910	$ 382,638 97
April 9th, 1910	423,305 09
July 1st, 1910	428,515 44
October 1st, 1910	612,691 28
December 31st, 1910	1,011,814 39
April 1st, 1911	1,176,204 76
July 1st, 1911	1,346,552 76
October 2nd, 1911	1,492,849 10

For a Cash Distribution.

Never before has any such a showing been made by the management of any mine in Canada, and Mr McGibbon is accordingly entitled to no small credit for the stand he has taken. Other Cobalt mines have accumulated a large surplus, at the same time paying large dividends. The La Rose dividend was cut in half and the earnings over and above the amount necessary to pay the dividend were allowed to accumulate as surplus. This has now grown to such proportions that it is attracting the attention of shareholders and the public generally. The directors have lately shown a strong desire to have a cash distribution. There has been discussion as to whether the distribution should take the form of an increased dividend or of a bonus. At the time the directors met to declare the last dividend the feeling seemed to be that there should be a distribution, and it was freely predicted that at the meeting held here on Tuesday a decision in that direction would be reached.

Stock Took a Jump.

While the meeting was in progress, the market advanced, apparently on the expectation that a bonus would be declared. So far as many of the large shareholders are concerned, a distribution of the dividend was, and is, the last thing they desire. The majority of shareholders bought the stock at much higher prices than at present prevail, and are holding in the hope that some disposition will be made of the surplus, which will be of permanent advantage to the company. As it now is, they own the surplus, anyway. It stands in the bank to the credit of the company, and they own their proportion. A distribution would simply mean that it would go to the credit of their private accounts; and matters would remain as they were before, save that the company would have weakened its position to the extent of the distribution. Undoubtedly, the stock would be worth just that much less; so that it is not easy to see why the stock advanced during the meeting on the hope of the declaration of a bonus. The directors did not declare the bonus.

In Montreal, the hope is freely expressed among many of the shareholders that Mr. D. Lorne McGibbon and the directors, having placed the treasury of the company in its present happy condition, should go further and re-invest whatever portion of the surplus they consider they can spare. The policy of the Crown Reserve mine, in re-investing in Porcupine, is referred to with approval, and the hope is expressed that La Rose may make a similar move. Others think that La Rose should form an exploration company and place men in the field to prospect ground and secure promising territory wherever available.

Re-invest in Industrials.

Still others offer the opinion that, instead of re-investing in mining territory, the company should re-invest in industrial propositions, hydraulic power or other public service undertakings. With its large cash surplus, the company is in a position to finance any reasonably sized undertaking, and to obtain the advantage of the lowest price at which it could be possible to secure properties or rights. The shareholders, who otherwise would be purchasers of shares in these undertakings at public distribution prices, would enjoy the unusual experience of participating on organizers' basis.

Many of the shareholders are desirous of having the company's surplus re-invested in some such manner as indicated, and strongly disapprove of it being chopped into chicken-feed and scattered among the shareholders.

Held a Long Meeting.

The meeting referred to was a strenuous one. From the start Mr. D. Lorne McGibbon advocated the principle of conserving the surplus for a few months yet. In the end he was supported by a majority vote, although it is said the opposition was strong. That this was the case is evident from the fact that the meeting began at eleven in the morning, and, save for an adjournment for lunch, lasted until six or seven in the evening. The conclusion reached was much the same as at the last meeting, save that the payment seems now to be contingent upon the annual report of the mine President McGibbon put forward the argument that in the absence of a detailed report of the year's progress at the mines, the directors would be badly advised to vote a bonus, and thereby possibly afford an opening for attack in case the position of the mine was not so favorable as hoped two months hence. This argument prevailed, and it was decided to await the annual report before taking action.

Should the annual report of the mining position be reasonably favorable, there is little doubt that some of the surplus will be given to the shareholders, unless in the meantime the directors can be persuaded that the shareholders would prefer to have it conserved and reinvested for the benefit of all. It would seem, also, that there is talk of building a mill for the treatment of the concentrates in the La Rose dumps, which dumps are valuable, and would far more than repay for the building of the mill.

◆

BOND NOTES.

The investing public will shortly be offered the first mortgage 6 per cent. gold bonds of the Canadian Locomotive Company, by Messrs. Æmilius Jarvis & Company, and the Dominion Securities Corporation. These bonds are not a new issue, but are the original issue of the Canadian Locomotive Company which was authorized last summer at the time the doubling of the company's output was decided upon. The preferred and common shares of the company were placed with investors last summer.

The proposal is being made at the civic legislation committee, Montreal, that all future city loans must arrange for a sinking fund. This will be submitted for the approval of the legislature. The civic debt is now $48,000,000.

◆

NOTES OF BIDDING.

Six bids were received for the Indian Head, Sask. $18,215 5 per cent. waterworks, sewers, and electric light debentures. Five of the offers were from Toronto bond firms, the sixth being from Messrs. Wilson and Bothwell, Indian Head. As previously noted, the award was made to Messrs. Æmilius Jarvis & Company.

◆

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended October 27th, 1910; October 19th, and October 26th, 1911, with percentage change:—

	Oct. 27, '10.	Oct. 19, '11.	Oct. 26, '11.	Chg. %
Montreal	$42,131,841	$50,877,148	$55,277,516	+31.2
Toronto	34,669,703	37,008,109	35,493,544	+ 2.3
Winnipeg	24,680,374	31,469,571	32,015,307	+29.7
Vancouver	9,542,408	11,445,658	12,074,016	+26.5
Ottawa	3,814,200	4,821,252	4,563,438	+19.6

Published by The MONETARY TIMES
of Canada

PRICE - $2.50

Some of Many Press Notices:

A valuable work.—*Canadian Courier.*

Of great value.—*Vancouver News Advertiser.*

Vastly interesting and most readable. — *Vancouver Province.*

The volume has occasioned no small comment.—*Montreal Shareholder.*

Has the merit of being instructive as well as interesting.—*London Daily News.*

An acceptable handbook to all interested in Canadian investments.—*Canada, London.*

A valuable compendium of information for business men, financiers and promoters in all lines.—*Toronto Star.*

Shows the vast possibilities of Canada as a field for investment. The work is thorough.—*London Financial Times.*

The work is one of great and permanent importance, and gives a mass of authentic and classified information.—*Toronto World.*

The chapters of this 240 page volume will be of direct interest to a wide circle of investors at home and abroad.—*Canadian Finance, Winnipeg.*

It gives the financial world an excellent guide to the important matter of capital investments of this country. A difficult task has been handled with much care.—*Montreal Herald.*

No pains have been spared to make the book one of commanding value and accuracy to bankers, financiers, investors, industrial and commercial interests.—*The American Banker, New York.*

Of great usefulness to the Canadian who desires to be fortified with safe and correct opinions in the matter of Canadian development. The most complete compilation and presentation we have yet had of the financial relations of Canada with the world at large.—*St. John Globe.*

The author has studied his subject inside and outside; dissected it and pieced it together again. He has, metaphorically speaking, ransacked the whole of Europe and North America for reliable information. A book brimful of interest and eloquent of Canadian progress. — *London Financial News.*

Interesting and Instructive.—*London Statist.*

The subject is fully covered by the author.—*New York Chronicle.*

Will undoubtedly appeal to a wide circle of investors.—*Reading Observer.*

Well worth the study of all those who take an interest in economic questions.—*Moncton Daily Times.*

The volume is interesting and will be in demand as an "inquire within" upon its subject.—*Montreal Chronicle.*

No other recent publication will afford more interesting material to the business men of Canada.—*Winnipeg Tribune.*

Of value to the Dominion at large in bringing prominently before the investing public the openings and opportunities for profitable enterprise.—*Toronto Globe.*

Its contents will be found interesting by investors in Canada. In a prefatory note Sir Edmund Walker speaks in high terms of the book.—*London Times.*

An interesting and valuable publication, carefully edited and compiled, and the most comprehensive work yet published in the field of Canadian finance.—*Toronto Mail and Empire.*

An invaluable contribution to the fiscal status and origin of capital invested throughout Canada. One of the most valuable books of its kind ever published.—*Victoria Daily Times.*

The facts and figures are presented in a manner that cannot help proving attractive to all who are interested in the future financial and commercial development of the Dominion.—*Toronto News.*

It is seldom that information and data of such outstanding importance can be collected and compressed within the covers of one publication and there should be a big demand for this book. It is well indexed, and should find a place in all reference libraries.—*British Columbia Saturday Sunset.*

A very timely volume. It would be difficult, if not impossible, to find elsewhere such clear, detailed and satisfactory answers to the questions: What have foreigners invested in Canada? To what extent have they invested? Along what particular lines has each nationality made its venture?—*New York Journal of Commerce.*

The provincial government authorities are lenient with municipal clerks and treasurers in Ontario. Mr. C. C. James, secretary of the bureau of industries, in presenting municipal statistics of the province, again complains that many of these officers have not yet returned the schedules. In most of these cases, the figures of debenture debt and of sinking funds are taken from the reports of municipal auditors, while in a few cases the figures of the preceding year, in absence of any returns, have had to be repeated. "Although the majority of the municipal officials send in their returns promptly and satisfactorily," says Mr. James, "we regret that too many of the others show neglect and carelessness in making returns to the Department. The handling of public utilities by commission, with a different treasurer from that of the municipality, is a continual source of trouble in getting information. In one town these utilities have not yet been audited for 1909, and the town treasurer knows nothing officially." The government should insist that these returns be filed at the required date, failure to be heavily punished.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Rivers, Man.—Until November 15th for $6,000 6 per cent. 20-year. C. Howard, clerk.

Bracebridge, Ont.—Until November 14th for $16,190.38 debentures. A. C. Salmon, town clerk.

Innisfail, Alta.—The ratepayers have carried a by-law to install a $15,000 municipal electric light plant.

Saskatoon, Sask.—On November 3rd the ratepayers will vote on a by-law to raise $100,000 for parks, etc.

Trenton, Ont.—Until November 3rd for $8,900 5 and 10-year 5 per cent. debentures. J. W. Delany, treasurer.

Wynyard, Sask.—A by-law to raise $20,000 for constructing roads, bridges and culverts has passed a second reading.

Brandon, Man.—The council may ask the ratepayers to endorse the bonds of the Sumner Fair board to the amount of $50,000.

Beachville, Ont.—The village has adopted a by-law to take Hydro-Electric power, and will expend $5,000 on a distribution plant.

Melville, Sask.—Until November 15th for $19,000 5 per cent. 30-year debentures. J. Crow, secretary-treasurer. (Official advertisement appears on another page).

Dundurn, Sask.—Until October 31st for $2,500 15-year 6 per cent. debentures. Mr. W. J. Crosbie, secretary-treasurer. (Official advertisement appears on another page).

Plenty, Sask.—Until November 18th for $4,800 6 per cent. 10-year debentures. A. M. Percival, secretary-treasurer. (Official advertisement appears on another page.)

Shoal Lake, Man.—On November 3rd the ratepayers will vote on a by-law to issue $12,000 5 per cent. 20-year municipal and fire hall debentures. F. Dobbs, secretary-treasurer.

St. Vital Rural Municipality, Man.—To-day the ratepayers will vote on a by-law to raise $10,000 for school purposes. E. A. Poulain, St. Boniface, is secretary-treasurer.

Swan River, Man.—Until December 4th for $3,000 5 per cent. 15-year local improvement debentures. B. E. Rothwell, secretary-treasurer. (Official advertisement appears on another page.)

Medicine Hat, Alta.—Until November 7th, for $102,000 5 per cent. 30-year school debentures. R. M. Napier, secretary-treasurer. (Official advertisement appears on another page).

Hardisty, Alta.—Until October 31st for $3,000 6 per cent. 7-year sidewalk and street debentures. Mr. A. Mursell, secretary-treasurer. (Official advertisement appears on another page.)

Ladysmith, B.C.—Until November 6th for $3,725 6 per cent. 15-year local improvement debentures. Mr. N. A. Morrison, C.M.C. (Official advertisement appears on another page).

Forest, Ont.—Until November 6th for $17,000 4½ per cent. 30-year school debentures. Mr. L. P. McKindsey, chairman, Finance Committee. (Official advertisement appears on another page).

Bathurst, N.B.—Until October 30th for $5,000 5 per cent. 25-year, and $5,500 5 per cent. 40-year school debentures. B. C. Mullins, secretary-treasurer. (Official advertisement appears on another page).

St. Louis R.C. S.D. No. 21, Alta.—Until November 22nd for $15,000 5 per cent. 30-year debentures. L. P. O. Noel, Medicine Hat, secretary-treasurer. (Official advertisement appears on another page.)

Township of Chapeau, Ont.—Until October 31st tenders will be received for $12,000 5 per cent. 20-year debentures, also $7,000 5 per cent. 30-year debentures. Messrs. McKessock & McKessock, solicitors, Sudbury.

Granum, Alta.—Until October 31st for $2,500 20-year 5 per cent. street and $1,500 20-year 5 per cent. fire protection debentures. C. E. Cameron, secretary-treasurer. (Official advertisement appears on another page.)

Stonewall, Man.—A by-law has been passed authorizing the sale of $5,000 debentures for a joint municipal building for the municipalities of Stonewall and Rockwood. J. A. McGuire, Stonewall, is secretary-treasurer.

Innisfail, Alta.—Until November 2nd for $3,500 Public school district No. 210 debentures, 5 per cent. interest, payable in 20 years. Mr. L. C. Harry, secretary-treasurer. (Official advertisement appears on another page).

Davidson, Sask.—Until November 20th for $16,000 5½ per cent. 20-year, skating and curling rink, and electric light and power debentures. Arthur J. Robertson, town clerk. (Official advertisement appears on another page.)

North Bay, Ont.—Until October 31st for $45,000 storm sewer and $100,000 waterworks extension debentures; interest 5 per cent., payable in 30 years. Mr. T. N. Colgan, commissioner of works. (Official advertisement appears on another page).

Progress Municipality, Sask.—Until November 15th for $20,000 20-year 4½ per cent. road debentures. The loan is authorized by the government of Saskatchewan. Mr. J. B. McConica, secretary-treasurer, Luseland. (Official advertisement appears on another page).

Vancouver, B.C.—This year the citizens passed by-laws for school extension purposes involving $967,000. At the coming municipal elections they will be asked to approve of the raising of $1,000,000, it being stated the increased accommodation is a pressing necessity.

Collingwood, Ont.—Until November 10th for $14,000 20-year fire hall; $6,400 30-year; $30,000 20-year; $15,000 20-year; and $24,500 20-year debentures, all guaranteed by the county of Simcoe. Interest, 4½ per cent. A. D. Knight, town treasurer. (Official advertisement appears on another page.)

North Vancouver, B.C.—The following by-laws have been passed by the ratepayers: $100,000 for local improvement on the Marine Drive, west of Capilano, and $100,000 for sidewalks and road improvements throughout the municipality. The latter amount includes an amount necessary to construct a bridge over Lynn Creek.

Saskatchewan.—The following villages have been empowered to borrow money for permanent improvements. The particulars are given in order, name of village, amount, name of secretary-treasurer: Colgate, $2,500, L. M. More; Plenty, $4,800, A. M. Percival; Biggar, $20,000, J. Lukey; Brock, $2,500, E. E. Mackay.

NEWS OF PRINCE ALBERT.

The Grand Trunk Pacific grading gangs are all within a few miles of Prince Albert, practically the whole of the last twenty miles being in the hands of sub-contractors. Mr. S. C. Dunn, chief engineer on the lines west of Winnipeg, stated there recently that his road would be in operation early in the summer. Much civic work has been completed in Prince Albert this year, and over eight miles of granolithic sidewalks have been laid. The Canadian Northern Railway inaugurated last week a service via Shellbrook on the Big River and Marcelin branches, both being operated from Prince Albert. This makes a daily train from Prince Albert to Shellbrook and opens a considerable area of Prince Albert's new distributing territory.

◆

The Caledonian Insurance Company of Edinburgh, Scotland, has appointed Messrs. Waghorn, Gwynn & Company, the well-known financial brokers, as its general agents for the Province of British Columbia. The Caledonian Company is the oldest Scottish fire office, having been founded in 1805. It is strong financially, as is readily seen by the value of its assets, which total $14,000,000. Mr. Robert Chapman, the general manager of the company, of Edinburgh, who is on a visit of inspection to Canada and the United States, where his company has large interests, was a visitor to Vancouver recently. The liabilities of the Caledonian in the great fire at San Francisco were promptly met.

Russell Motor Car Company

WEST TORONTO Limited

Report of the Board of Directors

ANNUAL MEETING, October 27, 1911

To the Shareholders: The report herewith submitted is the first under the new name of the Company, and covers its operations for the business year ending July 31st, 1911.

BICYCLE BUSINESS.—We are pleased to be able to again report an increase in the Bicycle business. This increase has been general in character, the result being that our turnover of new Bicycles, Parts and Accessories and Motor Bicycles shows a healthy increase.

Our Skate business again showed an increase, and orders booked for the present Fall's business are in advance of any previous year.

Our Australian business during the same period failed to show an increase, but we have had the opportunity this year of going carefully into that business with the Australian Manager, who was brought home to the Works to familiarize himself with the latest designs. As a result, we look forward to the strengthening of the Australian organization through the coming year.

MOTOR BUSINESS.—The Motor business, as usual showed a marked increase. We have continued manufacturing two types of cars, one with the "Silent Knight" motor, and the other with the valve type of motor. The proportionate increase of business on the Knight motor type is quite marked, and we consider it likely to show still further increase during the current year. This engine, which the Company controls for Canada, is to-day the most perfect known to the Automobile art. No car can be said to have the best up-to-date equipment without it. This opinion is shared with us by leading manufacturers of Europe and America. Since our last report the owners of the Knight patents have granted licenses to a number of important concerns in the United States; three of these have already announced their cars with the Knight engine, and are now making deliveries. Others will follow with similar announcements early in the year. All of these firms have licenses for the United States only, and have contracted not to ship cars equipped with Knight motors into Canada.

The advertising of the Knight motor in the United States, and the fact that cars so equipped must not be shipped into Canada, will be of great advantage to this Company.

INCREASE IN PLANT.—In view of the expanding nature of the Company's business, both in Bicycles and Motors, it has been necessary to make considerable additions to the Plant. During the past year a four-storey building was added to the factory, and large purchases were made of labor-saving machinery. Some of these were concluded in time to assist in the last season's production. For the coming season we have provided for the purchase of much additional machinery and for a further addition to the Company's Plant. The result of these additions will be a much increased output for the current year.

During the year the factory was operated to its full capacity. The Automobile machine shops have been kept running with day and night shifts during practically the whole year.

REORGANIZATION.—In view of the requirements of business, and so that the Company might be in a position to take fuller advantage of the trade offering in Canada, it was decided during the year to increase the capital. Shareholders have already been advised of the satisfactory completion of the Directors' plans in that direction, but it is perhaps not amiss to summarize them here, all of these changes having been approved of by the Shareholders.

At a general meeting of the Shareholders on April 18th, 1911, the name of the Company was changed to the Russell Motor Car Company, Limited, and provision made to handle the Bicycle end of the business as a selling department under the old name—Canada Cycle and Motor Company, Limited.

An issue of $800,000.00 of 7% Cumulative Convertible Preference stock was offered for public subscription. This was fully subscribed.

At the same time, provision was made to change the Common Stock of the Company into shares of the denomination of $100.00 by the turning in two shares of $50.00 each for one share of $100.00.

In view of the earnings of the Company and its strengthened financial position, the Directors felt justified in commencing the payment of dividends at the rate of 7% per annum on the paid up Preferred stock and also on the Common stock, for the quarter ending July 31st, 1911.

YEAR'S OPERATIONS.—The statement of Assets and Liabilities herewith has been made up after full provision for all proper contingencies in connection with the business. The Assets have been conservatively valued. The Accounts and Bills Receivable are shown after making full deduction for all bad and doubtful accounts. We have also provided as usual for depreciation in Machinery and Plant.

The Directors decided to write off against this year all expense in connection with the issue of $800,000.00 Preferred Stock.

Profit and Loss Account for year is as follows:—

	CR.		
Aug. 1. 1910	Balance of Profit Brought Forward -		$179,387.15
July 31, 1911	Net Profit for the Year, after providing for Depreciation, Bad and Doubtful Debts, Bank Interest and other Contingencies - - - - -		177,529.06
	DR.		
July 31, 1911	Underwriting and other Expenses, Preferred Stock Issue - - -	$ 67,466.00	
" "	Dividend No. 1, at the rate of 7% on Preferred Stock - - - -	11,381.64	
" "	Dividend No. 1, at the rate of 7% on Common Stock - - - -	14,000.00	
" "	Balance Carried Forward - - -	264,068.57	
		$356,916.21	$ 356,916.21

The condition of the business at the present time is satisfactory and your Directors look forward to the coming year as likely to show further improvement.

Statement of Assets and Liabilities as at July 31st, 1911, is submitted herewith.

The accounts of the Company have been duly audited and certified to by Messrs. Edwards, Morgan & Co., Chartered Accountants.

All of which is respectfully submitted.

J. N. SHENSTONE, President.
T. A. RUSSELL, General Manager.
A. E. KING, Secretary.

October 10th, 1911.

MONTREAL APPOINTS FISCAL AGENT.

Bank of Montreal Receives the Agency—Municipal and Industrial Bond Notes.

The report of the finances of the City of Montreal is satisfactory. There has been an increase of one-seventh in the revenue of the city, which will reach about $8,000,000. Last year the revenue was $7,000,000. The explanation of this situation is found in the increase in the assessment of real estate. This gain will be available next year, and a portion of the added revenue will probably be voted to the benefit of the police and fire departments. The increased revenue brings with it increased responsibilities, and the expenditure will be much larger than previously. The following is the table forwarded to the civic controllers:—

Assessable property—1911	$380,697,632
Exempt	119,228,417
Tariff roll	$499,926,049
Increase in assessable property	61,356,016
Increase and exemptions	9,975,918
Total increase	$ 71,331,934

Bank of Montreal Appointed.

The city council have decided to appoint the Bank of Montreal as its financial agent in London. The bank will receive one-fourth of one per cent. on all the bonds it places for the city. A discussion arose concerning the fairness of this charge, and while it was allowed that this rate was greater than received by the bank for looking after the provincial business, the claim was made that it was not an excessive amount. Controller Wanklyn had some remarks to make in this connection. He said: "Montreal is no longer a village. We are no longer placing loans in one hundred and two hundred thousand dollar amounts. Now it is five hundred thousand and a million dollars. The bank is wi'ling to take our bonds as collateral security, and to undertake to dispose of them to the best advantage within a certain time. We cannot expect to throw such large issues of bonds on the market in bulk and hope to have them taken up at once. The result is that sometimes if the market is not favorable, we have to accept poor terms, lose, in fact, ten or fifteen points."

Another Bond Offering.

Messrs. F. B. McCurdy & Company are offering $100,000 6 per cent. mortgage bonds of the Maritime Telegraph and Telephone Company at 103 subject to previous sale. This company is an amalgamation of the Antigonish and Sherbrooke Telephone Company, the Queen's County Telephone Company, the Prince Edward Island Telephone Company, the Eastern (Cape Breton) Telephone Company, the (Annapolis) Valley Telephone Company and the Yarmouth Valley Telephone Company. In fact all the well-known concerns in Nova Scotia have been taken into the deal and the new concern has 15,000 telephones, 3,500 miles of poles, 33,000 miles of wire and sixteen office buildings. The company also possesses rights to a system which permits telegraphing and telephoning to be carried on simultaneously over the same wire.

The total assets of the company are placed at over $2,000,000 and the annual earnings at $140,000. Against this are the following securities:—

	Authorized	Issued
Common stock	$1,000,000	$ 850,000
Preferred 6 per cent. stock	1,000,000	650,000
Bonds, 6 per cent.	1,500,000	1,180,600

The directors of the concern are Messrs. S. M. Brookfield, C. E. Smith, Robert E. Harris, Hon. B. F. Pearson, Hugh R. Silver, Michael Dwyer and John R. Macleod, all of Halifax, and C. F. Sise and L. B. MacFarlane, of Montreal.

Issue of Hotel Bonds.

The Carlton Hotel Company of Montreal will hold a special meeting of shareholders Wednesday to consider an issue of $1,000,000 5 per cent. bonds, the object of the issue being to construct an hotel of larger capacity than provided for at the organization of the company. The shareholders will be asked for permission to change the name of the company to the Ritz-Carlton Hotel Company of Montreal, Limited.

In calling the attention of clients to a list of industrial bonds, the Royal Securities Corporation says: "Canada is at present in the unique position of being free from the present unsettled political conditions in other countries, and in consequence Canadian investments are likely to prove the most attractive to investors both here and abroad. According to the law of supply and demand, this should tend to raise the price of our securities, and particularly those which are well secured and afford a fair rate of income."

Messrs. St. Cyr, Gonthier & Frigon, Montreal, have issued an attractive list of industrial and municipal bonds for October investment.

Decrease in British Capital Applications.

Out of the £84,000,000 reduction, as compared with 1910, in new security issues for the year's nine completed months at London, £24,500,000 was decrease in British Government borrowings (last year's issues were Irish Land stock); £5,500,000 in foreign industrial companies; £5,200,000 in foreign railways; £5,600,000 in "finance and exploration" shares, and no less than £20,000,000 in new oil and rubber flotations.

Forest, Ont., has an assessed value of taxation of $469,136, while the debenture debt is $8,397.70. The town will receive tenders until November 6th for $17,000 4½ per cent. 30-year school debentures. Situated on the main line of the Grand Trunk Railway, 24 miles east of the St. Clair tunnel, Forest, Ont., is in the midst of the best stock, fruit, dairy and grain section of the province. The population is estimated at 1,700, and several good industries are located in the town.

Finances of North Bay and Granum.

North Bay, Ont., will issue $145,000 5 per cent. 30 equal annual instalment debentures. The debentures are $100,000 for waterworks and $45,000 for sewers. The finances of the town are as follows: Assessed valuation for taxation, $3,065,862; assessed value of property exempt from taxation, $553,950; floating debt, $59,522.26; total debenture debt including present issue, $419,872.69; waterworks debenture debt, $57,263.21; local improvement debenture debt, $84,442.44; net debenture debt, $278,167.04; total value of assets of municipality December 31, 1910, $403,034.97; revenue from waterworks after paying expenses about $5,000. Present rate of taxation, general 14 mills, schools 12 mills. Present population 7,851, population five years ago 3,813.

The assessment of Granum, Alta., according to last revised assessment roll is $285,070, and total municipal debt outside of debts for current expenses is $2,173.32. About six years ago the village issued $1,000 debentures which sold slightly above par, which debenture will soon be paid off. In 1900 the town issued debentures amounting to $2,000 payable in ten years, which sold at a fraction less than 104. These are all the debentures outstanding. Seven years ago Granum was a hamlet of about a half dozen buildings. It has made steady progress and now has a population of about 450. There are five large elevators, two well equipped general stores, two banks (Bank of Commerce and Bank of Hamilton), hotel, lumber yards, blacksmith shops, etc.

The total taxable assessment of the city of Ottawa for 1912, is $76.262,809, an increase for the year of $12,975,654.

The realty assessment is $66.431,268 an increase of $11,480,482. This includes both land and improvements, as the assessment department has not yet separated these.

The business assessment is $7,162,879, an increase of $1,170,899, while the income assessment advanced by $324,273 to a total of $2,668,662. The city's population, is 90,520, an increase of 4,414 in the year.

Coming Canadian Issue in London.

The prospectus is about to be published in London of the Toronto Power Company, Limited, issue for £821,917, or $4,000,000 of 4½ per cent. consolidated guaranteed debenture stock. It is guaranteed unconditionally both as to principal and interest by the Toronto Railway Company. The issue price is 96.

La Banque Internationale and Messrs. Fairbanks Brothers will shortly offer a portion of the issue of the preferred stock of the Transportation Building Company, of Montreal.

◆

Tenders were opened on Monday for $25,000 5 per cent. debentures of Fergus, but no award was made, as the highest tender did not comply strictly with the advertisement. The form of debentures offered was for fifteen equal annual instalments of principal and interest. It was a condition of the highest tender that bonds be issued with annual interest coupons attached. The council, therefore, decided not to accept any tender but to have the necessary by-law passed as provided in sub-section 4 of section 386 of the Consolidated Municipal Act, changing the mode of issue of the debentures from that defined in the by-law and directing that the debentures be issued with interest coupons attached, and again call for new tenders. There were eleven bids.

RELATIVELY HIGH RETURN

The real estate mortgage is the oldest form of security known to man. And not only that—it was the safest for centuries. With the possible exception of government bonds, it is still the most conservative.

During the past year loan company funds increased over $15,000,000 on the prairies alone. There is an immense field in British Columbia.

Our loans are placed on improved revenue-producing property in Vancouver and New Westminster. Valuations are made by experienced men and are very conservative, being finally passed on by our board of directors.

No loan is made for more than 50% of appraised value. All titles are searched and certified to by our solicitors. We attend to the many small details which are so often a cause of annoyance to the purchaser.

If you have any funds available, we will guarantee a net return of SIX PER CENT. Our entire assets is your security. We collect both principal and interest and remit yearly or half yearly as desired. Advise us how much you would like to invest just now. We will submit a list suitable to your requirements.

WE OFFER AT 98 AND INTEREST THE UNSOLD BALANCE
$200,000 of the 6% First Mortgage Sinking Fund Bonds of The Spanish River Pulp & Paper Mills, Limited.

In recommending these Bonds for investment we draw attention to the following particulars:—

1. Canada is the main centre on the continent for paper manufacturing.
2. The close proximity of the plants of the Company to the Middle West Markets of the United States assures an increasing demand for the Company's output.
3. The cost of producing pulp has steadily decreased, while the price obtained has steadily increased.
4. By reason of the operation of the Sinking Fund, which is calculated to retire the total bond issue by maturity, there is an ever increasing equity behind the Bonds.

Our Special Circular will give you full particulars regarding the Company and the Bond Issue. We would be pleased to mail it to you free on request.

(1¾%), being at the rate of 7 per cent. per annum, has been declared on the Capital Stock of the Mexico Tramways Company for the quarter ending September 30th, 1911, payable on the 1st day of November to shareholders of record at the close of business on the 14th day of October, 1911, and that the transfer books of the Company will be closed from the 16th to the 31st day of October, 1911, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, N.Y.; Mexico City, Mexico; London, England, and its branches.

The holders of bearer share warrants, on detaching from their share warrant Coupon No. 10, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, or London, England, on or after the 1st day of November, 1911, will receive in exchange for each coupon the sum of one dollar and seventy-five cents ($1.75), representing the amount of the dividend.

By order of the Board.
W. E. DAVIDSON,
Secretary.

Toronto, Canada, Sept. 23rd, 1911.

THE BANK OF TORONTO.

DIVIDEND NO. 121.

Notice is hereby given that a dividend of two and three-quarters per cent. for the current quarter, being at the rate of eleven per cent. per annum upon the Paid-up Capital Stock of the Bank, has this day been declared, and that the same will be payable at the Bank and its Branches, on and after the 1st day of December next, to Shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the Sixteenth to the Twenty-fifth days of November next, both days inclusive.

By order of the Board,
THOS. F. HOW, General Manager.

The Bank of Toronto, Toronto,
October 25th, 1911.

THE CONSUMERS' GAS COMPANY OF TORONTO.

The Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto to receive the report of the Directors and for the election of Directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on **Tuesday, the 31st of October, 1911, at 12 o'clock noon.**

ARTHUR HEWITT,
General Manager

A branch of the Quebec Bank has been opened at Bulyea, Sask.

The Wabasset Cotton Company, Three Rivers, Que., may erect another large mill.

The Canada Cement Company are enlarging their plant at Port Colborne, Ont., to twice its present size.

Major John T. McBride has made an offer of $2,000,000 for the St. James' Methodist Church, Montreal.

The Eastern Townships Bank has opened a branch at Quebec, under the management of Mr. D. H. Tolmie.

The Imperial Guarantee and Accident Insurance Company of Canada has been registered in Saskatchewan.

The Royal Bank of Canada and the Merchants Bank have established branches in Point Grey Municipality, adjoining Vancouver city.

Simcoe, Ont., has offered the Southam Printing Company of London, Ont., a bonus of $30,000 if they will locate a factory in the town.

Mr. Varnum S. Vandeburg, of St. Catharines, Ont., has been arrested on a charge of setting fire to a barn owned by Mr. R. A. Goodwin, Louth township. The fire was extinguished after some difficulty.

An experimental farm may be located at Morden, Man., on the recommendation of Messrs. Bunting and Grindley, who were appointed by the Dominion Government to investigate the fruit conditions of the country.

A reduction in the fire insurance rate is anticipated at Ridgetown, Ont., when the new waterworks tank has been completed. The tank, which sits on a spiral frame over 100 feet high, will have a capacity of 55,000 gallons.

With a view, it is said, of burning up evidence of a shortage of about $2,000 in the books of the bank, John K. McLeod and Gordon T. Nagle, clerks in the Union Bank of Canada, Selkirk Avenue West, Winnipeg, are charged with incendiarism and remanded without bail. Their homes are in Winnipeg, and they are little more than boys. It is stated that restitution of the shortage has been made.

STOCK EXCHANGE MEMBERS

A Guide for the Investor

We have just completed a Booklet on Canadian Bonds and Debentures that should be invaluable to every investor.

It gives full particulars regarding the principal bond issues that are listed on the Montreal and Toronto Stock Exchanges.

Every Canadian bond investor should have a copy of the Booklet on file.

We will be pleased to forward copy free on request.

INTERNATIONAL WATERWAYS COMMISSION.

The members of the joint high commission which is charged particularly with the adjustment of questions touching water boundaries between the United States and Canada had an informal meeting at Washington recently, the discussion being confined to the scope of the treaty and the powers of the commission. The primary work of the commission will be in relation to the use of boundary waters.

The formal organization will not be effected until a successor to the late Senator Carter has been appointed by President Taft.

There were present at the meeting to-day James A. Tawney, of Minnesota, who presided; Frank S. Streeter, of New Hampshire; Sir George Gibbons, of London, Ont.; A. B. Barnhill, of St. John, N.B., and Aimee Geoffrion, of Montreal.

In addition to the direct power given to the commission over boundary waters, the treaty also provides that the governments of the two countries may refer to this commission any other questions that may become a source of controversy. The general arbitration treaty between the United States and Great Britain now before the Senate is along the same lines as the treaty creating the international joint commission, but enlarges the scope of negotiations to take in every question that may arise between the United States and Great Britain.

◆

The Canadian Consolidated Mining and Smelting Company has bonded the Silver Dollar group of claims, near Sheep Creek. This company is gradually extending its operations, and this is the second big lead proposition acquired in the Sheep Creek district recently. The company has also taken an option on the Little Donald and Black Diamond mine at Ainsworth, owned by Nelson and Spokane people.

To introduce THE MONETARY TIMES to new friends, we are prepared to send the paper for an eight weeks' trial subscription on receipt of twenty-five cents. If you do not know THE MONETARY TIMES, or if you want to introduce us to some friend, send us your order and it will be promptly filled.

THE MONETARY TIMES
62 Church Street - - TORONTO

The head office of the Sovereign Life Insurance Company will be removed from Toronto to Winnipeg on February 1st.

An eastern syndicate has bought the True Fissure group of mining claims at Ferguson, B.C. The property was owned in Cincinnati.

The Provincial Government of Ontario will ask the Dominion Government for a bonus of a million and a half dollars for the Temiskaming and Northern Ontario Railway.

It is stated that Messrs. Muir, Reece and Mather, of the Manitoba Power Company, with New York capitalists have made a bid of $300 a share for the purchase of the plant of the Winnipeg Electric Railway.

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

GEORGIAN BAY CANAL.

Sir Robert Perks, the British millionaire contractor, who recently visited Canada, estimates the savings of the British people at £500,000 daily, which he thought was an enormous sum, amounting to £150,000,000, or $750,000,000 a year. Sir Robert figured that British savings during three short months would pay for the whole cost of the Georgian Bay Canal.

He thought that public sentiment favored the early construction of his work, and was pleased to know that the great railway corporations had practically withdrawn their opposition to the project. Sir Robert said they were wise, for the reason that while the canal would carry the heavy products such as lumber, pulp and other commodities at a rate which would be very unprofitable business for the railways, the latter would get any amount of profit out of the manufactured goods, consequently the construction of this national waterway would be profitable to all concerned.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended October 20th:—McKinley-Darragh, 175,089; Cobalt Lake, 64,700; Cobalt Townsite, 104,000; Nipissing, 127,649; Drummond, 120,000; Coniagas 125,390; La Rose, 66,500; O'Brien, 63,800; Right-of-Way, 59,800; Trethewey, 53,040; Buffalo, 62,427; Crown Reserve, 61,200; Beaver, 64,479; Kerr Lake, 60,070; total, 1,208,144 pounds, or 601 tons. The total shipments since January 1st are now 41,816,282 pounds, or 20,908 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

WINNIPEG

The Supply City of Western Canada

Offers greater combined advantages to manufacturers and capitalists than any city in Canada. The remarkable development of this great central market is creating an unprecedented demand for home industries.

Winnipeg Wants these Manufacturers

and offers cheap power, cheap sites, low taxation, varied raw materials, the best of labor conditions, unexcelled railway facilities, and the earnest support of a community that recognizes the importance of its industries. Over a billion dollars produced by the farms of Western Canada in the past five years, and this with only eight per cent. of the available land under cultivation. Consider what this development makes possible for the Western manufacturer.

YOUR OPPORTUNITY.

Get Close to this Market.

Special openings for manufacturing farm and agricultural implements, including gas and steam tractors; paper and strawboard mills, men's clothing, ladies' ready-to-wear goods, food stuffs, starch factory, boots and shoes, felt wear, metal goods, wire nail factory, hardware specialties, flax and jute works, beet sugar factory, elevator machinery, electrical fixtures and appliances of all kinds; automobiles and commercial motor carriages, home and office furniture, leather goods, cereal foods, dairy supplies, building materials, stoves, ranges, furnaces and heating plants, and twenty-five other smaller lines.

Special reports prepared and mailed free of charge on the manufacturing possibilities of any of these lines of industries, by addressing

CHAS. F. ROLAND; Commissioner of Industries

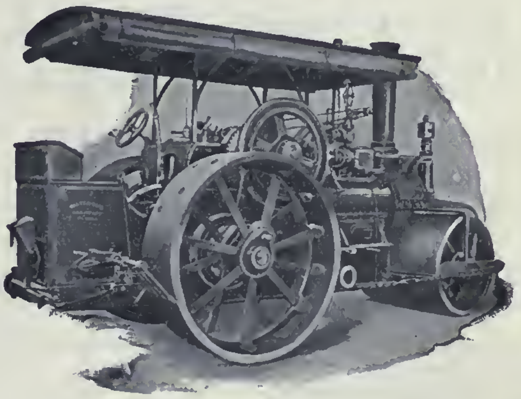
The Waterous

Double Cylinder

Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to none.

Ask the man on the machine.

LEGAL NOTICES

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of September, 1911, incorporating John Richard Corkery, James Moffat Forgie and Edward Gordon McMillan, law students, Harry Riley and Willis Bertram Sturrup, law clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, charter, hire, build or otherwise acquire steam and other ships or vessels with all equipments and furniture and to employ the same in the conveyance of freight, including coal, ores, grain, live stock, meat and other produce and merchandise of all kinds between such ports as may seem expedient; (b) To carry on the business of merchants, carriers by land or water, ship owners, wharfingers, barge owners, lightermen, forwarding agents, ice merchants and refrigerating store keepers; (c) To acquire, own and operate either by steam, electric or other power, tramways and railway sidings on or over lands owned or controlled by the company or on or over lands adjacent to the lands of the company with the consent of the owner or holder thereof; (d) To acquire and undertake the whole or any part of the business, properties and liabilities of any partnership, person or company, carrying on any business which the company is authorized to carry on, or carrying on any business which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights or possessed of property suitable for the purposes of the company; (c) To acquire, construct, carry on, improve, operate, maintain, develop or manage, carry out or control roads, ways, railway sidings, bridges, reservoirs, watercourses, packing houses, elevators and wharves, and to carry on the business or trade of warehousemen, storers, packers, and carriers of personal property and to issue warehouse receipts and bills of lading and to lend money upon the security of personal property warehoused or carried; (f) To issue paid-up shares, debenture stock, debentures, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be acquired by or for any service rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (g) To sell, lease or turn to account the undertaking or the whole or any branch or part of the business, undertakings, property, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having objects similar in whole or in part to those of this company; (h) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea, which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated, directly or indirectly, to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (i) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell, pledge or otherwise dispose of shares, stock, debentures, bonds, and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to bene-

PORT MANN

Port Mann has been officially announced as the Pacific Coast terminal of the Canadian Northern Railway Company's transcontinental line. We hold large tracts of land at this point, within the area selected by the railway company for its townsite. We would be pleased to send you reliable maps and general information relative to this new scene of development in British Columbia. As one of the pioneer investors at Port Mann, we believe you will be well advised to consult us before making any investments at this place.

With branch offices in various parts of the Province we are in touch with many good opportunities for investments that you might care to hear about.

LEGAL NOTICES

(Continued from Page 1851.)

fit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents, as the directors may appoint; (j) To enter into partnerships or into any arrangements for sharing profits, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise with any partnership, person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or into any business transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such partnership, person or company and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (k) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (l) To distribute in specie or otherwise as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company, formed to take over the whole or any part of the assets or liabilities of this company; (m) To enter into any arrangements with any governments or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (n) To do all or any of the matters hereby authorized either alone or in conjunction with, or as factors, trustees or agents for any other companies or persons or by or through any factors, trustees or agents; (o) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with the above, or any portion thereof, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (p) The powers in each paragraph to be held in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (q) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Coals Transportation, Limited," with a capital stock of two hundred thousand dollars divided into 2,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of September, 1911.

THOMAS MULVEY,
Under-Secretary of State.

14-2

Dated at Toronto this 17th day of October, A.D., 1911.

Bicknell, Bain, Strathy & MacKelcan, Solicitors for "Coal Transportation, Limited."

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood, Robert Musgrave Coates, solicitors' clerks; Samuel Maximilian Mehr, student-at-law; Samuel Goodman Crowell, and George Hamilton Cassels, solicitors, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein, and water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms, or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric gas or other light, heat and power: Provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilise the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (c) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells,

LEGAL NOTICE

(Continued from Page 1853.)

roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (e) To carry on the business of treating, smelting and refining mineral ores or other substances by means of electrolytic process or the application of electric power in any manner or form, and for such purpose to install all necessary plant, machinery and apparatus and to purchase, sell and otherwise deal in ores of various kinds, or other substances capable of being treated by electrolytic process, and to buy, sell and deal in any products or by-products of such ores or substances; (l) To carry on business as a manufacturer of and dealer in all kinds of chemicals and chemical products and by-products thereof; (g) To aid and assist by way of bonus, advances of money or otherwise with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (l) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, right or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out, and enjoy any statute, ordinance, order, license, power, authority, franchise, concessions, right, or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (p) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (q) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (u) To do all or any of the above things as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Ebro Irrigation and Power Company, Limited," with a capital stock of two million five hundred thousand dollars divided into 25,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of September, 1911.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

SASKATOON KNOWS HOW TO GROW.

The operating railway mileage over which Saskatoon wholesalers control the distributing business beyond competition is 1,642 miles. Saskatoon's railway business has shown an increase of more than 200 per cent. The net assessment in 1910 was $10,748,639 and this year is $23,392,528. The borrowing power, 20 per cent. of the net assessment, is $4,678,505 and the total bond issues, $1,520,687. The total bonds to be issued in 1911 amount to $1,124,000, making a total of $2,644,687 From this must be deducted electric bonds, $538,917; waterworks bonds, $506,850; local improvement bonds, $454,455, a sum of $1,500,222, leaving a balance of $1,144,464. Deducting the sinking fund (general debentures), $45,223, there is total liability on borrowing power of $1,099,241 and a balance of borrowing power of $3,579,263.

The Canadian agency, London, England, will spend $2,000,000 in constructing a river dam for production of power, and in laying down about nine miles of street railway, which will be operating by September, 1912.

Wholesale and industrial sites may be had at moderate figures, varying according to location. Spur facilities are either already available or obtainable when required. The cost of securing a site in Saskatoon is not a serious consideration.

Wholesalers and manufacturers do not overlook the fact that Saskatoon will be on the direct route to Hudson Bay. The following table of distances merits consideration:—

	Miles.
Saskatoon to Montreal, rail	1,894
Montreal to Liverpool	2,760
	4,654
Saskatoon to Fort Churchill per Hudson Bay Railroad—700 miles; Fort Churchill to Liverpool—2,960 miles	3,660
Distance saved via Saskatoon and Fort Churchill ...	994
Should Fort Nelson be finally selected as Hudson Bay terminal the distance saved would be	1,061

The census figures published this week show that the population of Saskatoon has increased in ten years from 113 to 12,002, a growth which surely has never been equalled.

◆

The Canada Life Assurance Company have secured options on property in the cities of Calgary and Edmonton. Messrs. E. W. Cox, general manager, and H. L. Watt, treasurer of the company, have just returned from a trip to the Pacific coast.

JAMES MASON,
General Manager.

Toronto, October 25th, 1911.

INVESTMENT AND LOAN COMPANIES

The Basis of the Nation's Wealth

Real Estate is the basis of the Nation's Wealth. It produces that which both man and beast must have to sustain life. With our rapidly increasing population comes the demand for a corresponding increase in the products of the soil, and this demand will never be less than now. Land cannot be destroyed, and with proper care, its producing power may be maintained intact. Land values, therefore, possess that element of permanency that reduces the speculative feature to the minimum.

This Corporation's borrowed funds (Deposits and Debentures) and by far the larger proportion of its shareholders' moneys (Capital Stock and Reserve) are invested in first mortgages on improved, productive real estate. To afford an opportunity to all of investing their money with such absolute safety, we issue our Debentures in sums of one hundred dollars. They are a security in which Trustees are authorized to invest Trust Funds. Write for specimen Debenture and copy of Annual Report.

WHAT WE PAY FOR HUSTLE.

We take pride in the wealth of our natural resources, our general development, the enterprise of our people and the extent of their prosperity. We boast of our time-saving methods, rapidity of action and of our American hustle. We observe John Bull plodding along slowly, apparently doing business in double the time it takes us to do it. We give a sly wink, meanwhile sending out sensational stories of how we build towns in a week, bridges in a month, large buildings in fifteen weeks; how we move structures a mile or so without disturbing business and how we lay rails for the locomotive at a wonderful speed. In short, we are speeders and we are proud to be first-class exponents of that North American art, hustle. What price do we pay for the boast? Here at a glance is a section of the bill of cost:

In four years—killed by	Persons.	
Steam railways	2,049	
Electric railways	301	
Industrial accidents	5,296	
Fires	1,072	
		8,718
Injured by		
Steam railways	7,344	
Electric railways	8,296	
Industrial accidents	10,444	
Fires (estimated)	1,908	
		27,992
		36,710

In the past four years there have been killed and injured in Canada 45,428 persons on our railways, by industrial accidents and by fires. This is at the rate of 11,357 per annum. In other words, every day during that period 6 persons have been killed and 19 injured, about one killed or injured every hour of the twenty-four. This appalling record, too, applies to only the few causes mentioned. If statistics could be obtained of all fatalities and injuries in the Dominion, the bill of cost would have a still more serious appearance.

Many, if not the majority, of these accidents can be traced to carelessness, thoughtlessness or selfishness. The desire to achieve big results in the shortest possible time at the expense of efficiency is a national trait which the country may well take immediate steps to obliterate. The evil of dollar and dividend hunting, regardless of destruction in its wake, is a menace to Canada's progress and credit. The basis of civilization is the proper respect for life and property. We in this country have by no means sufficient regard for either. The fact is noted by the capitalist and investor abroad and we suffer thereby and will do so to a greater extent, if early improvement is not made.

The national spirit of carelessness is vividly portrayed in the fire waste. In the past 32 months Canadian property has been burned to the value of $57,-880,678. This year's losses to date have been at the rate of $44 a minute. In addition, lives lost in fires in four years have numbered 1,072.

Railway accidents account for great loss of life. "Making up lost time" is responsible for many. But the stage apparently has not been reached where we would prefer to arrive at our destination two hours late and alive, rather than on time and dead. Collisions, derailments and parting of trains were responsible in four years for 894 killed and injured. In three years 190 persons were killed and 201 injured at highway crossings. During the past 23 years, 7,263 persons have been killed and 25,668 injured on Canada's steam railways.

Analyzing the statistics of industrial accidents in the latest published report, under the heading of mining, it is found that explosions caused over 35 per cent. of the deaths and over 20 per cent. of the injuries. Falls accounted for nearly all of the deaths and over 66 per cent. of the injuries in the building trades. Among unskilled laborers, 21 men were killed by being run over by vehicles and 17 by falling material, and 53 were injured in a similar way. An alarming increase has occurred in the number of fatalities among workpeople engaged in the handling of explosives. This summer, too, there were 63 drownings in the Lachine Canal. "The chief danger," says a civic official noting the fact, "is in the canal with its deep drop from the banks, making rescue difficult, and it seems advisable to have a railing along those parts of the canal where people most congregate, so that they will not be so liable to tumble into the water." Sixty-three drownings, before a rail was suggested! Such records can be found in any part of the country.

The writer heard an engineer admit that a certain structure, which had been criticized, "might fall in three years' time," with possibly serious loss of life. Railroad contractors were laying new steel recently at a record-breaking pace, while a big crack in the concrete abutment of a bridge was allowed to wait, despite the fact that work trains used the bridge daily. Carelessness with live wires, reckless driving of automobiles—in a thousand ways we violate the first principles of a civilized community.

The reasons for the existence of such conditions are due largely to individual, corporate and legislative carelessness. We need better laws for the protection of life and property and the strict enforcement of such laws. If the Imperial Board of Trade, for instance, had to deal with the question of our railroad fatalities, as they do in Great Britain, their action for reform would be drastic enough to startle us in no slight degree. We can therefore afford to emulate John Bull in his thoroughness of work and his regard for life. Ultimately his results are better, safer and more durable than ours. American hustle takes the vitality out of the nation and in more senses than one.

MINING INVESTMENTS AND MINING ENGINEERS.

Why is it that the general public—the cautious public—shys at a mining proposition? Why has mining enterprise fallen into disrepute? About eighteen months ago Mr. Thomas Kiddie told the Vancouver Canadian Club what a very small proportion of the money subscribed for mining companies was used for actual mining operations. The long-suffering public has been asked lately to subscribe to many schemes that from their inception were impossible of success, and impossible from either crass ignorance or deliberate and premeditated dishonesty.

At a meeting of a British Columbia branch of the Canadian Mining Institute, Mr. R. R. Hedley discussed this important subject. Can we (the technical mining men), he asked, in some measure protect the public? The public must take some chances. Mining enterprises that start with prospects cannot be sure of success, but they can be protected against that class of investment that is from the start absolutely sure of failure. Most of us can recall one instance, perhaps many instances, of company promotion that was predestined to failure from one or more of the following reasons: (1) The prospect gave little reason to hope that it ever could yield commercial ores. (2) The proposed distribution of the capital was such that there was no chance for the sufficient development of the property. (3) The management of the company's affairs was placed in grossly incompetent hands. (4) Often it has been the case with a property of some merit, that large blocks of promoters' shares were issued and a small block sold to raise working capital. This might have been sold at 25 cents a share with the expectation that when needed further capital could be raised by selling another block at a higher figure. Before that became necessary, however, the promoters' shares might have been offered for what they would bring, and the market consequently so demoralized that treasury shares became unsaleable.

For these abuses, Mr. Hedley (for whom the Monetary Times has considerable respect as a gentleman interested in actual mining development) suggests a cure. He would have it made a misdemeanor (1) to promote a company to operate a mine that has little, if any, reason to hope for commercial ore; (2) to so distribute the capitalization that the treasury is inadequately supplied; (3) to place the management in grossly incompetent hands; (4) to sell promoters' shares before the property has been developed beyond the prospect stage.

"Surely," said Mr. Hedley, "the Canadian Mining Institute can approach the provincial government with a view to persuading it to so legislate that it shall be required that all prospectuses shall be submitted to an advisory committee to detect faults, if any, that will surely lead to failure of the enterprise. It may not be necessary to ask for a staff of government engineers who will investigate and pass on the merits of the proposition, if it be required that the opinion of a reliable mining engineer be obtained before proceeding to promotion. The ideal way, of course, is to develop prospects to a certain point where there is a fair chance of making good, by a syndicate or a development company." Mr. Marriott, a mining man of world-wide repute, when commenting on the fact that there are so few mining companies sufficiently developed to attract his company, said: "What you need here is a few good development companies."

Mr. Hedley's suggestions deserve consideration. In too many directions is this country suffering from the financial brigandage of those who have in view only immediate and selfish ends without regard to the Dominion's needs, development and future. The mining industry in Canada has suffered from an overdose of unscrupulous company promoting and a lack of insistence upon the obtention of proper advice. Our best mining engineers are staying in the background. We need their names upon the new company's prospectus. If we do not see them there, the company's shares should be eschewed. Many unqualified promotion assistants are allowed to pose as mining engineers. The real mining engineers of Canada have been too modest. They should insist upon taking their proper place in company promotion matters and in that course they will receive the support of the legitimate press and the investing public.

BREAKING THE TRUSTS.

The attack by the United States government on the various trusts, the latest being the United States Steel Corporation, appears to be political stage play. The suit against that company asks for its dissolution and for that of its constituent companies, which, says the government petitioner, "monopolizes a part of commerce." Direct connection is charged by the government, between the Steel Corporation and all of the large railroads and steamship lines, the Standard Oil Company, Pullman Company, International Harvester Company and the Western Union Telegraph Company. The interlocking of directorates is said to have given the Steel Corporation control over trade and commerce and the Steel Corporation's acquisition of Tennessee Iron and Coal properties, in which it is alleged President Roosevelt was misled when he permitted the absorption, is declared to be an illegal and a national menace.

In 1900, most of the crude steel production of the United States was in the hands of three companies, each of which had close business relations with other concerns that manufactured steel in lighter forms. Under the direction of Mr. J. P. Morgan, the United States Steel Corporation was formed, absorbing the three companies in question and a dozen other corporations which had previously been rivals. These corporations had a capitalization of nearly a billion and a half dollars, and though the first capitalization of the trust was only $1,000,000,000, it is said that it should not have been more than $400,000,000. The promoters, chief among whom was Morgan, got $150,000,000 for their services. Andrew Carnegie got nearly $500,000,000, and one of the points Mr. Morgan may now be asked to clear up is why he and his associates paid Mr. Carnegie nearly $500,000,000 for a property that he was offered for $160,000,000 only three years before, and which he then refused on the ground that the price was excessive.

President Taft is trying to break this Steel Trust, practically an impossible task. These trust-breaking campaigns in the United States have a very heroic appearance. That is about all. To dissolve a large industrial combine, alleged to be illegal, without disturbing business is akin to pulling down a skyscraper, alleged to be improperly constructed, without disturbing the immediate neighborhood. In the case of the building, the inspector should have seen that the foundations were laid according to regulation. In the case of the trust, the government should have seen that its charter did not permit what the trust is accused of doing to-day.

President Taft has as much chance to change the business geography of the Steel Trust as he has to remold the physical geography of the United States. The country may be suffering from the operations of industrial combines, but in the majority of cases it is too late for the government to remedy the evils by legislation. The proper moment was when the original charters were granted. The president says he has no desire to disturb business conditions and that if the Steel Trust can prove they did not do this or that, well, everybody will live happily ever after. Surely the people of the United States do not take seriously the amusing spectacle of the government fighting a trust, which can make or unmake governments at will. Canada's lesson from the creation of such a power and the subsequent trust-breaking campaign, is obvious.

◆

The Northern Ontario Trust, Limited, has assets consisting of Porcupine property, house at Porcupine and shares of Achilles Gold Mines, together with an interest in certain claims. Here is a flagrant example of the misuse of the word "trust" in company titles.

SMALL CHANGE.

At the annual meeting of the Consumers' Gas Company, Mr. John L. Blaikie finished his address by quoting what he read a few days ago in one of Sir Walter Scott's novels, "Old men may be permitted to speak long, because they cannot in the course of nature have a long time to speak." Mr. Blaikie cannot label himself an old man, for in Toronto can be seen a son of 72 years taking for an automobile drive his father of 96.

* * * *

Mr. H. W. Baker, the efficient and popular publicity expert at Ottawa, is always busy answering the inquiries of manufacturers who look upon the parliamentary city as a suitable location for factories. Mr. Baker is a past-master in the art of letter writing and his inquirers seldom have to write for "information omitted." The publicity man has become a necessary asset in a progressive city. Mr. Baker is a man of ideas and throws original lines for his catches. With proper support from the civic authorities, there should be success at Ottawa.

* * * *

It is difficult to see what Toronto will gain from building the proposed tube railways. The population of the city is less than 400,000. Heavy traffic on underground railways is required to pay for the initial investment. If the civic authorities had planned to build a network of subways throughout the municipality, it would have meant direct competition with the street railway. The proposed scheme will serve only a restricted area and will fail to cater to anything like all residing in the outlying sections. In about eleven years Toronto will have an opportunity of taking over the street railway franchise. Then it will have the civic street car lines, the company's system, and possibly tubes. Would not the four million dollars proposed to be expended on tube railways be much better spent in building civic car lines, allowing the Toronto Railway Company to operate them, the city to take over the whole system at the expiration of the company's franchise. There is little use in counteracting street railway grievances by wasting a large sum of money on comparatively useless tubes.

* * * *

In discussing the case in which two young bank clerks are charged with embezzlement and attempted arson, Police Magistrate Walker of Winnipeg arraigned the banks as "shops for turning out criminals." He criticized the system which permitted thefts without detection, saying, according to a Canadian press dispatch: "If banks cannot get a system by which these boys can be checked up regularly, the sooner they shut their doors the better for the world. As things are they are simply shops for turning our criminals. The boys are technically the guilty parties, but to my mind the institutions are equally culpable, for it is their negligence which makes possible the crime." Mr. Walker has a considerably exaggerated idea of the situation. He forgets that a dishonest man will deceive, no matter what is the system devised for the employer's protection. The personality of the banker is the most important factor in banking. Embezzlement is not confined to the banking business. Indeed, in view of the millions of dollars handled there, the peculation is comparatively small. In Montreal, a lad in a manufacturing firm to-day stands accused of having taken during five years a sum of $4,800. That house is no more a shop turning out criminals than is the bank at Winnipeg or elsewhere. A magistrate should use greater discretion than exercised by Mr. Walker. Such a broad and reckless statement as his is extremely harmful.

WESTERN CANADA.

Effect of Late Season on Collections—Big Railroad Expansion—In the Wheat Markets.

Monetary Times Office,
Winnipeg, October 30.

There has been a decided improvement in the weather all over the West, so much so that threshing operations have been proceeding without interruption. Progress has been made during the past week, and there is a large movement of grain to the head of the lakes—a movement which is only limited by the supply of cars. The railroads are doing their best to cope with the situation, but it is only to be expected that complaints of car shortage are emanating from scattered points. Local elevators are full, some of them being too small to handle the increased supply, and grain is still coming along from the farms in large quantities. The railway companies are making supreme efforts to meet all demands, and are rushing equipment to all points where required.

Effect of Late Season on Collections.

One result of the inability of the farmers to get their crop marketed as early as usual is that implement houses and other businesses are finding collections slow. Payments for October are not up to the customary standard, but this condition of affairs is amply accounted for by the late season, coupled with the fact that the farmer has to wait for a considerable time for his returns from Winnipeg and Fort William. When the crop is promptly marketed, obligations are as promptly met, but this year there are good and sufficient reasons for October not showing up so well as in former years. November will without doubt show a substantial improvement. In the Morden district of southern Manitoba, where splendid crops were reaped, business men are doing a brisk fall trade, and are meeting little difficulty in collecting their outstanding accounts. The same observation applies to southern Alberta, where obligations are being met in a most satisfactory manner.

Railway Expansion in West.

It is understood the Grand Trunk Pacific Railway has purchased a townsite north of Swift Current, Sask., and that the Canadian Northern will be in the market shortly for an extensive terminal site. The Canadian Pacific Railway are already in course of building branch lines from Swift Current which will place that point on a direct through line from Edmonton to St. Paul and Chicago. The Canadian Northern Railway will run north from Swift Current to Kindersley through a rich agricultural district. The Canadian Pacific Railway will open the longest of their new branch lines for traffic on November 5th, namely, the Colonsay-Regina branch. Altogether 150 miles of new track will be opened for traffic, and is the biggest piece of new construction work completed by the Canadian Pacific Railway this year. A good service is to be inaugurated, so that incoming settlers may have the best of transportation facilities to their new homes. The Canadian Northern has applied for an extension of time in which to construct a large number of their proposed western branches.

The welcome news that the efforts of the Minister of the Interior have been successful, and that the big coal strike in Alberta has been settled, has been received with satisfaction on all hands. Many parts of the West were threatened with a coal famine, but this has happily been averted, although it will require prompt work to rush coal to the prairie country before winter sets in in earnest.

In the Wheat Markets.

After the long upturn markets switched round to the opposite direction, and for the greater part of the week there was a gradual downward trend in values. This was the result of several important influences, chief among which were the general liquidation in the American markets induced by the unsettled condition in the stock market, and by the bearish foreign news which came along all week. Receipts at Winnipeg have been extremely heavy, but there is no keen demand for our wheat abroad. The announcement that the Western Grain Standard Board had slightly lowered the quality of grades Nos. 4, 5 and 6 wheat apparently affected British and Continental markets. Although the European visible is twenty-six million bushels short of last year's total, the continent is showing comparatively little active interest in our crop. There is a continuation of fine conditions in the Argentine, but the latest reports from Australia point to a reduced yield owing to deficient rainfall.

Cash Wheat Active.

Our local market continues active, the close of the week bringing with it an improved cash demand. There was considerable buying by exporters and shippers to fill vessel space. Although receipts are so heavy, the amount in store at Fort William is still much less than a year ago, while the average grade is the lowest on record. Out of 5,476 cars inspected in a week, only 158 graded 1 Northern, or say 3 per cent. as against 16 per cent. in crop of 1910, while 40 per cent. of the cars graded 2 and 3 Northern as against 60 per cent. last year. It is probable that farmers who have the higher grades are holding back for higher prices, but in any case the supply of these grades is limited, and the demand from Ontario mills is likely to grow more insistent as the season advances.

ANOTHER STRONG FINANCIAL HOUSE.

With the prevailing active conditions in the Canadian bond market and the good prospects, there has been no dearth of new firms catering to the investment appetite. The latest to enter the arena is Messrs. Goldman & Company, with offices in the Home Life Building, Toronto. This house, with Mr. Goldman, the well-known and progressive financier at its head, will deal in bonds and investment securities, place underwritings and finance companies. The outlook for the success of the new firm is excellent. Mr. Goldman is eminently qualified to undertake the important financial and underwriting work which will be placed with his firm. As is known, his connection with Messrs. Æmilius Jarvis & Company extended over sixteen years, he being in partnership with Mr. Jarvis for the greater part of that period. Mr. G. E. Cork, who has had considerable experience in the business, will be associated with Mr. Goldman.

INTERCOLONIAL RAILWAY STATEMENT.

The financial statement of the Government Railways of Canada for the year ending with March 31, 1911, has been issued. That for the Intercolonial shows:—Revenue, from passengers, $2,732,989; from freight, $6,263,430; from mails and express, $449,797; from miscellaneous, $417,564; total, $9,863,783. Working expenses—Maintenance of way and structures, $1,804,089; maintenance of equipment, $2,223,908; traffic expenses, $196,228; transportation expenses, $5,144,233; general expenses, $222,610; total, $9,591,070.

This shows net earnings of $272,712 The capital cost of the road and equipment is given as $93,036,906. The length is 1,447 miles.

The Prince Edward Island Railway in the year earned $373,419. The operating expenses were $424,104. The cost of working the road was $86,684 greater than the revenue. The line is 267½ miles in length, and is set down as costing for traffic and equipment, $8,559,684.

Montreal has the highest birth rate of any of the large cities of the world, but has also a death rate only exceeded by one. The following table has been prepared by Dr. Ward, of the Civic Health Department, calculated on the per thousand of population:—

City.	Births.	Deaths.
Montreal	36.45	22.40
St. Petersburg	27.8	24.1
Berlin	25.5	14.7
London	23.6	12.7
Rome	23.6	18.5
Milan	23.3	17.1
Paris	18.0	16.7
Brussels	16.8	13.6

The Royal Bank of Canada has opened a branch at Eburne, B.C.

The Vancouver Power Company purposes an increase in capitalization from $4,000,000 to $7,000,000 by the issue of $3,000,000 worth of ordinary shares at $1 each. This is to cover the cost of extensions at Lake Buntzen and Lake Coquitlam.

The retardation of trade in the United States because of financial apprehensions as to the future, the economy of spending by the great railways, and political uncertainty, are reflected in the report from Washington this week upon the commerce of the Great Lakes. This commerce in September, as compared with that of September, 1910, decreased more than a million tons. The same condition was shown in the figures for September, 1910, which were nearly a million less than those of the same month in 1909, showing that the conditions were much the same a year ago. Soft coal while leading all other shipments, was less than last year's figures. Lumber and grain both show a falling off for the month, but while the figures for lumber for the first nine months showed a decrease from the year before grain shipments increased nearly 15,000,000 tons, all the principal grains showing a gain, except barley and flaxseed. A falling off for the month and season is shown in shipments of flour, salt, copper, pig iron and iron. Unclassified freight increased considerably.

MONTREAL STREET RAILWAY'S POSITION.

Financial Report of the Company and Its Relation to the Present Tangle.

Monetary Times Office,
Montreal, November 1st.

Unusual interest attaches to the financial report of the Montreal Street Railway for the year ended September 30th, 1911. Control of the company changed a year ago, financiers concerned in the Canadian Light and Power Company having obtained a majority of the stock originally with the intention of amalgamating the two companies, the terms being that for each share of Street Railway $250 in 4½ per cent. bonds of the new company, as well as half a share of stock, were to be given, while for each share of Canadian Light and Power, one and one-half shares of new stock were to be given. During the past year nothing further was said concerning this amalgamation, the directors having concentrated their attention upon the affairs of the Street Railway and its subsidiary companies. The Street Railway owns the franchise in the city of Montreal until 1922, while its subsidiary companies own franchises in various suburbs and outlying municipalities, some of which have recently been annexed by the city. Complications ensued between the company and the city. The company pays the city a certain percentage on earnings each year on a sliding scale, the highest rate being 15 per cent. The earnings already exceed the limit of the scale, so that the highest percentage is applicable. The company disputes the right of the city to collect upon certain earnings. There is also a difference of opinion as to the franchise rights of the railway, the counsel for the company stating that in some respects the franchise is a perpetual one. There are questions, too, of snow removal and of freight haulage on the streets, of increased rolling stock and more conveniences to passengers, etc., which all have to be considered.

Amalgamation Deemed Advisable.

In order that these matters might be simplified, it was deemed advisable that the company and its subsidiaries should amalgamate and deal with the city as a whole, the franchises of outside municipalities to be considered also. For this purpose the Montreal Tramway Company was formed, and at a recent meeting of shareholders the directors explained the terms upon which the stock might be exchanged. These were that for each share of Street Railway would be given $87.75 in cash, $160 par value in 5 per cent. debenture stock of the Montreal Tramways Company and $20 in common stock. Those not desiring to accept cash would be entitled to receive $250 in 5 per cent. debenture stock and the $20 in common. It was also announced that a Boston financial house was prepared to underwrite $10,000,000 5 per cent. debenture bonds in the Montreal Tramways Company at about 95 per cent. of par, thus providing cash to be given in exchange for the Street Railway shares.

Although this offer was accepted by a majority of the votes at the special meeting, it was objected to by a prominent shareholder and an injunction was asked to prevent it, but was not granted. The same opponents, and also the city of Montreal, appeared before the Public Utilities Commission in order to have the proposals set aside or amended. The decision of the Commission has not yet been given. The claim was made by one of the opponents that, inasmuch as the new securities to be issued by the Tramways Company would require fixed charges of $300,000 more than they now paid out as dividends, the city would be placed at a disadvantage in any negotiations it entered into with the railway. Doubts were expressed as to whether the company was able to earn the extra $300,000 per annum.

Comparative Statement of Earnings.

The following statement of earnings during the past year and the comparison with those of the previous year throws considerable light on these points:—

	1911.	Increase over 1910.
Gross earnings	$4,775,300	$422,749
Operating expenses	2,679,805	224,504
Net earnings	$2,095,494	$198,245
Interest from Park & Island Ry..	114,807	28,929
Total income	$2,210,302	$227,174
Fixed Charges—		
City's percentage on earnings	$335,194	$57,110
Interest	185,097	9,666
Rentals, leased lines	7,122	650
Taxes	56,500	8,500
Total	$683,904	$75,926
Net income	$1,626,398	$151,248
Dividend, 10 per cent	1,000,000	Same
Surplus	$626,398	151,248
Appropriations—		
Contingent account	$250,000	Same
Fire insurance	25,000	Same
Total	$275,000	Same
Transferred to surplus account	$351,398	$151,248
General surplus, now	2,735,009	351,398
Expenses percentage of earnings.	56.12	*.29
Passengers carried	118,268,080	11,026,674
Car earnings per passenger	3.94c	*.01c
Transfers	40,488,545	4,051,422
Total passengers	158,756,625	15,078,096

*Decrease.

Fairly conclusive evidence is here that the objection that the company will be unable to earn the $300,000 extra is not a strong one. The increase in net earnings for the year were $198,244, and the increase in total income $227,174. After all fixed charges and dividend requirements had been provided for there was a surplus of $626,398, and after liberal appropriations for contingent account and fire insurance, a balance of $351,398 remained to be carried forward to the credit of the surplus account. As compared with the previous year, this showed an increase of $151,248. It is therefore evident that had the company carried the increased charges of $300,000 during the past year, all appropriations could have been provided for and a balance of $51,398 would have remained to be carried forward to the credit of the general surplus. This general surplus is now $2,735,009.

Sum Paid to the City.

In the comparison of the passengers carried the company collected over 11,000,000 tickets more than the previous year and these, together with the transfers collected, amounted to a total of nearly 159,000,000, being an increase of over 15,000,000 over the figures of the previous year. This is an increase of 10 per cent. in the number of passengers carried. The company may not admit that the service was any less efficient, yet, unless it has been able to add 10 per cent. to its rolling stock and other facilities for carrying passengers, there seems some ground for the complaint. In the directors' report the statement is made that the property has been maintained in a high state of efficiency, and that a considerable sum has been spent in the maintenance of the track and rolling stock, power plants and buildings.

It will be observed that the company paid the city a sum of $335,194, being the percentage of earnings to which the city is entitled. This was an increase of $57,000 as compared with the previous year. In addition to this the company paid $56,500 in taxes, an increase of $8,500.

◆

TIMBER EXCHANGE OPENED.

The large amount of valuable timber in British Columbia and the wide recognition of that fact, is apt to attract to that province the class of promoter who is little concerned about the reputation of the province or of himself, and while the reputation of business men here now compares favorably with that of any other community, yet financial men, as represented in the financial journals, are now concerned that this reputation should be maintained. Actuated to some extent at least by these considerations the British Canadian Securities, Limited, have decided to open a department devoted entirely to timber and its value, giving careful consideration to quantity, quality, accessibility and price. The department will act entirely as agent and will purchase and sell only as agent and not on its own account, so that the opinions given should be unbiased and reliable.

It is also proposed to act in an advisory capacity so that investors contemplating timber purchases will be able for a fee to secure all information regarding properties under consideration, whether such purchases are intended to be made through the British Canadian Securities or through any other individual or corporation.

The company has secured the services of Mr. G. F. Gibson, a timber expert with considerable experience, as head of this department.

◆

The Bank of British North America has opened a branch at Kerrisdale, B.C.

At a meeting of the directors of the Montreal Telegraph Company the vacancy in the board created by the resignation of Mr. Hugh A. Allan. was filled by the election of Mr. Bartlett McLennan. Mr. William McMaster, vice-president, was elected president in Mr. Allan's place, Mr. William Wainwright succeeding Mr. McMaster as vice-president. The Montreal Telegraph Company besides being the pioneer Canadian Telegraph Company, is the oldest telegraph corporate body in the world to-day. It was organized in 1846 by members of the Montreal Board of Trade, and entered upon its successful career early in the year 1847.

COBALT IS A BIG SILVER SHIPPER.

Market For Ores—World's Production—Low Grade Ores.

There is a good demand for the silver ores of Cobalt, for the higher grades as well as for the poorer, more silicious qualities which have a value for fluxing purposes apart from their silver contents. Part of the richer ore goes to smelters in New York, Pennsylvania and New Jersey, and some of the heavy metallic ore from such mines as the Crown Reserve finds its way to the works of Beer, Sondheimer & Company in Germany, but most of the high grade ore is now refined in Ontario by the Canadian Copper Company, Copper Cliff, the Deloro Mining and Reduction Company, Deloro, and the Coniagas Reduction Company, whose head office is at St. Catharines and works at Thorold. These three companies combined treated 9,466 tons of ore and concentrates in 1910, the recovery of silver from which amounted to 14,574,837 fine ounces. The remainder of the output, consisting of 24,893 tons of ore and concentrates, yielding 16,076,580 ounces of silver, was exported, mainly to the United States. The material sent abroad for treatment thus contained on an average 645 ounces per ton, while that refined at home carried an average of 1,539 ounces per ton.

Were in the Market.

In addition to the three Canadian companies mentioned, the following concerns were in the market last year for Cobalt silver ores: American Smelting and Refining Company, whose purchases of low-grade ore were sent to Denver, Col., and Omaha, Neb., and of high grade to Perth Amboy, N.J.; Balbach Smelting and Refining Company, Newark, N.J., Pennsylvania Smelting Company, Carnegie, Pa., United States Metals Refining Company, Chrome, N.J., Beer, Sondheimer and Company, Frankfort-on-Main, Germany, and Quick, Barton and Company, London, England. The tariffs according to which these companies buy the ores vary a good deal in details, some imposing a refining charge of a half or three-quarters of a cent per ounce of silver, and a treatment charge of $10 or $25 per ton of ore, and paying for 95 up to 98 per cent. of the silver contents; others omitting the treatment charges, but paying for up to 95 per cent. of the silver, and subjecting nickel and arsenic to certain penalties if in excess of specified proportions. Neither cobalt, nickel nor arsenic are now paid for by ore-buyers.

Three new companies have erected plants for treating cobalt silver ores in Ontario, and expect to be in the market for the purchase of ores. These are Dominion Metals, Limited, Toronto; Canada Refining and Smelting Company, Orillia, and Swansea Smelting and Refining Company, Swansea.

Sampling Plant Established.

The facilities for handling ore in the Cobalt camp were increased in 1910 by the establishment of a sampling plant by Messrs. Campbell and Deyell. The works have a capacity of 30 tons of high grade ore per day, and are proving of much convenience to the mines. Without the aid of a sampling plant, it is a difficult matter to estimate closely the contents or value of a carload of such irregular material as high grade silver ore from Cobalt, but by ascertaining the contents in advance of sale or shipment, the seller is enabled to choose the market for which his ore is best suited. The advantages will be still more apparent when the sampling and assay come to be accepted as authoritative by smelters and buyers generally.

The operations of the Canadian cobalt-silver smelting works for the year 1910 may be summarized as follows:—

Ore received	tons	9,506
Ore treated	tons	9,466
White arsenic recovered and shipped,	pounds	3,047,699
Value of ditto		$70,709
Cobalt oxide shipped	pounds	13,508
Value of ditto		$9,630
Mixed oxides of cobalt and nickel shipped	pounds	108,178
Value of ditto		$18,769
Silver recovered	ounces	14,574,837
Value of ditto		$7,656,098
Workmen employed		298
Wages paid		$212,694

Cobalt, a Big Silver Shipper.

Since 1904 and to the end of 1910, Cobalt has shipped 102,078 tons of silver ore, 10,930 tons of concentrates and 980,633 ounces of bullion with a total value of $48,368,333. The record is one of steady and rapid progress, not easily matched in the annals of the mining industry in any part of the world. Cobalt has given Ontario third place among silver-producing countries, coming next after Mexico and the United States. The estimated production of the world in 1910 as given by the Director of the United States Mint was 217,788,714 ounces, Mexico being credited with 72,574,220 ounces, and the United States with 56,438,695 ounces. The production of Canada is given in the Director's table as 32,878,590 ounces, which is a close approximation to the actual figures, Ontario's output being 30,651,417 ounces, and British Columbia's 2,500,000 ounces as stated by Mr. Wm. Fleet Robertson, Provincial Mineralogist of that province in his preliminary estimate of mineral production for 1910, issued in January, 1911. South America, whose silver mines once united with the golden ingots of the Incas to fire the imagination and arouse the cupidity of her Spanish conquerors, yielded in 1910 only 16,476,928 ounces, while Australasia furnished about the same quantity, or 16,359,284 ounces. That is to say, Ontario's silver product last year was almost as great as that of South America and Australasia combined.

In the natural development of Cobalt the concentration of low-grade ores is yearly assuming greater importance. The first concentrates were made in 1908, amounting to 1,137 tons; in 1909 the shipments were 2,948 tons, and in 1910 they rose to 6,846 tons. Although constituting by weight only 20 per cent. of the shipments from the camp in 1910, they accounted for 23.1 per cent. of the total yield of silver. There were at work during the year fourteen concentration plants, of which three were customs mills, namely, Northern Customs Concentrators, Nipissing Reduction Works and Montreal Reduction Company's plant at Trout Mills; and the remaining eleven were operated by as many mining companies for the treatment of their ores. A fourteenth plant, that of the Hudson Bay Mines, Limited, was under construction at the close of the year, and has since begun work.

◆

GRAND TRUNK AND TEMISKAMING RAILWAYS.

As predicted several months ago, an engagement has now been made by the Temiskaming & Northern Ontario Railway with the Grand Trunk Railway for running rights of its trains over the provincial government's line, in consideration of which the company assumes an equitable share of the general maintenance of the road and pays the sum of $300,000 per annum as rental for such running rights, this sum representing one-half of the interest on the total cost of construction of the railway.

The main line of the Ontario Government Railway has been completed to Cochrane on the Grand Trunk Pacific Railway, a distance of 253 miles, and the Porcupine branch, it is expected, will be completed to Metagami River before the end of the present year, when the railway, with branches, will have about 380 miles in operation. Surveys for a possible extension of the line have been made as far north as James Bay in case it is decided to continue the line to that point.

◆

HISTORY OF THE BANK OF ENGLAND.

The National Monetary Commission has published a translation of Dr. Eugen von Philippovich's "The Bank of England and its Financial Services to the State," which, though well known to students of banking, has hitherto only been accessible in the German language. Dr. Philippovich does not study the Bank of England as a factor in the economic growth of the nation, but rather the "relations between the bank and the English financial administration, and the form which they present to-day."

Some banks, of which the German Reichsbank and the Bank of Japan are examples, have been organized out of hand by legislative enactment to aid in the administration of government finance and to provide banking resources for industry and convenience. The origin of the immense powers of the Bank of England was quite different. Although the Bank of England was founded in 1694 it did not gain its present intimate connection with government finance until the nineteenth century. The present powers of the bank were acquired as experience showed government officials that the facilities of the bank could be used to advantage in the administration of the public receipts and expenditures. In many cases the bank was first made use of by finance ministers and paymasters, and the legal authority followed later. In the Bank of England, therefore, we have the best possible example of the development of an institution that has, little by little, taken on new functions and new public responsibilities as experience showed these powers to be economically desirable.

In 1694 William Paterson and associates advanced the government £1,200,000 in return for £100,000 a year and the privilege of forming a corporation under the title, "the Governor and Company of the Bank of England." The corporation was allowed to deal in bills of exchange, to buy and sell gold and silver bullion, to lend money on security, with the right of selling the security three months after maturity of the debt secured. The government debt formed the capital stock and the bank was allowed to issue notes up to that amount. There is nothing in the law establishing the bank that indicated any intention of turning the management of the public debt over to it. None of the functions of the exchequer were to be exercised by it. However, the bank at once showed its importance in relation to the government credit by cashing the bills representing the public debt.

In 1697 a new bank Act allowed the Bank of England to increase its capital stock by taking subscriptions in bank notes and government bills. In 1708 the capital stock was again increased through a loan to the government and the monopoly of the bank was protected by a provision prohibiting companies of more than six persons from issuing bills or notes which were payable within six months of the date of issue. These two Acts, together with the original act of establishment, "formed the basis of the Bank of England's position until the beginning of the nineteenth century."

BRITISH COLUMBIA.

Proposed Tunnel From Lulu Island to Vancouver—Franchises of British Columbia Electric Railway.

(Staff Correspondence.)

Vancouver, October 28th.

Railways and railway construction are causing varied activity on the Pacific coast. Five railways are said to be backing the scheme to utilize a large portion of Lulu Island for terminal facilities. This island is on the sea and is quite level. The proposal is to reclaim some of the tide flats and construct a tunnel five miles long into Vancouver. The capitalization is $20,000,000. To many the first announcement of the project did not appear feasible. Messrs. J. C. White & Company, New York engineers, are looking over the ground, and if the island, formed by deposits of silt through the ages at the mouth of the Fraser River, gives solidity enough for the purposes required, it is very probable that further action will be taken. In Vancouver or on Burrard Inlet water frontage is at a premium. Lulu Island offers a large area which is close to the city and handy for all lines. One of the lines mentioned in this connection is the Chicago, Milwaukee & St. Paul, the entry of which has been suggested several times. Last winter there was a flurry of real estate on Lulu Island, started by the initial securing of options for the purpose now mentioned, and property sales were lively. After the first excitement the promoters went quietly to work and have secured what they were after.

Did Not Appeal as Business.

The proposition is the biggest engineering project of its kind contemplated in Canada and perhaps in the United States. For that reason it has appeared unlikely. The construction of a tunnel five miles in length to reach False Creek in the heart of Vancouver did not appeal to many as business, since there are several routes with fair grades, and these through parts of the city not congested with population. The Lulu Island part of the scheme is not an improbability by any means, as industries are steadily locating on the Fraser River. With the improvement of the channel that has been promised, both rail and water shipping facilities will be provided. Another point argued in its favor is the recent acquisition of several hundred acres of land in Coquitlam by the Canadian Pacific Railway for shop and yard purposes, not having room in Vancouver. If the Canadian Pacific Railway cannot find room, when it controls so much land, it is only natural that other companies should be seeking a level tract of land within easy reach of the business centre.

New points of discussion are arising in connection with the British Columbia Electric Railway. An amendment is proposed to the city charter to allow the raising of $500,000 annually until 1918, in which year the city has the right to purchase. This suggestion has not met with unanimity in the city council, though the amendment will likely be made, it being pointed out that it will not commit the city.

Should Franchise Be Rendered Invalid.

Two years ago the municipality of Burnaby granted a franchise to the British Columbia Electric Railway Company, but the matter was not submitted to the electors at the time. It has been suggested that this omission rendered the bargain invalid, and following a majority vote of the electors the point will be taken to the courts for decision. It is an important one, as the franchise in Point Grey is also affected. The company will engage the best legal talent.

Vancouver owners of land in the district between here and Stave River held a meeting last Tuesday to take preliminary steps toward the construction of an electric line between this city and Ruskin. It is near Ruskin that the Western Canada Power Company has its works, and the company has been asked to make a statement as to cost of power for a period of fifteen years. If the reply is satisfactory the railway company will be organized.

Another electric railway project is the offer of the British Columbia Hydraulic Company, of Victoria, to install a system in Nanaimo, if the city will guarantee the interest on $150,000 bonds. The city is promised a percentage of the gross revenue.

Railway From Edmonton to Fort George.

The charter secured by Mr. J. D. McArthur, of Winnipeg, and associates for a railway extension from Edmonton to Fort George promises another line through a section of the country where much development is expected during the next year or two. This line will come through the Pine River Pass, north of the Yellowhead, and will give access to the Peace River district.

Port Mann is again coming into prominence, and when the auction of lots takes place considerable interest will have been aroused. Sir Donald Mann has stated that ultimately there will be 5,000 men on the pay roll of the railway there, which in itself will ensure a fairly large population. The future city has been laid out well, with fine streets and boulevards, seven parks and artificial lakes in a large ravine in the townsite. Many of the lots in the business section will be 60 feet wide, as compared with 25 feet in Vancouver. Mr. John F. Hansen, president of the North Saskatchewan Land Company, of Winnipeg, has completed a satisfactory investigation into the possibilities of Port Mann on behalf of a British syndicate which contemplates investing $1,000,000 in property there. Port Mann may become a big railway and industrial centre. The Canadian Northern is mentioned in connection with the proposed Lulu Island development scheme, and even if the report is correct it should not affect Port Mann, any more than the purchase by the Canadian Pacific Railway of land in Coquitlam has affected Vancouver.

An important mining deal is the purchase of the Juniper claim near New Hazelton for $150,000 by a syndicate of Utah mining men, including Mr. John T. Cowan, Salt Lake; Browning Bros., Ogden, and others. Count William L. von Hardenberg, Berlin, Germany, has paid $100,000 for the Viking mineral group on Pitt Lake. It was owned in Vancouver.

◆

MONTREAL JOINT STOCK COMPANIES ENTITLED TO VOTE.

The following letter has been issued by Mr. George Hadrill, secretary of the Montreal Board of Trade, regarding the eligibility of Montreal Joint Stock companies and corporations to vote in municipal elections: As the result of the efforts of this Board and the Canadian Manufacturers Association, the following amendment to the charter of the city of Montreal has been secured, and in view of the importance of our representatives in the city council being honest, intelligent, and progressive men, the council considers it most necessary that the members of this board should bestir themselves to that end, and that those connected with incorporated companies or corporations should take advantage of this amendment to the city charter,—"44a. Joint stock companies or corporations may be entered on the voters' list and vote in the name of and through a representative of the company, duly authorized to that effect by a resolution, a copy whereof shall be filed with the city clerk on or before the first of December of each year, and they may so vote in all the wards where they pay taxes; provided such representative be a director or employee of the company when authorized and called upon to cast his vote."

◆

INTEREST ON A CENT FOR NINETEEN HUNDRED AND TEN YEARS.

Wagner and Sufan, the German statisticians, estimated in the year 1891 the population of the world at 1,480 million persons. More than one-half of this estimated number was based upon the results of actual censuses, and the remainder was carefully estimated. We shall probably not be far away from the truth if we say that there are now (in A. D. 1911) 1,800 million persons on the earth. If in Anno Domini 1 a man had then desired to be hailed in a later century Universal Benefactor of the World, he could have achieved his desire by then investing the equivalent of a modern American cent at 5 per centum compound interest per annum, the interest to accumulate year by year for the benefit of future generations.

At the end of the first century of investment—namely, in A. D. 100—the original cent would have grown to $1.31. At the end of 1,910 years after Anno Domini 1—namely, at the end of the year 1910 (last year)—the original cent would have grown to the stupendous value of 296,180,000,000,000,000,000,000,000,000,000,000,000 dollars ($29,618 followed by 34 0's). This accumulation resulting in A. D. 1910 from the original investment of one cent in Anno Domini 1 is so vast that no brain can realize what is the meaning of the enormous quantity of dollars just stated. We are wholly unable to realize the stupendous golden growth of this original cent unless we press into our service various aids to imaginative conception, such as those I have dreamed and here illustrated.

Imagine the earth transformed into a huge flat slab one mile thick, floating in space. Let every man, woman, and child now living in the world—approximately 1,800 million persons—continuously discharge a quick-firing gun loaded with American gold eagles in place of bullets for one thousand years. Each gun fires into space one thousand gold eagles per minute, which drop over the edges of the earth. The result is that at the end of one thousand years' continuous discharge of gold eagles from 1,800 millions of quick-firing guns at the rate of one thousand gold eagles per minute from each gun, only an infinitesimal fraction of the money would have thus been got rid of.

The amount to be thus drawn upon being $29,618 followed by thirty-four 0's, this amount being the accumulated result of one cent invested in Anno Domini 1 at 5 per cent. compound interest until the end of the year 1910. All this firing away of gold eagles would have to continue for more than 31,000,000,000,000,000 years, in order to exhaust the money accumulated in A. D. 1910. This incredible result is no freak of fancy, but a solid fact.—John Holt Schooling in November Strand.

FIRST FALL FLOTATION ABROAD.

Toronto Power Company's Issue Was Fully Subscribed. —Municipal Bond Notes.

A London cable says that the Toronto Power Company's issue of £821,917 4½s at 96 has been fully subscribed.

The issue of £300,000 of 6s at par of the Anglo-Persian Oil Company, of which Lord Strathcona is chairman, is also fully subscribed.

Mr. James A. Mackinnon, general manager of the Eastern Townships Bank, has returned from a trip of inspection with his directors, of their Western branches. Western towns, he said, are borrowing freely. He instanced the cases of Calgary and Edmonton, the former already owing $11,000,000, or two millions in excess of the total debt of the Province of Alberta, and the capital of the Saskatchewan being indebted to the amount of $9,000,000, or equal to the provincial indebtedness.

Regina, he said, had the most favorable financial showing of all. That city had conserved its land property, and selling these holdings to advantage, the city is able to build handsome school buildings and other edifices which are a credit.

Regina's Good Position.

Regina, which sold a big block of bonds last month, is the capital and largest city in Saskatchewan and the commercial and industrial centre of the middle West, possessing advantages for the manufacturer, the wholesaler and distributor, of inestimable worth and peculiarly her own. Regina's distributing territory comprises over 60,000 square miles in which are located over 250 towns and villages and a population of nearly half a million, and over 200 wholesale and distributing firms are now located there.

Regina's railway facilities are unexcelled in Western Canada, and it has five lines Canadian Pacific Railway, two lines Canadian Northern, one line Grand Trunk Pacific; two additional lines of the Grand Trunk Pacific will be in operation this fall, and three other lines projected. The Canadian Northern will have an additional line west in operation within a year's time. The Canadian Pacific contemplate building an additional line south from Regina.

When this railway construction is completed Regina will have a total of fifteen lines of railway radiating in all directions.

The statistics given below show the progress and development which have taken place:—

In 1882 the population was 200; 1901, 2,645; 1905, 5,500; 1910, 18,500, and 1911, 30,000.

The building permits in 1904 totalled $210,000.00. To September 30, 1911, $4,250,000.00.

The assessment in 1904 was $2,284,710.00, and 1911 $34,840,003.00, while the bank clearings for the first nine months 1910 totalled $33,547,433.48, and for the first nine months 1911, $49,269,937.70.

The customs house receipts for the same period total in 1910 $512,880.61, and in 1911 $642,573.64, an increase of $129,693.03.

Regina offers many opportunities for the investor.

Position of Rivers, Manitoba.

Rivers, Man., is asking for tenders for $6,000 6 per cent. twenty-year debentures for fire protection purposes. The village has not yet been incorporated a year, and the present population is about 1,100. The taxable property amounts to $342,405.00, and the rate of taxation, general 15 1-5 mills, school 11 mills, local improvement 1½ mills, total 28 mills. There is no other debenture debt.

Swan River, Man., is the central point in the Swan River Valley, which lies about ninety miles north of Dauphin and is about thirty miles by twenty miles in area. The country is very fertile and is noted as being able to raise fall wheat with success. The surrounding district is populated with a good class of farmers, nearly all Canadians. The town itself contains a population of about 900 and is growing steadily. It is situated on the Prince Albert line of the Canadian Northern Railway half way between Winnipeg and Prince Albert.

When the town was incorporated it assumed a small part of the debenture debt of the municipality from which it was taken, but the payments amount to only $173.10 annually and will run for about thirteen years. In 1908 the town issued $6,000.00 worth of local improvement debentures to pay for a drainage system and these debentures were sold at a little above par. The debentures payments have always been met on due date.

A new school is being built in the town to cost $20,000.00, the cost being provided for by thirty-year debentures issued by the School District, which contains considerable farm lands outside of the town limits, so that the town has only to pay a portion of the annual payments. The tax rate this year is 30 mills on the dollar, exclusive of frontage tax.

Progress Keeps Pace.

The rural municipality of Progress No. 351 was organized January 16th, 1911, comprising townships 34, 35. This district, which is among the most fertile in Saskatchewan, was settled by an American development company which purchased all of the odd numbered sections from the Canadian Northern Railway and sold them to actual settlers who are in a financial position which enables them to make rapid progress in the development of their properties.

These German-American settlers and the Canadians and Scotch who have also entered into the community are in favor of good roads. This accounts for the large amount of work that has been done by the municipality since its organization and between fifty and seventy-five miles of good roads have been built.

The money for this work has been borrowed and will be the first charge upon the debenture receipts. This is the first issue of debentures and will probably be the last, since the Government of Saskatchewan will only allow an issue of $24,000 by any municipality. The municipality started business with about $2,000 of assets in the form of arrears transferred to it by the provincial government; the 1911 assessment roll credits it further with $9,403.68; and a grant of $1,000 is being obtained from the provincial public works department.

The rural municipality of Progress has made a record in development both as a municipality during the ten months of its life and as a farming community during the four years it has existed as such.

Thetford Mines Offering.

Thetford Mines, Que., is issuing debentures for $170,000 for the construction of waterworks and sewers and roads. The total bonded debt of the town, including the present issue, is $300,000, while the floating debt amounts to $14,675. Town and city assets show $324,130, and the assessed value of taxable real estate is $2,355,975. The assessed value of exempted property, including mines, is placed at $9,000,000. The present population is 7,262.

A review of the Canadian bond market is to be issued monthly by the Dominion Bond Company. The first copy is being circulated. Our bond market, it says, has shown increased signs of activity. This applies to all departments—municipal, industrial and public utility. During the period preceding the elections a very large number of bond buyers held aloof from the market because of the uncertainty that prevailed as to the outcome. Since that time, however, a great many corporations and investors have come into the market as buyers, and the outlook certainly points to very active trading for the next four or five months.

The outstanding feature of the Canadian bond market during the past year has been the almost phenomenal increase in the number of comparatively small bond buyers in the different sections of the country.

The principal factors that have contributed to such a large increase have undoubtedly been the necessity of securing a larger yield upon one's investments, owing to the increased cost of living, and the general tendency there is on the part of investors to have a larger amount of their capital invested in standard bonds in preference to stocks. The increased number of enquiries being received would seem to indicate that the increase in the number of bond buyers will be even greater during the next year than it has been up to the present.

The monthly review of the Dominion Bond Company is an excellent innovation and should prove of value to the investor.

Red Deer Invites Bond Tenders.

The net debenture debt of Red Deer, Alta., is $90,692, while the town assets are valued at $315,261. The municipality assured value of taxation on land improvements, etc., is placed at $2,472,595.

The town is inviting tenders until November 20th for $63,600 5 per cent. 5, 10, 20 and 30-year debentures. The present population is about 3,000.

Big Industrial Offering.

An offering of £1,500,000 Canadian Locomotive Company 6 per cent. first mortgage forty-year sinking fund gold bonds is being made by Messrs. Æmilius Jarvis & Co. and the Dominion Securities Corporation, Limited, Toronto.

The company was incorporated in June and its assets as of July 1st totalled $5,000,000. The average net earnings for four years were $291,719. The company has on hand orders for 62 locomotives which are scheduled to be completed by July, 1912. The present capacity of the plant, which may be said to comprise everything required for the building of the most modern locomotives, is capable of producing a yearly output of about 75 engines, but as each year many satisfactory orders have been declined owing to the inability of the Company to make the deliveries required, it has been decided to proceed immediately with such enlargement of the works as will increase their future output to at least double their present capacity.

The bonds are secured by a trust deed in favor of the National Trust Company, Limited, as trustee, constituting them a first specific mortgage on the properties of the company mentioned therein and a first floating charge on the personal property, undertaking and assets, present and future, including all its present and future tolls, incomes and sources of money, rights, powers, privileges and franchises.

The bonds are offered at 100 and interest yielding 6 per cent.

OCTOBER MUNICIPAL BOND SALES.

Five Provinces in the Market.—Saskatchewan's Capital Makes the Largest Sale.

The municipal bond sales for October as compiled by The Monetary Times amounted to $1,730,175 compared with $1,748,778 for September and $2,211,461 for the corresponding period last year.

Five provinces were on the market and the majority of the sales were small, the largest being Regina which sold $932,800 4½ per cent. 15, 20 and 40-year debentures and $100,000 4½ per cent. 20-year school bonds.

The following are the particulars by provinces:—

Alberta	$132,700
British Columbia	52,200
Manitoba	108,000
Ontario	202,757
Saskatchewan	1,234,418
	$1,730,175

The following are the monthly totals as compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$2,540,862	$ 881,838	$ 420,337
February	4,074,125	1,272,977	1,037,287
March	1,615,368	1,169,730	6,271,925
April	4,033,988	6,805,078	3,910,288
May	5,185,530	5,964,896	3,946,047
June	2,243,569	2,187,588	3,983,670
July	1,989,442	1,536,424	1,594,566
August	3,011,242	1,312,953	1,493,507
September	1,503,108	2,841,486	1,748,778
October	1,510,132	2,211,461	1,730,175
November	2,725,166	2,292,781	....
December	1,100,428	566,113	....
Total	$31,532,960	$29,043,325	$26,142,580

The following are the particulars:—

Alberta.

Small schools	$ 3,000	6¼	1921
Camrose S. D.	28,400	6	1931-41
Castor	7,000	5½	1916-31
Calgary R. C. S. D.	60,000	4½	1941
Wainwright	34,300	5½	1931
	$132,700		

British Columbia.

Municipality of Spallumcheen	$25,200	5 and 6	1931-41
Kelowna	27,000	5	1916-1931-38
	$52,200		

Manitoba.

Portage la Prairie	$100,000	5	1941
Macdonald Municipality	4,000	4	1930
Minnedosa	4,000	5	1941
	$108,000		

Ontario.

Dunville	$10,000	5	1931
Sandwich	16,300	5	1921-31
Thamesville	3,500	5	1926
Clinton	11,000	4½	1930-41
Cochrane	38,500	4	1931
Meaford	16,000	5	1926
Dundas	16,500	5	1912-26
Petrolia	22,977	4½ & 5	1921-26
Hastings	6,000	5	1931
Mimico	7,500	5	1941
Cornwall Township	5,225	5	1931
Ingersoll	25,000	4½	1941
Raleigh Township	10,755	5	1921
New Liskeard	7,000	5	1931
Midland	6,500	5	1941
	$202,757		

Saskatchewan.

Village of Abernethy	$ 3,000	6	1926
Small schools	3,000	6¼	1921
Moose Jaw S. D.	125,000	4½	1941
Indian Head	18,215	5	1926-46
Regina	932,800	4½	1926-31-51
Regina S. D.	100,000	4½	1931

Weyburn	7,403	.	....
Govan	5,000	6	1926
	$1,234,418		

PERSONAL NOTES.

Mr. W. C. Matthews, general manager of Messrs. R. G. Dun & Company, Toronto, is dead.

Mr. George A. Taylor, manager of the Royal Bank of Canada at Halifax, N.S., has been transferred to the Fredericton branch. Mr. Taylor was recently tendered a banquet at the Halifax Club.

Mr. Thomas McCaffry, manager of the Vancouver branch of the Union Bank, and supervisor of the branches in British Columbia, has been ill for the past month. He is expected to resume his duties shortly.

Mr. F. J. Coombs, manager of bond department, and Mr. C. E. Abbs, office manager, have been admitted to partnership in the firm of Messrs. A. E. Ames and Company of Toronto. Both gentlemen have been with the firm for many years.

Mr. F. W. Wegenast, manager of the Canadian Manufacturers' Association, legal department, Toronto, has gone to Vancouver, B.C., to represent the members before the commission which is to investigate the British Columbia Companies Act, and taxation and assessment laws.

Mr. John G. Borthwick, secretary of the Canadian branch of the Caledonian Insurance Company, has been appointed Canadian manager of the company, in succession to Mr. Lansing Lewis, who recently retired. Having served in his capacity as Canadian secretary for eleven years Mr. Borthwick is widely known throughout the Dominion.

Mr. John Ferguson, one of the two London managers of the National Bank of Scotland, and a recent visitor to The Monetary Times Office, has concluded his tour of Canada. The Dominion, he says, has all the money it wants for commercial purposes and the energy and enterprise of the banks here will no doubt keep up the supply, but we shall go to the Old Country for money to be used for railway development and other public works, "I am going back to tell money lenders of Great Britain that here in Canada is to be found the greatest country for sale investments in the whole world," he said.

COBALT ORE SHIPMENTS.

The following are the Cobalt ore shipments, in pounds, for the week ended October 27th:—Drummond, 120,000; Nipissing, 65,393; Cobalt Lake, 61,400; Hudson Bay, 61,484; Buffalo, 57,892; La Rose, 65,611; Green-Meehan, 85,800; McKinley-Darragh, 51,207; Beaver, 54,280; Millerette, 60,000; total 682,967 pounds or 341 tons. The total shipments since January 1st are now 42,499,249 pounds or 21,249 tons.

In 1904 the camp produced 158 tons, valued at $316,217: in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

Congratulations to the Montreal Herald, one hundred years old. The Monetary Times in its forty-fourth year feels quite young again.

* * * *

The board of censors of moving picture films for Ontario has directed manufacturers in the United States to delete the Stars and Stripes from their films. This has raised the ire of the manufacturers, who have addressed a communication to the United States Secretary of State. The moving picture show has become a sort of educational institution, whether we like it or not. The Ontario censors, we feel sure, have no antipathy to the Stars and Stripes. All they are doing is to see that Canadian children and others shall be taught, in a British country, of deeds of valor under the Union Jack rather than under its companion flag. We can stand both in Canada but at present our neighbor's flag has the monopoly in this line. We would suggest to the film manufacturers who "consider it an insult to our flag and detrimental to our commercial interests" to make some pictures suitable for consumption in this country. Such a course would hurt neither their pride nor their pocket.

STARTING A BANK IN A SMALL VILLAGE.

Difference in Procedure Followed by Canada and United States—Canadian Depositors Have Greater Safety.

By H. M. P. Eckardt.

There is a remarkable difference in the procedure followed in Canada and in the United States when the inhabitants of a small village desire to secure banking facilities. On the southern side of the boundary line the wealthier members of a community of this type must assume considerable responsibility before they can realize their ambition of having a bank in town. To have a branch of an outside bank is out of the question for the American law practically forbids branch establishment. If the people are determined to have a bank they must organize it among themselves, subscribe and pay in the capital that is required, employ the officers and men, and assume full responsibility for the operations of the concern.

First of all they have to decide whether they will apply for a federal or a state charter. The banks having a federal charter have a somewhat higher standing than the state banks, but the minimum capital for a national bank is $25,000, and it is not every small village that can provide that much. Then there is another difficulty. The charter for a national bank must have the approval of the Comptroller of the Currency at Washington. Until a few years ago it was the custom for the Comptroller to approve of the granting of charters in every case wherein the applicants had complied with the formalities prescribed by law.

Professional Bank Promoters Began to Exist.

A class of professional bank promoters sprang up; they would go from place to place, organize banks and collect their commission or profit in each case, and then let their newly created institutions shift for themselves. In some cases the new banks did not prove to be prosperous concerns. So the Hon. Mr. Murray, who now occupies the office of Comptroller of the Currency, introduced a severer method of dealing with applications for a bank charter.

He will not approve an application until he investigates the circumstances. He inquires about the parties who back or endorse the application. If they are the associates of a professional promoter their plan will probably be disallowed. Again the Comptroller may refuse their application if he considers that the place is too small or that it will not provide business enough to enable a bank to live.

Thus the citizens may be baulked in their efforts to secure the establishment of a national bank.

The department at Washington has an autocratic power in the matter. Apparently the Comptroller turns down about one-half of the applications he receives. At any rate he stated in a letter published about a month ago that he had disapproved of about 200 applications in the past year and a half. As the number of national banks increased by 219 in that period it is therefore presumed that somewhat more than one-half the applications were approved.

Local Parties Must Take Responsibility.

If the Comptroller allows the scheme to go through, the local parties must take the whole responsibility of success or failure. They are subject to double liability on the stock they subscribe for. They are obliged in the first place to put up the funds to comprise the capital of the bank. Then if the bank meets with disaster they may be called upon to pay on account of their double liability. It is quite a common occurrence for the Comptroller to insist that the shareholders of a national bank shall pay in fresh capital to replace losses which the examiners declare have been made.

The responsibility is much the same if a state bank is organized. The minimum of capital will be less, but the parties who wish to have the bank in their village must stand responsible for its debts and its good management. They will lose heavily if the trusted officers default or play them false.

Of course if the concern is very prosperous, they stand to make the profits. But it is not often the case that a bank in a very small village earns large dividends unless the rates of interest are very high.

Canadian Conditions Are Different.

In Canada the conditions are entirely different. When the leading business men of a little Canadian village desire to secure good banking facilities they are not at all dependent upon the will of an autocratic government official. They can take a list of perhaps 15 banks which would be open to consider the establishment of a branch. These banks are strong competitors, each one being eager to extend its business into every possible locality.

Selecting one of these banks the local parties will place before one of its officials, who is acquainted in a general way with the district, a statement of the business that would be done by a bank branch. They quote the railway receipts at their point, post office receipts, grain and other merchandise shipped out, population, and they may give an estimate of the amount of loans and deposits which the branch could show. If the bank management considers that there is a fair prospect of a branch earning a trifling profit it may agree to establish one. They may establish a branch knowing that it will return deficits instead of profits, if the prospects are for steady improvement in business. If this bank will not act, one of its rivals may. And, if a branch of a good bank is secured, the townspeople have practically no responsibility to assume.

Canadian Deposits Have Safety.

They do not have to take a dollar's worth of the bank's stock. If its teller or its manager defraud the bank of $20,000 or $30,000 they are in no wise affected. The bank stands the loss and never feels it. If the branch meets with losses in its discount business they are not interested. In short they have no responsibility in the matter. They have secured a far better bank than the people of a small village in the States can hope to get, and they have not had to assume any risks whatever, and the depositors are much safer than the depositors in a small American village usually are. Also the borrowers get larger amounts than American borrowers similarly situated can get, and they get their loans at lower rates of interest.

◆

COOPERAGE PRODUCTION LAST YEAR.

The amount of cooperage produced in Canada during 1910 has been compiled by the Dominion Forestry Branch at Ottawa. Reports were received from one hundred and thirty-three firms, of which ninety-four were in Ontario, showing that slack and tight cooperage was produced in Canada to the value of one million seven hundred and forty thousand dollars. As the hardwood forests of Canada are already greatly depleted, and as the Canadian products transported in barrels are chiefly flour and apples, requiring only slack cooperage, the tight cooperage stock manufactured in 1910 amounts to only one-fifth of the total value. Barrels made from tight stock are used as containers of oils, alcoholic liquors and other liquids, and as Canada has practically no wood of sufficiently clear quality for such stock, the most of it has to be imported as staves or stave bolts from the United States. Of the total, slack cooperage made up one million three hundred and ninety-five thousand dollars, which is two hundred thousand dollars less than the 1909 value. Notwithstanding the decrease in value of slack cooperage for 1910, the number of pieces produced was five hundred thousand more than in 1909. Practically no cooperage is manufactured in Canada for export, and whatever quantity is shipped out is the cooperage left on the manufacturers' hands after the domestic market has been satisfied. In the middle of the last decade the export trade was quite an important branch of the cooperage industry, but in 1910, exports of staves, heading and barrels, amounted to only one hundred and fifteen thousand dollars.

◆

SALMON ON THE COAST.

Mr. Joseph Durney, who recently made a two weeks' visit to the Columbia River, Puget Sound and British Columbia salmon canneries, writes from San Francisco on October 21 that after seeing everyone in connection with the business in those districts he found that there is positively nothing to offer in chinooks, Alaska red or medium red, and that there is very little Alaska pink unsold. Stocks on hand, he says, consist almost entirely of Puget Sound humpbacks and Alaska chums. "When you take into consideration the stock on hand in comparison with the quantity packed," he writes, "it is astonishing to find what a tremendous quantity of salmon has been marketed. The total pack of salmon this year will be a record-breaking one, several hundred thousand cases larger than any previous pack. We estimate the total 1911 pack as 3,000,000 cases Alaska, 1,350,000 cases Puget Sound, 500,000 cases Columbia River, spring and fall, 750,000 cases British Columbia and 250,000 cases outside rivers, a total of 5,850,000 cases, or 600,000 cases more than any previous year in the history of the salmon business.

"Of the vast quantity of fish packed there are unsold less than 200,000 cases, consisting, as already said, almost entirely of Puget Sound humpbacks and Alaska chums. Very few Puget Sound cohoes or chums have been packed so far and the outlook is for a short pack of these grades.

"When you stop to consider that of the season's pack 2,500,000 cases are pinks and chums, as against 1,400,000 cases, the largest previous pack of these grades, you will understand that dealers and consumers have at last realized the value of pink salmon, and you can count on it as being probably the most popular grade from now on, not only because of the price but on account of the excellent quality.

"The unsold stock of Puget Sound humpbacks is in very firm hands. Hence there is no possibility of a decline in price, because everyone connected with the salmon business knows that as next year is the off year no humpbacks will be packed on the Sound. As 1913 is the big year on sockeyes, packers will devote their entire attention to the packing of that grade."

PRESSED BRICK COMPANY IS SILENT.

At Winnipeg While the Vancouver Concern Has Big Liabilities and Little Money in Hand.

The Monetary Times still awaits replies to the questions asked of the Manitoba White Granite Pressed Brick Company, Limited, which recently made an offering of stock. While a page advertisement was offered for insertion in this journal, we could not see our way to its acceptance until our inquiries had been satisfied. Of the Vancouver plant, of which Mr. L. F. Willan was the financial agent, as he is in the present case, we were informed by the secretary-treasurer that it "was duly organized. All the stock was sold and it has been in operation since last March. It was organized under the Steger system which was the original name of the system now known as Stefar system."

Information from Vancouver regarding this plant by no means creates confidence in the enterprise of the Manitoba White Granite Pressed Brick Company, Limited. Here is the report from the columns of the Vancouver Daily Province, dated October 23:

"Far From Cheering."

"A meeting of the shareholders of the Pacific Pressed Brick Company was held Saturday afternoon to hear a statement as to the financial condition of the business and to decide what should be done about it. Some thirty shareholders were present, all of them holders of small amounts of stock. The situation as described by the president, Mr. G. C. Hinton, was, as he said himself, far from cheering. When the present management took hold about six months ago, they found that the situation was not as it had been represented to them and the liabilities were considerably greater than they had supposed.

Difficulty With the Manufacturing.

"The position now was that the company had been capitalized at $100,000 in shares of one dollar each. Twenty thousand of these shares went to the promoters and about $15,000 of the money collected on stock subscriptions went to canvassers. There was also $12,365 still unpaid on stock which had been subscribed for. The brick which the company manufactures is a patented article of lime and sand, of alleged higher quality than the ordinary clay brick and suitable more for facing than for inside work. In the initial stages the company had some difficulty with the manufacturing and during the past summer the demand had been small. The net result, as the president explained, was that there are now liabilities of $32,000 and no money. The assets consist of the plant and a twenty-year lease of the ground at one hundred dollars a month.

Wanted a Statement.

"Mr. Hamilton Reid, who was present on behalf of a number of the shareholders, asked for a detailed statement of the exact position of affairs, but the president said it had been impossible to get this ready in time as the meeting had to be called hurriedly owing to a demand for the immediate payment of $600 rent. Since then, however, the money for rent and wages had been raised by the directors on their personal note and the immediate pressure had thus been relieved. After some further discussion it was decided to appoint a committee consisting of Messrs. Weingardt, Jewel and Hamilton Reid to examine the books and prepare a statement to be submitted to the shareholders at another meeting."

We should imagine, in view of this condition of affairs, that the stock of the Manitoba White Granite Pressed Brick Company, Limited, will not have a rapid sale. Mr. L. F. Willan was the fiscal agent in the case of Vancouver and is acting in the same capacity for the Winnipeg company.

GRESHAM LIFE ASSURANCE SOCIETY.

The Gresham Life Assurance Society was founded in 1848, and since then has issued over 281,000 policies for assurance exceeding $498,000,000. Its present funds exceed $51,000,000, and its income $7,500,000.

The Gresham has displayed in a practical way its faith in Canadian investments by placing from time to time its funds in Canadian securities and now holds over $2,000,000 so invested in Canadian bonds and other securities.

At the last quinquennial valuation for the year ended 31st December, 1910, a profit of about $2,100,000 was disclosed. The Society intends to develop an active business in Canada and has so arranged all its policy forms as to bring them into line with all the requirements in this country. In addition to the ordinary forms of insurance there will be several special policies which previous experience in other quarters of the globe has proved to be a great attraction.

The Society will continue its policy of investing funds in Canada. A board of directors, representative Canadian financial men, will be selected to preside over the destinies of the Society's Canadian affairs.

The management is vested in the hands of Mr. A. R. Howell, who was the secretary for Canada of the Life Department of the Royal Insurance Company. The Gresham is one of the largest and most widely known of the British life offices.

COST OF ONTARIO HYDRO-ELECTRIC SYSTEM.

Chairman Beck Gives Further Figures and Predicts a Surplus Next Year.

The total estimate of cost of construction of the Ontario Hydro-Electric system, made in 1908, was $4,006,927, according to a statement issued by Hon. Adam Beck, chairman of the commission. Of this $3,515,751 has been spent. Before the line is completed it will cost $405,416 more. The estimate for the right-of-way was $227,375, while the sum expended totalled $456,067, with an additional $40,495 necessary to complete this, which makes the total to complete the right-of-way $496,562.

For Transmission Lines.

The amount asked for transmission lines was $1,842,964. The amount already spent is $1,623,172, and to complete their construction a further expenditure of $75,926 will be required. This brings up the total estimate to $1,699,098.

The sum of $1,377,176 was asked for the erection of transfer stations, $1,023,258 has been spent and their completion will involve the further expenditure of $137,099, which brings the total estimate to $1,160,351.

For testing instruments and all tools the cost was scheduled at $31,970. So far, all spent on this work totals $14,954.

Not Included in Estimates.

Not included in the estimates of 1908 was $106,800 for protective relay and $51,485 for spare transformers. There has been actually spent under these two heads $91,628 for protective relay and $46,336 for spare transformers, and $15,171 and $5,148 respectively is needed to complete the work.

The total estimated cost to complete the Port Credit station is $96,986, and $42,033 is needed to complete the work on which $54,953 has already been spent.

Money For New Lines.

For new lines to Port Credit, Brampton, Weston, Seaforth, Mitchell, London and Hamilton asylums, Agricultural College at Guelph, and the two London lines, with the Springbank and Dundas loop, the estimate was $240,000. The commission will complete the work with this sum, of which $199,477.95 has already been spent.

Step-down equipment for the Watertown and Port Stanley lines will cost $37,914.

Receipts from municipalities to September 30 last totalled $134,422. Estimated receipts to October 1 total $33,807. Payments to the Ontario Power Company for September and October for power and for charges to maintenance and operation will total by the end of this month, $142,991. For September the payment for power to the Ontario Power Company was $74,642. The estimated excess receipts over and above expenditures to October 31 are $25,438.

Expenditures and Revenue.

The estimated expenditures and revenue for the fiscal year of 1911-12, which begins on November 1, are given by Hon. Mr. Beck with the sinking fund out. The total capital cost of the Niagara system to July 31, including all new stations and transmission lines constructed or under construction at that date is $3,921,167.

An income of $473,828 from municipalities based on estimated load of January, 1912, gives a revenue which ends the next fiscal year with a surplus of $828.

This estimated surplus is reached after an allowance of $18,539 has been made for power lost in transmission. The experience of the month of September, however, leaves the commission to believe that such an allowance was unnecessary. In that month, while 11,850 horse-power was purchased from the Ontario Power Company, yet by overlapping it was possible to supply the municipalities with the equivalent of 13,370 horse-power. If this can be continued during the coming year, instead of a loss of $18,000 there should be a profit of about $20,000 to the credit of the municipalities, making the surplus on the year's operations about $40,000.

MR. H. H. MOTLEY TO REPRESENT THE ÆTNA.

The Ætna Insurance Company of Hartford, Conn., one of the largest and oldest of the tariff fire insurance companies doing business in Canada, has made Calgary the headquarters for their business in Alberta. Following arrangements made by Mr. W. H. Breeding, special representative of the company, when in Calgary a few days ago, H. H. Motley will have entire charge of all the Alberta business. The Ætna is practically the first of the larger tariff companies to recognize in this way the development of that province.

The Ætna commenced business in Canada in 1821 being the second oldest company writing insurance in the Dominion. For some years they have had agencies in the principal towns and cities in Alberta, and it is a distinct tribute to Calgary that the provincial headquarters should be established there.

FIFTY NEW COMPANIES

Have Been Incorporated—Two Dry Dock and Shipbuilding Concerns are Included in List.

Fifty new companies with a total capitalization of $16,840,000 were incorporated last week. The largest company to be chartered was the Sloan Star Mines, Vancouver, B.C., with capital of $2,500,000. Two large shipbuilding and dry dock companies were incorporated. The St. Lawrence Dry Dock and Shipbuilding Company, Quebec, $1,000,000 has secured general powers for ship construction and repairs.

The Polson Dry Dock and Shipbuilding Company, Limited, has received a charter. The capital is $1,000,000 and the head office Toronto. This company has received a dry dock subsidy from the Dominion Government and will make a bond issue in the near future. Other large companies were: Nicola Collieries, Vancouver, $1,500,000; Northern Anthracite Collieries, Vancouver, $1,500,000; Sakta Gold Mines, Toronto, $1,500,000, while each of the following companies has capital of $1,000,000, British Empire Securities Company, Montreal; Henley Porcupine Mines, Toronto; Lumbermen's Trust Company, Vancouver.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Strathcona, Alta.—Gainers, $75,000.

Invermere, B.C.—Hotel Invermere, $25,000.

Prince Rupert, B.C.—Sloan and Company, $25,000.

Creelman, Sask.—Creelman Hotel Company, $6,000.

Hedley, B.C.—Sacramento Mines Company, $250,000.

High River, Alta.—Pennington Coal Company, $5,000.

Melville, Sask.—Melville Mercantile Company, $20,000.

Coquitlam, B.C.—Coquitlam Lumber Company, $10,000.

Wabamun, Alta.—Connor Coal Mining Company, $25,000.

Asquith, Sask.—Asquith Manufacturing Company, $25,000.

Battleford, Sask.—Battleford Iron Works Company, $10,000.

Strome, Alta.—Strome Milling & Grain Company, $50,000.

Kylemore, Sask.—Fishing Lake Farm and Land Company, $250,000.

Galt, Ont.—Galt Lands, $40,000; G. A. Dobbie, F. S. Scott, E. J. Getty.

Orillia, Ont.—Orillia Garage, $15,000; E. F. Cooke, H. R. Tudhope, W. R. Cooke.

Berlin, Ont.—McKellar Shoe Company, $40,000. H. D. McKellar, C. Greb, J. J. A. Weir.

Chesley, Ont.—Canada Beds, $50,000. C. H. M. Fleming, E. J. Creeper, G. N. Griffin.

Danville, Que.—Shipton Creamery, $19,000. J. A. McCallum, J. S. Mably, J. H. Doak.

Ottawa, Ont.—Grant, Holden, Graham, $100,000. H. Grant, S. H. Holden, G. C. Murray.

Saskatoon, Sask.—Elding and Delmage, $20,000. Saskatoon Mutual Land Company, $80,000.

Porcupine, Ont.—Gibson and Crawley, $200,000; A. A. Crawley, L. A. Smith, F. S. Dunlevie.

Clinton, Ont.—Clinton Motor Car Company, $100,000. J. Craig, E. D. Cleghorn, J. MacLauchlan.

Kingston, Ont.—Kingston Health Association, J. A. Minnes, C. A. Macpherson, J. B. McLeod.

Port Elgin, Ont.—Port Elgin Fruit Growers, $40,000; C. F. Ritchie, J. H. Oldham, M. K. Lennox.

Woodstock, Ont.—J. M. Archibald Company, $50,000. J. Leonard, C. M. Gibson, T. W. Baird, Beachville.

Welland, Ont.—Henrietta Hotel Company, $200,000; S. Moore, C. J. Laughlin, junior; G. W. Sutherland.

Sherbrooke, Que.—Canadian Brakeshoe Company, $200,000. P. McCullough, A. G. Campbell, E. W. Jones.

Fort William, Ont.—Hydro-Carbon Vaporizer, $500,000. J. W. Mowbray, J. M. Pilant, W. R. McKie. Gleichen.

Cranbrook, B.C.—Alberta British Columbia Lumber Company, $500,000. Cranbrook Lime Works, $10,000.

Winnipeg, Man.—Coal and Chemical Company, $10,000,000. T. D. Thompson, D. B. McDonell, A. E. Wilkes.

Stayner, Ont.—Oakview Telephone Company, $1,500. G. C. Coles, Collingwood; J. Knox, W. A. Doner, Stayner.

Quebec, Que.—St. Lawrence Dry Dock and Shipbuilding Company, $1,000,000; L. Kent, R. Wall, J. Desautels.

Cobourg, Ont.—Cobourg Co-operative Warehousing Company, $4,000. S. W. Staples, W. G. Jamieson, T. Davidson.

Moose Jaw, Sask.—Saskatchewan Bridge and Iron Company, $250,000. Peace River Valley Land Company, $100,000.

Thetford Mines, Que.—Cranbourne Exploration and Mining Company, $10,000; S. Deschamps, J. N. Roberge, V. J. Morisset.

St. Laurent, Ile d'Orleans, Que.—Chantier Maritime de St. Laurent, $50,000; O. Fillion, St. Laurent; J. A. Fillion, Rev. P. J. Fillion, Quebec.

Hamilton, Ont.—Natural Gas Company of Ontario, $40,000; P. W. Booth, Buffalo; E. W. Evans, Oil City, Pa.; A. F. King, Findlay, O. Mills Hardware Company, $100,000; C. Mills, N. Mills.

Victoria, B.C.—Columbia Catering Company, $75,000. Wm. N. O'Neil Company, Victoria, $150,000. Monk and Monteith, $50,000. Anglo-Pacific Investment Company, $100,000. Cadillac Garage Company, $30,000.

Montreal, Que.—Le Boulevard des Deux Rivieres, $70,000; C. M. Cotton, A. W. G. Macalister, F. T. Enright. Richelieu Realty Company, $100,000; A. Chase Casgrain, E. M. McDougall, J. J. Creelman. X-Rays, $50,000; G. J. Bonenfant, L. R. McDonald, H. D. Hamilton. Prairie Provinces Land Company, $150,000; E. R. Parkins, A. C. Calder, W. Taylor. Dominion Buckle and Barrette Company, $250,000; J. R. Middlemiss, Sir E. R. Murray, W. J. Poupore. Carreras & Marcianus of Canada, $250,000; G. W. MacDougall, G. Barclay, C. A. Pope. British Empire Securities Company, $1,000,000; G. V. Cousins, E. G. T. Penny, A. H. Elder.

Toronto.—Roger Miller and Sons, $200,000; R. O. Miller, H. W. Ross, F. R. Miller. Toronto Automobile Trade Association; W. S. Smith, O. Hezzelwood, M. A. Kennedy. Sakta Gold Mines, $1,500,000; J. Montgomery, R. Honeyford, M. Laidlaw. Henley Porcupine Mines, $1,000,000; J. E. Day, J. M. Ferguson, E. V. O'Sullivan. J. C. Hayes Company, $50,000; J. C. Hayes, W. McKim, E. W. Pratt. Douglas Land Company, $40,000; H. R. Douglas, Toronto; R. J. Lillico, E. B. Caldwell, Chesley. Polson Dry Dock and Shipbuilding Company, $1,000,000; J. Stewart, W. Gilchrist, A. E. Day. General Storage Corporation, $500,000; H. R. Morwood, P. R. Whalley, R. C. Beattie.

Vancouver, B.C.—Wm. N. O'Neil Company, $750,000. Vancouver Coffee and Tea Company, $20,000. Capilano Rock and Gravel Company, $250,000. India Realty and Investment Company, $10,000. Shamrock and Rose Boarding and Sales Stables, $25,000. Northern Anthracite Collieries, $1,500,000. Lumbermen's Trust Company, $1,000,000. Nicola Collieries, $1,500,000. British Columbia Screen and Manufacturing Company, $25,000. Canadian Ferro Concrete Construction Company, $50,000. Coquahalla Hotel, $30,000. Imperial Canadian Securities Company, $100,000. Brittingham and Young Company, $50,000. Grand Prairie Syndicate, $300,000. Sloan Star Mines, $2,500,000.

INDUSTRIAL ACCIDENTS DURING SEPTEMBER.

Industrial accidents occurring to 180 individual work people in Canada during September, were reported to the Department of Labor. Of these, fifty-eight were fatal and 122 resulted in serious injuries. In addition, five fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before September, 1911.

In the preceding month there were 104 fatal and 133 non-fatal accidents reported, a total of 237, and in September, 1910, there were ninety-one fatal and 181 non-fatal accidents, a total of 272. The number of fatal accidents reported in September, was, therefore, forty-six less than in the preceding month, and thirty-three less than in September, 1910. The number of non-fatal accidents reported in September was eleven less than in the preceding month, and five less than in September, 1910. Altogether there were fifty-seven less industrial accidents reported in September than in the preceding month, and ninety-two less than in the same month of the preceding year.

Of 180 returns received during the month giving the ages of the victims of industrial accidents, four referred to persons under twenty-one years of age, fifty-three to persons between twenty-one and forty-five, and fifteen to persons over forty-five. One hundred and eight persons were over twenty-one years of age, but their exact ages were not specified.

◆

Complaint is being made by the inland shipping companies over the difficulties their boats have had for the last few weeks of the present season in reaching Montreal from upper lake ports with a full cargo. The low water in the upper river has had much to do with their troubles, but it is claimed that even this could be largely overcome by a little governmental expenditure in the improvement of the Morrisburg canal, which, though only built for upward traffic, has been in great demand for down-coming vessels for several weeks past.

REVIEW OF THE MONTH

CANADIAN FLOTATIONS IN LONDON (OCTOBER).

The following flotation of interest to Canadians was made in London during October:—

Toronto Power Company, Limited.—£821,917 4½ per cent. consolidated guaranteed debenture stock at 96.

DIVIDEND CHANGES.

The bonus of 25 cents a share has been dropped by the Kerr Lake Mining Company.

A half-yearly dividend of 6 per cent. has been declared by the Canadian Northern Prairie Lands Company, Limited, as compared with 5 per cent. a year ago.

NEW STOCK LISTINGS.

The Montreal Stock Exchange have listed 10,000 additional Shawinigan shares.

The Bank of Montreal has listed $1,600,000 additional stock on the Montreal Exchange.

Thirty thousand additional shares of Toronto Railway have been listed on the Montreal Exchange.

Seventy-two thousand shares common stock of the Laurentide Company, Limited, have been listed on the Montreal Exchange.

The Montreal Stock Exchange has listed the following securities of the Canadian Locomotive Company, Limited: 20,000 shares common, 15,000 shares preferred, and $1,500,000 6 per cent. first mortgage bonds.

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during October:—

Maritime Oil and Gas Company, Limited, Halifax.—Offering of shares at 10 cents.

City Central Real Estate Company, Limited, Montreal.—5 per cent. consolidated first mortgage bonds.

Mathews Steamship Company, Limited.—$55,000 6 per cent. first mortgage bonds.

Maritime Telegraph and Telephone Company.—$100,000 6 per cent. first mortgage bonds at 101 and accrued interest.

Boswell Egg and Poultry Farm, Limited, Vancouver.—Offering of shares at par, $1.00.

Coronation Oil Company, Limited.—Offering of shares. Capital, $850,000, non-assessable shares of $1.00 par value.

Saskatchewan Stock Farm Company, Limited, Regina, Sask.—500 shares capital stock at $100 each. Capital, $100,000.

Duluth, Rainy Lake and Winnipeg Railway Company.—$10,000 5 per cent. first mortgage gold bonds. Price: at market.

Spanish River Pulp and Paper Mills, Limited.—Unsold balance of $200,000 6 per cent. first mortgage sinking fund bonds at 98.

Co-Operative Investment, Limited, Winnipeg.—Offering of shares. Capital stock, $50,000, divided into 500 shares of $100 each.

Great Northern Collieries, Limited, Queen Charlotte, B.C.—100,000 shares, par value $1.00, offered at 15 cents. Capital, $1,500,000.

Montreal and Suburban Realty Company, Limited, Montreal.—Offering of bonds at par with a bonus of 25 per cent. common stock. Capitalization: Stock, common, 10,000 shares, par value $100 each; bonds, 6 per cent. first mortgage, $1,000,000.

BANK BRANCHES OPENED AND CLOSED DURING OCTOBER.

Twenty-eight branches of Canadian chartered banks were opened during October and four closed. During September, 19 were opened and two closed; during August, 16 were opened and 5 closed; during July, 18 were opened and 3 closed; during June, 25 were opened and 3 closed; during May, 29 were opened and 3 closed; during April, 17 were opened and 3 closed; during March, 18 were opened and 3 closed; during February, 17 were opened and 10 closed; during January, 37 were opened and 3 closed. Houston's Bank Directory gives the following particulars for October:—

Branches Opened.

Briercrest, Sask.	Canadian Bk. of Commerce.
Bulyea Que.	Quebec Bank.
Cabri, Sask.	Union Bank of Canada.
Calgary, Alta., Mount Royal	Canadian Bk. of Commerce.
Cluny, Alta.	Traders Bank of Canada.
Delaware, Ont.	Home Bank of Canada.
Frankville, Ont.	Merchants Bk. of Canada.
Frobisher, Sask.	Merchants Bk. of Canada.
Grouard, Alta.	Canadian Bk. of Commerce.
Montreal, Que.	Banque Internationale du Canada.
Montreal, Que.	Bank of New Brunswick.
Mulgrave, N.S.	Royal Bank of Canada.
Naranata, B.C.	Eastern Townships Bank.
Ottawa, Ont.	Bank of Toronto.
Pincher Station, Alta.	Merchants Bk. of Canada.
Port Haney, B.C.	Bank of Montreal.
Quebec, Que.	Eastern Townships Bank.
Ryley, Alta.	Merchants Bk. of Canada.
Saskatoon, Sask., West Side	Canadian Bk. of Commerce.
Summerberry, Sask.	Bank of Toronto.
Summerland, B.C.	Eastern Townships Bank.
Toronto, Ont., Queen Street W. & McCaul	Metropolitan Bank.
Toronto, Ont., Queen Street E. & Lee Ave.	Metropolitan Bank.
Toronto, Ont., Queen and Roncesvalles Ave.	Imperial Bank of Canada.
Toronto, Ont., 1686 Dundas Street	Home Bank of Canada.
Trinity, Nfld.	Royal Bank of Canada.
Vanguard, Sask.	Union Bank of Canada.
Wallaceburg, Ont.	Merchants Bk. of Canada.

Branches Closed.

Bridgenorth, Ont.	Union Bank of Canada.
Porcupine, Ont.	Canadian Bk. of Commerce.
St. Pamphile, Que.	Banque Provinciale du Canada.
South Porcupine, Ont.	Traders Bank of Canada.

THE MODERN TRUST COMPANY.

Despite the important place which the trust company holds in the business and financial world, there are few books dealing with its functions and organization. The development of the trust company idea is a recent one, and only within the past twenty years have these corporations become a prominent factor in the financial world. Until the organization of the trust company section of the American Bankers' Association in 1896, the only publications in reference to trust companies were short chapters in works on banking and an occasional magazine article. Since that time, the transactions of the trust company section and articles in banking periodicals and the financial press have constituted the most important contributions to the subject; but in spite of all that has been written on special lines of trust company work, it is still difficult to obtain a general knowledge of what a trust company is and how it does its business.

The volume "The Modern Trust Company, Its Functions and Organization." by Kirkbride and Sterrett, helps considerably to fill the gap. While the aim of the volume is to describe the trust company as it exists in the United States to-day, there is much of interest to those associated with Canadian trust companies. The various chapters deal with trust company functions, organization, officers, banking department, corporate trust department, industrial trust department, safe deposit department, savings fund depart- general accounting and miscellaneous subjects. There are ment, life, fidelity and title insurance and suretyship; also a list of forms and a complete index. The Modern Trust Company, by Kirkbride and Sterrett. Published by Macmillan Company of Canada, Limited, Toronto. Price, $2.50 net.

ELECTRIC RAILWAY SECURITIES.

Questions of Life and Character of Franchise—Rate Regulation—Proper Publicity.

In view of the proposed sale of the Winnipeg Electric Railway, the discussions in Western Canada as to the merits of municipally owned tramways and the probability of the city of Toronto taking over the Toronto Street Railway, the address of Mr. J. G. Cannon at Atlantic City the other day is of additional interest. Mr. Cannon is the president of the Fourth National Bank of New York and before the convention of the American Electric Railway Association discussed electric railway securities from an investment standpoint. Franchises, he said, deserved first consideration. This problem to-day bears closely on the vital questions of depreciation and financing. The tendency now is to limit the time of franchises. It is stated, for instance, that in New Jersey a franchise cannot be obtained for more than 40 years, and it is only in exceptional cases, such as where the population is limited, that even this period is considered; the usual time is 20 years. It seems to be the consensus of opinion that it is impossible to make proper allowance for depreciation and at the same time work out the finances of a road in 20 years. Thirty years, at least, is considered necessary.

Life and Character of Franchise.

"We must always bear in mind the two very important questions of the life and character of the franchise. The right-of-way of steam roads is perpetual; that of electric roads is in most cases only temporary. In the latter case, construction and operation are attended by possible loss through the refusal to renew franchises. The situation in Kansas City, Mo., at the present time illustrates this point.

"The terms of the franchise are of large import. It should be determined what they provide respecting fares, transfers and concessions from the company. Moreover, it should be ascertained what provision is being made toward the redemption of the bonds by sinking fund or otherwise. Corporations with perpetual franchises do not meet with the same difficulty as do most of the electric traction companies which contend with the possibility of unrenewable franchises and the growing tendency to limit the time of the same. The importance of an amortization provision, therefore, cannot be overestimated.

Important for the Investor.

"Of consequence also to the investor, particularly in interurban properties, are the questions of the territories served and the prospect of increasing traffic from year to year, together with competition with existing steam roads. The subject of legislation is ever with us and the many laws enacted each year affecting railroad corporations, both electric and steam, are without number and they, in many instances, severally impair the borrowing capacity of the roads.

"By far the most important subject affecting the financial status of electric railway securities is that of rate regulation. Traction companies are to-day experiencing financially what steam roads passed through years ago, but so far they have not largely benefited from the knowledge gained by years of vicissitudes on the part of the latter. The development of many of the electric traction systems has come largely as the result of the operation of promoters. It is a matter of common knowledge how in the past, except where otherwise regulated by state laws, the bonds authorized and issued with which to build the roads were largely in excess of the cost of construction, consequently making the stock, both preferred and common, represent no real value. It is true, however, that this method of financing is probably over and that we shall never again see such gross abuses of over-capitalization; nevertheless, the sins of the fathers are being visited on the children to-day, as the long list of failures, receiverships and rehabilitations amply testifies. The over-capitalization of the electric industry as a whole, in the past, must be accepted as a fact.

History of Electric Railways.

"The history of electric railways is well known and the failures, receiverships and reorganizations which have taken place have tended to discredit securities of this type. At the same time, granting that there are very many undesirable properties in the electric traction field, there are also large numbers of splendidly equipped companies, with unquestionable records for honest capitalization and good earnings. The bonds of these stronger properties, selling on a basis of, say 1 per cent. higher than those of steam roads and with a ready market, present an exceedingly attractive form of investment.

"If, in the past, electric railway securities have not been considered a prime investment, the managers of traction corporations have themselves largely to blame. Our people, as a whole, are not unreasonable, but are open to conviction by the proper presentation of facts. A policy of publicity consistently followed would be of vast help to our railroad administrators and undoubtedly a step toward the solution of some of the present day transportation problems.

"When the people can be brought to the point of believing that the management of electric railways is endeavoring to properly serve them and that traction securities represent honest valuations, it will be found that the public will become attracted to this class of investment and that a more general market will thus be created for electric railway securities both here and abroad."

CANADIAN PROVINCIAL SECURITIES

Should be Included in the British Trustee List—Notes of an Important English Case.

That the Canadian provincial securities should be included in the British Trustee list, is a plea which has been persistently advocated by The Monetary Times. We have the assurance of the provincial treasurers that they will co-operate with us with that object in view. If the assistance of the Dominion Government could also be obtained, a united appeal could then be made to the Imperial authorities. The question is fully discussed in "Capital Investments in Canada," a new volume published by The Monetary Times. Until action is taken by the Imperial Government this much desired innovation cannot be secured.

Raised in English Courts.

The matter was raised in the English court as recently as May, in the case of Sir S. M. M. Wilson's estate. Here are the material facts as stated by Mr. A. R. Barrand, F.I.A., in the Journal of the Institute of Actuaries:—

A testator by his will had declared that, notwithstanding any restrictions contained in the Settled Land Acts, any capital moneys arising under those Acts might be invested, "In the stocks or securities (not payable to bearer) of the Government of India for the time being, or of any British Colony or dependency." The testator died on 31st December, 1897, and his will was duly proved. The trustees had in hand a sum of about £5,000, representing capital moneys arising under the Settled Land Acts, and the respondent, as tenant for life in possession under the settlement, desired that they should invest in some or one of certain stocks, including stock of the Provinces of Nova Scotia, Ontario, Quebec, Manitoba, Saskatchewan, and British Columbia, in the Dominion of Canada.

Trustees Were Willing.

The trustees were willing to make the investments if they had power to do so, and an originating summons was accordingly taken out by them asking for the direction of the Court as to whether, as such trustees, they were justified in making the said investments or any of them. The only question was whether each of the several provinces of the Dominion of Canada was a "British colony or dependency" within the meaning of the investment clause of the will.

The case came before Mr. Justice Eve, in May last, and he held that the trustees were not authorized by the will to invest in such securities. In delivering judgment to this effect, he said: "The whole point which I have to determine is whether these stocks issued by the several provinces constituting the Dominion of Canada are securities of a 'British colony or dependency.'

Definition of Colony.

"The tenant for life argues that each of these provinces is a British colony or dependency—preferably a British colony—and on his behalf it is pointed out that in some recent statutes, more particularly in the Colonial Stock Act, 1900, which followed upon and amended the Colonial Stock Acts of 1877 and 1892, the provinces are all treated as separate colonies. In the Act of 1877, section 26, the definition of the expression 'colony' is very wide, and includes the whole of the dominion, colonies, islands, territories, provinces and settlements under one central legislature, and such part of the said dominion and such of the said colonies, islands, territories, provinces and settlements as is under a local legislature. For the purposes of those Acts it is clear that each of these particular provinces is a colony. But on behalf of the trustees it is urged that it is only with reference to those particular Acts that each of these provinces is to be deemed a colony, and it does not follow that the proper interpretation of the expression in this will is the same.

Not the Provinces.

"They suggest that the ordinary and proper meaning of the expression is to be found in the Interpretation Act, 1889, where, in section 18, subsection 3, the expression is defined as meaning 'any part of Her Majesty's dominions exclusive of the British Islands and of British India,' to which is added this qualification: 'Where parts of such dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one colony.' The qualification exactly fits the Dominion of Canada. . . . . I think, according to its ordinary and natural use, the expression 'British colony or dependency' means the aggregation of the provinces and settlements making up the Dominion, and cannot be construed in such a document as this will to mean each of the individual provinces or settlements which go to make up the Dominion."

OBSOLETE AMERICAN SECURITIES.

Author of Handbook Gives Some Good Advice on Mining Stocks—How Oil Companies are Duplicated.

In his book on obsolete American Securities, Mr. R. M. Smythe says that, as usual, the lists of deceased mining companies are larger than all others put together. Indeed, it is out of the question to keep track of the births and deaths among mining companies.

"Real mining," says Mr. Smythe, "is a grand and most fascinating business, but the promoting of mining stocks is an entirely different thing, and generally acts unfavorably on the promoter and on all his friends It is the greatest 'continuous performance' swindle in the world. A well-known magazine published in New York gives, in its issue for April, 1911, an excellent insight into the methods and profits of this business. As a rule, the only thing to be gained by the purchaser of mining stocks is the added interest and excitement in life from holding a few dollars' worth of something which may be worth millions in your imagination if you are careful not to make too many inquiries about it. You cannot make money out of these stocks; but you may make experience on a very small outlay, which will save you heavier losses later in life. As far as I can judge, however, from what comes to hand, a very large majority of mortals do not learn by experience or by anything else, and those that do generally succeed, die rich and miserable."

Increasing Oil Companies.

One of the alleged interesting methods of increasing the number of operating oil companies by four hundred per cent., without doing any extra work beyond printing certificates, is as follows, says Mr. Smythe:—

The promoters purchase one-sixteenth of an acre and organize four companies, each company owning one-quarter of the one-sixteenth of an acre. At the centre of this plot, where the properties of the four companies join, a well is drilled, each company owning one-fourth of the well. They proceed to issue certificates of stock, and declare that they are now actively drilling on their property. If this one well strikes oil, all four companies notify their stockholders that they have struck oil. When a well does not strike oil, the four companies stop business, and the promoter moves to another one-sixteenth of an acre to organize four more companies.

Raised Stock Certificates.

Fraud committed thirty-seven years ago in Pennsylvania had an echo in May, 1911, in Newark before vice-chancellor Stevens. In 1874, an attempt was made to finance what was to be known as the Fire Insurance Company of Pennsylvania by means of raised certificates of railroad stock. It developed in the hearing that shares of various railroads were purchased, each certificate being for one share. These were raised to one hundred shares, and some to five hundred shares, in order to make an apparently solid financial backing for the proposed insurance company. The Insurance Commissioner of Pennsylvania nipped the plan, and as a result several of those concerned served terms in Pennsylvania prisons.

Some of the shares manipulated were of the Central Railroad of New Jersey, and others of the Pennsylvania Railroad and the companies of which it afterwards came into control. The operators erased the name of the person to whom the certificate for one share was issued and substituted the name of the proposed insurance company, and then erased the "one," and substituted either one hundred or five hundred, as suited them best.

Some of the Obsolete Companies.

Among the thousands of obsolete securities noted by the author, the following appear to be Canadian companies:—

Alberta Oil Company—New Jersey charter void 1906. For non-payment of taxes.

Canada Beet Sugar Company—New Jersey charter void 1905. For non-payment of taxes. Canada Brewing Company—New Jersey charter void 1910. For non-payment of taxes. Canada Construction Mining Company, Leadville, Col., 1881. No value found. Canadian Copper Company—Office in New York, 1864 Extinct. No value found. Canadian Copper Mining Company—Ceased business. No value found to stock. Canadian Electro-Chemical Ore Reduction Company—New Jersey charter void 1905. For non-payment of taxes. Canadian Manifold Company—New Jersey charter void 1906. For non-payment of taxes. Canadian Oil Company—New Jersey charter void 1906. For non-payment of taxes. Canadian Phosphate Company—Incorporated in England 1887. Extinct 1893, 1894. No value found to stock. Canadian Royal Art Union, Montreal, Canada. Barred from United States mails, November 7th, 1900. Canadian Sterling Light Company—New Jersey charter proclaimed void 1904, when two years' taxes were unpaid. Canadian Tanners' Glue Company—New Jersey charter void 1906. For non-payment of taxes. Canadian Tubular Steamship Oil Transportation Company—New Jersey charter void 1906. For non-payment of taxes.

Nova Scotia Boiler Company—New Jersey charter void 1908. For non-payment of taxes. Nova Scotia Development Company—New Jersey charter void 1910. For non-payment of taxes. Nova Scotia Leaching Company—New Jersey charter void 1905. For non-payment of taxes.

Ontario Car and Truck Company, of Oswego City, N.Y., 1896. Incorporated in West Virginia. Stock worthless. Ontario Gold Fields Mining and Development Company, Limited. Office in New York and London. No further information about this company after 1899. Ontario Mutual Accident Association. Office in New York. Dissolved 1894. Ontario Silver Mining and Manufacturing Company, Detroit, Mich., 1871. No value found. Ontario Silver and Antimony Mining Company. Office in Toronto, Canada, 1893. Ceased operations. No value found to stock. Ontario Wood Paving Company, 1871. Extinct, and stock worthless.

Some of the Ontario companies noted may hail from Ontario, California. There are several New Brunswick corporations listed, but we assume that many of these are of New Jersey origin. Very few of the Canadian companies noted have originated in Canada.—Obsolete American Securities and Corporations. Compiled and published by R. M. Smythe. Copies may be obtained from the Book Department of The Monetary Times. Price, $5.00.

◆

RAILROAD AND COMPANY EARNINGS.

The following are the railroad earnings for the week ended October 21st:—

	1910.	1911.	Increase or decrease.
C. P. R.	$2,302,000	$2,532,000	+ $230,000
G. T. R.	963,374	1,023,892	+ 60,518
C. N. R.	403,900	459,000	+ 55,100
T. & N. O.	25,486	45,660	+ 20,174

The statement of the Nipissing Mines Company shows the operating company, the Nipissing Mining Company, to have had on hand in cash on October 2, $999,894; ore in transit and at smelters, $131,782; ore sacked at mine, ready for shipment, $197,653, or a total of ready assets of $1,329,330. The dividend of 5 per cent. and bonus of 2½ per cent. requires $450,000. The operating company is shown to have had on hand on October 2, therefore, $549,000 in excess of the dividend requirements of the holding company.

The Ontario Power Company of Niagara Falls and the Ontario Transmission Company, Limited, report combined earnings for the nine months ended September 30 last as follows:—

Gross earnings	$622,443
Operating expenses	110,192
Net earnings	$512,251
Other income	64,756
Total net	$577,007
Interest charges	504,293
Surplus	$72,714

The Ontario Transmission Company, Limited, reports transmission line rental for the nine months ended September 30th of $120,735; interest on bonds, $66,409, so that there was a surplus for the period of $54,325.

◆

Considerable attention is being paid at the present time to the question of low price sites with direct trackage connection for the many new industries which are being established in Moose Jaw, Sask The Board of Trade and the City Council are working in harmony, and as the city at the present time holds some 500 lots, which are in every way suitable for industrial purposes, it is believed that in the very near future the Industrial Commissioner will be in a position to supply sites with direct trackage at a very nominal cost.

Shipments have been made over the new Canadian Northern line, which is coming in from the South, and while this line has not as yet reached the city limits, the demand for service has been so great that the Canadian Northern Railway have consented to carry merchandise, providing the wholesalers of Moose Jaw will haul their goods to the present end of steel. This arrangement has already been taken advantage of by a number of the business houses.

WORKMEN'S COMPENSATION.

One can scarcely blame Sir William Meredith, who is preparing a report for the Ontario government on the subject of workmen's compensation, for refusing to grant delay in its preparation and presentation. The most important matter is not so much legislation in the individual provinces but the need for a Dominion Act which would apply to the country as a whole. Those employing labor in one part of the country might easily be placed at disadvantage compared to employers in another section where different compensation legislation was in operation. The provinces might well sacrifice their rights in this matter, making a joint request to the Dominion for workmen's compensation law which would apply to the entire country. At the recent Imperial Conference in London, Sir Joseph Ward presented a resolution to the effect that it is in the best interests of the Empire that there should be more uniformity throughout its centres and dependencies in the law of accident compensation. His resolution was adopted. Sir Joseph Ward wanted the British system made universal throughout the Empire. New Zealand and Great Britain are the only countries which have that system. Sir Wilfrid Laurier stated that so far as Canada was concerned, for his part he could approve altogether of the principle. "But," he added, "it is a matter over which the government of Canada would have no power at all. It is within the jurisdiction of the provinces."

◆

OCTOBER FIRE LOSSES.

Gratifying Decrease is Recorded.—Gasoline Causes Many Fires.—Carelessness a Serious Factor.

The Monetary Times' estimate of Canada's fire losses during October amounted to $580,750, compared with $1,123,550 for September and $2,195,781 for the corresponding period last year.

The following is an estimate of the October losses:

Fires exceeding $10,000	$401,000
Small fires	104,000
Fifteen per cent. for unreported fires	75,750
Total	$580,750

The following are the monthly totals compared with 1909 and 1910:

	1909.	1910.	1911.
January	$1,500,000	$1,275,246	$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	920,000
September	1,615,405	894,125	1,123,550
October	2,208,718	2,195,781	580,750
November	935,191	1,943,708	....
December	1,433,813	1,444,860	....
Total	$18,905,538	$23,593,315	$17,086,125

Gratifying Decrease is Recorded.

A gratifying feature of last month's fire losses is that the total is the lowest for any one month during the past three years.

There were twelve fires at which the damage reported was $10,000 and over, the largest being the mills of the White Pine Lumber Company at Blind River, owned and operated by the J. W. Wells Lumber Company of Menominee, Mich., which were completely destroyed. The loss is estimated at $125,000 with insurance of $90,000.

Another large fire occurred at Montreal when the Ste. Irene Roman Catholic Church was totally destroyed. The loss is estimated at $90,000, fully covered by insurance. At the time of the outbreak there were fully five hundred children in the parochial school in the church but all were got out safely. The fire is supposed to have started in the basement.

There were five reported cases of incendiarism last month. At the instance of the Equity Insurance Company, Mr. and Mrs. J. Switzor, of Toronto, are facing a charge of arson. The preliminary investigation was held recently. The Switzers claim that certain goods were destroyed in a fire which broke out in their store. The insurance company disputes the claim, and holds that the occupants of the place were responsible for the fire.

The fires at which damage to extent of $10,000 and over occurred were as follows:—

Toronto, Ont., warehouse	$12,000
Quebec, P.Q., fire station, etc.	60,000
Markdale, Ont., outbuildings, etc.	12,000
St. Catharines, Ont., warehouse	20,000
Ymir, B.C., mines, etc.	20,000
North Hartley, Que., power house	10,000
Englehart, Ont., lumber yard	20,000
Blind River, Ont., lumber mill	125,000
Montreal, Que., store	12,000
Montreal, Que., Roman Catholic Church	90,000
Amherst, N.S., factory	10,000
Kenora, lumber mill	10,000
	$401,000

The following structures were destroyed and damaged:—27 residences, 18 stables and barns, 8 warehouses, 7 stores, 7 lumber and planing mills, 2 churches, and one each of the following: blacksmith shop, pottery, fire station, hotel, printing office, tug, garage, workshop, mine, railway station, power house, club house, freight cars, etc.

The presumed causes of fire were: 5 incendiarism, 3 careless with matches, 2 lamp explosion, 3 gasoline explosion, 2 sparks from engine, 2 sparks from chimney, and one each of the following: defective stove, live coal, lamp upset, lightning, mice nibbling matches, cigar stub carelessly thrown, explosion overheated pipes, careless tramp, defective wiring.

Of the animals destroyed by fire 50 were pigs, 9 horses, 2 cows, and 150 hens. There were also destroyed 2 automobiles, 2,000 bushels of grain, 47 tons of hay, and 50 acres under crop.

The number of deaths from fire last month were 17 as compared with 13 in September and 16 for the corresponding period last year. A large number of deaths from fire are due to carelessness. In a western town a home was destroyed, the child burned to death and the mother seriously injured through mistaking gasoline for water.

Three young children of Alexander Lachance, of St. Foreol, County of Montmorency, Que., were burned to death in a fire which destroyed the home. The little ones were left alone in the house, and it is supposed that one of them started the fire while playing with matches.

Of the 17 deaths, burning buildings were responsible for 12, clothes catching fire 3, and playing with matches 2.

The following are the monthly totals compared with the two previous years:—

	1909.	1910.	1911.
January	16	27	27
February	8	15	12
March	16	20	18
April	18	37	20
May	21	15	28
June	16	52	13
July	4	15	110
August	17	11	22
September	10	10	13
October	26	16	17
November	34	19	..
December	33	19	..
Total	219	256	280

The following fatalities occurred during October:—

Quebec, P.Q., burning building	1
Montreal, Que., clothes caught fire	1
Quebec, P.Q., burning building	3
Medicine Hat, Alta., burning building	1
Toronto, Ont., clothes caught fire	1
Charlton, Ont., playing with matches	1
St. Catharines, Ont., burning building	1
Peterboro, Ont., clothes caught fire	1
Halifax, burning building	1
Caron, Sask., burning building	1
Smith Falls, Ont., playing with matches	1
Rouleau, Sask., burning building	1
Andover, N.B., burning building	1
Providence, Beaver Co., Que., burning building	2
	17

Gasoline Causes Many Fires.

The post office department at Ottawa has been notified that through the explosion of a lamp in a postal car on an Intercolonial train the car was destroyed and 125 bags of mail, containing several thousand letters, papers, and parcels, were burned. Officials are now making inquiries. Information shows that about 75 locked bags, containing letters and mail, and about 50 tie sacks were burned, and the car almost entirely consumed by fire. The explosion took place near St. Fabien, Quebec.

That no less than 38 fires in Winnipeg, Man., since the beginning of the year have been definitely traced to gasoline in one shape or another, was the statement made before the Fire, Water and Light Committee of the City Council recently in an official report from Fire Chief Buchanan. Amendments and additions to the city building by-law, covering the handling of gasoline, were under discussion and the report evidently came as a decided surprise to all members of the committee. The 38 fires traced to gasoline are accounted for as follows: Automobiles on fire, 9; lighting gasoline lamp with matches, 1; plumbers' lamps exploded, 4; gasoline tanks exploded, 8; gasoline iron exploded, 1; gasoline stoves exploded, 5; gasoline lamps exploded, 3; gasoline tanks overflowed, 3; overheated gasoline engine, 1; cleaning with gasoline, 1; defective valve on Pitner lamp, 1; lamp set fire to can of gasoline, 1.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Seymour, Ont.—October 27th.—Premises of Mr. Alex. Haig destroyed. Loss and origin unknown.

Hamilton, Ont.—October 25th.—House occupied by foreigners damaged. Origin, children playing with matches.

Virden, Man.—October 28th.—Stables of Mr. Fred E. Anderson destroyed. Loss about $2,500. Origin, children playing with matches.

Kenora, Ont.—October 25th.—Mill and machinery of Dryden Timber & Power Company destroyed. Loss about $10,000. Origin, unknown.

Blind River, Ont.—October 31st.— Mills of White Pine Lumber Company destroyed. Loss about $125,000. Insurance $90,000. Origin unknown.

Ottawa, Ont.—October 28th.—Premises of Messrs. C. Ross & Company, Metcalfe Street, slightly damaged. Loss unknown. Origin, sparks from chimney.

Englehart, Ont.—October 31st.—Lumber yard of Mr. C. O. Douser and premises of Jamieson Meat Company destroyed. Loss about $20,000. Origin unknown.

Amherst, N.S.—October 29th.—Premises of Messrs. Taylor & Tennant, aerated water manufacturers, destroyed. Loss about $10,000. Origin, supposed defective wiring.

Montreal, Que.—October 30th.—Rear of store on Drolet Street badly damaged. Loss about $12,000. Origin unknown. October 28th.—Building of Beaver Oil Company, corner of De l'Epee and Ducharme Streets, Outremont, badly damaged. Loss unknown. Origin, sparks from engine. October 31st.—Ste. Irene R.C. Church totally destroyed. Loss about $90,000. Origin unknown.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Ottawa, Ont.—The loss sustained by the Hunt Club was $2,500 on stock and buildings. Insured in the following companies:—Alliance, $4,000; Guardian, $5,800; Royal, $10,000; Phoenix, $10,000. Total, $29,800.

◆

QUEBEC RAILWAY LIGHT, HEAT AND POWER COMPANY.

The annual financial report of the Quebec Railway Light, Heat and Power Company, while it does not contain reassuring evidence of the sufficiency of earnings to permit of the continuance of the one per cent. per quarter on the common stock of the company, indicates that the business of the concern is expanding. The report is for the year ended June 30, 1911, and is for the first year following the consolidation of the various companies which make up the Quebec Railway, Light, Heat and Power Company, namely, the Quebec Railway Light and Power, the Jacques Cartier Electric, the Quebec Gas, the Frontenac Gas, the Quebec County Railway Company, the Quebec and Saguenay Railway and the Canadian Electric Light Company. As compared with the total earnings of these companies during the previous year, the consolidation, for the year ending June 30th last, earned as follows:

	1911.	Increase.
Gross Earnings	$1,280,126.76	$152,174.34
Operating Expenses	661,907.15	17,343.55
	$618,219.61	$134,830.79

The fixed charges during the year amounted to $456,329. Deducting this from the net earnings as shown above, a balance of $161,890 remains against other appropriations and dividends. Two quarterly dividends were paid during the year, amounting to $199,990. Hence the earnings fell $38,100 short of meeting the dividends. As the dividends were paid during the latter portion of the period, it might readily be that the earnings during that period were sufficient to meet the dividend requirements. In that case, the company would necessarily show a deficit during the early portion of its career.

The company has common stock outstanding amounting to $9,995,500 and bonds of $7,495,400, the bonds bearing interest at the rate of five per cent. In order to keep up its dividend at the rate of one per cent. per quarter, the company will have to make up the shortage of $38,100, shown above, on the two dividends, as well as the $199,910 required for the remaining two, or $238,010. This would be for the bare dividends alone without any allowances for eventualities.

The consolidation takes in all the public service corporations in the city of Quebec and supplies the entire railway and lighting facilities, obtaining good prices. Many extensions, more especially in connection with the passenger service, are being carried out, and the opinion has been expressed that the company will show an increase in earnings during the coming few years.

◆

NEW BRUNSWICK'S PREMIER.

The calling of Premier Hazen, of New Brunswick, to the Dominion Cabinet left vacant the most important office in that enterprising and progressive province. Without hesitation or delay, the best man was found to fill the vacancy and the result is that Mr. Flemming, formerly the provincial secretary of the province, became premier of New Brunswick. He is in the prime of life, having been born in the parish of Woodstock, Carleton County, a year after confederation. First elected to the legislature in 1900, he soon demonstrated his ability as a parliamentary debater and quickly became recognized as one of the leading members of the provincial House. He is a keen financial critic, with considerable executive skill, which perhaps largely contributed to his appointment by Mr. Hazen in 1908 as provincial secretary. Mr. Flemming is deeply interested in the Valley Railway project, an important question for the people of New Brunswick, as it will serve an old agricultural section of the province in addition to increasing the export trade through the port of St. John. He is heartily in accord with the movement initiated by The Monetary Times for the inclusion of Canadian provincial securities in the British Trustee List.

HON. J. K. FLEMMING,
Premier of New Brunswick.

PRICES IN FOREIGN COUNTRIES.

Advance Has Not Been Confined to Canada and the United States.

That prices have advanced in other parts of the world as well as in Canada and the United States is evidenced by a statement prepared by the Bureau of Statistics, Department of Commerce and Labor, comparing important prices at the present time with those of certain earlier years. The import figures of the United States government represent, under existing law and regulations, the prices of the articles in question in the wholesale markets of the country from which imported, and a comparison, therefore, of the average import prices of the principal articles imported at the present time compared with those of corresponding periods in earlier years indicates, in some degree at least, the fluctuation in prices in the countries from which these articles are imported.

This comparison of prices is rendered practicable by reason of the fact that the Bureau of Statistics publishes in its summary of commerce and finance a table showing the monthly average import prices of the principal articles brought into the country, and states at the head of the table that "The value of the goods represents their value in the foreign markets." These statements of average import prices are obtained by comparing quantity with value for the period in question, or in other words, by dividing the stated quantity of the article under consideration into the stated value thereof and thus determining the import value per unit of quantity.

Average Price of Coffee.

This table shows, for example, the average price of coffee imported in August, 1911, as 11.8c. per pound, against 6.4c. per pound in August, 1901, a decade ago; india rubber, an average of 83.4c. per pound in August, 1911, against 46.9c. per pound in August, 1901; clothing wool, 22.9c. per pound in August, 1911, against 12c. per pound in August, 1901; combing wool, 33.9c. per pound in August of the present year, against 19.8c. in August a decade ago; flax, $438.65 per ton in August, 1911, against $216.82 in August, 1901; hemp, $210.10 per ton in August of the present year, against $165.61 in August, 1901; tin plates, 3.9c. per pound in August of the current year, against 3c. in the corresponding month a decade ago; tin in bars, blocks, etc., 41.2c. per pound in August, 1911, against 26.5c. a pound in August, 1901; and tea, 18.2. a pound in August of the current year, against 13.3c. a pound in the corresponding month a decade ago.

Even in the single twelve month period from August, 1910, to August, 1911, a large number of articles show a marked advance in prices. Coffee, for example, which, as already indicated, showed an average of 11.8c. per pound in August, 1911, averaged 7.8c. per pound in August, 1910; rice imports in August, 1911, averaged 3.1c. per pound, against 2.4c. per pound in August a year earlier; cement, in August, 1911, 38.8c. per hundred pounds, against 28.4c. per hundred pounds in August of last year; bananas, 29.8c. per bunch in August of the present year, against 27.6c. per bunch in August, 1910; currants, 4.8c. per pound in August, 1911, against 3.7c. per pound in August of last year; figs, 6.7c. per pound in August, 1911, against 5.3c. per pound in August a year ago; almonds, 14.5c. per pound in August of the present year, against 10.3c. per pound in the corresponding month of 1910; calf skins, 29.2c. per pound in August, 1911, against 24.1c. per pound in August, 1910; tin plates, 3.9c. per pound in August of the current year, against 3c. per pound in August, 1910; olive oil, edible, $1.44 per gallon in August, 1911, against $1.29 per gallon in August, 1910; black pepper, 8.2c. per pound in August, 1911, against 7.3c. per pound in August a year ago; champagne, $15.49 per dozen quarts in August, 1911, against $14.64 in August, 1910; tin in bars, blocks, etc., 41.2c. per pound in August of the current year, against 32.1c. in August of the previous year; leaf tobacco, suitable for wrappers, $1.17 per pound in August of this year, against 95.4c. per pound in August of last year; clothing wool, 22.9c. per pound in August, 1911, against 21.2c. per pound in August, 1910; combing wool, 33.9c. per pound in August of the current year, against 30c. per pound in August a year ago; and wool carpets and carpeting, $4.98 per square yard in August, 1911, against $3.47 in August, 1910.

Did Not All Advance.

This advance in prices, however, does not extend to all articles. Nitrate of soda is materially lower in price than a year ago—$26.55 per ton, in August, 1911, against $34.75 per ton in August, 1910; guano, $12.42 per ton in August, 1911, against $25.79 in August of last year. Cocoa is slightly less in average import price, 22.2c. per pound in August, 1911, against 23.7c. per pound in August, 1910; also copper, 11.4c. per pound in August, 1911, against 12c. in August, 1910; pig iron, $27.19 per ton in August, 1911, against $34.09 in August, 1910; while copper, cotton cloths unbleached, manila, hemp, sisal grass, hides of cattle, raw silk, and lumber show a slight decline in August, 1911, compared with August, 1910.

◆

STOCKS AND THE STOCK MARKET.

Another valuable volume has been issued by the American Academy of Political and Social Science, under the title "Stocks and the Stock Market," and is published as a complement to the work "Bonds as Investment Securities," recently reviewed in these columns. Professor S. S. Huebner, Ph.D., Professor of Insurance and Commerce, University of Pennsylvania, deals with the scope and functions of a stock market, while Mr. Roger W. Babson discusses "Barometric indices of the condition of trade" and "The sources of market news." Mr. Thomas Gibson contributes a chapter on the influences affecting security prices and values. Other chapters are: The purchase or sale of securities through a stock broker; stocks and their features—division and classification; preferred stocks as investments; the declaration and yield of stockholders' rights; convertible bonds and stocks; economic crises and stock security values; railroad stocks as investments; electric railway stocks; industrial stocks as investments; stocks of financial institutions; the wrongs and opportunities in mining investments; bibliography on securities and stock exchanges. This will prove a valuable volume to the stockbroker and the investor. Copies can be obtained from The Monetary Times Book Department. Price, $1.00.

FIRST MORTGAGE FORTY-YEAR SINKING FUND GOLD BONDS

Dated July 1st, 1911 **Due July 1st, 1951**

Interest payable 1st January and July.

Principal and Interest payable at the Bank of Montreal, Toronto, Montreal and London, England.

Redeemable as a whole at 105 and accrued interest on or after July 1st, 1914, on prior notice, or annually for Sinking Fund drawings, beginning July 1st, 1916.

Denominations: $100, $500 and $1,000
with Sterling equivalents.

Bonds issued in coupon form with privilege of registration of principal and in fully registered form. Coupon and registered bonds are interchangeable.

Trustee: NATIONAL TRUST CO., LIMITED, TORONTO

The legal opinion of Messrs. Blake, Lash, Anglin and Cassels, Toronto, will be furnished.

We emphasize the following salient points of this Issue—

(1) Value of assets as of July 1st, 1911, $5,000,000—Consisting of Real Estate, Buildings, Plant and Goodwill, $3,837,911.94, and Net current quick assets in excess of current liabilities, $1,162,088.06. Included in current assets is the sum of $734,909 invested in Municipal and other bonds.
(2) Average annual net earnings for past four years (1907-1910) $291,719 or practically 3¼ times the interest on the present bonds.
(3) An annual Sinking Fund beginning July 1st, 1916, sufficient to retire the present issue prior to maturity at a maximum price of 105 and accrued interest.

The Company has outstanding $1,500,000 7% Cumulative Preferred Stock and $2,000,000 Common Stock, both of which are listed upon the Toronto and Montreal exchanges.

The present capacity of the plant which may be said to comprise everything required for the building of the most modern and up-to-date locomotives, provides for a yearly output of seventy-five engines, but as each year many satisfactory orders have been declined owing to the inability of the Company to make the deliveries required, it has been decided to proceed immediately with such enlargement of the works as will increase their future output to at least double their present capacity. Therefore, it may safely be assumed that a corresponding increase in the earnings of the Company will be assured.

At the present time, the Company has a sufficient number of orders on its books to keep it fully employed for about a year, and if negotiations for additional contracts now pending are successful, the Company will have abundance of work until the early months of 1913.

The excellent management of the Company has been further strengthened by the acquisition of Mr. A. W. Wheatley as its General Manager. Mr. Wheatley is one of the foremost locomotive manufacturers in America, having, previous to joining this Company, been the General Manager of the American Locomotive Company's plant at Dunkirk, N.Y., the second largest locomotive works on this continent.

THE SIXTY-THIRD ANNUAL REPORT OF THE CONSUMERS' GAS COMPANY, OF TORONTO

The sixty-third annual general meeting of the stockholders of the Consumers' Gas Company, of Toronto, was held in the company's board room, No. 19 Toronto Street, on Tuesday, 31st October, 1911, at noon.

The president having been called to the chair, presented the annual report and the financial statements:

Your directors submit herewith the sixty-third annual report of the Company, with the accompanying financial statements.

The output of gas for the year has amounted to 2,843,041,000 cubic feet, as compared with 2,621,247,000 cubic feet in 1910.

New mains represent an extension to our distribution system of 33 miles, the system now totalling 456 miles.

6,152 new services have been laid.

The Gasholder at Station "B," having a capacity of 5,000,000 cubic feet, has been satisfactorily completed, and was put into commission on August 18th. A suitable Governor House has been erected and a complete system of Valves and Governors has been installed.

There has been added to the manufacturing plant at Station "B" during the year, 11 benches of twelves "through" retorts, capable of producing over 3,000,000 cubic feet of gas per 24 hours, which brings the total manufacturing capacity of the Retort House plant at Station "B" up to 5,000,000 cubic feet per day. The new retort settings will be operated by modern mechanical stoking machinery. The plant is nearing completion, and will be ready for operation by about 15th November.

There has also been installed at Station "B," one 300 H.P. Marine Type Boiler with connections and accessories, one Rotary Exhauster of 5,000,000 cubic feet capacity, Condensers, Tar Extractors, Washer-Scrubbers, and Purifiers, each capable of dealing with 2,500,000 cubic feet of gas per day, and a 50 H.P. Gas Engine.

At Station "A" it has been necessary to partially renew and augment the Condenser and Washer Plant. The result has been increased efficiency and larger revenue from the sale of residuals.

The continued growth of the Company's business and the great increase in the number of its customers has necessitated further alterations to the office premises on Toronto Street, the whole building now being required for the purposes of the Company. It has also been necessary to secure more commodious premises for the Gas Appliance Branch, which has been located at Nos. 12 and 14 Adelaide Street West.

Your Directors, after carefully considering the Company's financial position, were glad to be able to reduce the net price of gas on the 1st January, 1911, to 70 cents per thousand cubic feet, the gross price remaining as formerly, $1.00 per thousand, the difference representing the discount allowed for prompt payment of accounts.

On the 18th April last, 7,690 shares of new stock, of a par value of $384,500.00, were disposed of at public auction, realizing an average premium of 92.64%.

The following statement for the past, as compared with the preceding year shows:—

	Meters	Gas Rental.
Year ending 30th September, 1911 ...	72,544	$1,857,071.01
Year ending 30th September, 1910 ...	65,349	1,799,246.19
Showing an increase of	7,195	$ 57,824.82

All of which is respectfully submitted.

JOHN L. BLAIKIE,
President.

JOHN L. BLAIKIE, President.
ARTHUR HEWITT, General Manager.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto, for the year ending 30th September, 1911, and certify to their correctness.

W. E. SAMPSON,
ROBERT ARMSTRONG,
Auditors.
Toronto, 24th October, 1911.

In moving the adoption of the Report, the President said:—

The President's Address.

Gentlemen,—The Annual Report, Balance Sheet and accompanying Statements, set forth very clearly the existing conditions of the Company's affairs, and these are so eminently satisfactory that shareholders and gas consumers cannot fail to be highly gratified.

I shall briefly refer to a few of the most important and interesting facts in the Report.

The very first statement in the Report will greatly astonish very many, that is the enormous output of gas for the year, viz., 2,843,041,000 cubic feet, as compared with 2,621,247,000 cubic feet in 1910.

You may remember that at the time of the Annual Meeting a year ago, the new Gasholder was in process of construction. It was a big undertaking, and it has been a triumph of engineering skill, as will be freely acknowledged when I state that every steel plate in the great structure with holes ready punched for riveting the whole together, fitted so exactly that you could not have inserted between them a thin sheet of paper even. The diameter of the steel tank is 216 feet, and the total height of the holder when inflated is 205 feet. The weight of the steel and iron contained in the whole structure totals over three thousand tons. The quantity of water contained in the steel tank itself, amounts to nearly ten million gallons. I may confidently say that the completion of the new Retort Settings and the additional storage capacity furnished by the five million cubic foot capacity Gasholder at Station "B," brings the Company past the danger point of not being able to amply supply its customers with gas. Both as regards manufacturing and storage plant, the Company is now admirably circumstanced. It is fortunate that this is the case, as you will note there has been an increase in the past year over the preceding one of no less than 7,195 Gas Meters, and were that rate of increase to continue for say the next ten years, there would be about double the total number in use than at the present time.

We are all proud of our City, and firmly believe that its rapid growth in population and wealth will continue, and the Company must be in a position to meet future requirements.

Note the unprecedented increase in the number of customers already mentioned, as also the extension to the Street Mains System, of 33 miles, and 6,152 new Services. The Company's operations extend not only to the City of Toronto, but throughout the Township of York. The extension of the Street Mains System, 33 miles in the year, bringing up the total to 456 miles, is well worth noting. In a Gas Journal that came some days ago to our General Manager, it was stated that in Melbourne, Australia, a city of 500,000 inhabitants, they had laid nine miles of street mains in a year, and seemed to regard that as something wonderful. It looks very small in comparison with results in Toronto.

It will be observed from the Financial Statement that the revenue from the sale of Gas has amounted to $1,857,071.01. Had the price of gas not been reduced on the 1st of January last, the revenue from the Gas Sales would have amounted to about $1,980,000.00, so that the reduction in price on the quantity of Gas sold, amounts to about $123,000.00.

On the 30th September, 1910, the Special Surplus Account showed a credit balance of $77,411.79, while on the 30th September, 1911, it amounted to $28,703.62, or $48,708.17 less than last year.

The efforts which have been made by the Company to improve the condition of the various Gas Appliances used throughout the City, have resulted in the consumers obtaining a higher percentage of efficiency from these appliances. In many cases the quantity of gas required for a given service has been reduced without any reduction in efficiency. Gas Ranges, Gas Water Heaters and Gas Heaters are being appreciated as modern household necessities, and your Directors anticipate a still greater development in this direction.

It gave your Directors great pleasure to reduce the price of Gas on the 1st January, 1911, to 70 cents per thousand cubic ft. It will interest the general public to compare this with the price of gas in many of the Cities, for example:—

Guelph, Ont.	$ .90	Cleveland, Ohio	.80
Hamilton, Ont.	1.00	Columbus, Ohio	1.00
London, Ont.	.95	Denver, Col.	.90
Montreal, P.Q.	1.00	Detroit, Mich.	.80
Ottawa, Ont.	1.10	Milwaukee, Wis.	.80
Toronto, Ont.	.70	New York, N.Y.	.80
Vancouver, B.C.	$1.15 to 1.75	Oakland, Cal.	1.00
Winnipeg, Man.	1.20	Philadelphia, Pa.	1.00
Boston, Mass.	.80	Pittsburg, Pa.	1.00
Brooklyn, N.Y.	.80	Portland, Ore.	.95
Buffalo, N.Y.	.95	St. Louis, Mo.	.80
Chicago, Ill.	.80	Seattle, Wash.	1.00

There are many things relating to the plant of the Company at both the old and new works (that is Stations "A" and "B") well worth noting, but suffice it to say that the entire equipment of this Company is thoroughly up-to-date, and that fact combined with competent heads of Departments at the works, an efficient Superintendent of Distribution, and the able and energetic efforts of our General Manager, Mr. Hewitt, and his assistant, Mr. Armstrong, accounts for the fact that this Company furnishes gas to its consumers at a lower price than any Gas Company on the Continent, and of a quality surpassed by none.

Our Vice-President, Mr. Austin, will second the adoption of the Report (which I now move may be adopted) and I certify that we are much indebted to him, as with his motor car, and his energy and strength, he spends much time around the works, and sees that every man does his duty.

I shall not detain you longer, Gentlemen, and shall only quote what I read a few days ago in one of Sir Walter Scott's novels, "Old men may be permitted to speak long, because they cannot in the course of nature have long time to speak."

The motion for the adoption of the Report being seconded by the Vice-President, was carried unanimously.

Messrs. Walter Gillespie and Wm. Crocker were appointed Scrutineers, and reported the unanimous re-election of the following gentlemen as Directors for the ensuing year:—A. W. Austin, J. L. Blaikie, A. H. Campbell, Sir Wm. Mortimer Clark, K.C., LL.D., Wellington Francis, K.C., F. LeM. Grasett, M.D., James Henderson, M.A., D.C.L., John Hoskin, K.C., LL.D., D.C.L., Thos. Long, E. B. Osler, M.P.

At a meeting of the Board held subsequently, Mr. John L. Blaikie and Mr. A. W. Austin, were unanimously re-elected President and Vice-President for the ensuing year.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Rivers, Man.—Until November 15th for $6,000 6 per cent. 20-year. C. Howard, clerk.

Rapid City, Man.—Until November 13th for $2,650 5 per cent. 7-year local improvement debentures. C. G. Murray, secretary-treasurer.

Forest, Ont.—Until November 6th for $17,000 4½ per cent. 30-year school debentures. Mr. L. P. McKindsey, chairman, Finance Committee.

St. Louis R.C. S.D. No. 21, Alta.—Until November 22nd for $15,000 5 per cent. 30-year debentures. L. P. O. Noel, Medicine Hat, secretary-treasurer.

Pembroke, Ont.—Until November 15th for $12,500 4½ per cent. 20-year debentures. A. J. Fortier, town clerk. (Official advertisement appears on another page.)

Melville, Sask.—Until November 15th for $19,000 5 per cent. 30-year debentures. J. Crow, secretary-treasurer. (Official advertisement appears on another page).

Thetford Mines, Que.—Until November 6th for $70,000 waterworks and $100,000 road debentures. Interest, 5 per cent., maturing 1914-1954. V. Morisset, town clerk.

Plenty, Sask.—Until November 18th for $4,800 6 per cent. 10-year debentures. A. M. Percival, secretary-treasurer. (Official advertisement appears on another page.)

Davidson, Sask.—Until November 20th for $16,000 5½ per cent. 20-year, skating and curling rink, and electric light and power debentures. Arthur J. Robertson, town clerk.

London, Ont.—The ratepayers may be asked to vote on a by-law to set aside $100,000 to be used for the purchase of land for factory purposes and in obtaining industries.

Moose Jaw, Sask.—On November 3 a by-law to raise $550,000 for the purpose of bringing an adequate supply of pure water from Caron Springs to the city will be submitted to the ratepayers.

Progress Municipality, Sask.—Until November 15th for $20,000 20-year 4½ per cent. road debentures. The loan is authorized by the government of Saskatchewan. Mr. J. B. McConica, secretary-treasurer, Luseland. (Official advertisement appears on another page.)

Collingwood, Ont.—Until November 10th for $14,000 20-year fire hall; $6,400 30-year; $30,000 20-year; $15,000 20-year; and $24,500 20-year debentures, all guaranteed by the county of Simcoe. Interest, 4½ per cent. A. D. Knight, town treasurer. (Official advertisement appears on another page.)

Port Colborne, Ont.—In connection with the Ontario Government's good roads movement, the Haldimand county council have authorized an issue of debentures to the amount of $10,000 for improving the roads of the county. The required machinery will be purchased this fall and work will be started early next spring.

◆

NATIONAL TRANSCONTINENTAL RAILWAY.

A little over two-thirds of the construction work on the National Transcontinental Railway has been completed. Of 1,845 miles from Moncton to Winnipeg, 1,275 miles of roadbed are now practically finished by the contractors, and rails are laid for that distance. The middle section of the line, comprising nearly 600 miles, and constituting the most inaccessible part, will require at least a couple of years more work to complete, and the present indications are that the whole line will not be opened for traffic until the spring or summer of 1914. By that time, it is expected, the Quebec bridge will also be completed.

Meanwhile the New Brunswick section and the section from Winnipeg to Superior Junction, will be available for local traffic. The total amount spent on the road to date is a little over $207,000,000.

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended November 3rd, 1910; October 26th, and November 2nd, 1911, with percentage change:—

British Columbia Mortgages

In placing any surplus funds your first thought should be—security. The careful investor is wary of mining and oil shares, because no security is usually given.

No safer form of investment exists to-day than first mortgages. Ours are placed on improved city properties in Vancouver and farms in Saskatchewan and Alberta. Our valuations are made by experts and are very conservative.

No loan is placed for more than 50% of appraised value. All loans are approved by board of directors. The company insists on the payment of a portion of principal at end of third year, interest payable half-yearly. Titles are searched and certified by our solicitors.

We guarantee to net you SIX PER CENT., making all collections and attending to minor details without charge. Let us tell you more about our Guaranteed First Mortgages.

— WE OFFER —

6% First Mortgage Sinking Fund Bonds

— OF —

THE SPANISH RIVER PULP & PAPER MILLS, Limited

PARTICULARS:

1. The Bonds are a First Mortgage on all the properties of the Company.
2. Conservative value of property, $13,512,184, or nearly six and a half times the value of outstanding bonds.
3. The estimated net earnings for 1911 will show over twice the amount of interest required on $2,100,000 of Bonds, which include the present issue for the paper mill installation, and from which no earnings are as yet derived.
4. Through the operation of a Sinking Fund the Bonds are retired before maturity, thereby creating an ever-increasing equity behind the issue.
5. The pulp industry is destined to be one of the most important in Canada. The cost of producing pulp at the Company's mill has steadily decreased, and, owing to the increased demand, the price has steadily increased.
6. The Company has found a ready market for all the pulp it has manufactured in the middle Western States. Statistics show that these States consume one-third of the total consumption in the United States.
7. The Company's area is 6,000 square miles. The capacity of the Pulp Mills is 160 tons, and the Paper Mill 100 tons per day.

PRICE: 98 and Interest, to yield over 6⅛%.

We have prepared a Special Circular, giving full particulars regarding the Company and considerable information on the pulp industry. We would be pleased to forward copy of it to you on request.

A. J. FORTIER,
Town Clerk.

Pembroke, Oct. 26th, 1911.

TOWN OF MELVILLE, SASK.

TENDERS WANTED FOR $19,000 DEBENTURES.

Sealed tenders, marked "Tenders for Debentures," will be received up to noon, 15th November, 1911.

Tender price to include interest, cost of printing debentures and bank charges. The debentures are 30 years, payable at end of term; interest 5 per cent. half-yearly. In issues of $1,000. Principal and interest payable at Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Quebec.

The highest or any tender not necessarily accepted.

JOHN CROW,
Secretary-Treasurer,
2nd October, 1911. Melville, Sask.

TENDERS FOR DEBENTURES

VILLAGE OF PLENTY, SASK.

Sealed Tenders will be received by the undersigned up to November the 18th, 1911, for the purchase of four thousand eight hundred dollars ($4,800) Village of Plenty debentures, repayable in ten instalments, with interest at six per cent. per annum.

The highest or any tender not necessarily accepted.

A. M. PERCIVAL, Secretary-Treasurer.

TENDERS FOR DEBENTURES.

Sealed tenders marked "Tenders for Debentures," addressed to John Steven, Reeve of Progress Municipality, Luseland, Sask., will be received up to and including **Wednesday, November 15th, 1911,** for the purchase of Twenty Thousand Dollars Debentures of the Rural Municipality of Progress No. 351, Saskatchewan, repayable in twenty equal, annual, consecutive instalments with interest at four and one-half (4½) per cent. per annum.

The municipality contains over 188,000 acres of taxable land, which will be increased when Government school lands are disposed of. The C.P.R. Moose Jaw-Edmonton line runs through the municipality, which comprises one of the most progressive settlements in Saskatchewan. The loan is authorized by the Government of Saskatchewan, and is required for constructing roads and purchase of road-grading machinery.

For further particulars apply to

J. B. McCONICA,
Sec.-Treas. Progress Municipality,
Luseland, Sask.

FARMERS BANK SHAREHOLDERS CONTEST LIABILITY.

Five hundred and ten shareholders of the Farmers Bank have filed, through Mr. William Laidlaw, K.C., Toronto, agent of the shareholders' solicitor, Mr. J. W. Elliott, K.C., of Milton, their defence against the claims of the liquidators to have them placed on the list of contributories. Over 615 defences have been filed, but no date has yet been set for their hearing. Unless the Federal Government grants a Commission it is likely an application will be made to the courts in connection with the dispute over Referee McAndrew's jurisdiction.

In the defence filed, it is pointed out that in the charter of the Farmers Bank there was a section providing that as soon as a sum not less than $500,000 of the capital stock had been bona fide subscribed, and a sum not less than $250,000 paid to the Minister of Finance, a meeting of the subscribers should be called. The defence claims that the sum of $500,000 was not bona fide subscribed, and that the sum of $250,000 thereof was not paid to the Minister of Finance within the time provided for, and that all subsequent action of the provisional directors was illegal, including their acceptance of applications for subscriptions for shares of the bank's capital stock and their issuance of shares of capital stock.

The defendant further claims that he was not de jure a shareholder of the Farmers Bank and that the money accepted from him by the directors as stock subscription was procured by fraud and misrepresentation, and that any application for stock subscription was procured subject to conditions precedent. The defendant alleges that the bank is justly indebted to him for money deposited with the bank, and that this should be set off against any liability of the defendant to the bank.

In conclusion, the defendant denies any jurisdiction of Mr. J. A. McAndrew, Official Referee, to hear the question.

◆

A late October Canadian flotation in London, was £200,000 5 per cent. debenture stock at 95 of the Alberta Land Company.

The Maritime Trust Company, Vancouver, elected the following directors at its annual meeting: Mr. J. M. McPherson, president; Mr. S. A. Heaslip, first vice-president; Mr. C. W. Murray, second vice-president; Mr. W. A. Freeze, secretary; Mr. W. J. Heaslip, treasurer; Mr. W. H. Alcock and Mr. Walter Scott.

The directors of the Temiskaming & Hudson Bay Mining Company have declared another dividend of 300 per cent. This makes the thirty-fifth dividend paid by this company and will be payable on Monday, November 13. The books of the company will be closed to transfers from November 8 to November 11 inclusive.

London Agency of the IMPERIAL BANK OF CANADA.

LATE NEWS AND NOTES.

A new four per cent. provincial loan of $1,000,000 will be authorized by the Ontario Government. It will be floated in the province and will be free from succession duties. This loan will be for general provincial purposes, and will supplement the $5,000,000 loan authorized last year to be floated in Great Britain. The treasurer floated only $2,500,000 of this loan

The Imperial treasury may decide not to subsidize a steamship service between the United Kingdom and the West Indies via Canada, as it is probable that the Canadian Pacific Railway will push a scheme of linking the islands with one of the St. Lawrence ports. South American developments are also likely.

The British Government is approaching Argentina, Colombia, Denmark, France, Mexico, Morocco, Norway, Russia, Sweden, Switzerland and Venezuela concerning the position of the overseas dominions under the commercial treaties with those countries, to secure if possible, the right for the overseas dominions to withdraw from the treaties apart from the United Kingdom.

Welsh tin plate makers are approaching the Canadian Government, alleging that since the withdrawal of the anti-dumping clause, once operative, Americans are capturing the Canadian trade formerly held exclusively by Wales.

Sickness Policies—covering any and every sickness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

Seven to One

That is about the ratio. About seven times as many persons are injured as die from all causes yearly. Accidents are a more prolific cause of death than any disease except lung diseases.
Twice as many people are accidently killed as die of old age.
Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

OUR MOTTO: Prompt and Just Treatment of Claims.

The Canadian Bank of Commerce has opened a branch in West Saskatoon, Sask., in charge of Mr. J. Muir, to be known as West Side, Saskatoon, branch.

Owen Sound, Ont., may have its own street railway. The mayor proposes that the town build, own and operate six miles of electric railway at an initial cost of $100,000.

At a meeting of the directors of the London Street Railway, it was decided to increase the capital stock from $552,000 up to an amount not exceeding $750,000. Mr. J. W. Williams, of Detroit, was appointed to succeed the late Mr. George H. Bentson as secretary-treasurer.

A strike of high grade galena has been made on the Standard mine in the Slocan district of British Columbia. This property is owned in Spokane. The strike will be of importance to the whole district, as it will give an incentive to further mining activity.

Mining properties in the silver and lead section of Slocan district, B.C., valued at over $2,000,000, have been amalgamated by a deal concluded in Vancouver. The consolidation under a new company is composed of the Byron N. W. and John M. Harris mineral properties of Sandon the most noted of which is the Slocan Star Mine, which, up to the time when its activities were suspended by litigation, had produced $3,000,000 in silver, lead and zinc. For ten years the Slocan Star was entangled in litigation. In 1905 the property was closed.

To introduce THE MONETARY TIMES to new friends, we are prepared to send the paper for an eight weeks' trial subscription on receipt of twenty-five cents. If you do not know THE MONETARY TIMES, or if you want to introduce us to some friend, send us your order and it will be promptly filled.

THE MONETARY TIMES

62 Church Street - - TORONTO

The Canadian Fire Underwriters' Association has fixed another reduction in the key rate of 25 cents in the congested districts of London, Ont., and 10 cents in other parts of the city. The underwriters made a reduction of 20 cents last year, which makes the total reduction due to the wells 45 cents. As the fire insurance premiums collected in London amount to between $300,000 and $400,000 annually, there will be a saving of from $75,000 to $100,000. When the city employs ten more men in the fire department and installs another air compressor at the Horton Street plant, the underwriters promise a further reduction of 10 cents in the congested district and 5 cents elsewhere.

Head Office - VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,090,000.

Assets of over a Million Dollars.

Paid up Capital	$780,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

THE GREAT WEST PERMANENT LOAN COMPANY

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

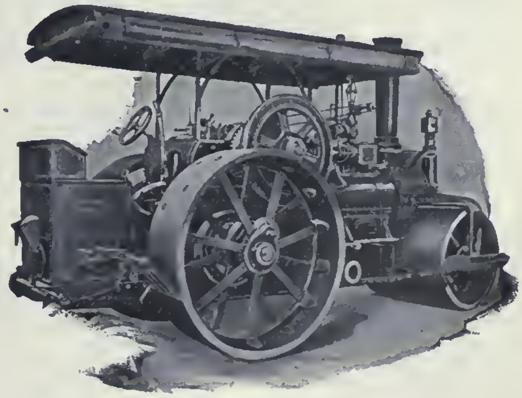
The Waterous
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to none.

Ask the man on the machine.

JOHN R. LITTLE, Managing Director

FROM COAST TO COAST.

The capital stock of Aqueducts, Limited, has been increased from $100,000 to $150,000.

The Alaska Feather and Down Company's capital stock has been increased from $100,000 to $500,000.

The name of the Mad Dan Mining Company, Limited, has been changed to Jajola Cobalt Porcupine Syndicate, Limited.

The number of the directors of the Belgo-Canadian Realty Company, Limited, of Montreal, has been increased from three to seven.

The Niagara Fire Insurance Company of New York has been licensed to carry on business in Manitoba, and Mr. C. H. Enderton, Winnipeg, has been appointed chief agent for the province.

Mr. Smithers spoke hopefully of the ultimate prospects of the Grand Trunk Pacific. Increased wages accounted for £100,000 out of the £168,418 increase in the cost of conducting transportation in 1910.

The Nova Scotia Car Works has secured an order to build one thousand additional wooden box cars for the Canadian Northern Railway. The output per day at the car plant has increased until now it is twelve cars per day, and will be further increased.

In the British House of Commons Mr. McKinnon Wood, for the Treasury Board, informed Mr. Evelyn Cecil that the words "Dei Gratia" or letters "D. G." had been omitted inadvertently from the new Canadian coinage. Fresh dies had been sent to the Canadian mint.

FROM COAST TO COAST.

"Canada at present occupies a larger place in the eyes of the people of Great Britain than ever it did, and as a result, more British capitalists are seeking investment in Canada and many additional millions will follow." Sir Maxwell Aitken, just before sailing for England.

The following companies operating under Ontario charters have increased their capital stock:—W. H. Cox Coal Company, Limited, from $10,000 to $25,000; Diamond Flint Glass Company Limited, from $1,600,000 to $3,500,000; Laughlin Realty Limited, from $40,000 to $100,000.

At the Grand Trunk Railway Company's half-yearly metting in London last week, it was stated that the company is about to enforce its new powers to issue bearer certificates for its stocks. They will be issued on January first under conditions made familiar by Canadian Pacific Railway practice.

The advocates of the change say that Canadian, American and Continental interest in the stock, which is already considerable, will be greatly encouraged by the abolition of what most countries abroad regard as the obnoxious system of transfer now in force.

The Temiskaming and Northern Ontario Railway has placed with the Canadian Locomotive Company an order for 4 locomotives of the "Consolidated" type. Up to date the provincial Government has placed orders for 28 engines with the local locomotive company for the Temiskaming and Northern Railway.

The Allan line has placed orders for their two new liners for the Montreal-Liverpool service, the first ship to be built by Beardmore & Company, shipbuilders of Glasgow. The vessel is to be of 15,000 tons burden, 570 feet in length, and with a speed of 18 knots, will be the fastest vessel on the St. Lawrence route. Twelve shipbuilders tendered for the second liner, the construction of which was awarded to the Fairfield Shipbuilding and Engineering Company. The double contract represents an outlay of one million pounds sterling.

For the first time, the report of the English mint, just issued, gives an official estimate of the amount of gold coin in circulation in the United Kingdom. The total is 113,000,000 pounds, an increase of 13,000,000 pounds since 1900. In 1892 the total was about 90,000,000 pounds. The phrase, "in circulation," includes the amount of gold held by banks in their coffers, which has been increasing in recent years. The Mint's figures will be of value to the economists who assign part of the cause for the increased cost of living to an expansion in the amount of gold coin, thereby, they contend, diminishing the purchasing value of the sovereign.

LIFE ASSURANCE COMPANIES

The Chief Difficulty

that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

More Policyholders in Canada than any other Canadian company.

THE UNION LIFE ASSURANCE COMPANY
Head Office, TORONTO, Canada

CONSUMERS' GAS COMPANY.

Gas furnished to consumers at a lower price than any gas company on the continent and of a quality surpassed by none. That was the claim made by the president of the Consumers' Gas Company, Toronto, at its sixty-third annual meeting this week, and one to which the company has every right. After considering the company's financial position, the net price of gas was reduced on January 1, 1911, to 70 cents per thousand cubic feet. This compares with the next highest figure of 80 cents at Brooklyn, Boston, Detroit, and other cities; 90 cents at Guelph, $1.00 at Montreal, $1.15 to $1.75 at Vancouver, and $1.20 at Winnipeg. The efforts which have been made by the company to improve the condition of the various gas appliances used throughout the city have resulted in the consumers obtaining a higher percentage of efficiency from those appliances. In many cases the quantity of gas required for a given service has been reduced without any reduction in efficiency. The revenue from the sale of gas has amounted to $1,857,071. Had the price of gas not been reduced on January 1st last, the revenue from the gas sales would have amounted to about $1,980,000, so that the reduction in price on the quantity of gas sold amounts to about $123,000.

The financial statement shows $416,180 appropriated for dividends, and $342,768 for plant and buildings renewal fund while $28,703 was carried to special surplus account. The table below gives a good idea of the company's rapid growth. Under the capable management of Mr. Arthur Hewitt, the Consumers' Gas Company of Toronto is operating a public utility in the interests of the public as well as in those of its shareholders.

One of the penalties of being a country in the making is to have most important legislation questioned. Whether the Dominion parliament in passing the Industrial Disputes Act exceeded the powers conferred upon it, is the question which the Superior Court, Montreal, will be called upon to decide as a result of a judgment rendered by Mr. Justice Charbonneau last week, and ordering the issue of a writ of prohibition against the board of conciliation appointed to deal with a dispute between the Montreal Street Railway and some of its ex-employees. The company, which was petitioner for the issue of the writ, in the course of numerous contentions advanced, opposed the demand of the dismissed employees, who alleged that they had been deprived of their positions for the simple reason that they owed fealty to a labor organization. The company maintained that there was no reason for the government to appoint a board of conciliation under the Industrial Disputes Act, as the alleged difficulty was fully covered under the clause dealing with railway disputes in the Conciliation and Labor Act. The authority of the Quebec Public Utilities Commission and the Combines Investigation Act have both been tested and, so far as we can judge in this age of legal technicalities, their rights established.

REAL ESTATE SECURITY

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of $100, $500, and $1,000.

They are a first lien upon all real estate and all other assets of the corporation.

The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.

The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value.

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

STERLING LIFE ASSURANCE COMPANY.

The Sterling Life Assurance Company of Canada is the name of a new life insurance company that will seek incorporation under the Insurance Act of 1910 at the next session of the Dominion House. The head office is to be in Toronto. The capital to be asked for is $1,000,000. The shares will be $100, issued at a premium of 25 per cent., and a call of 50 per cent., made of both capital and premium. It is proposed to sell both non-participating, ordinary, and industrial life insurance. The applicants are A. E. Munn, lumberman, of Orillia; W. H. Shaw, principal of the Central Business College, Toronto; Dr. G. E. Smith, Toronto; A. P. Poussette, K.C., Toronto; and J. W. Garvin, insurance broker, Toronto.

The proposed managing director of the company is Mr. J. W. Garvin, B. A.

◆

A meeting of the shareholders of the Banque de St. Hyacinthe has decided to make an offer of 85 per cent. of the amount of their claims to the depositors in that institution for a full release.

Messrs. Greenshields & Company, members of the Montreal Stock Exchange, have opened a banking and brokerage office at No. 5 Rue Davnou, in Paris, France, for the purpose of conducting a general business in all Canadian securities. Mr. J. F. Dupont will be the manager.

The Eastern Securities Company of St. John, N.B., have opened a branch at 215 Notre Dame Street, Montreal, under the management of Mr. J. P. L. Stewart. Mr. Mahon will remain managing director of the Eastern Securities Company, which will still hold its connection with St. John, and three business men have been added to the board. They are Mr. John Findlay, of Findlay & Howard; Mr. T. McAvity Stewart, vice-president of the Kenmore Realty Company, and Mr. C. E. Archibald, vice-president of the Smart Bag Company.

The Union Bank of Canada, opened a branch in London, England, under the management of Mr. F. W. Ashe. The offices occupy a prominent position at the corner of Hatton Court and Threadneedle Street, an entrance in the latter important thoroughfare having been specially constructed since the late tenants, the Chartered Bank of India and China, vacated the premises. Mr. Ashe states that the step taken had long been under consideration by the directors; and final arrangements were made during the recent visit of Mr. G. H. Balfour, the general manager, to London, "not so much with the view of entering into competition with the other Canadian banks which have already established branches in London, but in order to conserve our growing interests in the United Kingdom, which is now visited so much more frequently by our clients and friends in the Dominion."

INVESTMENT AND LOAN COMPANIES

The Chief Consideration

Is the safety of your money your chief consideration in deciding upon an investment for it?

Then you cannot find a more satisfactory investment than this Corporation's Debentures.

To bring them within the reach of the smallest investor, they are issued for sums as small as one hundred dollars.

This does not preclude their selection by investors of large sums, large numbers of whom hold them for many thousands of dollars.

They are a Legal Investment for Trust Funds. and many Executors and Trustees save themselves worry and anxiety by investing in them.

They are held in large sums by Insurance Companies, Benevolent and Fraternal Societies, and similar institutions.

Send for specimen Debenture copy of Annual Report, etc.

HALIFAX AND ITS BANK FIGURES.

The pride of Halifax is piqued, and the blush spreads across the countenance of Nova Scotia. The bank clearings of the city for the first six months of the year showed a decrease from the figures of the corresponding period last year. Now an ordinary type of city would let it pass at that. We all remember the meeting of traders in Chicago during the depression in trade and before they raised the tariff. When the deliberations had gone on for three or four hours one trader said: "Trade is dull, but I do not care. So long as I have a brother at the head of the police, and another brother at the head of the Excise, I will defy competition." Now, so long as the exports from Halifax for 1910-11 exceed those of 1909-10 by $2,500,000, and business generally has been good, and manufacturers have had the best year's results in seventy years, and the fish trade has been brisk, Halifax can afford to wink at the clearing house figures.

Mr. E. A. Saunders, the enterprising board of trade secretary at Halifax, was so perturbed at the clearing house result, that he girded his loins with investigative armor and proceeded to search for the cause. He found that a year ago, the Union Bank of Halifax, with a large local business, was absorbed by the Royal Bank. Two other banks, the Union Bank of Canada and the Merchants Bank, have established themselves in Halifax, but they have not been there long enough yet to counterbalance matters. During this transition period, the local bank clearings declined. The Canadian port need not feel doleful on this score, for Halifax and Nova Scotia are still on the map, and within the next decade should undergo wonderful development, enjoying consequently more prosperity.

In connection with the question of banking down by the sea, it is interesting to recall the criticism of Professor Johnson, of New York University, who examined our banking system on behalf of the National Monetary Commission of the United States:—

"The people of the East," said the professor, "supply the capital for the development of the West, though many of them, perhaps, are entirely ignorant of the useful purpose their savings are made to perform. In the western cities of Canada one hears no talk among business men about scarcity of capital. A merchant or manufacturer in Manitoba gets the money he needs as easily as does a merchant or manufacturer in Toronto or Montreal.

"Justifiable as the bank's policy is from a national point of view, one cannot help believing that the branch banking system has really checked the development of business and industry in the Maritime Provinces. If Canada, during the last thirty years had depended, like the United States, upon independent local banks, there would have been a plethora of capital in the East, and Montreal, Quebec, and Halifax, like Boston, New York, and Philadelphia, would, years ago, have had 4 and 5 per cent. money, while Winnipeg and other Western cities, less populous than now, would still be paying 1 per cent. a month. The relative cheapness of capital undoubtedly helped build up the prosperous industries of Massachusetts. The same cause operating in the Maritime Provinces of Canada would doubtless have led to the establishment there of industries of which the people under existing conditions have not ventured to dream."

The Maritime provinces will themselves scarcely endorse that statement. The branch bank system gathers deposits where money is plentiful and makes loans where it is most needed. The transfer of funds from sluggish to active communities, says Professor Johnson, is the inevitable result of our banking system, and is the cause of the tendency of the rate of interest toward uniformity in all parts of Canada. The fact is surely one of the strong features in supplying the financial need of the Dominion. In the East, where money for commercial purposes is more than sufficient, the surplus is used for commercial purposes in the West, where money is not so plentiful, and the need therefore is strongly defined. The chartered banks foster commercial development particularly for many good reasons. Loans on land are made by the life insurance companies, the trust companies, private estates and loan companies. Without a uniformity in the interest rate, it might be possible to lend money at, say, one per cent. less to certain sections of the country, while other sections would pay higher than they do now, but obviously this would work disadvantageously to the country as a whole. Again, the volume of business and prosperity in the Maritime provinces depends largely upon the credit and facilities afforded to Western Canada by the banks. The separation of savings and commercial banks is a natural thing for a man from the Eastern States to advocate. There such a division has worked fairly well, but it would have been attended by very bad results in the Western States. If savings banks were allowed to lend money only on real estate it would withdraw a great deal of money from commercial enterprise, and rates would be higher all round. We argue that every dollar of the people's savings should be used for commercial purposes. As an evidence that this reasoning seems correct, witness the fact that in the Western States, where the deposits are needed for commercial purposes, the savings banks do a regular banking business.

GRAND TRUNK POSITION.

The Grand Trunk position is slowly improving. Mr. A. W. Smithers, presiding at the half-yearly meeting in London, referred to the fact that all the railways of the world were being pressed by high prices for all they used and by the cost of high wages. Despite that, he was able to tell the proprietors of the road that not only had the Grand Trunk maintained the position already won, but they were able to pay the full half year's dividend on the second preference stock, which they had not been able to do in the first half of the year since 1907. He was glad to report that they had been able to maintain that position owing to the very satisfactory increase in gross earnings. The increase under this head of the Grand Trunk proper for the half year was, in round figures, £239,000. The increase in the working expenses was £172,000, but to this had to be added increased charges for interest, increased debits on the Canada Atlantic Railway and the Detroit, Grand Haven and Milwaukee Railway owing to increased working expenses, and in the case of the Canada Atlantic Railway of a small increased interest charge. There was an increase under the head of maintenance of way and structures of £30,000, and £7,500 under traffic expenses, which amounts were almost exactly balanced by a decrease of £38,000 in maintenance of equipment. The large increase of £172,000 consisted of conducting transportation, £168,000; general expenses, £3,000; and taxes, £1,100. Of the amount of £168,000 for conducting transportation, the large sum of over £100,000 had gone directly in wages, and the balance, which had gone in increased fuel and other supplies, had been also swelled indirectly by the increased wages, which was the main element in the increased cost, not only in working the railway directly, but in the many and various supplies a railway had to purchase.

Mr. Smithers once described the Grand Trunk as a road "poor, but honest." Honesty is, as usual, however, proving the better, even if the slower, policy, as witnessed by the showing for the past half year. The comparison for the six months ended June 30th is as follows:—

	1909.	1910.	1911.
Gross Receipts	£2,866,468	£3,321,637	£3,561,182
Working expenses	2,079,196	2,456,065	2,628,205
	787,272	865,571	932,977
Balance from rentals, &c...	Cr.58,092	Cr.58,090	Cr.22,431

The dividend policy of the road has caused some dissatisfaction, although this has been modified considerably since the reorganization of the management and directorate. The reason why a larger dividend was not paid to the holders of third preference stock, said Mr. Smithers, arose from circumstances beyond the control of the board, but they believed the growth of Canada would enable them to overcome those difficulties, and that nothing would enable them to attain success more surely than to keep the Grand Trunk physically in the best condition to meet the requirements of their customers, and to be ready to cope with the increased traffic which would come when they were physically connected with the Grand Trunk Pacific, and also, with regard to finance, to keep the credit of the company at the highest possible level.

One shareholder thought the ordinary shareholders ought to have some more consideration shown them than had been done in the past, particularly as the position of the company was improving, and that so much money should not have been expended upon betterments. The chairman, in reply, said that the directors were doing their very best for the benefit of all the stockholders in the company, and he could assure them that, considering the big undertaking they had in hand, there was a great deal more anxiety placed upon them than there was fun. It was necessary that the company should be in a strong position financially, and that its credit should stand high. The policy of the board was with a view to gaining that end. If the shareholders would only have confidence in the board he felt sure that the policy they were pursuing would, within some two years, land them in a measure of great success.

CHAMP CLARK AND HIS "HUMOR."

Mr. Champ Clark, Speaker of the American House of Representatives and candidate for the presidency of the United States, is a frank man. His utterances regarding the annexation of Canada by the neighboring republic have been treated largely as a joke. At Fremont, Nebraska, the other day he stated that nine-tenths of the people of the United States were in favor of our annexation, and that he could win the presidency on such a platform against Taft. These remarks have been treated largely as American humor. The Under Secretary of State for Foreign Affairs in the British House of Commons, in reply to a question, "gathered that the proposal made in the speech was not intended seriously."

Mr. Clark may misunderstand the ninety millions of people over whose lower legislative chamber he presides, but it is a mistake to conclude that he has no faith in his statements. He is a man of iron will, dogged persistence, brutal frankness and unswerving bitterness towards his political opponents. Those who have talked with him—the writer met him in April—cannot misjudge the quality of his sincerity. Mr. Clark is a believer in the gospel of Canada's annexation. That may be because he does not know our country or the backbone of our people. We think that Mr. Clark has a wrong impression of American opinion, as we know he has of Canadian. His remarks are scarcely worth the paper required to record them, but his "jokes" unconsciously may become a wedge of enmity between the two countries.

In short, Mr. Champ Clark is tactless, and his "humor" is not appreciated. He should forsake the gavel in the American House and resume one of his former avocations, preferably farming, which has wonderful effect in absorbing exuberant verbosity. Mr. Champ Clark as president of the United States would be the greatest presidential error made in any country. We feel sure the people of the republic will endorse that opinion when nomination day arrives.

TORONTO IS NOT READY FOR TUBES.

It would sound well to talk of Toronto, a city of less than 400,000 population, possessing tube railways, but they are unnecessary. The city wants a better, more extensive car service. Proper transportation facilities are lacking, but the installation of subways is the least desirable way to supply the need. Money should be spent either by the Street Railway Company or the city to improve local traffic conditions. The company will not expend more than compelled. Their franchise expires in eleven years, and the municipality will then acquire the system.

Suppose, then, that the city is committed to an expenditure of $5,000,000, the amount estimated for the tubes. With that sum it would be possible to build 100 miles of surface lines, instead of only three miles of underground railways. The tubes could not be completed for five years, while the 100 miles of surface track should be finished in at least half that time. The Street Railway Company would undertake the operation of all lines until its franchise expired. Toronto could get practically no relief from the tubes until finally completed. Every few miles of surface lines built are, on the other hand, of immediate utility. The tubes scheme for Toronto is a proud fad. It will plunge the city into heavy expenditure without anything like corresponding benefits. Ratepayers who have at heart the interests of the Queen City will vote against the tubes on New Year's Day.

SMALL CHANGE.

The civic debt at least could be packed into those Toronto tubes.

Cats eat rats, rats eat cats, and promoters get the skins and wealth. This is the latest promotion idea, reported from Chicago, but it is merely a variation of bulls eat bears, bears eat lambs and promoters, etc., etc., etc.

* * * *

The directors of the Manitoba White Granite Pressed Brick Company "are surprised" at the action of The Monetary Times in refusing to accept advertisements of their sale of stock—a case of the brick being pressed too hard for their liking.

* * * *

While the provincial government is fighting the Alberta and Great Waterways Railway Company for the proceeds of a bond sale, Messrs. Mackenzie & Mann are planning a network of steel for the Peace River region. The practical sometimes beats the legal.

* * * *

Yet another example of the pernicious principle of the municipal bonus has arisen, this time at Simcoe. It appears that town has granted a bonus of $30,000 to an industry already established in London, the bonus being made on condition that the factory was moved from London to Simcoe. The competition between municipalities for new industries, in the direction of bonus inducements, is bad, but the present case is far worse.

WESTERN CANADA.

Progress Being Made in Threshing and Marketing of Grain—In the Wheat Markets.

Monetary Times Office,
Winnipeg, November 8th.

Reports from the western provinces show that business conditions are in a satisfactory condition. Fall trade is extremely brisk, with every sign of a continuation. With the marketing of their grain farmers are now in a better position to meet obligations, and collections are reported to show considerable improvement. Railway construction work all over the west is proceeding, the weather enabling work to go on without a break. Altogether there is little if any complaint of trade conditions now that the grain is being rushed to the lake terminals.

Threshing and Marketing of Grain.

The fine weather of the past week has enabled rapid progress to be made with threshing and marketing the grain crop of 1911. Reports show that in Manitoba 80 per cent. of the crop has been threshed and 50 per cent. marketed; in Saskatchewan 60 per cent. threshed and 30 per cent. marketed; and in Alberta 30 per cent. threshed and about 10 per cent. marketed. Manitoba wheat has graded well, the heavier yields being reported from the northern part of the province and the lightest from the south, and the crop varying from 9 to 32 bushels an acre with an average yield of 20 bushels to the acre. In Saskatchewan the yield of wheat varies from 8 to 34 bushels to the acre, with an average of around 22, while the bulk of the grain has graded below No. 4. In Alberta the threshing is backward, but the yields are averaging high. The oat crop has been a good one, while barley has also yielded well. Flax in many cases has been a splendid crop, but about 6 per cent. has suffered from frost. Manitoba lands may be clear by the end of this week, while another ten days will bring threshing to an end in Saskatchewan and Alberta.

Home for Display of Western Resources.

The directors of the Winnipeg Industrial Bureau have made arrangements for a lease of the old Manitoba Hotel site at the corner of Water and Main streets, on which they will proceed to erect a structure in which to house their exhibits. The building will entail an expenditure of $50,000, and will be of the nature of an exhibition building. It will be divided into departments for machinery and mercantile wares, with one devoted to a display of the natural resources of the country, so that the visitor to Winnipeg will be enabled to view the possibilities of the west the moment he sets foot in the city.

The new policy of the Canadian Northern Railway with reference to hotels is to find expression in Winnipeg by the erection of a large hotel. Sir William Mackenzie, before leaving the city last week, is reported to have concluded arrangements for the erection of a luxurious hotel in connection with the Canadian Northern Railway, the new site of which is to be near the Union Depot. From Sir William Mackenzie's statement it would appear that the railway is seriously considering the building of a chain of hotels across the Dominion, all under its own management.

In the Wheat Markets.

Market values showed a declining tendency throughout the early part of the week, and the unexpected happened when the October options closed quietly at a decline of 4½ cents. Although there was nothing really bearish in the situation, markets had been relatively weaker for some time, but the month closed with a surprising weakness of tone, mainly on account of the large decline on the United States markets, one of the chief factors in which was the rumoured Federal investigation of large wheat holdings.

The close of the week left markets in general much improved, cables were firmer and there was a better cash demand. Weather reports from the Argentine, where the crop is reaching the critical stage, indicate almost perfect conditions, but the Australian shortage will probably take up quite a portion of the Argentine surplus, while the Russian shortage gets larger as the season advances.

All Grades in Demand.

Our Winnipeg market continues to show a considerable amount of activity, with a healthy and keen demand for all grades of wheat. The cash demand was better than for some time, and there was some export enquiry for Nos. 2 and 3 Northern, which have not been in demand recently. There was some buying by export houses to fill old contracts, but there is a distinct absence of interest in our crop by both British and European buyers quite unusual at this time of year.

Judging from world conditions there is not a great surplus in any one country, and it is believed there will be an improved foreign demand for our wheat later in the season, leading to higher prices. The Canadian visible, while showing an increase, is still three million bushels less than last year, while stocks in terminals are one and one-half million bushels less. The movement from the country at present is the largest on record, but there is no betterment in the average grading.

AEROPLANES AND AUTOMOBILES

Are Becoming Big Factor in the Foreign Trade of the United States.

Aeroplanes are becoming a factor of international commerce. The records of the United States Bureau of Statistics show that more than $50,000 worth of aeroplanes were imported into, and exported from, the United States in the months of July, August and September of the current year. The Bureau of Statistics only began the maintenance of a separate record of this comparatively new article of commerce with the opening of the current fiscal year. In the month of July, the first month of the new fiscal year, the official records show that two aeroplanes were exported from the United States to Canada at a total valuation of $6,950. In the month of August, 1911, two machines were exported to Canada, their total value being $8,000.

Value of Aeroplanes.

In the month of September, 1911, one aeroplane was exported to Canada, its stated value being $3,500, making the total value of exports of aeroplanes in the three months for which a record is now available $18,450, or an average valuation of $3,690 each. On the import side no transactions are given for the month of July, but in the month of August two aeroplanes were imported from France, their combined value being stated as $15,091. In September the number imported was five valued at $22,752, one being from England, valued at $4,700, and five from France, valued at $18,052, making the total importations of the three months in question eight aeroplanes, valued at $37,843, or an average valuation of $4,730 each.

Figures of Automobiles.

The same paragraph which records the imports and exports of aeroplanes also deals with automobiles. The number of automobiles imported in the nine months ending with September, 1911, was 670, valued at $1,450,222; against 809 automobiles valued at $1,623,140 in the corresponding months of 1910 and 1,208 valued at $2,218,414 in the corresponding months of 1909. Of the 670 automobiles imported in the nine months of 1911, 227 were from France, 113 from Germany, 105 from the United Kingdom, and 85 from Italy. The number of automobiles exported in the nine months under consideration was, in 1911, 11,244 valued at $11,565,034, against 6,472 valued at $8,874,066 in the like period of 1910, and 3,426 valued at $5,481,707 in the like period of 1909. The largest exportation in the nine months of 1911 was to Canada, 4,107 cars, compared with 2,563 to the United Kingdom, 352 to France, and 884 to other Europe, while shipments were also made to Mexico, the West Indies, and various countries in South America, Asia, Oceania and Africa.

* * *

PERSONAL NOTES.

Mr. H. L. Watt has been elected a director of the National Trust Company, Toronto.

Mr. George S. Cushing of St. John, N.B., has purchased the Miller and Woodman mills.

Messrs. Irish & Maulson, the well-known insurance brokers of Toronto, have opened an office in the Coristine Building Montreal. The management is under the control of Mr. Walter Miller of the Toronto office.

Mr. George Gonthier, consulting accountant, and Mr. H. E. Midgley, chartered accountant, have amalgamated. The firm name is Messrs. Gonthier & Midgley, and their offices are at 103 St. Francois Xavier Street, Montreal.

Mr. Edward Bath, consulting engineer of the British firms of Messrs. Cammel, Laird & Company and Norton Griffiths & Company, recently visited St. John, N.B., regarding the dry dock and shipbuilding project.

THE TORONTO CARPET MANUFACTURING COMPANY, LIMITED.

The annual general meeting of the Toronto Carpet Manufacturing Company, Limited, was held at the head offices of the company in Toronto on Monday, the 6th inst., the chair being occupied by the president and general manager, Mr. F. B. Hayes. The directors' report submitted was highly satisfactory and the prospects for the current year appear excellent.

The following directors were elected for the ensuing year:—F. B. Hayes, president and general manager; Dr. Charles S. Murray, Walter T. Sykes, vice-presidents; and George D. Perry, G. H. Muntz, Louis M. Hayes, and C. V. Harding.—1t. 11/11/11.

MONTREAL STREET RAILWAY.

Utilities Commission Give Decision in its Favor — Quebec Tax on Industrial Corporations—Canadian Northern and Montreal.

Monetary Times Office,

Montreal, November 8th.

Those who followed the reports concerning Montreal Street Railway affairs which have appeared in The Monetary Times during the past few weeks will recall that although the amalgamation proposals were accepted by a majority of votes at a special meeting of the Montreal Street Railway, called to consider the terms under which their shares could be exchanged for shares in the Montreal Tramways Company, the proposals were later opposed not only by a large shareholder but by the city itself. The shareholder referred to opposed the terms of exchange before the courts, making application for an injunction upon the matter. The decision was given against him, the judge taking the act of the legislature whereby the Tramways Company was empowered to put into effect the proposals. The matter then went before the Public Utilities Commission. Here again it encountered opposition from the same source.

The city sought to show reasons why the Public Utilities Commission should not give its permission for the carrying out of the deal. The reasons offered on behalf of the city were that the fixed charges on the Montreal Street Railway now consist only of interest on about $4,000,000 bonds. The stock capital is but $10,000,000. Upon this dividends of 10 per cent. are being paid. Instead of $10,000,000 in stock, the Montreal Tramways Company intends issuing $10,000,000 in 5 per cent. debenture bonds and $16,000,000 in 5 per cent. debenture stock, both of which are fixed charges, so that a fixed charge of $1,300,000 would take the place of a dividend of $1,000,000.

City Would Be at Disadvantage.

The city claimed that this would put it at a disadvantage in its negotiations, as the directors of the railway would insist upon these fixed charges being first earned. The city opposed the capitalization of the Tramways Company on the grounds that the capital was being watered to the extent of the value of the franchise.

The judgment of the Utilities Commission was favorable to the Tramways proposal. The judgment says that, having heard the argument both of the counsel for the city and Senator Beique, who had made application to have the proposed merger prohibited, there is not sufficient danger to the public interest to warrant a refusing to allow the merger to be carried out.

The merger will amalgamate the Montreal Street Railway Company, the Montreal Terminal Railway Company, the Montreal Park and Island Railway Company, and the Public Service Corporation.

Quebec Provincial Tax on Industrial Corporations.

Sir Lomer Gouin did not offer much encouragement to the deputation which waited upon him last week for the purpose of asking him to abolish the special tax on industrial corporations. The delegates were many and influential, representatives being sent from the Canadian Manufacturers' Association, the Montreal Board of Trade, the Chambre de Commerce, the Builders' Exchange, the Quebec Board of Trade and Sorel Board of Trade. Accompanying the delegation were many members of parliament. It was stated that the tax worked much as a discrimination against companies having their headquarters in Montreal and the bulk of their capital invested here. It was more advantageous that the headquarters should be somewhere else—say in Toronto. Ontario did not levy taxes of this character and Quebec is the only province which levies a special tax on industrial corporations.

Lieut.-Col. Smart, who spoke for the deputation, concluded with the following statement:—"I would like to submit a few figures as to what this tax means to us in dollars and cents. Take a company with a capital of $5,000,000, which in these days of big enterprises is not reckoned as of extraordinary size. Such a company, supposing the major part of its investment and its chief officers were in this province, is asked to pay into the provincial treasury $5,250 every year, besides a fixed tax of $50 per annum for each place of business in the cities of Montreal and Quebec and $20 for each office or warehouse in other places. This would be the tax even if only 60 per cent. of that capital were employed in this province, but it would be only $2,250 if only 40 per cent. of that capital were employed here. Should 60 per cent. of the capital be invested in this province and the head offices of the company be in Ontario the annual levy would be only $3,250 as compared with $5,250."

Sir Lomer Gouin said that he would be pleased to grant the petition were it not that it was necessary to raise money. Everyone wanted his taxes lowered and if taxes were lowered it would not be possible to make the increased grants to education and other worthy objects.

Canadian Northern and Montreal.

Montreal is interested over its Canadian Northern depot. Nearly every week a new site is selected. Lagauchetiere street happens to be close to the Windsor station and only a short distance from the Grand Trunk Railway station. It is convenient also to St. Catherine street. The hill is precipitous, thus affording a good opportunity for the tunnel, which the company intends to build under the mountain. The city attorney is corresponding with Ottawa on the subject, it being no doubt his object to watch the progress of the deal and protest against the granting of any rights which would interfere with the welfare of the city. It was ascertained that no charter had been issued and that the matter had only progressed as far as the notice of application.

It is doubtful if half the people in Montreal know that there is a Canadian Northern station in the city. The station is situated in the east end, some miles from the hub. It is an unobtrusive structure and by no means a centre of activity. A line running to the east end of the island and crossing over the river makes connection with the Canadian Northern Quebec through line. One may go to the city of Quebec by this route; and he may also go to Ottawa in the other direction.

No doubt the problem has occasioned Messrs. Mackenzie and Mann as much trouble as the construction of many hundreds of miles of railway.

◆

GRAND TRUNK ISSUE IN LONDON.

Issuing houses in London are taking advantage of the somewhat better reception given recent new issues. The new Grand Trunk loan of £1,250,000 fours was issued this week at 92 for general purposes of the company.

Seeing that the stock ranks for dividend after the debenture charges, some objection is raised to the new issue being called "guaranteed," but notwithstanding this the Financial Times says the stock has a free market and may be recommended as a safe lock-up.

The prospectus says the Midland five per cent. bonds are to be paid off out of the proceeds of the new issue, thereby reducing the preference charges of the company by £42,840 per annum.

The following is a list of the Grand Trunk Railway securities:—

Description.	Amount Outstanding.	Date of Redemption.	Rate %
2nd Equip. mortgage bonds.	£ 373,000	July, 1919	6

The result of the underwriting is awaited with interest.

◆

The National Finance Company has moved its branch office from 26 Wellington Street East, to 10 Adelaide Street East. A suite of rooms is being occupied conjointly by the company's bond department, in charge of Mr. F. W. Moore, and by the Prudential Investment Company, of which Mr. Stuart is manager for Ontario.

A reward of $200 has been offered by the Oxford Farmers' and South Easthope Fire Insurance Companies for the apprehension and conviction of the party or parties responsible for the burning of the barns on lot 29, con. 30, of the 10th line, East Zorra, belonging to Messrs. George Patterson and Dan Gingerich, on October 19. These two barns were totally destroyed with the season's crop, the fires starting within half an hour of each other.

"Ralph Connor" is interesting himself in a petition to the Governor-General, which it is expected will be signed by many influential Winnipeg people, asking for the release of two bank clerks condemned to prison for thefts from the Union Bank. The petition urges that considering their age and responsible position the two bank clerks did not have sufficient supervision and points out that contact with habitual criminals will start them on a life of crime.

BANKING IN GREAT BRITAIN.

Deposits of Forty-five English Banks Last Month Totalled Seven Hundred and Ninety-six Millions Sterling.

Some big figures are cited in the accounts of 45 English joint stock banks. Twenty years ago there were 114 banks, but amalgamations have reduced the number rapidly. Three banks have disappeared since this time last year, the London Trading Bank, the Carlisle and Cumberland Banking Company, and the Halifax and Huddersfield Union Banking Company. The first has gone into liquidation as the result of its inability to meet a run induced by the uncertainty caused by the Birkbeck suspension, and the second has been absorbed by the Bank of Liverpool, while the third has amalgamated with the Halifax Joint Stock Bank, and the name of the combination has been changed to the West Yorkshire Bank. A small concern, the Halifax Equitable, founded in 1900, has been included in the table, and Lloyds Bank has taken over a Smithfield private firm. The Scotch and Irish banks remain unchanged in numbers, no amalgamation having taken place in either of these groups since the absorption of the Town and County with the North of Scotland Bank. The alterations in the paid-up capital of the banks between June 30, 1910, and June 30, 1911, are mostly the result of these changes by amalgamation or liquidation. When an amalgamation occurs nowadays the opportunity is often taken of reducing the capital to a considerable extent, the shareholders of the absorbed bank receiving either shares paying a higher rate of dividend, or a portion of the purchase money is paid in cash. The result of these changes on balance is a reduction of £116,650 in the paid-up capital of the English banks. The paid-up capital of the English banks is now £62,167,353, and the uncalled liability on this sum is £172,069,429, so that shareholders are still liable for more than two-thirds of the nominal amount of capital held by them. The following and other tables are taken from the London Economist.

Capital.

	Subscribed	Paid up	Uncalled balance.
England (including Isle of Man and Channel Islands)	£ 234,236,782	£ 62,167,353	£ 172,069,429
Scotland	28,525,140	9,241,070	19,284,070
Ireland	26,349,231	7,309,231	19,040,000
	289,111,153	78,717,654	210,393,499

The reserve funds of the English banks fell by about £800,000 in the year to June 30th last on account of the large sums required to meet investments depreciation, and there is no doubt that in the current half-year further sums will be required unless a great change in the gilt-edged market takes place. The reserves of the Scottish banks have declined by about £250,000, but the Irish have risen slightly; the Scotch reserves, however, are very much higher in proportion to the paid-up capital than either the English or Irish.

A short time ago we commented on the increasing number of colonial banks which are opening offices in London, and our table now contains 38 balance-sheets of colonial banks. To increase the usefulness of the table, we have now grouped them geographically, according to the four great British colonial possessions, namely, Africa, Australasia, Canada, and India.

The following are our usual tables of English, Scotch and Irish aggregate figures:—

Deposits of Joint Stock Banks in England and Wales included in the following statement.

In Statement.	Total in England and Wales. £	Including Bank of England. £	Deposits held by the other banks. £
Deposits, 78 b'ks Oct. 19, 1901	634,346,000	52,745,000	581,601,000
'' 75 '' May 17, 1902	633,183,000	48,341,000	584,842,000

◆

The Richelieu & Ontario Navigation Company may build new boats.

The Dominion financial statement for October shows a revenue during the month of $12,221,653.27, as against $9,666,192.95 in October last year. The ordinary expenditure for the month was $4,364,903.11, as compared with $6,099,436.69 in the same month of 1910. The revenue for the seven months is $76,291,178.04, as compared with $65,814,386.28 in the same period of last year, while the expenditure for the seven months has been $40,298,359.13, against $41,208,109.65. The capital expenditure for the month was $2,561,812.30, against $3,548,278.93, and it is worthy of note that there were no payments on account of bounties. For the seven months the capital expenditure has been $14,889,839.43, as against $15,978,415.24.

WORLD'S CONSUMPTION OF BEER,

Wine and Spirits—United States Takes the Lead—Canada's Figures.

More beer is consumed in the United States than in any other country of the world, and more distilled spirits than in any other country except Russia. The quantity per capita consumed in the United States is not, however, in the case of beer, as great as in Belgium, United Kingdom, Germany, or Denmark, while our per capita consumption of distilled spirits is less than that of Denmark, Hungary, Austria, France, Netherlands, or Sweden. Of wines the quantity consumed in the United States is below that of Portugal, Spain, Germany, Italy, or France, and the per capita consumption is less than that of France, Italy, Portugal, Spain, Switzerland, Austria or Hungary.

Malt Liquors Consumed.

The quantity of malt liquors consumed in the United States in 1910 was 1,851 million gallons, against 1,704 million in Germany and 1,397 million in the United Kingdom, that of Austria being 493 million, Belgium 412 million, France 376 million, and Russia 231 million gallons. Of spirits the quantity consumed in the United States was 133½ million proof gallons, against 232⅔ million in Russia, the per capita being in each case 1.45 gallons, against a little less than 1 gallon in the United Kingdom. The quantity of beer per capita consumed in the United States was, in 1910, 20.09 gallons, against 31.44 gallons in the United Kingdom and 26.47 gallons in Germany. In the consumption of wines France leads the world, 1,541 million gallons, or 39.36 gallons per capita in 1909. Italy in that year consumed 31.17 gallons per capita, Portugal 27.39 gallons, Switzerland 14.55 gallons, and the United States, in 1910, only 0.66 gallons per capita. Comparatively little beer is consumed in Italy, Roumania, Servia and Russia; less than 2 gallons per capita annually, as against 20 gallons in the United States, 26½ gallons in Germany, and 31½ gallons in the United Kingdom. The principal countries in which wine consumption averaged less than one gallon per capita in the latest available year include Netherlands, the United Kingdom, Canada, Newfoundland, New Zealand, and the United States.

Per Capita Figures.

The following table, compiled from official sources by the United States Bureau of Statistics, Department of Commerce and Labor, shows in millions of gallons the consumption of malt liquors, wines, and distilled spirits, respectively, in the principal countries of the world for which statistics of this character are published and the per capita consumption in each instance, the figures being for the latest year for which statistics are available.

CONSUMPTION OF

Countries.	Malt Liquors. Million gallons.	Malt Liquors. Gallons per capita.	Wines. Million gallons.	Wines. Gallons per capita.	Distilled Spirits. Million gallons.	Distilled Spirits. Gallons per capita.
United States, 1910	1,851.3	20.09	60.5	0.66	133.5	1.45

1911	.859	5.434	.104	3.011	....

COBALT MINES AND WATER POWERS.

The mines at Cobalt are now enjoying the advantages of water-power developed on the Montreal and Metabitchewan Rivers, and transmitted both as compressed air and electricity. The power plants are situated at Ragged Chute and Hound Chute on the Montreal River, and at the foot of Bass Lake, near the mouth of the Metabitchewan. At the first named place the Cobalt Hydraulic Power Company has installed an air-compressing plant on a large scale, and pipes the compressed air to Cobalt. The development here is 4,000 or 5,000 horse power. At Hound Chute the Cobalt Power Company has an electrical equipment capable of delivering about 3,000 horse power. The British Canadian Power Company, formerly Mines Power, Limited, has the plant at Bass Lake, its capacity being about 8,000 horse power. This is transmitted to Cobalt in the form of electricity, part of it being then utilized in the compression of air for the operation of drills, etc., in the mines.

The advent of hydraulic power has been a decided advantage to the camp, reports the Ontario Bureau of Mines, inasmuch as the power is delivered at a cost of little more than one-third of that produced by the consumption of coal, but it has not been without its drawbacks. Interruptions were not unknown at first, but these were quickly eliminated by greater attention to the equipment. There was also some objection to the use of the compressed air from Ragged Chute by reason of its deficiency in oxygen and consequent inability to support the burning of candles, thus alarming the miners, who suspected bad air. Acetylene lights, however, got rid of this difficulty, and no ill effects were produced upon the workmen by the smaller percentage of oxygen. The chief trouble is more fundamental. The cold northern winters, with their infrequent thaws, have the effect of rendering the general drainage system very torpid, and the run-off of water is reduced to a minimum in the months of January, February and March. If the proverbial "January thaw" comes to the relief, the situation is mitigated, but if this fails to arrive or is inadequate to replenish the reservoirs, the water runs through the turbines much faster than it is replaced, and a scarcity of water and reduction in power necessarily follow. The winter of 1910-11 was unusually steady, and in February it began to be apparent that the water-powers on the Montreal and Metabitchewan were likely to be seriously affected. March saw no improvement, and as the return of spring, which the previous year was unusually early, was in 1911 unusually late, the shortage of water and power continued well into April. Such of the mines as had retained their steam plants were obliged to put them again into commission, but in a number of cases steam power was unavailable, and the general effect upon the camp was to cause a decided drop in production. It is possible that the output of silver for 1911 will reflect this partial stoppage of the mines. The remedy is to more nearly equalize the flow of these rivers, which can only be done by a system of dams at the outlets of the lakes and river expansions, thus permitting storage of the freshet waters for use in the low-water periods of summer and winter.

◆

The Hupp Motor Car Company and the White Machine Works of Eauclair, Wis., manufacturing sawmill machinery, will establish plants at Windsor, Ont.

Owing to increased business, the Dominion Life Assurance Company have found it necessary to move their branch office to larger and more commodious offices in the Kent Building, Toronto.

CANADIAN NORTHERN RAILWAY.

Excellent Position of the Coming Transcontinental is Reflected in Latest Annual Report.

The Canadian Northern Railway has experienced another good year. The ninth annual report for the year ended June 30, 1911, showed gross earnings of $16,360,712, net earnings $4,990,346, working expenses $11,370,365, and a net surplus for the year of $694,823. The traffic in Saskatchewan justified the policy of acquiring the advantage of first construction in good districts. New steamers will be placed in commission on the Royal Line. The land sales totalled 279,151 acres, which realized $3,345,498, an average of $12 per acre. The company owns 871,866 acres in Manitoba and Saskatchewan.

Percentage Increases.

The gross earnings show an increase of $2,527,650, or 18.27 per cent., and in net earnings of $645,956, or 14.87 per cent., over the preceding year. The working expenses, including all taxes, were 74.81 per cent. of the gross earnings of the railway proper and 69.50 per cent. of the gross earnings from all sources, compared with 74.01 per cent. and 68.59 per cent. respectively last year. During the year over 400 miles of newly constructed tracks were added to the system, the average mileage operated being 3,383 miles.

The company's acquired securities total $16,328,393 and are as follows:

Minnesota & Ontario Bridge Company 4½ per cent. first mortgage debenture bonds, $180,000; capital stock, $100,000. Minnesota & Manitoba Railroad 5 per cent. general mortgage bonds, $250,000; capital stock, $400,000. Lake Superior Terminals Company, Limited, 5 per cent. mortgage gold bonds, $2,000,000; capital stock, $500,000. Canadian Northern Telegraph Company, 5 per cent. general mortgage bonds, $800,000; capital stock, $500,000. Winnipeg Land Company, Limited, 5 per cent. first mortgage gold bonds, $300,000; capital stock, $100,000. Canadian Northern Coal & Ore Dock Company 5 per cent, first mortgage bonds, $375,000. St. Boniface and Western Land Company 5 per cent. first mortgage bonds, $750,000; capital stock, $250,000. Edmonton & Slave Lake Railway Company 5 per cent. first mortgage bonds, $420,000. Canadian Northern Prairie Lands Company capital stock, $483,393. Canadian Northern Railway Express Company, Limited, 4 per cent. first mortgage gold bonds, £616,438, $3,000,000; capital stock, $1,000,000. Canadian Northern Steamships, Limited, 5 per cent. first mortgage debenture stock, £600,000, $2,920,000; capital stock, $2,000,000. Total, $16,328,393.

The total fixed charges were $3,982,651.

Carriage of Freight.

The following table shows what freight was carried during the past three years:

	For Year Ended June 30		
	1911	1910	1909
Flour, sacks, 100 lbs. each.	2,215,094	1,789,768	1,380,207
Grain, bushels	40,249,939	37,355,010	27,113,077
Live Stock (all kinds), head	137,295	123,635	91,546
Logs and Lumber, feet....	324,221,000	294,647,000	247,452,000
Firewood, cords	210,625	189,535	177,231
Coal, tons	370,161	282,718	326,591

Expenses and Earnings Per Mile.

This table shows the earnings and expenses per mile operated:

Year	Average Miles Operated	Earnings	Expenses	Net Earnings
1902-03..........	1,276	$1,918.23	$1,244.55	$ 673.68
1903-04..........	1,349	2,402.71	1,571.40	831.31
1904-05..........	1,586	2,641.37	1,667.55	973.82
1905-06..........	2,064	2,860.34	1,780.39	1,079.95
1906-07..........	2,509	3,328.09	2,161.88	1,166.21
1907-08..........	2,866	3,387.81	2,329.65	1,058.16
1908-09..........	3,013	3,512.04	2,328.38	1,183.66
1909-10..........	3,179	4,351.39	2,984.80	1,366.59
1910-11..........	3,383	4,386.15	3,361.03	1,475.12

Outstanding Debenture Stock.

Car trust obligations were created to the extent of $3,294,000 in connection with the purchase of locomotives, passenger cars and freight cars. During the year $1,943,669 was repaid in respect to previous obligations, thus making a net increase on this account for the year of $1,350,330.

A further issue of five per cent. income charge convertible debenture stock was made during the year. The total amount issued and now outstanding is $15,000,000. As the surplus net earnings of the company permitted the payment of the interest, there was paid out $312,872 for interest upon the amount of principal outstanding from time to time during the fiscal year.

FROM COAST TO COAST.

The Grand Trunk Railway has placed an order for fifty first-class coaches and twenty-five standard baggage cars.

Mr. F. Shannon, of the staff of the Vancouver branch of the Bank of Montreal, has been injured in a shooting accident.

The name of the firm of Brunett, Ormsby and Clapp, Limited, has been changed to Ormsby, Clapp and Anderson, Limited.

Mr. A. Homer Vipond, president Dominion Life Underwriters' Association, was recently the guest of the Ottawa Life Underwriters.

The Smart Bag Company, Limited, have listed this week in the Montreal Exchange, 4,500 shares of common and 6,000 shares of preferred stock.

Mr. W. P. Kearney, president of the Rubber Tire Equipment Company and of the Rubber Tire Wheel Company, was in Vancouver on business last week.

The British Columbia Express Company will construct a steamer to cost $100,000, for the Upper Fraser route between Fort George and Tete Jaune Cache.

The following companies operating under Ontario charters, have increased their capital stock:—Canadian Talc and Silica Company, from $100,000 to $150,000; Cosgrave Brewery Company of Toronto, from $200,000 to $300,000.

With the cessation of the coal miners' strike in the Crow's Nest, the Granby smelter will be reopened. Resumption of operation at the coal mines will mean much for business throughout the southeastern portion of British Columbia.

Mr. Edward Crutwell, bridge engineer of London, England, is in Vancouver. He will plan the Second Narrows bridge for his firm, the head of which is Sir John Wolfe Barry, who has been commissioned to supervise the construction.

Charged with conspiring to defraud Messrs. Phippen Brothers, of Toronto, out of $500 received as premiums for fire insurance companies not licensed in Ontario, Messrs. Edward M. Carroll, general manager, and Victor Miller, a clerk, were arrested last Tuesday at the office of the Insurance Brokerage and Contractor's Company, Bay Street, Toronto.

A large quantity of inferior canned Japanese salmon has been coming on the London market recently labelled "Fraser River Salmon." The High Commissioner took action, which caused the labels of one consignment of a thousand cases to be removed, and he received an undertaking that the salmon would not be sold so labelled.

Fire Chief Thompson, Toronto, has been appointed chairman of the special committee, which is to take up with the Ontario Government the matter of appointing Provincial fire marshals. The new marshals are to examine premises to reduce the likelihood of fires and also investigate the cause of fires. The Ontario chiefs of the fire departments decided to ask for legislation for this at their last meeting.

A new corporation is about to be formed under the name of Messrs. F. W. Woolworth Company, to take over the business of Messrs. F. W. Woolworth & Company, New York; S. H. Knox & Company, Buffalo; F. M. Kirby & Company, Wilkesbarre, Pa.; The E. P. Charlton & Company, Fall River, Mass.; C. S. Woolworth, Scranton, Pa.; W. H. Moore, Watertown, N.Y.; and W. H. Moore & Son. Schenectady, N.Y.; also a controlling interest in the English business of F. W. Woolworth & Company, Limited. This new company will own and control over 600 five and ten cent stores doing business in all parts of the United States and in Canada and England. The capitalization of the new company is to be $15,000,000 seven per cent. preferred stock and $50,000,000 common stock.

Of the dividend cheques sent out by the York County Loan and Savings Company on November 1st, 1909, cheques totalling $28,000 have never been cashed. They are still being returned to the National Trust Company at the rate of about twenty-five or thirty dollars a month, totalling about $200; but it is regarded as likely that $25,000 worth of the first dividend cheques will never be cashed. The first dividend was paid on November 1st, 1909. The second dividend will, according to present calculations, be dated 1st January, 1912. There is at present $700,000 in the bank for the purpose of a dividend and the liquidators count on getting the additional amount required for a 25 per cent. dividend by the end of the year. That will make a total payment since liquidation of 50 cents on the dollar.

BRITISH COLUMBIA.

Vancouver's Borrowing Power—Loan Companies Cautious in Advancing Loans on Workingmen's Houses.

(Staff Correspondence.)

Vancouver, November 4, 1911.

Loan companies are cautious in considering loans on houses erected for workingmen in the districts outside the boundaries of the city proper. Building is proceeding at a great pace, the record for the nine months ending September 30th being greater than that of Montreal, and nearly as much as Toronto, the population of which is much larger. The local figures do not include those of South Vancouver and Point Grey, into both of which municipalities the overflow population is steadily going. In South Vancouver homes for workingmen are erected with amazing rapidity, but the building laws are being improved so that a better class of structure is now demanded.

When a poor man buys a house, and he does it here to avoid the high rents, he thinks that since it passed the regulations it should be well built and built to last. Never were more houses built on the speculative plan. A man with a little money will buy several lots, and rush as many houses on to them as possible, in many instances giving no leeway whatever. The outside boarding is not put on diagonal, the door casing it not mitred, the wood not selected, cement posts only for foundation instead of an all-round wall, woodwork is not smoothly finished, in fact no point is overlooked in material or finishing to make a cheap house.

The portion of the lot is worth, say $800, the contract price of the cottage being $1,300. This sells for $3,000 or $3,200, the loan being enough to cover all the building expenses, this being assumed by the purchaser. The initial payment covers nearly all the layout on the lot, so that the operator, when he sells, and he generally does as soon as the house is ready, practically clears himself.

Houses Not Worth Sandpapering.

If workingmen had the time or the power to think, and a little money, they could save $1,000 on their purchase. It would not require much more money than what they put up for first payment. Recently it was rumored that money was not forthcoming for these kind of houses in South Vancouver. The amounts have been reduced and $1,000 is now about the limit of the loan. A builder informed The Monetary Times that with the rush mill work was nothing to what it used to be. Doors and sashes are manufactured now with a speed that precludes good finishing, and the houses are not worth the expense of the sandpapering.

The fall weather has been particularly favorable for building and October's figures were $1,558,565. The local trade has been a great help to the lumber mills, and some of the building supply companies have become so that they demand cash with order, having all they can attend to.

Activity in New Westminster was shown by the large increases in the records of the land registry office and the customs. The land registry receipts in October were $11,784.18, while for the same month last year they were $4,694.95. Customs figures were $47,951, and in October last year they were $25,761.83.

Vancouver's Borrowing Power.

Vancouver's borrowing power next year will be $24,200,000, an increase of $7,200,000 over the present figure, but if all the proposed by-laws are submitted there will be nothing left even of this large amount. Money is wanted for various things, and besides out of this amount comes the share of the city for local improvements. The comptroller advises eliminating several of the less important by-laws so that the city will have a margin for any emergent expense. Such by-laws as $1,000,000 for schools and school sites; improvements in Hastings under annexation agreement, $75,000; D. L. 301, $50,000; waterworks necessities, $2,000,000; exhibition, $100,000; sewers, $750,000, and a few others are necessities. The aldermen should consider the many by-laws instead of leaving the matter entirely to the people.

The South Vancouver Board of Trade on Wednesday night endorsed the project of the Vancouver Dock & Harbor Extension Company, Limited, which provides for the establishment of a harbor and docks on Lulu Island. The company's financial agent appeared before the board and stated that neither the Dominion or the Province was being depended on for aid, though such co-operation would be of great benefit.

Some months ago it was announced that the Taylor Milling and Elevator Company would build an elevator and mill in Nelson, but would await the result of the elections before making a definite statement. The building will be commenced next spring.

The E. C. Atkins & Company, saw manufacturers, of Indianapolis, will have a branch business in this city. Mr. W. C. Birdsall will be manager and Mr. A. F. Arnett, assistant.

PRESSED BRICK FARCE.

The plant at the Pacific Pressed Brick Company, Limited, Vancouver, is in the hands of the sheriff, it is learned, and the Royal Bank of Canada holds a chattel mortgage against the property. The shareholders have suffered heavy losses and are now issuing a writ against the directors for misappropriation of funds. Messrs. L. N. Willan and J. J. Munsey were the principal promoters and fiscal agents. Mr. Willan is also fiscal agent for the Manitoba White Granite Pressed Brick Company, Limited, of Winnipeg, whose advertising The Monetary Times has refused to accept.

A statement of the receipts and expenditure of the Pacific Pressed Brick Company, Limited, as at March 18th, 1911, shows that the total receipts from sales of shares was $64,246. Among the expenses are the following items:—

Incorporation expense	$ 280.50
Legal expense	164.30
General expense	590.81
Preliminary and formation expenses	12,000.00

Twelve thousand dollars as preliminary and formation expenses is an extraordinary amount and details should be demanded. Perhaps Mr. L. F. Willan can throw some light on this matter. In the meantime, The Monetary Times has no hesitation in advising investors to give the Winnipeg company a wide berth, and to bestow the strictest scrutiny on schemes in which Mr. L. F. Willan or his colleagues are fiscal agents or otherwise connected.

* * *

RAILROAD AND COMPANY EARNINGS.

The following are the railroad earnings for week ended October 31st:—

	1910.	1911.	Increase or decrease.
C. P. R.	$3,271,000	$3,675,000	+ $404,000
G. T. R.	1,392,943	1,463,496	+ 70,553
C. N. R.	556,200	628,500	+ 72,300
T. & N. O.	34,887	62,763	+ 27,876
Halifax Electric	5,403	5,789	+ 385

The following are the railroad earnings for October:—

	1910.	1911.	Increase or decrease.
C. P. R.	$10,150,000	$11,113,000	+ $963,000
G. T. R.	4,200,039	4,468,768	+ 268,729
C. N. R.	1,627,800	2,028,900	+ 401,100
T. & N. O.	108,656	202,954	+ 94,298

The following are the earnings of the Toronto Railway Company for September:—

	1911	1910	Inc.
Gross	$ 467,814	$ 427,580	$ 39,324
Operating	214,898	200,379	13,519
Net	$ 252,916	$ 227,201	$ 25,715

And for the year to September 31:—

Gross	$3,520,782	$3,195,938	$324,844
Operating	1,766,276	1,634,760	131,516
Net	$1,754,506	$1,561,178	$193,328

* * *

The Michigan Millers Mutual Fire Insurance Company of Lansing, Mich., has ceased doing business in Manitoba province and has reinsured all outstanding policies in the Liverpool-Victoria Insurance Corporation, Limited, of London, England.

The manager of the Canadian Casualty & Boiler Insurance Company, Mr. C. Norie-Miller, also manager of the General Accident Assurance Company of Canada, has been promoted to the joint management for United States of the parent company, i.e., the General Accident, Fire & Life Assurance Corporation, Limited, of Perth, Scotland, at Philadelphia, in conjunction with Mr. John A. Kelly, of New York. Mr. John J. Durance succeeds Mr. C. Norie-Miller at Toronto as manager of this company and the General Accident Assurance Company of Canada. Following these changes comes the readjustment of the staff in the promotion of Mr. J. O. B. Latour as chief engineer, succeeding Mr. A. M. Wickens who has been appointed executive special, a new department which has been created for the furtherance of the company's business in the field. All the stock of the Canadian Casualty and Boiler Insurance Company is owned by the General Accident Fire and Life Assurance Corporation, Limited, of Perth, Scotland.

CANADA IS POTENTIAL MARKET

For Machinery—United States Manufacturers Have Big Share of Business—Imports from Great Britain.

Figures respecting British machinery exports, compiled by a writer in the London Times, show that in 1909, the value sent to Canada was £339,593 or 11d. (about 22c.) per head. Commenting upon these and other statistics it is contended that they are suggestive alike to the economist and to the British manufacturing engineer, for they indicate immense potential markets for machinery in many portions of the Empire. "Undoubtedly the most remarkable of them are those which relate to Canada. That country, the oldest of the great dominions, has an enormous extent of territory, 3,730,000 square miles, and her numerous and growing industries, and the development of her varied and immense natural resources, call for nearly every variety of machinery. She is, moreover, the most populous of the British-peopled dominions (nearly 7,500,000 of inhabitants) and her people are at once energetic and enterprising, and sincerely and loyally attached to the Mother Country. Nevertheless, her purchases of British machinery in 1909 amounted to the relatively paltry sum of £340,000, or less than 1s. per head of her population.

Worth Less Than Burma.

"As a market for British machinery, she is worth less than Burma, the Cape, the Transvaal, or Natal, and just about one-third as much as New South Wales. There are, at least, a dozen foreign countries each of which is worth more than she is as a buyer of British machinery. It is not, of course, that she does not want machinery. Although she is now an important manufacturer, and even exporter, of machinery—sending in fact to this country nearly one-third as much as it sends to her—it is probable that she absorbs per capita more machinery of home and outside production than any other British country oversea, apart from small and accidental cases, such as that of the Falkland Islands, and she imported machinery, in the year in question, to the value of £2,661,731, or rather more than 7s. per head. Of that total, the United Kingdom supplied a trifle over 12 per cent.

"The average British manufacturer when faced with a lost or declining market suspects Germany. The suspicion would be quite unjustifiable in the present instance. Germany's exports of machinery to Canada amount to a few thousand pounds only; and the offender is the United States, which supplied over 85 per cent. of all the machinery Canada imported—more than seven times as much as the United Kingdom supplied, and practically all that the latter did not send.

Supplies All This Machinery.

"From the reports it appears that the United States supplies all the machinery of the following classes which Canada obtains from outside: fire engines, steam shovels, railway and tractor motors, typewriting machines and cash registers; among agricultural machinery, all the threshing machines and parts, weeders, seed drills, harrows, self-binding harvesters, horse rakes, manure spreaders, and mowing machines; and also practically all the railway locomotives, gasoline engines, beet-sugar machinery, combined portable and traction engines and boilers, printing presses and bookbinders' machinery, and electric motors and generators. Even of steam engines and boilers, coal mining and some other mining and smelting plant, sewing machines and parts, and windmills, where the record of the United Kingdom is a little better, the United States supplied over 80 per cent.

"No consolation for British machinery makers is to be found in an examination of the proportions which the United Kingdom supplies of other Canadian imports—rather the contrary. Of the import trade of Canada as a whole, the United Kingdom provides nearly 24 per cent., against 61 per cent. by the United States; and if the large amount of crude or raw materials which Canada naturally obtains from her next-door neighbor—materials which the United Kingdom could not expect to supply—is excluded from consideration, and the examination is confined to manufactured goods only, the proportion which the United Kingdom supplies is very much larger than 24 per cent. Even in iron and steel, and manufactures of iron and steel generally, apart from machinery, the United Kingdom supplies over 20 per cent. of the whole, against 76 per cent. supplied by the United States.

Preference and Future Prospects.

"There is no doubt that Canada would prefer to trade with the Mother Country before all others. Her tariff arrangements give a real preference to the machinery of the United Kingdom in most classes. The amount varies, but it is never less than 5 per cent., and ranges up to 12½ per cent. It is true that certain machinery is admitted free of duty into Canada—and in regard to such machinery the United Kingdom has no preference—but its total does not reach 10 per cent. of the whole. On the great bulk of the machinery obtained by Canada from outside sources, the United Kingdom has a preference so far as the duties imposed by Canada are concerned. The explanation of the fact that the United Kingdom gets so little of the machinery trade of Canada would therefore seem to be either that the preference is not sufficient to counterbalance the advantages which the United States has in propinquity to Canada; or that British machinery makers do not care for Canadian trade, and neglect it; or that they are hopelessly beaten in a British dominion and in a branch of trade in which they claim to be experts, and in regard to which no other country has superior, if equal, advantages.

Was a Relapse Last Year.

"The classification adopted in the reports on trade and commerce issued by the Canadian government omits, under the influence of the tariff arrangements, from the normal 'Machines and Machinery' a number of items which are certainly machinery; and hence it is not always easy to arrive at the totals desired. This circumstance, however, will hardly affect, to any material extent, the ratios between the proportions of the machinery imports into Canada supplied by the two chief purveyors. From the Canadian figures it appears that while in 1906 and 1907, of the total 'machines and machinery' supplied by the United Kingdom and the United States, this country provided a little over 5 per cent. only, in 1908 the proportion rose to 9.5 per cent., and in 1909 to 12 per cent. But after so great an improvement, there was a relapse last year, and the proportion fell to only 7.6 per cent. Still it seems that things are really getting better, and that the preference has had an appreciable effect; and while this country cannot now hope to displace the United States as the principal purveyor of machinery to Canada, only a sustained and systematic effort on the part of British machinery makers is required in order to make up a good deal more of the leeway."

◆

LATHS IN CANADA LAST YEAR.

Despite the use of metal lath and patent methods of interior finish, wooden lath production amounted to eight hundred and fifty-two million pieces, worth one million, nine hundred and forty-three thousand dollars, in Canada during 1910. This information has been obtained from statistics compiled by the Dominion Forestry Branch which show that nearly thirty million more lath were produced in 1910 than in the year before, but that owing to a decrease in the price per thousand, the total value of the industry was thirty-five thousand dollars less. Two-fifths of the total was cut in Ontario, which province increased its 1909 production by fifty-seven million or nearly twenty per cent. New Brunswick, the second province in importance, increased its proportion of the total from one-fifth to one-quarter, by cutting sixty-two million more than last year. The production of laths in Quebec and British Columbia during 1910 was considerably more than in 1909, amounting with Ontario and New Brunswick to ninety-four per cent. of the total. The remaining five provinces cut smaller amounts, and with the exception of Alberta, each showed a decrease from the amount produced in 1909. The average price of laths in 1910 was $2.28 per thousand, or 16 cents less than in 1909. The price varied considerably between the different provinces, British Columbia laths being $1.66 per thousand, while in Prince Edward Island the price was $2.67.

◆

MEXICAN COMPANIES WITH CANADIAN CHARTERS.

An increasing number of companies are operating in Mexico with Canadian charters, we are reminded by "Canada," the London illustrated weekly. This practice on the part of British capitalists to incorporate with a Dominion charter companies destined to operate elsewhere is due in large measure to the economies thus effected by avoiding income tax charges, which would necessarily be payable to the British Government, were these companies incorporated in Great Britain.

The article mentions the Mexican-Midland Light & Power Company, which has just secured a Canadian charter. It has a capitalization of $15,000,000 common stock and $30,000,000 five per cent., fifty-year redeemable bonds. None of the stock will be offered to the public yet.

In this connection, we notice that the Barcelona Company, a Pearson flotation, has been organized under the laws of Canada with a capital of $25,000,000, and with the head office at Toronto. The company purposes developing waterpower aggregating over 250,000 horsepower, and it will also construct hydro-electric power plants to supply light and power to the city of Barcelona and the entire north-eastern section of Spain. The company has also acquired one of the tramways in Barcelona and concessions for suburban railways, which will be built at once.

◆

Survey work on the proposed Saskatchewan river waterway between Edmonton and Winnipeg has been completed.

INLAND REVENUE REPORT.

Foreign Demand for Canadian Distillery Products—Illicit Manufactures.

The report of Inland Revenue gives the following summary comparison of the accrued revenue for the fiscal years ended March 31, 1909, 1910 and 1911:—

	1909	1910	1911
Excise	$15,084,589	$15,283,665	$16,919,553
Public works	4,436	*553	*174
Weights and measures, gas and law stamps	136,128	156,460	151,229
Electric light	43,846	46,316	59,583
Other revenues	4,552	4,571	20,837
Methylated spirits	49,960	71,464	90,999
Totals	$15,323,511	$15,563,029	$17,242,675

*Ferry Licenses.

The following are the details of excise revenue accrued during the undermentioned fiscal years:—

	1909	1910	1911
Spirits	$6,950,589	$7,169,760	$7,913,376
Malt liquor	17,628	27,314	52,893
Malt	1,396,007	1,434,004	1,529,472
Tobacco	5,964,005	6,067,599	6,784,140
Cigars	626,059	432,539	470,197
Acetic acid	3,841	6,037	10,242
Manufactures in bond	71,669	77,811	77,840
Seizures	3,948	3,051	5,605
Other receipts	50,843	65,549	75,789
Methylated spirits	49,960	71,464	90,999
Totals	$15,134,549	$15,355,128	$15,010,551

Spirits Produced Show Decrease.

The quantity of spirits produced during the year was 5,255,133 proof gallons, as compared with 5,721,424, proof gallons produced in the previous year. The raw material taken for use, in the production of spirits, during the year was as follows: Malt, 5,766,504 lbs.; Indian corn, 52,080,594 lbs.; rye, 11,320,088 lbs.; wheat, 961,071 lbs.; oats, 484,208 lbs.; barley, 3,600 lbs.; rice, 3,600 lbs.; molasses, 18,531,379 lbs.

There was on April 1, 1910, in process of manufacture 360,912 proof gallons, while the quantity manufactured was 5,255,133 gallons. There was returned to distilleries for re-distillation 782,572 gallons, and the amount received into distilleries from other sources was 14,212 gallons, making a total of 6,412,829 gallons. This was disposed of as follows: Placed in warehouse, 6,015,018 gallons; fusel oil written off, 25,327 gallons; deficiency arising from rectification, 7,041 gallons; remaining in process of manufacture March 31, 1911, by actual stock taking, 365,443 gallons; total, 6,412,829 gallons.

The foreign demand for Canadian distillery products is slightly less than the average of the last four years, the quantities exported being as follows:—

	Proof gallons.
*1906-1907	303,594
1907-1908	412,859
1908-1909	311,314
1909-1910	361,934
1910-1911	273,963

* 9 months.

Transactions in Malt and Tobaccos.

The following statement shows the transactions in malt during the fiscal year ended March 31, 1911, and the four preceding fiscal years:—

Fiscal year	Manufactured during the year. lbs.	Imported lbs.	Taken for consumption. lbs.	Exported lbs.
*1906-1907	79,682,511	1,056,315	69,176,871	303,550
1907-1908	99,577,820	472,433	98,579,733	355,200
1908-1909	95,453,648	1,220,392	92,631,306	378,200
1909-1910	90,559,046	2,237,528	95,166,134	425,600
Totals	365,273,025	4,986,668	355,554,044	1,462,550
Average	97,406,140	1,329,778	94,814,412	390,013
1910-1911	100,086,332	3,073,837	101,525,430	551,500

*9 months.

The transactions during the fiscal year ended March 31, 1911, and the four preceding fiscal years, respectively, in tobacco, snuff and cigarettes were:—

Fiscal year	Manufactured during the year. lbs.	Taken for consumption. lbs.	Exported. lbs.	Total tobacco taken for consumption. lbs.
*1906-1907	12,381,013	12,101,678	114,322	23,504,001
1907-1908	17,238,977	17,112,591	141,465	32,088,445

The quantity of petroleum and naphtha inspected during the fiscal year was: Petroleum, 21,017,628.45 gallons; naphtha, 6,517,655.41; total, 27,535,283.86.

The quantity of methylated spirits manufactured during the fiscal year was 186,559.33 proof gallons, and the sales 187,499.59 proof gallons.

There were seven seizures for illicit manufactures during the year, three of which took place in Montreal, two in Quebec and one each in Ottawa and Peterborough, Ont. Fines to the amount of $1,200 were collected.

◆

COMPENSATION CASE AT MONTREAL.

An interesting judgment in a suit taken under the Workmen's Compensation Act, was rendered by Mr. Justice Fortin, in the Superior Court, Montreal, last week, the case being that of Alfred Laroche vs. The Grand Trunk. Plaintiff was the victim of an accident whilst in the employ of the company at Richmond, Que., and, though the company offered to settle the case by paying the sum of $80, the court ordered that the victim should be paid a lump sum of $267.75, or 50 per cent. of his salary, for fifty-one weeks, and besides this a pension of $27.30, to start at the conclusion of the time covered by the award for half-yearly salary.

The plaintiff was at work on the construction of a building, when in carrying an iron beam, in company with other employees, the beam was allowed to fall, injuring Laroche on the knee. He represented that, as a result of the accident, he would be incapacitated from work for a period of at least a year, and that, furthermore, he would suffer permanent incapacity to the extent of 10 per cent. of his former earning power. As the victim, at the time of the mishap, had been earning $1.75 per day, or $10.50 per week, the court authorized him to reclaim from the company 50 per cent. of his annual wages, said wages to be computed from the eighth day after the accident and to continue till a full year from the time of the accident had elapsed.

Under the head of permanent disability, the court ruled that as the plaintiff had represented and proven that his earning capacity would be decreased by 10 per cent., he had a right under the law to one-half of the percentage of decreased earning power, or 5 per cent. on an annual salary of $546.

SIXTY-THREE NEW COMPANIES.

Were Incorporated During the Week, Many Being of an Industrial Nature.

Sixty-three companies with a total capitalization of $14,663,000 were incorporated during the past week.

Matthews-Laing, with head office in Toronto, and capital of $5,000,000, was the largest company to be granted a charter. The provisional directors are Messrs. W. E. Matthews, A. E. Matthews and R. G. Dobier. Other large companies were Metropolitan Oil Company, Vancouver, $3,000,000; Deer Lodge Security Company, Winnipeg, $1,500,000, and Messrs. J. Hanbury & Co., Vancouver, $1,250,000.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Trail, B.C.—Trail Curling Association, $10,000.

North Battleford, Sask.—Griese & Wood, $30,000.

Melville, Sask.—Melville Lumber Company, $20,000.

Lytton, B.C.—Lytton Water Supply Company, $10,000.

Saskatoon, Sask.—Peace River Realty Company, $50,000.

Prince Albert, Sask.—Sherwood Lumber Company, $10,000.

Victoria, B.C.—Bazan Bay Brick and Tile Company, $100,000.

Veregin, Sask.—Reibin Potapoff & McKosaeff Company, $8,000.

Yorkton, Sask.—Yorkton Auto and Garage Company, $40,000.

Welland, Ont.—Temple Club. B. L. Booth, W. J. Livingston, G. A. Porter.

Walkerville, Ont.—Herald Press, $40,000. E. Dobie, W. Wooliatt, Miss E. Rogers.

Sudbury, Ont.—Commercial Construction, $40,000. E. H. Low, J. F. Black, W. Black.

Bracebridge, Ont.—Ecclestone and Bates, $20,000. A. E. Ecclestone, A. S. Bates, G. J. Fenn.

Transcona, Man.—Phoenix Lumber Company, $20,000. A. E. Smith, J. W. Morrison, L. J. Carey.

Bridgeburg, Ont.—Rose Hill Natural Gas Company, $5,000. E. Hollister, J. L. O'Brian, G. A. Halbin.

Sorel, Que.—La Cie Generale d'Imprimerie de Sorel, $5,000. E. Lizotte, A. Sylvestre, R. Larochelle.

Herbertville Station, Que.—Overall Manufacturing Company, $10,000. C. R. Tremblay, J. E. Paradis.

Hamilton, Ont.—MacKay, Paulin Construction Company, $40,000. J. MacKay, F. W. Paulin, A. B. MacKay.

Port Daniel, Que.—Chaleur Bay Lumber Company, $200,000. P. O. Viall, C. R. Taylor, Port Daniel; L. D. Crear.

Sydney, N.S.—Cross Fertilizer Company, $300,000. A Cross, Sr., W. C. Cross, J. Y. Alexander, Glasgow, Scotland.

Bowmanville, Ont.—Bowmanville Realty Company, $50,000. C. H. Carlisle, Toronto; A. N. McMillan, J. J. Moriarty, Bowmanville.

Windsor, Ont.—Krinkle Company, Windsor, Ont., Canada, $5,000. H. C. Hawk, E. L. Branson, F. C. Grandin, Battle Creek, Mich.

Ste. Cecile du Bic, Que.—La Compagne S. Bilodeau, $20,000. D. S. Bilodeau, J. A. Marier, G. A. Marois, all of St. Romuald d'Etchemin.

Regina, Sask.—Mooney Seed Company, $100,000. P. T. Evans & Co., $50,000. Modern Fish Market, $20,000. Queen City Development Company, $60,000.

Moose Jaw, Sask.—Unique Theatre Company, $50.000. Loyal Orange Building Association, $30,000. Anglo-Canadian Mortgage Investment Corporation, $500.000.

Vancouver, B.C.—J. Hanbury & Co., $1,250,000. Acadia Trust Company, $100,000. Metropolitan Oil Company, $3,000,000. Acme Lumber Company, $10,000. Great West Cartage Company, $10,000.

Montreal.—Montreal Sporting Goods Manufacturing Company, $50,000. W. P. Armstrong, H. U. P. Aylmer, J. Dewitt, E. E. Howard. Investment Realties, $150,000. J. W. Cook, O. B. MacCallum, A. A. Magee. Kearney Brothers, $100,000. P. Kearney, W. Kearney, J. J. Whyte. Samuel Wener & Company, $150,000. M. A. Phelan, W. Bovey, Westmount; J. L. Reay, Montreal.

Toronto.—Port McNicoll Realty Company, $100,000. W. C. MacNeill, J. L. Graham, E. W. Pratt. Elliott Sherring and Company, $40,000. C. W. Thompson, I. S. Fairty, G. Cooper. Mountjoy Lumber Company, $100,000. J. B. Holden, G. A. Grover, D. W. O'Sullivan. Ontario Society of Domestic Sanitary and Heating Engineers. W. Mansell, E. L. LeGrow, F. R. Maxwell. Gibson House, $40,000. Mrs. J. Gibson, B. Heck, M. J. Phelan. Matthews-Laing, $5,000,000. W. E. Matthews, A. E. Matthews, R. G. Dobier. Anglo-Canadian Contractors, $250,000. J. S. Lovell, W. Bain, R. Gowans. New Brunswick Shale Company, $100,000. G. G. Ruel, R. H. M. Temple, S. P. Biggs.

Winnipeg, Man.—Moncreiff and Endress, $50,000. H. G. Moncreiff, G. W. Endress, C. G. Barnardo. Empire Lightning Rod Company, $40,000. E. H. Davis-Derby, G. H. Ross, D. W. Clapperton. Canadian Collectors, $20,000. A. Darrach, F. F. Montague, L. J. Elliott. Reid & Whitman, $50,000. C. H. Newton, J. Leslie, J. B. Mitchell. Transcona Realty and Investment Company, $30,000. R. H. Cottingham, B. C. Parker, J. Heslip. Winnipeg Builders, $100,000. P. Callaghan, M. Gonsalves, W. W. Kennedy. Deer Lodge Security Company, $1,500,000. C. N. Maywood, J. Simpson, D. McLean. W. A. MacKenzie & Co., $50,000. P. C. Locke, F. R. Sproule, C. G. Barnardo. Moose Jaw Land and Development Company, $20,000. W. McCurdy, E. B. Reynolds, E. F. Coke. Reichert Concrete Forms, $50,000. C. S. Tupper, J. Allen, H. W. Hollis. Great West Investments, $25,000. G. S. Francis, F. J. Lindsay, H. H. Mitchell. Winnipeg and Western Land Company, $60,000. A. K. Dysart, C. A. Price, R. E. Hickey. Horn-Baker-Smith Advertising Company, $50,000. J. H. Black, R. C. McPherson, A. H. Andrews. Inland Agencies, $5,000. W. A. Vrooman, H. G. Cohoe, J. B. Hugg. Beaton & Vezina, $100,000. W. Beaton, T. R. Vezina, L. T. Beaton. Capital Investment Company, $20,000. W. J. Hogan, T. D. Thompson, J. Thompson.

RAILWAY ECONOMY.

To encourage economy, the railways of the United States are distributing literature showing how, by a little care, expenses can be kept down. From one of these pamphlets the following is clipped, and it is headed by a few words showing what the men can do to save their employers' money:

	Miles.
1 2-cent postage stamp equals hauling one ton of freight	3½
1 lead pencil equals hauling one ton of freight......	2
1 track spike equals hauling one ton of freight	2
1 track bolt equals hauling one ton of freight	3½
1 pound of waste equals hauling one ton of freight..	10½
1 white lantern globe equals hauling one ton of freight	20
1 red lantern globe equals hauling one ton of freight.	75
1 lamp chimney equals hauling one ton of freight..	10½
1 station broom equals hauling one ton of freight..	35
1 station water pail equals hauling one ton of freight.	20
1 lantern complete equals hauling one ton of freight.	100
1 gallon signal oil equals hauling one ton of freight.	60

NORTHWESTERN COAL AND COKE CORPORATION.

The Northwestern Coal & Coke Corporation, an American corporation which is now arranging for the necessary licenses to do business in Canada, will engage in the business of general forwarders and wholesale dealers in coal, coke, sewer and drain pipe, bricks, stone, lime, cement, etc. The corporation has acquired three properties, including coal lands, clay lands, and what is said to be the largest and best stone quarry between Ontario and the Rocky Mountains. The corporation has also effected a sale of two million of its shares (par value one dollar) at 25 cents a share. One hundred thousand dollars of this has been paid up, and the balance will be paid on cash calls of $25,000 each. The corporation will encourage the manufacture of sewer, drain pipe, and brick in the West, as most of the sewer and drain pipe now used is imported from the United States. From reports now before the corporation and from tests made at the Granby smelter it appears that the clay properties acquired are good, but the corporation is having sample pipes made from same to prove the actual worth.

The corporation will not develop any properties. It will lease its property holdings and engage in the buying and selling business strictly as a general supply, distributing and forwarding concern.

* * *

"Porcupine is puzzled at the 'twisted neck' vein," says a contemporary; and a good many necks have become twisted in puzzling Porcupine stock manipulation veins.

The Canadian Properties, Limited, a London, England, syndicate with offices in Winnipeg, has recently made a sale of 20,000 acres in the Kindersley district, immediately south of Saskatoon, together with inside property on Second Avenue, Saskatoon, opposite the Bank of Montreal. The total outlay aggregates in the neighborhood of $500,000. Mr. Charles H. Hoare, chairman for the company, is at present in Vancouver. The directors of the firm are Lord Hindlip, Messrs. Anthony Edmund Gibbs, Arthur Engerton and Cecil Ward. Mr. L. B. Boyd is the Winnipeg manager.

NEW BRUNSWICK

Will Endeavor to Interest Ontario Fruit Farmers—Timber Limits Are Sold—Fall Trade is Good.

(Staff Correspondence.)

St. John, N.B.,
November 7th, 1911.

Is it possible to interest young Ontario farmers, who are thinking of going West, in the cheap orchard lands of New Brunswick? Mr. A. G. Turney, provincial horticulturist, who has lived in the Ontario orchard belt, thinks it is, and the provincial government will lend a hand. It will send a fine exhibit of New Brunswick apples to the annual exhibition of the Ontario Horticultural Association at Toronto, and with it will go persons qualified to tell about the extent and the price of orchard lands in the province, and the fine opportunity for profitable fruit farming.

The recent fruit fair held in St. John for three days, under the auspices of the New Brunswick Fruit Growers' Association, was a revelation to all comers, showing that the province can produce apples in as great variety and of as good quality as those of the famous Annapolis valley. One of the large rinks was used for the exhibition and there were interesting talks on fruit raising each day by experts.

An interesting and successful orchard experiment is being made at Burton, on the St. John River, by a group of business and professional men, known as the St. John River Valley Fruit Company. They own nine hundred acres of land, only a portion of which has been cleared, but on which there is one good orchard, whose product brought them eight first prizes at one of the fall fairs. They have planted more trees, cleared land for another planting in the spring, and will gradually convert the whole area into a great orchard which will be divided into smaller orchards and sold to small farmers. Mr. Turney states that business men are showing an encouraging interest in the development of the fruit raising industry, which is expected within the next ten years to become a great source of wealth to the province.

Big Demand for Potatoes.

There has been an active demand this fall from the western provinces for New Brunswick potatoes. The buyers went into the field and purchased potatoes by the carload at $1.25 to $1.50 per barrel. With a large crop of good quality, the farmers are reaping a harvest in this branch of trade.

It is announced that the Drummond Company will install a concentrating mill at their iron mines in Gloucester county, and that they expect to have an output of 2,000 tons of iron ore per day next year. The market for ore has been dull this year, but considerable quantities were shipped to Philadelphia. The company erected quite a number of workingmen's dwellings this year, and will add to the number next year. Quite a village has grown up around the mines.

Lumber operators on the St. John and Miramichi rivers and in other parts of the province report that the lumber cut this year will be only 50 per cent. of an average cut. They are no doubt considerably below the mark, but the cut will unquestionably be much smaller than usual because of dull markets and lumber held over this year.

St. John is interested in the statement that the Canadian Pacific Railway may inaugurate a steamship service between Canada and India. St. John would be its winter port. Business men also note with interest the discussion on better trade connections between Canada and the West Indies and South America.

Timber Limits are Purchased.

The Dominion Iron and Steel Company have purchased the Montgomery timber limits in Restigouche county. There are eighty square miles of these limits with a mill, tugboats, booms, etc., at Dalhousie.

The firm of Messrs. T. McAvity & Sons desire to secure the property on the harbor front which was granted as a site for the proposed sugar refinery. The promoter of the refinery has failed to take possession within the stipulated time, but continued to express confidence in his ability to do so. The civic authorities have grown tired of waiting, and are now taking steps to recover control of the site. If Messrs. McAvity & Sons secure it they will assemble their whole iron and brass manufacturing plant upon it and enlarge the scope of their operations.

The fishermen along the St. John and Charlotte county coasts have reaped a harvest in sardine herring. The fish were plentiful and the price profitable. Thousands of dollars have been paid to the fishermen of every little hamlet along the coast.

An agreement may shortly be reached between the provincial government and the Dominion government which will enable the former to close the contract for the construction of the St. John Valley Railway from Grand Falls to St. John, to be operated as part of the Intercolonial Railway.

Wholesale merchants report an excellent fall trade in New Brunswick. The farmers have had a profitable year, and manufacturing industries have been steadily employed.—W.E.A.

SHOULD BE RAISING SHEEP

To the Tune of Eighty Millions, Whereas We Have Less Than Two Millions.

Canada should be carrying 80,000,000 sheep. Instead, the figures are less than 2,000,000, that number being 1,000,000 less than twelve years ago. Mr. W. T. Ritch, special commissioner to the Department of Agriculture at Ottawa, with Mr. W. A. Dryden, have been conducting an inquiry into the causes of comparative failure of the sheep raising industry in the Dominion. His report will be published shortly.

No Encouragement Given.

Mr. Ritch says that no encouragement is given to raise sheep in Alberta and Saskatchewan, owing to the policy of settling immigrants pursued in the prairie provinces. The leases granted to ranchmen are for 21 years; but they are terminable by the government giving two years' notice, with the result that owing to the insecurity of tenure, the leaseholders have given insufficient attention to sheep, nor have any of them installed a proper plant for their washing and dipping. As a remedy, the report will suggest that the sheep-farmers be permitted to graze on Crown lands. A benefit that will accrue to the government, if this is done, will be that the sheep will eat the herbage so close as to reduce the risks of bush fires to a minimum.

The report will go on to point out that the ignorance of sheep-breeders themselves is a graver difficulty that must be overcome, if the industry is to be raised to the height it should occupy. Hitherto, the sole idea of the farmers has been to raise sheep for their wool. In this they cannot hope to compete with other countries, including the United States, in consequence of various local conditions. But the report will urge that there is a fortune in store for successful breeders of mutton, in preference to wool-bearing sheep.

Varying Conditions of Raising.

As an instance of the varying conditions of different countries, it is shown that, whereas in Australia sheep are principally raised for their wool, the value of the sheep apart from its wool is no more on an average than 10 shillings, or about $2.50, while here it is a poor sheep that will not fetch $6 at least. There is a great demand for mutton-sheep in New England, so that last year 26,000 sheep were exported to Boston from Prince Edward Island alone, and many more from the other Maritime Provinces. Yet all the time the Canadian farmer has been neglecting the certain revenue that awaited him to raise wool rather than mutton.

Example of Prevailing Ignorance.

The following instance of the prevailing ignorance among sheep farmers is given to show how much must be done, before better results can be hoped for. In Ontario, wool is sold for from 14 to 15 cents a pound. In the Maritime Provinces they still follow the custom that obtained in England in the days of hand-loom weaving. The wool is first shorn and then tub-washed, after which it is sold for 22 to 24 cents a pound. The farmers openly boast of the superiority of their wool to that grown further west, forgetful that it has shrunk in the process of tub-washing quite 40 per cent., so that the Ontario wool is really the more profitable.

Other important matters on which the report will touch are the better administration of the dog laws, and the improvement of fencing in the eastern provinces, to obviate the heavy losses that now take place from dogs worrying the sheep; and last, though not least, the necessity for the proper classification of wool, at which the farmers too often laugh as a fad, forgetful that in Australia an expert wool-classer often makes $5,000 a year. In Canada, the farmers are obtaining no more for the first fleeces than for subsequent shearings, or for fine wool than they do for coarse.

L'Union Fire Insurance Company has been registered to do business in Manitoba.

The Imperial Guarantee and Accident Insurance Company of Canada has been registered in Saskatchewan.

Hon. T. W. Crothers, Minister of Labor, has notified the Royal Commission to proceed with the investigation of the charge of violation of the anti-combines act made against the United Shoe Machinery Company of Quebec.

That Canada raises the best wheat in the world was the result of the contest held at the recent land show, New York. The winner was Mr. Seager Wheeler of Roathan, Sask. He received a prize of $1,000 in gold. Another Canadian, Mr. W. I. Glass of MacLeod, Alta., was the alternate.

The 95 per cent. double liability call on the shareholders of the Ontario Bank has realized $1,123,000. The stock capital was $1,500,000. From this amount 2,008 shares with a par value of $100 a share was had by the officers' guarantee fund. This left assessable stock to the amount of $1,292,200, on which the double liability of 95 per cent. was made.

NICKEL INDUSTRY OF ONTARIO.

Copper Cliff Has Large Smelter—Monel Metal is Practically Non-corrodible.

There were raised from the nickel-copper mines of Sudbury last year 652,392 tons of ore, of which 628,947 tons were smelted in the blast furnaces and put through the converters. The product was 35,033 tons of Bessemerized matte, 23.6 tons of ore being thus required on an average for one ton of matte. In this quantity of matte there were contained 18,636 tons of nickel, last year's output, 13,141 tons, being exceeded by 5,495 tons, or over 41 per cent. The production of 1910 was much the largest since the nickel mines of Sudbury were opened, a quarter of a century ago, and stamps this field as being the most important source of nickel in the world. The value of the nickel contents of the matte, on the basis of what it is worth—or estimated by the producers to be worth—at the point of production is $4,005,961.

To the output of the Sudbury mines must be added, for the sake of completeness, the nickel contents of the silver ores raised at Cobalt, estimated to amount to 504 tons, bringing the total yield of nickel in 1910 up to 19,140 tons. Nothing is added to the value of the production by the nickel from Cobalt, since the mining companies are paid nothing for it. It cannot be doubted that at least a portion of this nickel yield finds its way into use in the arts, since it must be separated from the cobalt, in order to obtain the latter.

Copper Cliff Has Large Smelter.

The Sudbury mines are operated by two companies—The Canadian Copper Company, and the Mond Nickel Company. The former's smelting works are at Copper Cliff, where during the last few years there has been established one of the largest and best-equipped plants of the kind to be found anywhere, costing in the neighborhood of $4,000,000. Power for operating the mines and works is developed at High Falls on the Spanish River, about 28 miles from Copper Cliff, where there is a natural drop of about 65 feet, increased by damming to 85 feet. About 12,000 horse power can be obtained here, and costs delivered at Copper Cliff about $15 per horsepower-year. Exclusive of capital charges the cost is about $6. The cost of the water power development was about $750,000. Ore is taken for the most part from the Creighton mine, which furnished 391,575 tons out of the 508,404 tons raised by the company in 1910. Of the remainder, 89,219 tons came from Crean Hill, 26,381 tons from No. 2, and 1,229 tons from the Vermilion. Creighton ore contains about 1.5 per cent. copper, and 4.5 per cent. nickel. The workings began as open-cast, the ore coming right to the surface, where the lens was about 400 feet wide. After an opening had been made the full width of the ore and about 700 feet long, to a depth of 190 feet, it was found advisable to resort to the usual method of working by shafts and levels. At the fourth level the ore body has a width of about 250 feet, and ore has been proven for 1,500 feet on the strike of the deposit. The mine is estimated to show 5,000,000 tons of ore without including certain extensions, or about 13 years' supply at the present rate of extraction. The Canadian Copper Company estimates that it has "proved supplies of ore" in its nickel-bearing lands amounting to at least 30,000,000 tons. Crean Hill admirably supplements Creighton for smelting purposes, the silicious character of the ore correcting the more basic nature of the material from Creighton. Since the beginning the ore of the Crean Hill is said to have averaged 6.35 per cent. of the combined metals, the copper being in excess.

Monel Metal is Practically Non-corrodible.

The Mond Nickel Company's smelting plant is at Victoria Mines in the township of Denison, and on the Sault branch of the Canadian Pacific Railway. This situation is convenient to the Victoria mine, from which until lately the company has drawn the bulk of its ore supply. In view of the fact that most of its ore now comes from the Garson mine, some distance to the northeast of Sudbury, the company is contemplating the removal of its works to a point near Rumford on the main line of the C.P.R., where the distance for ore haulage will not be so great. Last year, out of a total of 143,988 tons of ore raised, 93,542 tons were extracted from the Garson mine, 42,488 tons from Victoria No. 1, and 7,958 tons from Victoria No. 4. At Wabageshik Falls on the Vermilion River, the Mond Company have for some years been generating water power for use at Victoria Mines plant and mines, and to serve a like purpose at their new location they have obtained from the government the lease of a power on the Wahnapitae River not far from its mouth.

Monel metal is an alloy of nickel and copper which has been placed on the market by the Canadian Copper Company, and which is produced by that company without separating the metals or either of them from the matte. It is asserted that the proportions in which the nickel and copper occur in the Canadian Copper Company's ores are almost precisely those required for the alloy, which are about 67 per cent. nickel and 27 per cent. copper, and that by careful attention to the furnace charge a Bessemer matte can be produced within one per cent. of that required in making Monel metal. Considerable quantities of this alloy are now coming into use. It is claimed to possess great strength and to be practically non-corrodible. It has been employed as castings in the manufacture of propellors for vessels of the United States navy and private yachts, in pump linings, steam turbine nozzles and valve fittings for superheated steam, in dairy machinery, refrigerating plants, and pickling apparatus in steel mills; in rod form, for pump rods, bolt and nut stock, steam turbine parts, stock for drop forgings, electrical apparatus, motor boat shafting, pickle pins and valve stems; as sheets, for roofing railway terminals and other large buildings, for mine screens and chutes, smelter roofs, skylights and window frames, boat sheathing, cooking utensils and chemical apparatus, also for steam turbine blades; in the form of wire for wire cloth, motor cycle spokes, rope for mine hoists and cableways, nails, screws, rivets etc.; and many other applications where high tensile strength, combined with non-corrosive features are essential.

Development of Nickel Copper Mining.

The use of nickel for coinage purposes is spreading. In 1909 the Government of Turkey was authorized to put out an issue of coins made of nickel or aluminium. The latter metal, upon being tested, not having given satisfactory results, nickel was decided upon, and it has been resolved to issue 120 millions of 5-para pieces, 120 millions of 10-paras, 70 millions of 20-paras, and 20 millions of 40-paras, in all 330 million pieces. The money is all to be coined in four years and issued in twenty.

The development of nickel-copper and smelting during the last five years is shown by the figures contained in the following table:—

Schedule.		1908.	1909.	1910.
Ore raised	tons	409,551	451,892	652,392
Ore smelted	"	360,180	462,336	628,947
Bessemer matte produced	"	21,197	25,845	35,033
Nickel contents	"	9,563	13,141	18,636
Copper contents	"	7,501	7,873	9,630
Value of Nickel	$	1,866,059	2,790,798	4,005,961
Value of Copper	"	1,062,680	1,122,219	1,374,103
Wages paid	"	1,286,265	1,234,904	1,698,184
Men employed	No.	1,680	1,796	2,156

The valuation of the nickel and copper contents of the mattes in the above table is that placed upon them by the producers themselves.

New Caledonia Has Large Production.

The only other important source of nickel is the island of New Caledonia, whose output, however, in proportion to the whole, is now much less than that of Sudbury. Société le Nickel, whose production is of New Caledonia ores, operates refineries in France, England and Germany. From 1900 to 1909 the French production fell from 1,700 to 1,200 tons, while that in England rose from 1,500 to 2,800 tons, and in Germany from 1,400 to 3,100 tons. Thus in 1909 the total output of nickel from New Caledonia was 7,100 tons. In the same year the yield from the Sudbury mines was 13,141 tons. Le Nickel proposes to erect a refinery in New Caledonia to treat the ore on the spot.

Other statistics of the nickel-copper industry for the past year show that 24,651 cords of wood valued at $76,705 or $3.11 per cord were used, mostly in "heap-roasting" the ore, and 95,172 tons of coke costing $696,851 or $7.32 per ton, were consumed in reducing the ore to matte.

The liquidator of the Ontario Bank announces that the sum of $1,123,000 has now been received from the shareholders of the defunct institution on the call for 95 per cent. of the double liability. As the full amount of assessable stock had a par value of $1,292,200, the amount called would total $1,227,590; so that all but about one hundred thousand dollars has been paid up by the shareholders. The liquidator says there is now a small return in prospect for the holders, as the sum in hand will be more than sufficient to cover the liabilities that remain unsettled.

EFFICIENCY IN ACCOUNTING.

Dominion Association a Success—Joint Stock Company Law.

The chartered accountants of Winnipeg, Man., recently held their annual gathering. The medal presented by Mr. W. A. Henderson for the best all round papers in the intermediate class at the chartered accountants' examination was won by Mr. R. C. Macdonell, the presentation being made by the president, Mr. H. M. Cherry. In his presidential address Mr. Cherry stated the position which accountancy occupies and should occupy in the business world. Until quite recently it was not generally accepted that accountants should have a definite professional standing in the community as they have elsewhere. Business health can only be kept in sound order by careful accounting and this is almost as essential to social well being in this age, as the elimination of obvious causes of disease to which human beings are subject. Business mortality as well as human mortality can be diminished by common sense regulations which tend towards eliminating quackery either in medical or accounting practice.

Speaking of the services to societies which accountants render, Mr. Cherry said: Our relations to the public are two-fold, as accountants and as auditors. A man may, by the possession of knowledge, be an expert accountant, but to be an auditor in the best sense of the word, must also possess in a marked degree the qualities of self-reliance and courage. Occasions may arise where an auditor finds himself in hopeless disagreement with his client upon a question of the proper method of treating certain items in his client's accounts. Upon such occasions, where convinced that his viewpoint is correct, he must be firm and courageous. To maintain his attitude may mean a temporary sacrifice of material benefits, but he should remember that in the practice of any profession sacrifices of all kinds are required, and he should be prepared to subordinate his personal advantages to the good of the profession at large, and its standing in the estimation of the public, for we stand or fall in the estimation of the public, not only as individuals, but as representatives of the profession generally.

Aim to Advance Along Broad Lines.

It has been stated that we are endeavoring to build up an association which will become a close profession, solely in our own interests. Such statements cannot be too strongly denied. I am voicing the sentiments of the members of this association when I say that our aim is to advance strictly along broad lines. As an association, we desire to promote an increased knowledge of accountancy, as laid down in the preamble to our charter, a part of which reads: "The said association has been formed for the purpose of raising the standard of accountancy within the province," also for the purpose of "securing to the public a guarantee of efficiency and reliability as regards services performed and certificates issued by those parties as public accountants."

Public Becoming More Appreciative.

As time goes on the public is becoming better educated to the necessity of closer inspection of business methods by properly qualified men, and the high place which the name "chartered accountant" occupies in the estimation of the public, is due to the fact that our qualifying tests ensure the possession of special training and knowledge. It has been charged that we set our standard of examination unnecessarily high, so as to place a limit on the number of successful candidates. I think if we sought for the real reason for the high percentage of failures, we would find that it is because our intermediate examination has been open to all candidates, irrespective of preliminary training or service, and a number of candidates try this examination who are insufficiently prepared. On the other hand, it has been found that at both the intermediate and final examinations, the candidates, who are successful are those who have served a term in a chartered accountant's office, where they naturally acquire a more adequate preparation for the examinations. Our association has no intention, by its qualifying tests to place an insurmountable barrier in the way of any candidate. Our aim is, rather to ensure that all who succeed in passing the examinations, and who are admitted to membership, shall be men having a considerable knowledge regarding the subjects coming within the scope of a chartered accountant's work, men capable of reflecting credit upon the association and the standing of the profession.

Dominion Organization a Success.

We have to congratulate ourselves on the successful reorganization of the Dominion Association of Chartered Accountants, which was accomplished last year. The Dominion Association now acts as a parent body in an advisory capacity to all provincial associations. We can now look forward to the introduction of an equally high standard of examinations for all the provinces, and the interchange of membership courtesies, which is already established between some of our associations. As illustrating how provincial associations have been brought closer together, the examinations conducted by us last spring were joint examinations for the provinces of Manitoba and Alberta, which may be taken as the forerunner of one examination for all provinces, or at least, for the provinces in the west.

A subject of some importance which might be mentioned is that of the existing legislation with regard to joint stock companies. The Accountant in recent issues has been publishing a tabulated statement giving a comparative analysis of the company laws of the United Kingdom and the Empire. In making a comparison between the Companies Act of Manitoba and that of the Dominion of Canada, I note that it points out the following omissions from the Manitoba act: Provision that a prospectus must specify contracts entered into, by, or on behalf of company, or be deemed fraudulent. Liability of the directors where loan is made to a shareholder. The liability of the directors to creditors where business is commenced before 10 per cent. of the capital stock has been subscribed and paid for. Provision that a printed statement of the affairs and financial position of a company be annually laid before the shareholders at or before each general meeting.

Others who addressed the meeting were Messrs. Ronald, Pithlado, Bunsell, Tarr, Reade, Trueman, Love, Scally and Turner.

STATISTICAL FALLACIES.

The Life Underwriters' Association of Montreal held its first meeting for the season recently when there were 60 members present, with Mr. J. C. Tory, M.P.P., in the chair. The cup won by the Montreal Association at Winnipeg for having made the largest percentage of increase of membership, was presented to the Association. Mr. Tory, in accepting the same, reviewed the progress of the past two years, the membership having grown in that period from less than 30 to 182.

The resignation of Mr. J. C. Tory as president, and Mr. G. E. Williams as secretary, were accepted. These gentlemen occupy the same offices in the new Incorporated Provincial Association, and have retired on that account. To fill the vacancies created, the following were elected as officers:—President, Mr. H. H. Kay; vice-president, Mr. A. C. Champagne; secretary, Mr. W. W. King.

Mr. T. B. Macaulay, F.I.A., managing director of the Sun Life Insurance Company had been announced to give the address of the evening on "Financial Aspects of Life Insurance." Owing to illness, he was prevented from being present, and Mr. A. B. Wood, actuary of the Sun Life, read a paper prepared by Mr. Macaulay on "Statistical Fallacies." The paper made very clear the foolishness of arriving at conclusions, on insufficient data. It particularly referred to the theory, that the first born in families were inferior, physically and morally, to the later born. Mr. Macaulay showed that this theory had been proposed on altogether insufficient statistics. Before reading the paper Mr. Wood referred to the interest taken by the management of his company, and he believed the management of all other companies in the important work being done by the Underwriters' Associations.

The council of the Life Underwriters' Association of Quebec met in Montreal, November 2nd. Mr. Tory, the president, was in the chair, and the members of the council from the three associations in the province were present. A resolution passed by the Quebec Association was presented, asking that all official documents of the associations be printed in both languages. This was agreed to. Another resolution passed by the same association was submitted, referring to the action of a new life insurance company in the province, who do not employ agents, but who pay medical examiners a bonus for introducing business to them. This action was strongly condemned, and it was decided to bring the matter to the attention of the College of Physicians and Surgeons of Quebec, it being held that such action on the part of medical men was unprofessional. The annual meeting of the provincial association will be held on Monday, December 11th.

CHARCOAL EMBERS CAUSE FIRE.

That the fire which destroyed the church of St. Irenee, Montreal, was caused by an ember charcoal which fell from the censer in the hands of an acolyte, was proved at the investigation held before Fire Commissioner Latulippe at Montreal. Fire Chief Tremblay stated that he arrived on the scene fifteen minutes after the alarm was given, and he discovered that the pressure of water was not sufficient. One of the acolytes, a lad fourteen years of age, was examined, and he told of dropping a piece of burning charcoal from the censer, which broke into fragments, and some pieces of which rolled near a cupboard of priestly garments. He thought he had gathered up all the pieces, but could not be sure. Another boy said that all the pieces were not gathered up.

IS FIRE PREVENTION A HOPELESS TASK?

Mr. Croker, Late Fire Chief of New York City, Says "No"—Fire Waste of the United States.

Every day in the year there are close to thirty fires in Greater New York. At least fifteen of these are due to carelessness, caused by somebody disregarding the fire peril in a way that should be reckoned as a crime. In 1910, the money loss to property from fire in New York was $5,936,333. There were nearly 10,000 fires. Of the most serious of these the factory fires were in a majority. But the factory owner is not to be singled out and blamed for conspicuous carelessness. The above statements are made by Mr. Edward F. Croker for twelve years chief of the New York fire department.

In Mr. Croker's opinion the causes for fires may be put down in this order: Carelessness in factories, which in most cases means dirt and rubbish and oily waste. Carelessness in the use of matches. Do you stop to watch where a lighted match falls after you have lighted your cigar? Bad electrical wiring. Careless housekeeping. Dark and dirty hallways. People, at night, scratch matches to find their way about, throw the match in a corner into a pile of rubbish, and a few hours later there is a call for the firemen. Dark basements. Tenants go down after coal or wood with a candle or with matches. A startling number of bad fires occur this way. Oil stoves. Old-fashioned oil lamps. Cigar and cigarette stubs. They are petty things taken one by one, but they are the principal reasons for the great number of fires occurring in a city like New York.

Many Fires Caused by Inexcusable Carelessness.

Ugly fires—oil, factory, packing house, or lumber yard—are practically all caused by inexcusable carelessness. This is one of the facts that makes the experienced fireman feel strongly against our national habit of playing with fire. It is true that in buildings where inflammable material or explosives are kept, and in industries where the danger of fire is greatest, certain regulations are in force to minimize the peril. These regulations consist mainly of signs reading "No Smoking," a watchman whose job is to keep an eye out for incipient fires, and a few fire extinguishers on the wall. And these regulations are in force solely because the insurance underwriters insist upon them, and not because the owners of the establishment are awake to the fire peril and seek to do their duty in this matter.

It requires no training in fire-fighting to understand how utterly inadequate such precautions are. In nine cases out of ten when small fires start in such places—as they are sure to start sooner or later—these safeguards amount to nothing.

Is It a Hopeless Task?

Since leaving the fire department of Greater New York to take up the work of preventing fires, Mr. Croker has been asked many times: "Do you not think it is a hopeless task?"

The answer always has been that, if he did think so, he naturally would not attempt to start such a campaign. But the question illustrates the attitude of a good portion of the public toward the fire problem. Most people look upon fire as something inevitable, almost natural, and consider their prevalence in this country something that must be borne, along with other damages caused by the acts of nature.

This is all wrong. The average fire is no more to be accepted as inevitable or natural than is the collapse of a poorly built building. Both may be ascribed to the same specific causes: careless building, careless inspection, careless usage. Both are preventable; and the occurrence of either is not to be considered as due to anything but pure, man-made carelessness.

The work of fire-preventing is not a hopeless task. On the contrary if owners and occupants of buildings throughout the country would adopt and put into effect a proper standard of cleanliness, inspection and common-sense carefulness, the number of fires in this country would be reduced 50 per cent. within a year. If the New York fire department had—as it should have—full authority to make inspections of all sorts of buildings, to enforce a standard set of fire regulations, and to make arrests when its orders against fire perils were disobeyed, that single department would cut New York's annual fire loss down 40 per cent.

The Fire Waste of the United States.

In the last fifteen years the records kept by the fire insurance underwriters show that approximately $2,000,000,000 and 20,000 lives have been sacrificed to fire in the United States, and the figures are steadily growing. The annual loss in money per capita now is $2.71. In Germany, which has the highest fire loss of any European country, the per capita loss is forty-nine cents. Berlin has one of the lowest rates of loss of any city in the world, and Berlin's fire department does not compare with New York's for efficiency. By cutting in two the actual number of fires that occur, as a standard regulation of fire conditions would do, the cause of one-half of our great losses would be done away with, and half of the problem would be solved at once.

Automatic sprinklers and automatic alarms should be installed to the last limit of precaution. There is no case where the old adage, "an ounce of prevention is worth a pound of cure," is as true as with fire. The doors should open outwardly and be fastened only in such a manner that they will yield instantly to slight pressure. The windows should be unobstructed and the fire escapes should lead to safety instead of into a trap. These are the changes that could be brought about without any revolution in most establishments, and they would be sufficient. It is the lack of them that is responsible for most of our fires.

Science of Fireproofing a Farce.

The science of fireproofing is a farce. What good does it do to make the walls, floors and ceilings of a building fireproof if you will fill it with inflammable material and fittings and expose them to contact with fire? It saves the building to some extent it is true. It doesn't save anything else. There is no such thing as a fireproof factory.

But with all these things—fire prevention, better buildings and better men in the fire departments—the war against fire never will be won until the people of this country have become educated to the new idea. It is the individual citizen who is responsible for the prevalence of fires, and he will continue to be so until he has been differently trained. You could build a country full of so-called fireproof buildings, and a careless people would find a way to burn them up. It is not too much to say that this education toward carefulness in regard to fire should begin with the training of children in the public schools. The boy who has been taught to regard fire as something that should be handled with the same care as explosives, or poisons, or deadly weapons, will not forget it when he becomes a man. The necessity for proper carefulness will be with him always. And only when this is true of all the people of this country will our fire losses cease to shame us before the civilized world.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended November 3rd:—Coniagas, 188,333; McKinley-Darragh, 212,694; Cobalt Lake, 114,430; La-Rose, 144,800; Cobalt Townsite, 117,094; Temiskaming, 138,730; Chambers Ferland, 64,000; Trethewey, 41,613; Crown Reserve, 51,080; Nipissing, 58,098; Kerr Lake, 60,000; Drummond, 60,000; total, 1,250,872 pounds or 625 tons. The total shipments since January 1st, are now 43,750,121 pounds or 21,875 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

OCTOBER'S COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore during October:—

Mine.	Tons.
Beaver	59.3
Buffalo	122.2
Chambers-Ferland	32.0
Cobalt Lake	230.2
Cobalt Townsite	110.5
Colonial	24.0
Coniagas	132.6
Crown Reserve	30.6
Drummond	210.0
Green Meehan	42.9
Hudson Bay	62.8
Kerr Lake	92.0
La Rose	275.7
McKinley-Darragh	307.3
Millerette	30.0
Nipissing	128.7
O'Brien	69.2
Right of Way	61.2
Temiskaming	101.3
Tretheway	79.7
	2,202.2

The shipments for September were 2,149.9 tons.

The Indian population of Canada is 103,661, and the Eskimo, 4,600. The Indian population by provinces is:—Alberta, 8,088; British Columbia, 24,581; Manitoba, 6,104; Nova Scotia, 2,026; New Brunswick, 1,802; Prince Edward Island, 292; Ontario, 22,496; Quebec, 11,462; Saskatchewan, 9,943; Ungava, 1,246; Yukon, 3,500. Ontario Indian agricultural output was over half a million bushels of grain and roots, worth $435,000. British Columbia follows with a $350,000 crop. General increases are shown in Alberta and Saskatchewan, where the crops come to 72,459 bushels and 299,851 bushels.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

London, Ont.—November 2nd.—Residence of Mr. W. H. Wyatt destroyed. Loss and origin unknown.

Arichat, N.S.—November 2nd.—D'Esconsse schoolhouse destroyed. Loss about $2,500. Origin unknown.

Fairlight, Sask.—November 3rd.—Fairlight Methodist Church destroyed. Loss about $2,500. Origin unknown.

North Bay, Ont.—November 3rd.—Refrigerator factory of Mr. E. M. Boquot destroyed. Loss and origin unknown.

Progresston, Ont.—November 7th.—Woollen mill of Mr. Peter S. Green destroyed. Loss about $10,000. Origin unknown.

Magrath, Alta.—November 1st.—Residence of Mr. G. A. Coleman, senior, destroyed. Loss about $1,000. Origin unknown.

Montreal, Que.—November 7th.—Barn of Mr. J. E. Charlebois, Lower Lachine Road, destroyed. Loss and origin unknown.

New Glasgow, N.S. — November 6th. — Premises of Standard Printing Company, Limited, destroyed. Loss and origin unknown.

Ingersoll, Ont.—November 8th.—Slaughter house and barn of Mr. Harry McMulkin destroyed. Loss about $800. Origin, incendiarism.

Brockville, Ont.—November 1st.—Pickling department of the Wolthausen Hat Corporation destroyed. Loss about $2,000. Origin unknown.

Regina, Sask.—November 8th.—American Abel Thresher & Engine Company warehouse destroyed. Loss about $160,000. Origin unknown.

South Clinton, Ont.—November 7th.—Planing mills of Mr. Robert Conkle destroyed. Loss about $10,000. Origin, supposed careless smoker.

Melville, Ont.—November 5th.—Evaporator and factory of Mr. John R. French destroyed. Loss estimated at $15,000; no insurance. Origin unknown.

Pembroke, Ont.—November 2nd.—Plant of Messrs. Thomas Pink Company, Limited, destroyed. Loss about $35,000, fully insured. Origin unknown.

Lachine, Que. — November 5th. — Twenty gasoline launches, 2 boat houses, bakery, wheelwright shop, and small factory. Loss estimated at $15,000. Origin unknown.

St. John, N.B.—November 5th.—Residence of Mr. J. W. Lawlor of Lancaster Heights, West St. John; also barn of Deaf and Dumb School. Loss about $12,000. Origin unknown.

Bethany, Ont.—November 3rd.—Sisson block destroyed including Mr. Jackson's grocery store, Mr. Hall's barber shop, Mr. Reynold's undertaking rooms. Loss estimated at $20,000. Origin unknown.

Chatham, N.B.—November 3rd.—Repair shop of Mr. W. J. Groat, corner of Water and King Street, and rear of grocery store of Mr. W. J. Connors, badly damaged. Loss about $5,800. Origin unknown.

Toronto, Ont.—November 5th.—Tailoring establishment of Messrs. Southcombe Brothers, 490 Queen Street West, destroyed. Loss about $2,700. Origin unknown. November 2nd.—Adams' harness factory badly damaged. Loss about $10,000. Origin unknown.

Hamilton, Ont.—November 5th.—Dwelling of Mr. John Moody, Main Street East, badly damaged. Loss unknown. Origin, fireplace overheated. November 3rd.—Membery mattress factory, Severn Street, destroyed. Loss about $5,000. Origin, spark from grinder igniting sea grass.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

London, Ont.—Details of losses and insurance appearing elsewhere in this issue.

Montreal, Que.—The Roman Catholic Church of St. Irenee was insured in the following companies:—Atlas, $20,000; Phœnix of London, $15,000; Guardian, $10,000; Royal $10,000; Queen, $10,000; total $65,000.

TRUST RELATION OF OFFICERS TO POLICYHOLDERS.

In his address on "Trust Relation of Officers to Policyholders," President E. W. Randall of the Minnesota Mutual Life of St. Paul, Minn., at the recent convention of American Life Underwriters at Pittsburg, referred to the trusteeship existing between these parties as a trust solicited by the trustee and thus different from the ordinary trust of trade or business. He elaborated the aspects of the relation, classifying them under two main heads, the internal and the external. Under the former head he grouped expenses of management, mortality rates, health conservation and investments. Under the head of external aspects he mentioned the relations of the companies to the legislatures, the State Insurance Departments and the public press. Then he took up the policyholders' side of the trusteeship and outlined the obligations on that side.

Mr. Randall stated that life insurance in its relation to the individual, to the mass, and to the public is a trusteeship involving a direct contact with the policyholder as a man, and an indirect contact with him through the people as well as obligations to the public through the policyholder. As such it calls for a high quality of statesmanship on the part of its executives, whether the company be large or small. The very essence of relationship involves the obligation of perfect service, or as near that as may be in an imperfect world, like this of ours. It involves unequivocal honesty, a broad and comprehensive business intelligence, and a very high type of moral courage. It has been men who have possessed these qualities who have built up the best insurance companies and who have secured for life insurance that splendid vitality and stability of which it boasts. Mere shrewdness, politics, self-interest which is honest only because honesty is the best policy—these will not do. Statesmanship in the best meaning of the word is demanded for the administration of the life insurance trust under the conditions which obtain at the present time.

The further point is obvious, that for the best administration of this trust, this solicited trusteeship, the life company officer must be personally above reproach. There must fall upon his company through his daily walk and conversation no taint of suspicion or appearance of evil. He must be broad enough in character not only to keep guard over his trust to the individual policyholder as a duty from man to man, but to have a clear understanding of his duty as a public servant. He must be a man of keen insight into details and into the larger business relations affecting the public welfare. He must, also, be a man of quick perception and prompt decision and action. Such men in positions as officers of life companies will never for a moment fail to act the part of the faithful trustee.

Financial righteousness must be the rule in every insurance office if the largest success is to be obtained. By deserving it, it may command even a larger measure of public confidence, and through good service find in each group of policyholders a pleased and satisfied constituency—the best asset any company can have.

◆

The Insurance Brokerage and Contracting Company, Bay Street, Toronto, have made an assignment. Messrs. E. M. Carroll, the general manager, and Okan A. Miller, agent, are at present under arrest on a charge of conspiring to defraud. Mr. Carroll and The Monetary Times had some lively correspondence a few months ago.

The Canada National Fire Insurance Company
Head Office—Bank of B.N.A. Bldg., Winnipeg, Can.

Authorized Capital - $3.000,000
Subscribed Capital - 2,000,000
Capital paid up - - 560,000

Now open to receive business.

Reliable Agents wanted throughout the Province of Ontario.

Address—
C. E. CORBOLD, Branch Manager, Province of Ontario
Telephones—Main 5081; North 3841. | 203 Lumsden Bldg., Toronto

EMERGENCY BANK CIRCULATION.

Should the Act Be Amended?—Some Observations and Suggestions.

(Specially Contributed to The Monetary Times).

The coming revision of the Bank Act, and, more particularly, that portion referring to circulation, is a subject receiving the earnest attention of Canadian bankers and financiers. The fact that at the highest point in September, (the last month before the Emergency Circulation Act takes effect), the bank notes outstanding came within less than $2,000,000 of the legal limit, would appear to indicate that unless the present act be amended, the time is not far distant when the circulation supplied by the banks will be inadequate to the growing needs of the country. The end of September showed a margin of $4,200,000 between paid-up capital and circulation, as against $9,200,000 on the corresponding date last year. While the total of paid-up capital will be augmented during the next twelve months by the advent of the International Bank, and further issues by banks already in existence, it is hardly likely that such large increases will be effected every year.

It must be borne in mind that large areas of virgin prairie were brought under cultivation during the past summer, and this, with a favorable spring, will result in a largely increased acreage for next season's crop; also, that the general volume of business, as reflected in railroad earnings, bank clearings, building permits, etc., shows no sign of diminution, and, although the crop is disappointing when considered in the light of earlier indications, the result is likely to be sufficiently encouraging to cause further expansion in trade during the coming months.

Requires More Currency.

During the grain moving season, there are several reasons why Western Canada, especially, requires a much larger amount of currency in proportion to its population and wealth than older and more closely settled countries. The principal one is the enormous extent of the crop area, and the fact that at every point where there is an elevator, funds have to be provided to purchase grain. At points where chartered banks are not established private parties have to act as paying agents for the elevators, and the total amount of currency outstanding in their custody often represents a large sum, when the crop is heavy.

In the towns, and districts within a reasonable radius, cheques have largely replaced actual cash as a medium of settlement between debtor and creditor, although there are still a number, among the older settlers and foreigners especially, who persist in carrying the more bulky article (sometimes in large quantities) notwithstanding that banking facilities are at their disposal. On the other hand, farmers living long distances from towns and banks have practically no alternative but to make their settlements in currency, and the process frequently results in large amounts being outstanding for a considerable length of time.

How the Farmer Works.

As an example;—A farmer ships and sells a car of wheat, receiving in return a parcel of currency. Owing to the average crop acreage being so large, the Western farmer is obliged to exert every effort to prepare as much soil as possible before the ground freezes, and when the remittance arrives from the grain company, he may be busy ploughing or engaged in some other urgent pursuit, and is almost compelled to delay the disposal of his money. It is, therefore, either secreted on his person or in the house, and may remain there for several weeks. Whenever he has a respite, he usually takes advantage of the opportunity to pay, or endeavor to pay, his debts. Although the greater portion of these may consist of payments due on land, interest on mortgages, accounts due machine companies and merchants, the settlement of which, almost invariably sends the currency back to clearing centres, he has other debts of a more local character, often involving considerable sums, and the adjustment of which results in no speedy return of the medium to the banks. He may owe a neighbor for money borrowed, for stock, feed, or seed purchased; and frequently, there is the regular hired help to pay. These creditors in turn will often retain the cash in their possession indefinitely.

The extraordinary amount of railroad construction and development work taking place in the Dominion at present, is also an important factor in creating a heavy demand for currency.

The banks are making reasonable efforts to cope with the situation by increasing their paid-up capital as frequently as the procedure seems warranted. It appears, however, as if they will hardly be able to keep pace with requirements, unless aided by legislation. As far as actual funds are concerned, the manner in which legitimate business has been taken care of during the past year would indicate that the banks are not seriously handicapped in this regard; it is the extraordinary demand for circulating medium, occasioned to a large extent by features peculiar to the country at its present stage of development, that is creating attention.

No Radical Changes.

As intimated in The Monetary Times, it is unlikely that any radical change will be permitted in the laws governing bank issues, and the majority of men, well informed in financial affairs, will probably approve the wisdom of this course. Nevertheless, it would appear that the emergency circulation, might, with advantage, be amended along lines suggestive of an evolution of the principles on which the ordinary circulation is based. The act at present permits the banks, from October 1st till January 31st, in addition to issuing notes to the amount of their unimpaired paid-up capital, (the ordinary circulation privilege), to issue notes to the extent of 15 per cent. of their combined paid-up capital and reserve fund. While the ordinary circulation is free of interest, the excess is subject to a tax, not to exceed 5 per cent. per annum (4 per cent. is the rate exacted) to be paid into the Finance Department.

By way of amendment to the above, the writer submits the following suggestions:—

(1) That the excess issues be based on reserve funds only, and be permitted to the extent of 50 per cent. thereof;

(2) That the tax be either withdrawn or reduced to a rate which will admit a profit to institutions availing themselves of the act, and rendering a public service thereby;

(3) That the time be extended at least two months, making the period from August 31st till the end of February, and be subject to further extension, if, in the opinion of the Minister of Finance and his advisors, circumstances warranted the action, and the best interests of the country would be served in so doing; and,

(4) In the event of the adoption of the first suggestion, that a clause be inserted in the Bank Act prohibiting the reduction of reserve funds without permission of the Government.

Basing excess issues on 50 per cent. of reserve funds would provide about $16,000,000 additional circulation as compared with the present system, taking paid-up capital and reserve fund figures as at 30th September.

Banks' Reserve Funds.

The reserve fund of a bank, in addition to engendering a sense of security in the minds of depositors, and its consequent value as an advertisement, is virtually so much additional paid-up capital. It represents shareholders' profits reinvested, as it were, in the business. Although dividends are disbursed on the actual paid-up capital only, the earning power of a bank is increased by each addition to the fund.

The reserve, it is true, is not subject to a double liability call, and may be reduced without permission from the Government, hence the suggestion that excess circulation be permitted to the extent of 50 per cent. only, and that reserve funds, once created, be not subject to unauthorized reduction. No reputable institution is likely to resort to the expedient of reducing its reserve fund unless heavy losses have been sustained which it cannot recoup out of the bad debt reservations or surplus earnings.

The present Emergency Act empowers a bank to issue notes in excess of its paid-up capital, whether it possesses a reserve fund or not, while the plan suggested would prevent this, and therefore, in the writer's opinion, be more in keeping with the principles on which the ordinary circulation is based. As a bank, when first established, is allowed to circulate notes to the full extent of its paid-up capital, it seems reasonable, when prudent management has accumulated a reserve fund which is practically equivalent to additional capital, that in the event of commercial conditions requiring the circulation, additional powers of issue should be conferred, based on this fund and its relation to paid-up capital.

To Receive Full Benefit.

In order that the country receive full benefit from the operation of the Emergency Act, it is almost necessary that all the banks take advantage of its provisions, in accord-

LONDON'S BIG FIRE.

Details of Losses and Underwriting—Total Insurance Over Four Hundred Thousand Dollars.

A destructive fire occurred in London, Ont., on November 3rd, when six of the largest business houses sustained considerable loss.

The following is a partial list of insurance involved in the London fire, the names at the head of the columns being those who sustained losses, the marginal names being those of the insurance companies interested:—

Grand total								$404,500

The following are details of the estimated insurance loss in the fire:—

Aetna, $13,000; Anglo, $2,900; Atlas, $7,500.

British America, $11,500.

Caledonian, $10,500; Canadian, $11,500; Commercial Union, $15,250; Continental, $11,500; Connecticut, $2,500; Crown, $4,000.

Dominion, $4,250.

Economical, $9,000; Equity, $500.

Fidelity-Phenix, $4,500.

General, $6,850; Guardian, $18,850; Gore, $3,300; German-American, $2,500.

Hartford, $7,250; Home, $2,500; Hand-in-Hand, $1,250.

Insurance Company of North America, $17,000.

Law Union & Crown, $9,750; London & Lancashire, $9,500; Liverpool & London & Globe, $18,300; London Assurance, $7,500; London Mutual, $9,600.

Manitoba, $18,500; Monarch, $1,000; Merchants, $300; Montreal Canada, $2,400.

National of Hartford, $5,000; New York Underwriters, $14,500; Northern, $25,000; North American, $6,500; North British & Mercantile, $22,500.

Pacific Coast, $2,500; Phoenix of London, $14,500; Protector Underwriters, $5,000; Phoenix of Hartford, $4,000; Perth, $3,000.

Queen, $4,000; Queen City, $5,000.

Rimouski, $9,050; Royal, $10,600; Royal Exchange, $2,500.

Sovereign, $3,000; Sun, $25,750; Scottish Union & National, $9,000; St. Paul, $4,350.

Union, $11,000.

Waterloo, $2,000.

York, $1,300; Yorkshire, $20,350; total, $454,400.

The following are additional details of the losses:—Messrs. Purdom Hardware Company, building, value, $15,000; insurance $15,000; loss $10,000. Stock, value $60,000; insurance $45,000; loss $50,000. Messrs. J. H. Chapman & Company, three stores, value $50,000; insurance $35,000; loss $50,000. Stock, value $200,000; insurance $150,000; loss $200,000. Messrs. T. F. Kingsmill & Company, three stores, value $40,000; insurance $35,000; loss $40,000. Stock, value $225,000; insurance $200,000; loss $225,000. Messrs. Brewster's, two stores, value $40,000; insurance $35,000; loss $40,000. Stock, value $40,000; insurance $30,000; loss $40,000. Messrs. Mara & Company, one store; value $25,000; insurance $15,000; loss $25,000. Stock, value $75,000; insurance $60,000; loss $75,000. Messrs. Roome, Corbett & Company, one store; value $25,000; insurance $20,000; loss $20,000. Stock, value $40,000; insurance $25,000; loss $40,000. Messrs. R. J. Young & Company, two stores; value $45,000; insurance $35,000; loss $5,000. Stock, value $125,000; insurance $100,000; loss estimated $50,000. Total value of buildings, $240,000; insurance $180,000; loss $190,000. Stock, value $685,000; insurance $655,000; loss $680,000. Total loss, $870,000. Messrs. Gray & Parker, one store, value $28,000; insurance $20,000; loss $500. Stock, value $80,000; insurance $65,000; loss estimated $10,000. Totals—Value of buildings, $263,000; insurance $210,000; loss $190,000. Stocks—Value [illegible],000; insurance $690,000; loss, $690,000. Total loss on buildings and stocks—$880,500. Total insurance—$900,000. Total value of buildings and stock—$1,113,000.

The above lists are subject to revision.

ALBERTA PROVINCE WINS.

Court Holds That Proceeds of Bond Sale Belong to Province—Appeal to be Made.

RAILWAY BOND SUIT IN BRIEF.

Issue of $7,400,000 5 per cent. 50-year first mortgage bonds of the Alberta and Great Waterways Railway, guaranteed by provincial government, made in London at 110 by Messrs. J. S. Morgan & Co., in December, 1909. Proceeds placed on deposit in three Canadian banks.

Route and length of road:—Edmonton, northeast of Athabasca River to Fort McMurray, 350 miles.

Government pressed railroad agreement, crisis occurred, and Provincial Cabinet was dissolved.

Royal Commission was appointed to investigate the deal. Their report was of little value, material witnesses not having been summoned to give evidence.

Provincial government cancelled railroad agreement, alleging that company had defaulted in bond interest.

Provincial government sought proceeds of bond sale from banks which had the money on deposit. Banks refused to hand it over without order of court.

Provincial government commenced action against company for the money and this week judicial decision was made in favor of province. The railway company will appeal.

Judge Stuart at Edmonton has declared that the province of Alberta has the right to collect from the bank the proceeds of the sale of the Alberta and Great Waterways Railway's bonds, guaranteed by the province. An appeal will be carried to the Supreme Court of Alberta. This is the first legal engagement in the suit brought by the province against the railway company to recover $7,400,000. Others interested in the case were the Canada West Construction Company, a subsidiary concern, organized to build the railway; the Royal Bank of Canada, in which was deposited $6,000,000; the Union Bank of Canada, which held $1,000,000; and the Merchants' Bank, which held the remainder. The two latter banks paid the money held by them into court when the legal action commenced. The Royal Bank refused to pay over the money, contending that they were protecting their clients.

What the Judge Says.

In his decision Justice Stuart declares his belief that the confiscatory act of the Legislature was not ultra vires, in that as it by an act created the company out of persons living and doing business outside of the province, so also had it the right to annul this act and possess itself of the proceeds of the sale of the bonds.

The position in this matter of the Royal Bank of Canada which holds the bulk of the money, has been explained previously. Before accepting the deposit the Royal Bank required, and the government passed, an order-in-council undertaking that the funds would not be withdrawn except for the purpose of the construction of the railway. Subsequently the government of Alberta, having decided it was inadvisable to proceed with the contract, passed legislation cancelling the same, and to appropriate the amounts on deposit for other government purposes.

Railway Notified the Bank.

Whereupon the railway company notified the Royal Bank not to surrender the funds standing in their joint name, under penalty of damages. The Royal Bank, therefore, was compelled to decline to surrender the money on the demand of the government, as the ownership can only be determined by the highest court. Obviously the Royal Bank took the only course which could be followed by any chartered bank worthy of the name.

With regard to the other two banks concerned, an order was made in the Supreme Court in Edmonton in February, allowing them to pay their share of the proceeds of the bond sale into court, pending the decision in the case noted above.

◆

NOTES OF BIDDING.

Two offers were received for the $4,000 5 per cent. 30-year debentures of Minnedosa, Man., which were awarded to the National Finance Company, Vancouver.

For the Brock, Sask., $2,000 7 per cent. village improvement debentures, three offers were made. The bid of Mr. T. R. Billett, of Winnipeg, was accepted.

For the $35,000 4½ per cent. 30-year school debentures of Belleville, Ont., nine offers were received. As previously noted, the issue was awarded to Messrs. Wood, Gundy and Company, Toronto.

Eight bids were received for the $18,000 5 per cent. 30-year bridge and school debentures of Etobicoke Township, Ont. As previously noted, the issue was awarded to the National Finance Company, Toronto branch.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Rivers, Man.—Until November 15th for $6,000 6 per cent. 20-year. C. Howard, clerk.

Bracebridge, Ont.—Until November 14th for $16,190.38 debentures. A. C. Salmon, town clerk.

Berlin, Ont.—The ratepayers will vote on a by-law to raise $100,000 for waterworks extension.

Waldron, Sask.—For $5,000 permanent improvement debentures. W. J. Johnston, secretary-treasurer.

Pangman, Sask.—For $4,000 permanent improvement debentures. F. C. Goold, secretary-treasurer.

Ingersoll, Ont.—In January the ratepayers will vote on a by-law to raise $125,000 for waterworks system.

Hamilton, Ont.—The ratepayers may vote on a by-law to raise $85,000 or $100,000, for new fire stations.

Shoal Lake, Man.—The citizens have authorized a by-law to raise $12,000, to erect and equip municipal hall.

Colgate, Sask.—Tenders are called for $2,500 for permanent improvements. L. M. More, secretary-treasurer.

Melville, Sask.—Until November 15th for $19,000 5 per cent. 30-year debentures. J. Crow, secretary-treasurer.

Battleford, Sask.—The council will submit a by-law authorizing the borrowing of $100,000 for further waterworks extension.

Kingston, Ont.—On November 16th the ratepayers will vote on a by-law to raise $100,000, to promote the erection of a hotel.

St. Boniface, Man.—The ratepayers will vote on by-laws aggregating $700,000, for waterworks, schools and municipal gas plant.

Rapid City, Man.—Until November 13th for $2,650 5 per cent. 7-year local improvement debentures. C. G. Murray, secretary-treasurer.

Swan River, Man.—Until December 4th for $3,000 5 per cent. 15-year local improvement debentures. B. E. Rothwell, secretary-treasurer.

Biggar, Sask.—The village council board has been authorized to borrow $12,000 for permanent improvements. J. Lukey, secretary-treasurer.

St. Louis R.C. S.D. No. 21, Alta.—Until November 22nd for $15,000 5 per cent. 30-year debentures. L. P. O. Noel, Medicine Hat, secretary-treasurer.

Fort William, Ont.—The ratepayers will vote on a by-law to raise $100,000 4½% 10-year debentures, as loan to new iron and steel pipe factory.

Campbellford, Ont.—Until November 20th for $31,500 5 per cent. 30-year power and $3,000 5 per cent. 10-year school debentures. E. C. West, town clerk.

Pembroke, Ont.—Until November 15th for $12,500 4½ per cent. 20-year debentures. A. J. Fortier, town clerk. (Official advertisement appears on another page.)

Plenty, Sask.—Until November 18th for $4,800 6 per cent. 10-year debentures. A. M. Percival, secretary-treasurer. (Official advertisement appears on another page.)

Hanover Rural Municipality, Man.—On November 16th the ratepayers will vote on a by-law to raise $1,800 for school purposes. J. K. Dueck, secretary-treasurer, Chorlitz.

Davidson, Sask.—Until November 20th for $16,000 5½ per cent. 20-year, skating and curling rink, and electric light and power debentures. Arthur J. Robertson, town clerk.

Ayton, Ont.—For $6,000 4½ per cent. 20-year school debentures, guaranteed by the township of Normanby. R. H. Fortune, secretary of school board. (Official advertisement appears on another page.)

Progress Municipality, Sask.—Until November 15th for $20,000 20-year 4½ per cent. road debentures. The loan is authorized by the government of Saskatchewan. Mr. J. B. McConica, secretary-treasurer, Luseland.

Moose Jaw, Sask.—By-laws aggregating $603,000 have been passed by the ratepayers as follows:—$500,000 for water improvements; $17,000 for fire apparatus and extensions, and $136,000 for cement sidewalks. The new water supply will be brought from the springs at Caron, twenty miles distant.

New Westminster, B.C.—The ratepayers will vote on by-laws as follows:—$35,000 for a parks improvement scheme; $15,000 for the completion of the Horse Show building at Queen's Park; $6,000 for the erection of a new isolation hospital; $5,000 for the completion of a garbage collection system; and $3,000 for the erection of a public laboratory.

OUTLOOK IN LONDON MARKET.

Only Four Issues Made This Fall, One of Which Was Entirely Successful—Bond Notes.

Four Canadian issues only have been made in the London market this fall. Last autumn and the previous one were far busier in Canadian flotations. The following are the securities offered since the end of July:

Company.	Amount.	Security	Issued at.	Result.
Kamloops Land & Development Co., Ltd.....	£20,000	£1 shares	par	No inf'n
Toronto Power Co., Ltd.	821,917	4½% con. guar. deb. stock	96	No inf'n
Alberta Land Co., Ltd...	200,000	5% deb. stock	95	Under's took 30%
City of Moose Jaw.....	89,200	4½ bonds	par	Fully subscribed

Of the four issues therefore, only the Moose Jaw bonds were entirely successful. The underwriters of the Toronto Power Company probably had little left on their hands. The two land company schemes were by no means as sought as was desired. It is possible that the Canadian land business is being overdone a little in England. Again, hundreds of British investors are buying direct rather than participating in land company enterprises.

Moose Jaw's Success.

Moose Jaw's success is notable in a market which apparently remains as congested as in the spring. The amount was just about right for market conditions. In the case of Montreal the size of the loan was $7,000,000, an important factor. It was felt inopportune to market such an amount at the moment. Mr. Thomas Skinner, a director of the Canadian Pacific Railway, the other day paid a tribute to the judgment and foresight with which the affairs of most Canadian municipalities are managed, but said they must expect to pay more for their loans in London than in the past. The British investor, having so many opportunities now given him, looks for a better yield in Canada.

Present Market Conditions.

The present market conditions overseas apparently make it desirable for Canada to seek capital there for only the best proposals. While this applies always, it is doubly important at the present time. Moose Jaw was in the London market in November, 1910, with £101,300 4½ per cent. debentures at 101½. The city of Toronto has just placed a line of 6 months treasury bills in London at 4 per cent., plus, presumably, commission and stamps. Toronto's last public flotation in London was in June, 1909, when £394,100 4 per cent. general consolidated loan debentures were marketed at 102½. Toronto will probably make another issue there early next year. By the way, when will that city appoint a fiscal agent to deal with the marketing of its securities, as Montreal did last month?

Mexican Issue in London.

An issue has been made in London at 87 of £1,000,000 5 per cent. second mortgage 50-year bonds of the Mexican Light and Power Company made through Messrs. Dunn, Fischer and Company. Dr. Pearson says the balance available in 1911 exceeds twice the amount required for interest on the £3,000,000 worth of bonds, of which the present offer forms a part.

Colonel Matheson, treasurer of the Province of Ontario, announces that it is the intention of the province to float a $1,000,000 4 per cent. loan from succession duties. The loan, which will be made next year, will be offered to the public in Canada. The Ontario government issued no new loan in 1910, except that it completed in February the sale of the loan of $3,500,000, the purchases from January 1st to February being about $1,300,000. The rate of interest was 4 per cent. The bonds were sold at two per cent. premium. This amount also was raised in Canada. Ontario was in the London market in April, 1909, when it sold £820,000 4 per cent. registered stock at 102, and in June £500,000 of the same class of securities at 101.

The Bank of Montreal has been appointed fiscal agent for **Calgary, Alta.**

The Northern Sulphite Company, of Sturgeon Falls, has won the action launched against the Occidental Syndicate, of London, and John Craig. Chief Justice Meredith at Toronto has given judgment holding that 51 first mortgage bonds, of a par value of $500 each, were purchased by the syndicate with the Northern Sulphite Company's money. The syndicate is ordered to return the bonds, but is to have a lien on them for any excess over the money taken from the company's treasury for the purchase.

To Restore Consols.

The depreciation of consols, Great Britain's premier security, has long been exercising the minds of London, England. Leading bankers for some time have been discussing the matter, and they will now take action. Sir Robert H. Inglis Palgrave, director of Barclay & Company, bankers, Limited, will approach the Chancellor of the Exchequer, Lloyd George, with a scheme to arrest the depreciation. No details have been given out beyond a statement that Sir Robert's scheme, which the leading bankers are now discussing, has redemption as its basis, with other securities, almost equally sound, purchasable for more favorable terms. There is little inducement for the people to buy consols, but redemption at a fixed term and at par is regarded by a considerable body of opinion as the only possible means of restoring consols.

Underwriters are busy with a view to an early issue of £1,250,000 Grand Trunk 4 per cent. guaranteed stock at 92, full dividend payable in April.

The possibility of a new Canadian Pacific Railway stock issue is again being discussed. A Financial News correspondent says a bonus issue of ordinary shares is probable at no distant date, and adds that the English public, who like the idea of a new issue, will then rush in, pushing the shares up.

The Mexican Light & Power issue of £1,000,000 5's at 87 was fully subscribed.

The Province of Alberta has placed a line of six months treasury bills at 4 per cent.

RELATIVELY HIGH RETURN

The real estate mortgage is the oldest form of security known to man. And not only that—it was the safest for centuries. With the possible exception of government bonds, it is still the most conservative.

During the past year loan company funds increased over $15,000,000 on the prairies alone. There is an immense field in British Columbia.

Our loans are placed on improved revenue-producing property in Vancouver and New Westminster. Valuations are made by experienced men and are very conservative, being finally passed on by our board of directors.

No loan is made for more than 50% of appraised value. All titles are searched and certified to by our solicitors. We attend to the many small details which are so often a cause of annoyance to the purchaser.

If you have any funds available, we will guarantee a net return of SIX PER CENT. Our entire assets is your security. We collect both principal and interest and remit yearly or half yearly as desired. Advise us how much you would like to invest just now. We will submit a list suitaeble to your requirements.

A. M. PERCIVAL, Secretary-Treasurer.

EMERGENCY BANK CIRCULATION.

(Continued from Page 2026.)

ance with the demand for currency. Many of our institutions, with, a large proportion of their branches in the prairie provinces, are likely to reach the limit of their circulating powers considerably in advance of those whose activities are chiefly confined to the East. When this stage is reached, the banks not requiring to avail themselves of the act for their own business needs, should find inducement to do so in order to assist in meeting the requirements of the West. At present there does not appear to be any incentive. When the cost of printing, plates, cash reserves, etc., is added to the 4 per cent. tax, it is evident that little or no profit is derived from the issue; in fact, the general manager of one of the largest banks, stated some time ago that the institution with which he is connected, had, at a loss, taken advantage of the emergency circulation to perform a public service by providing currency.

It seems unreasonable to expect a strong bank, possessing an ample circulation margin, to make use of this simply to provide currency for other institutions, when the result is unprofitable. Again, if banks requiring circulation are under the necessity of paying heavily for it, the result is bound to be reflected in a curtailment of facilities provided. This illustrates a principle which Gilbart was of the opinion would always be found correct;—That restrictions upon banks are taxes upon the public.

Meeting Commercial Requirements.

Our bank act was framed with the idea of meeting the commercial requirements of the country, and any changes which have been effected in its construction, have usually tended to facilitate the operations of the banks, enabling them, with reasonable safety, to employ their resources in all legitimate activities, and thus play an important part in the nation's progress and development. On this record, our hope for the future is based, and although problems will have to be solved, and situations met, we are confident that those entrusted with the guidance of our financial destinies will have courage and ability to deal with contingencies as they arise.

LIVE ENERGETIC young man, 30, well educated and of good address, having filled positions of responsibility, desires position with a growing industrial concern where diligence and the use of common sense would be appreciated, and where prospects are good. Practical experience in shop and office and a knowledge of chemistry. Box 447, Monetary Times.

◆

MEETING OF BANKERS' ASSOCIATION.

According to custom, no official announcement was made at the conclusion of the annual meeting of the Canadian Bankers' Association at Montreal on Thursday. Unofficially, it is understood that the bankers favor the revision of the Bank Act at the coming session rather than have a further postponement. The bank charters expired on July 1st, 1911, and were extended by parliament for one year. The question of circulation was also discussed.

"The banks are discovering," said a member of the association, "that the issuing of new stock at a premium is not a very profitable undertaking. An investment in bank shares pays a relatively small return to the investor. Further, the investing public are now realizing that the holding of bank shares carries with it a double liability clause. Twenty years ago investors did not consider the double liability clause, simply because they had never been called upon to pay. Within the past few years, however, there have been double liability calls and many investors are turning away from bank shares. Since 1902 the Canadian banks' circulation has increased from $65,000,000 to $115,000,000 at the present time. During the same time the paid-up capital of the banks has only increased by $32,000,000. In other words, the circulation is increasing almost twice as fast as the paid-up capital of the banks."

The Bankers' Association decided to recommend to the Government a change to prevent any bank being found lacking in currency. This plan which will probably be recommended to the Government will be modelled on the plan in operation in Scotland, whereby a bank can issue circulation against its gold reserves. This change will not give the banks more power, but simply allow them to change their machinery in such a way as to provide against a shortage of currency. This measure, it is contended, will be for the general benefit of the country at large as well as for the banks.

Sir Edward Clouston was re-elected president of the association, and Mr. D. R. Wilkie, general manager of the Imperial Bank, was elected one of the vice-presidents in place of Mr. Duncan Coulson. Mr. T. Howe, general manager of the Bank of Toronto, took Mr. Wilkie's place on the council.

◆

NEWS AND NOTES.

The Bank of British North America has opened a branch at Verdun, Que.

The Montreal Textile Company is said to be arranging for the sale in London, of its Montreal Cotton preferred stock holdings.

The Northwest Grain Dealers' Association's revised estimate of the Western wheat crop is 178,260,000 bushels, and the oats crop 187,335,000 bushels.

In an interview Mr. D. W. McCuaig, chairman of the Manitoba Elevator Commission, stated that the Government elevator system this year will prove a financial success. Up to date $1,500,000 has been expended on the system.

At the forthcoming meeting of the Union Bank, to be held on December 18th, the shareholders may be asked to grant permission for the removal of the bank's headquarters from Quebec to Winnipeg. Of its total number of branches, numbering 245, there are 159 west of the great lakes.

The Richelieu & Ontario directors held a meeting on Thursday, and decided to increase the dividend of the company from 6 to 8 per cent. The announcement was made in time for the opening of the Stock Exchanges. The directors stated that arrangements are being made to have the stock listed on the London and Paris Exchanges.

Norway and Sweden, through their diplomatic representatives at Washington, have requested the United States to grant them, under the favored-nations clause of their treaties, the same privileges given to Canada by section two of the reciprocity agreement by which wood pulp and print paper are admitted free of duty into the United States. Under section two of the Canadian reciprocity agreement print paper and wood pulp were given free entry to the United States. This section of the bill became effective on July 1st last, independent of the passage of the law by Congress, and its operation was not dependent upon ratification of the agreement by Canada.

G. H. BALFOUR,
Quebec, Oct. 24th, 1911. General Manager.

That the better police protection of the banks in Vancouver, B.C., should be dealt with by the banks was the opinion of the police commissioners at their recent meeting.

The shares of the Transportation Building Company offered by Messrs. Fairbanks Brothers and the International Bank were taken.

Mr. W. N. McIlwraith, who has been associated with Messrs. Wood, Gundy & Company, Toronto, since the inception of the firm and is acting as manager of their London, England, office, has been admitted to the partnership in this well known house.

During October the Nipissing Mining Company mined ore of an estimated value of $226,929, and shipped ore of an estimated value of $225,282. The development at vein 73 is reported as continuing favorable. The vein has a width of four to twelve inches, and assays 1,500 ounces. Of the $225,000 shipped during the month, the high-grade mill produced 397,678 ounces, or 13.65 tons of refined silver, having a gross value of $213,220.

CROWN ABANDONS ARSON CASE.

The Vernon, B.C., arson case in which Messrs. Frank Belmont and James A. Dake were jointly indicted over a year ago has been abandoned by the Crown. The case was that of the jeweler, Mr. Belmont, who is charged with having arranged for the destruction of his store by fire, the latter to be caused by an ingenious clockwork mechanism which was to automatically set the place afire during the night. The clock went off before it had accomplished the task proposed for it, attracting the attention of the night watchman and causing him to investigate with the result that the fire was prevented. Mr. Belmont escaped and has never been apprehended. As Mr. Belmont's whereabouts are still unknown to the police, it was felt that it was unjust to keep Mr. Dake longer in custody, and the case was therefore abandoned by the Crown.

POLICY LOANS.

An interesting statistical paper was given by Mr. Arthur F. Hall, secretary and manager of the Lincoln National Life of Fort Wayne, Ind., at the recent life underwriters' convention at Pittsburg.

Mr. Hall had collected data from some fifty companies on the subject of "Policy Loans," and, although the experience varied greatly, he was able to draw some general conclusions. He stated that out of a large number of such loans made during the last five years only one or two per cent. had been repaid in cash and a similar percentage had been decreased to some extent, while from fifty to sixty per cent. had been increased from year to year. Most of these loans are obtained solely to pay premiums, and about ten or fifteen per cent. are raised on policies on account of the low rate of interest. He said that probably fifteen or twenty per cent. of the loans were requested for legitimate business purposes and were those most often repaid in cash. The number and amount of policy loans requested and granted in the last five years have increased enormously.

Mr. Hall said that undoubtedly the custom of granting policy loans affected mortality, but that it was impossible to state how much. He suggested that, if company managers feel that the growth of the custom menaces the future of the business or the protection of beneficiaries, they can materially lessen its evils by ceasing to use the loan feature as a selling feature. As a further preventive of dissipating beneficiaries' protection through the policy loan system, he inquired as to the practicability of classifying policies, according to whether they are to protect families or business and restricting the former class to loans solely for the payment of premiums.

FARMERS' BANK DEPOSITORS PETITION OTTAWA.

At a recent meeting of the depositors of the defunct Farmers' Bank held at Toronto, the following resolution was moved by Mr. John Stone:—"The efforts made by the shareholders are much to be deprecated; the amount of the available double liability which could be collected amounts to only 10 per cent. of the aggregate deposits, and the shareholders subscribed for their stock as a business proposition, hoping to obtain dividends therefrom. Any deception or fraud committed by W. R. Travers (formerly manager of the bank) was committed as the agent of the shareholders, and consequently the shareholders will have to shoulder the fraud of their agent. Some of the shareholders also assisted Travers in deceiving the Government. Their precipitate action must have the effect of very seriously embarrassing any application made to the Government in behalf of the depositors."

The petition to be forwarded to the Federal Parliament sets forth that the depositors, previous to the Farmers' Bank suspension, were of the belief that the deposits in Canadian banks were so absolutely safeguarded that it was impossible for the depositors to suffer loss. The executive appointed by the meeting consists of Messrs. H. S. Reynolds, A. Merker, John Stone, and W. Bealey, all depositors at the Toronto office of the Farmers' Bank.

LEGAL NOTICES

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of September, 1911, incorporating John Richard Corkery, James Moffat Forgie and Edward Gordon McMillan, law students, Harry Riley and Willis Bertram Sturrup, law clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, charter, hire, build or otherwise acquire steam and other ships or vessels with all equipments and furniture and to employ the same in the conveyance of freight, including coal, ores, grain, live stock, meat and other produce and merchandise of all kinds between such ports as may seem expedient; (b) To carry on the business of merchants, carriers by land or water, ship owners, wharfingers, barge owners, lightermen, forwarding agents, ice merchants and refrigerating store keepers; (c) To acquire, own and operate either by steam, electric or other power, tramways and railway sidings on or over lands owned or controlled by the company or on or over lands adjacent to the lands of the company with the consent of the owner or holder thereof; (d) To acquire and undertake the whole or any part of the business, properties and liabilities of any partnership, person or company, carrying on any business which the company is authorized to carry on, or carrying on any business which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights or possessed of property suitable for the purposes of the company; (e) To acquire, construct, carry on, improve, operate, maintain, develop or manage, carry out or control roads, ways, railway sidings, bridges, reservoirs, watercourses, packing houses, elevators and wharves, and to carry on the business or trade of warehousemen, storers, packers, and carriers of personal property and to issue warehouse receipts and bills of lading and to lend money upon the security of personal property warehoused or carried; (f) To issue paid-up shares, debenture stock, debentures, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be acquired by or for any service rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (g) To sell, lease or turn to account the undertaking or the whole or any branch or part of the business, undertakings, property, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having objects similar in whole or in part to those of this company; (h) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea, which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated, directly or indirectly, to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (i) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell, pledge or otherwise dispose of shares, stock, debentures, bonds, and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents, as the directors may appoint; (j) To enter into partnerships or into any arrangements for sharing profits, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise with any partnership, person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or into any business transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such partnership, person or company and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (k) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (l) To distribute in specie or otherwise as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company, formed to take over the whole or any part of the assets or liabilities of this company; (m) To enter into any arrangements with any governments or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (n) To do all or any of the matters hereby authorized either alone or in conjunction with, or as factors, trustees or agents for any other companies or persons or by or through any factors, trustees or agents; (o) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with the above, or any portion thereof, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (p) The powers in each paragraph to be held in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (q) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Coals Transportation, Limited," with a capital stock of two hundred thousand dollars divided into 2,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of September, 1911.

THOMAS MULVEY,
Under-Secretary of State.

14-2

Dated at Toronto this 17th day of October, A.D., 1911.

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

MONETARY TIMES PRINTING CO.

Montreal Toronto Winnipeg London

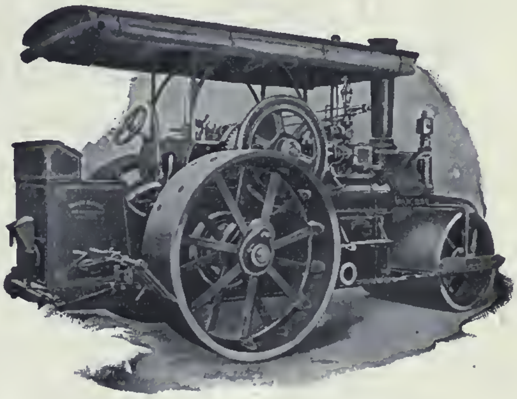
Policyholders of the Canadian Guardian Life Assurance Company will get the best deal at the Department of Insurance, Ottawa. If they will go there in a body, Mr. J. M. Spence, president of the company and managing director of another concern which desires to take them into his new fold, will be left alone in Alberta to study the prickly points of his precious policy plan.

* * * *

While we welcome the capital which the Duke of Sutherland will invest in Canadian land schemes, the Duke will pardon some skepticism as to the alleged philanthropic features of the enterprise. In buying well-chosen real estate in the Dominion—and the Duke is a keen financier—it is difficult, almost impossible, not to become a profit-taker despite philanthropic motives. We do not desire to see land speculations on a big scale in this country. Our own politicians and others have already given a taste of what it means in a prosperous and sparsely populated country. What it will signify when we have a well-peopled land, can be left to the imagination. The small landowner should make the best foundation for Canada.

H. E. T. HAULTAIN,
Consulting Mining Engineer
41 National Trust Bldg.
20 King Street E., Toronto.

The Waterous
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to nune.

Ask the man on the machine.

Dominion Charter, 1911

AUTHORIZED CAPITAL, $1,000,000 SUBSCRIBED CAPITAL, $614,000

President, Edward Brown, Winnipeg; First Vice-President, Hon. A. E. Forget; Second Vice-President, F. N. Norton; Additional Directors, J. W. Scott, Listowel, Ont.; W. M. Martin, M.P.; Aleck Clark; H. L. Johnson; E. P. Brockman; A. H. Tasker, C. F. Millar; all of Regina.

Bankers: The Canadian Bank of Commerce.
Solicitors; Balfour, Martin, Casey & Blair.

Place funds for investment in the very heart of Canada's richest agricultural district on personally selected farm mortgage securities, not to exceed 40% actual valuation. Values will continue to increase. Profitable rates quoted on application.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur St.

"Nine-tenths of the people of the United States favor the annexation of Canada," said Mr. Champ Clark at Fremont, Nebraska, last week.

A local company has been formed in Prince Albert, Saskatchewan, to operate a transportation system on the Saskatchewan River between Edmonton and Prince Albert. A steamer and a fleet of barges will be built for this purpose. It is proposed in the first instance to bring coal down the river. From the statements of the lumber companies operating in Prince Albert, it is estimated that 150,000,000 feet of lumber will be cut in the woods to the north of the city this winter. It is anticipated that 4,000 men will be needed for this work.

The value of manufactures passing out of the United States in the calendar year 1911 may exceed one billion dollars. This estimate is based upon figures of the Bureau of Statistics, Department of Commerce and Labor, covering the exports of manufactures in the nine months ending with September, 1911, which amount to 478½ million dollars for finished manufactures and 240½ million for manufactures for further use in manufacturing, making the total exports of manufactures in the period named 719 million dollars, against 612 million in the like period of 1910. The increase in the nine months of 1911 over the like period of 1910 is 17.48 per cent., and in case the increase during the remainder of the year continues at the same rate the total value of manufactures passing to foreign countries during 1911 will be about 970 million dollars. When to this is added the value of manufactures going to Alaska, Porto Rico and Hawaii, not included in the exports to foreign countries, the total outward movement of manufactures from continental United States in 1911 will pass the billion dollar line. This will bring the total value of manufactures exported in 1911 to more than twice that of ten years ago and more than five times that of 20 years ago the exports of manufactures in 1901 having been 447½ million, and in 1891 about 185 million dollars.

An iron and steel pipe factory may be located in Fort William at an early date.

Mr. W. E. W. Jackson, of the Toronto Meteorological Observatory, believes that the use of the proposed Hudson Bay route to Europe for the transportation of western wheat is beset with serious obstacles.

Hon. W. T. White, at Lansdowne, Ont., said that no immediate changes in the tariff were contemplated, and stated it was the definite intention of the government to build and operate the Hudson Bay Railway.

The Canadian Highway Association has been formed at New Westminster B.C., to promote a transcontinental highway from Halifax, N.S., to Alberni, B.C., and also to extend the Pacific highway north through British Columbia to Dawson City, making the longest highway in the world.

Mrs. Leah Schneider, of Toronto, has been sentenced to one year's imprisonment for arson.

The Banque Internationale has opened its first branch office at the corner of Papineau Square and Dorchester Street east, Montreal. Mr. W. L. Laplante is acting manager.

The Union Trust Company, Limited, have completed alterations and improvements to their offices, Temple Building, Toronto, and a large crowd visited on Wednesday, the opening day.

Seventy-three questions and answers on Prince Rupert, B.C., are contained in a handy pamphlet issued by the Continental Trust Company, Limited, of Prince Rupert, which has already dubbed itself "the San Francisco of Canada."

FINANCIAL AND REAL ESTATE

FOR QUICK SALE

One of the most magnificent farms in the greatest wheat district of the Canadian West, consisting of

1,280 Acres of the Finest Land

within 4½ miles of

CITY OF BRANDON

3-story Stone House—costing $15,000

and all necessary farm buildings—all farm fenced.

Owner has made his fortune and is retiring.

IF INTERESTED, WRITE FOR PRICE AND TERMS.

J. W. FLEMING, Real Estate and Loans, BRANDON, MAN.

SIX PER CENT. BONDS

REAL ESTATE SECURITY

CANADIAN REAL ESTATE BOND CORPORATION SIX PER CENT BONDS

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of $100, $500, and $1,000.

They are a first lien upon all real estate and all other assets of the corporation.

The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.

The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

THE PRESIDENT OF A GREAT MILLING COMPANY

writes to the Great-West Life:—

> "After considerable deliberation, I have accepted a Policy in The Great-West Life Assurance Company for the reason that my residence in the West since 1881 has enabled me to observe the class of investments in which the Company places its funds. From personal knowledge, I am able to state that the Company has never lost one dollar of principal or interest in connection with any of its investments. The demand for money during the last twenty years in the West has enabled the Company to receive upwards of 7% net, and as long as the present immigration continues, this rate should be maintained for many years to come. The profits heretofore declared on the policies of The Great-West Life Assurance Company appear to me to be giving ultimately cheaper insurance than any other Company, for the reasons stated above."

Make
Money
Earn
Its
Way

No attention is paid by many people to the investment of small sums of money. It is allowed to remain idle. To get the most out of life, people must work—so with money. It should be made to more than earn its own way.

To some this may not have occurred to be worth while; to others it is not known that excellent bonds, affording absolutely safe and profitable investment, are issued in denominations of $100 and $500. Any number can be purchased from us, yielding splendid interest return. Full particulars upon request.

We give the same attention to large and small orders.

We are glad to receive inquiries about investments.

Write to-day.

INVESTMENT AND LOAN COMPANIES

The Chief Consideration

Is the safety of your money your chief consideration in deciding upon an investment for it?

Then you cannot find a more satisfactory investment than this Corporation's Debentures.

To bring them within the reach of the smallest investor, they are issued for sums as small as one hundred dollars.

This does not preclude their selection by investors of large sums, large numbers of whom hold them for many thousands of dollars.

They are a Legal Investment for Trust Funds, and many Executors and Trustees save themselves worry and anxiety by investing in them.

They are held in large sums by Insurance Companies, Benevolent and Fraternal Societies, and similar institutions.

Send for specimen Debenture, copy of Annual Report, etc.

ANOTHER UNDESIRABLE PROMOTION.

For a considerable time, it has been stated that a new fire insurance company with capital of $2,000,000 was being formed, with headquarters at Montreal. The activity in this matter is now such that it demands the strongest criticism. The name first proposed was the Crown Fire Insurance Company of Canada. As an Ontario company with that title already exists, it is intended to make a change in this respect, although the issue of a founders' prospectus bears the name mentioned. The promoter is Mr. George H. Roberts, who calls himself "agent for the founders." His present prospectus "is issued for the perusal of persons whom we desire to become associated with us as founders of a new Canadian fire insurance company, and is delivered and sent only to such persons as have been selected as being acceptable to those constituting our present strong body of founders."

We need not discuss here Mr. Roberts' career in the life insurance business. It is sufficient to say that his labors in that field have not maintained him in a high position or public respect. So far as is known, he is inexperienced in fire underwriting, a business which requires the greatest experience, skill, care and substance in management. The founders' prospectus, signed by Mr. Roberts, is to "be followed by one in full detail when our shares are offered for public subscription." The method of organization, says this document, "is very simple, inasmuch as we ask our founders to subscribe for but one share of stock of one hundred dollars, fully paid up. As soon as the list of founders is completed, or perhaps at an earlier date, we will offer to the founders of the company as much stock as they may wish to take. This second issue will be offered at par, and it is the intention to limit the call to twenty-five per cent., and to be held in trust until the directors are elected by the shareholders. The call of twenty-five per cent. may be made in three monthly instalments, but no call will be made or the subscriptions binding in any way until at least $250,000 of stock has been subscribed for. The preliminary issue has been fixed at a minimum of $250,000 so that a board of directors may be appointed as quickly as possible from among the founders to take charge of the affairs of the company. After the founders have subscribed for as much stock as they may desire to acquire we will then offer to the public further issues, to be placed in a number of series at a gradually advancing premium. This should, of course, enhance the value of the stock originally subscribed for by the founders."

There are two serious phases of this promotion: first, the undesirability of launching a fire insurance company, an important matter, without underwriting backbone; and second, the reprehensible method of promotion. The list of unsuccessful fire insurance companies operating in Canada is already a long one. The latest list of companies that have gone out of business or retired from the Canadian field contains the names of 68 concerns. Of these, 28 were American, 18 British and 22 Canadian. This list dates only to the year 1907.

Some of these companies were weak from the beginning and did not deserve success. Others were well managed and had considerable resources. But they either withdrew from the heart-breaking fight with the constantly wearing fire waste of this continent and its periodical conflagrations, or succumbed. The managers of many were ingenious men, who either had a fairly thorough knowledge of the routine work of fire underwriting, or imagined that they could improve upon old-fashioned principles or practices. They were able to secure, by sanguine speech and sometimes specious argument, directors and shareholders who really believed that there was "a gold mine in fire insurance." Many of them are alive to-day, but poorer in pocket and most thoroughly disillusioned. As for the companies—they are no longer with us.

Mr. Roberts states that he has obtained as founders of his company a large number of prominent men. The list of their names he is using as chief promotion asset. These gentlemen are said to have signed a certificate, not only agreeing thereby to become a founder of the company and paying one hundred dollars to Mr. Roberts, but also approving of the formation of the company. For seventy or eighty men, whose names should be practically a guarantee, to endorse such a scheme would be a serious matter, under the existing circumstances, and especially as the obvious intention is to sell stock on the strength of the names. The Monetary Times was unable to believe that the gentlemen named were acting as founders and approving the company's formation. Communications were, therefore, sent to several. The first reply, from a knight financier, whose name is being used freely by Mr. Roberts, says: "I do not know anything about this company at all, nor have I heard of it. I have written to Montreal to take means of having my name stopped being used." Another gentleman states that his signature was obtained some two years ago, after Mr. Roberts had secured those of several other prominent men, plus one hundred dollars, from each of them. All these gentlemen have cancelled their signatures, but did not get back their subscriptions. This is enough to show that Mr. Roberts is promoting his company by misrepresentation. The Monetary Times can only advise that investors at home and abroad should not place their money in this scheme, neither the man nor the methods justifying the confidence of capital.

We cannot refrain from again emphasizing the importance of Canadian public men refusing to lend their names to promotions, unless they are personally sure that the enterprise, supported with their names, is sound and worthy. A few dollars given to a promotion by a well-known and wealthy man may be pocket money for the promoter, and stop there. But the giving of a name involves a grave responsibility. Abuse of this matter will surely lead to a blot upon the name itself and upon the credit of Canada. We must know that a public man's name upon a prospectus is a guarantee, as far as possible, of the enterprise and the honesty of its promoters. This responsibility cannot be shirked.

AMALGAMATED ASBESTOS CORPORATION.

The directors of the Amalgamated Asbestos Corporation have decided to default on the bond interest, which falls due December 1st, and will reorganize the company's finances. The plan, if followed, will provide for the displacement of the $8,000,000 bonds by $2,000,000 5 per cent. bonds, and $6,000,000 income bonds, or preferred stock. This is equivalent to cutting the interest rate from 5 per cent. to 1½ per cent.

The Philadelphia firm, which was largely interested in the bonds, in a circular letter says: "While the company has not met the expectations under which it was formed, we believe that this has been due to a combination of exceptional and temporary causes, the chief of which have been unwise management and a decline in the market prices."

It is useless to blink the fact that, had the capitalization of the company been reasonable, dividends would have been paid and reorganization unnecessary. The company had resources of $25,000,000, $15,000,000 of which represented bonds. Five of the six properties absorbed had total capitalization of $3,550,000. Allowing $4,000,000 for the capitalization of the six properties, the difference in aggregate capital of the individual companies prior to amalgamation and the capital of the merger, was $21,000,000. That was an unreasonable difference, after making due allowances for organization, management, and development.

The bond and stockholders are gathering to-day the fruits of over-capitalization. The investor is learning by experience, what The Monetary Times has persistently sought, the reasonable capitalization of companies, and especially of amalgamations. Even if the present case is but a temporary setback, the incident has a most unpleasant and reactionary effect upon the confidence of the investor at home and abroad.

We have no less than forty recent industrial amalgamations which are in the experimental stage, so far as the much-vaunted advantages of consolidation are concerned. Investors should have full information as to past results and present position of companies participating in mergers. Above all, they may judge largely of the value of a stock or bond offering by the absence or presence of "watered stock."

There can be little sympathy with the promoters of the Amalgamated Asbestos Corporation. Theirs was an effort to float, with full knowledge of the circumstances, a craft far too heavily laden. It is waterlogged. The sympathy is with the passengers.

TORONTO TUBES.

The proposed tube railway for Toronto is a scheme, superficially popular, but actually unnecessary. That the citizens need better transportation facilities is true, but the suggested remedy is a slow one, and only affects a small proportion of the population. In a few years, the civic authorities will acquire the street railway, or they may purchase it prior to the expiration of the company's franchise. In the meantime, the city could build car lines, which would all be part of the municipal system later, and which would relieve the traffic problem almost at once. The greatest mistake is to suppose that those who oppose this extravagant and fanciful tube scheme, oppose also progress for Toronto. The Queen City already has sufficient municipal "white elephants." The thoughtful citizen will vote against the tubes on January 1st.

SMALL CHANGE.

Before buying stock of the Manitoba White Granite Pressed Brick Company, of Winnipeg, the investor should learn what became of $12,000 preliminary and formation expenses in the promotion of the Pacific Pressed Brick Company, of Vancouver.

* * * *

If Canada would give ear to proper city planning schemes, many complex problems for a later day might be saved. With all the land we have, houses are being built on small lots, close together, in cramped streets, in a manner which is making surely trouble for the future.

* * * *

The silence of Mr. J. M. Spence, of Edmonton, is painful. A former president of the Canadian Guardian Life Assurance Company, and managing director of the International Insurance Company, he proposes that the shareholders and policyholders of the first should take a similar part in the second named company. We have already explained that the Department of Insurance withdrew the charter of the Canadian Guardian Life, which in seventy-two months showed an operating deficit of $62,000. Policyholders will get the best deal at the Department of Insurance, Ottawa. In the meantime, it would be interesting to know how fares Mr. J. M. Spence.

COPPER, IRON AND STEEL

Active Industry in Ontario — Magnetic Ore Under Development.

The copper product of Ontario in 1910 amounted to 9,630 tons, valued at $1,374,103, being an increase over the output of 1909 of 1,697 tons in weight and $247,088 in value. It was all contained in the nickel-copper mattes produced by the Sudbury smelters. The only non-nickeliferous mine which contributed to the total was Bruce Mines, a quantity of ore from which was shipped to Victoria Mines and used by the Mond Nickel Company for lining the Bessemer converters which produced the matte.

Small quantities of copper ore were raised by the Hermina Mining Company, the Parry Sound Copper Company and the Meridian Bay Mining Company, but none was shipped by any of these companies.

The shipping iron mines last year were the Helen, Moose Mountain, Atikokan and Mineral Range. Their combined output was 230,656 tons valued at $513,721, a shortage as compared with 1909 of 33,121 tons of ore and $131,901 in value. Of the output 112,246 tons were hematite, and 118,410 tons magnetite.

Magnetic Ore Under Development.

A large deposit of magnetic ore has been under development by the Lake Superior Corporation at Magpie, in the Michipicoten district, 15 miles north-east of the Helen Mine. Some seventeen drill holes have been put down, to an aggregate depth of several thousand feet, and Mr. R. W. Seelye, manager of the company's mines department, computes that between 15 and 20 million tons of ore have been shown up. The ore is metamorphic after siderite, the sulphur contents and carbon dioxide being, of course, objectionable for furnace practice. A series of experiments was undertaken by the company with the view of determining the best method of eliminating these undesirable elements. The results, Mr. Seelye states, are such as to leave no doubt that the ore can be successfully treated and the deposit utilized.

Search for bodies of workable ore goes on unremittingly, not only in northern, but also in eastern Ontario. Special interest has been aroused by the endeavor to determine the extent and value of the large iron carbonate outcrops on the Mattagami River. Reports of large surface showings of iron ore brought from the neighborhood of Bending and Stony Lakes, west of the main line of the Canadian Pacific Railway at Ignace station. In the eastern part of the province a considerable body of magnetite is said to have been discovered along the line of the Kingston and Pembroke railway not far from the Wilbur Mine. Preparations are also being made for the erection of magnetic concentration plants at Collins Bay, near Kingston, and at Trenton.

Pig Iron and Steel.

There are now eight blast furnaces producing pig iron in Ontario, distributed as follows: Algoma Steel Company, Sault Ste. Marie, two; Hamilton Steel and Iron Company, Hamilton, two; Atikokan Iron Company, Port Arthur, one; Canada Iron Corporation, Midland, two; Standard Chemical Company, Deseronto, one. The combined product in 1910 was 447,351 tons of pig iron, valued at $6,975,418, or an average of $15.59 per ton. In 1909 the furnaces were seven in number, and the production was 407,013 tons worth $6,301,528. The additional furnace blown in last year was at the works of the Canada Iron Corporation, Midland. There were made at Sault Ste. Marie and Hamilton 331,321 tons of steel, 233,621 tons of the pig product at the two places being used in the manufacture. The plant at Sault Ste. Marie makes steel rails exclusively, while at Hamilton, basic open hearth ingots are produced, a large tonnage of which is further developed into billets, forgings, spikes and bar iron and steel.

The blast furnace operations for the past year are shown in the following statistics:—

Ontario ore smelted	tons	143,284
Foreign ore smelted	"	678,890
Scale and mill cinder smelted	"	15,584
Limestone for flux	"	248,750
Coke for fuel	"	471,493
Value of do.		$2,237,039
Charcoal for fuel	bush.	1,133,419
Value of do.		$107,675
Pig iron product	tons	447,351
Value of do.		$6,975,418
Steel product	tons	331,321
Value of do.		$7,855,407
Workmen employed	No.	2,120
Wages paid		$1,443,904

At Welland, where cheap electric power is available, a considerable industrial development is going on. Among the plants established there is that of the Electro-Metals, Limited, where ferro-silicon is made from iron ore and silica (flint, sandstone and sand). The product contains about 50 per cent. silica. Some 4,343 tons of iron ore were used last year. Seven electric furnaces are operated and about 115 workmen employed.

In the following table are details of the iron and steel-making industry of the province during the last three years:

Schedule		1908	1909	1910
Ontario ore smelted	tons	170,215	220,307	143,284
Foreign ore smelted	"	342,747	543,544	678,890
Limestone for flux	"	179,741	226,991	248,750
Coke	"	322,817	436,707	471,493
Charcoal	bush.	......	973,413	1,133,419
Pig iron	tons	271,656	407,013	447,351
Value of pig iron		$4,390,839	$6,301,528	$6,975,418
Steel	tons	172,108	296,031	331,321
Value of steel		$4,397,082	$6,759,960	$7,855,407

In 1906 the value of the steel was $4,202,278.

◆

STATUS OF MICA INDUSTRY.

Condition of Market Shows Better Tendency—Canadian Mica for Electrical Purposes.

The condition of the mica market, though inclined to show a slightly better tendency, towards the latter part of 1910, has not conduced to any great activity on the part of operators during the past few years. Some few of the large owners are continuing to work, but practically all the smaller mines are idle.

A peculiar feature is, that while in the Quebec mica districts mining was declared to be unprofitable under present mining conditions, operators in Ontario, while admitting that prices were low, yet contrived to find a satisfactory enough market to enable them to continue working their properties, and even to consider the re-opening of mines which have been idle for some years. The cause of this divergence of opinion is difficult to arrive at, since wages and general mining expenses are, if anything, lower in Quebec than in Ontario.

Owing to this inactivity amongst mica-miners, says Mr. H. S. de Schmidt, M.E., in a report to the Mines Branch, Ottawa, fully 80 per cent. of the mines visited were found to be idle, and the pits more or less full of water, and consequently inaccessible.

Canadian Mica for Electrical Purposes.

Although in the past, Canadian producers have, for the most part, seemed to be content with the market provided by the United States, shipments are now being made in increasing quantity to English consumers, and inquiries were often made during the past season as to names and addresses of buyers in the United Kingdom.

While appreciating the superiority of Canadian amber mica for electrical purposes, English and Continental manufacturers nevertheless still procure the greater part of the mica they require from India.

Subjoined are tables showing the amount of mica imported into the United Kingdom during the past five years from Canada and India respectively, and also the imports of Canadian mica into the United States for the same period.

It is worthy of remark that, while the yearly average unit value of the Indian mica imported into the United Kingdom in the five years—1905 to 1909—shows a maximum variation of $119.44, that of the Canadian mica similarly imported reaches the high figure of $691.97.

Can Always Be Depended Upon.

The comparatively small difference in the case of the Indian mica is doubtless due to the standard quality of the mineral, which varies little in color and general character (elasticity, brittleness, etc.), whereas the amber mica possesses all these attributes in greatly varying degree—its price varying accordingly.

It is due to the fact that the Indian mica can always be depended upon to be of the same standard quality, that buyers in the United Kingdom have generally preferred this variety to the amber which can seldom be relied upon, even in a single shipment, to be of uniform grade and color.

Canadian producers, while realizing this, yet appear reluctant to fall in with the wishes of the British market, and cannot agree to the request of prospective purchasers in the United Kingdom to furnish shipments which are uniform in quality with samples submitted by them.

There can be no doubt that, could a satisfactory system of sorting be devised and agreed upon amongst mica dealers, the market relations and conditions between Canada and Great Britain would be materially improved.

MONTREAL STREET RAILWAY.

Is the Franchise Perpetual—Montreal City Treasurer has Resigned—Mr. Arnoldi is Probable Successor.

Monetary Times Office,
Montreal, Nov. 15th.

The resignation of Mr. William Robb, City Treasurer of Montreal, is in the hands of the Board of Control. City Treasurer Robb has so long been in control of the finances of Montreal that the citizens feel as though they were venturing out on thin ice in paying over their money, now that Mr. Robb will no longer have his quarters at the City Hall. About a year ago Mr. Robb gave his first intimation that his resignation was likely to take place in the near future. The city will retain his valuable services until the end of the present year, when Mr. Robb will go on a pension of three-quarters of the city treasurer's salary.

Mr. Robb is now 77 years of age. He has been in the employ of the city for 47 years, and for the past twenty has held the post of city treasurer. The citizens have always felt that there was one man in whom they could absolutely trust, because City Treasurer Robb has not only always inspired confidence, but has always deserved it.

Religious Institutions and Tax Exemptions.

Mr. C. Arnoldi will probably be Mr. Robb's successor. Mr. Arnoldi is well known in Montreal having been born and educated here. He has had considerable experience in financial, brokerage, commercial and banking offices. He has been in the employ of the city for a number of years and for some time has been receiver of taxes and assistant treasurer.

During his long service with the city Mr. Robb has been of very great assistance in guiding the policy at the city council. He has endeavored to adjust taxation in such a way as to make it fall more equitably upon the ratepayers. Particularly has he aimed to do away with as many of the exemptions as possible, and suggested that even if the various religious institutions were exempted from taxation for some years, they should recognize the claims of the city when disposing of their property at largely enhanced values. He has been a strong advocate of placing the water taxes upon the owner of the property rather than upon the tenant, it being his opinion that to cut the water off from the tenant was a very great hardship.

Board of Trade and Street Railway.

The Montreal Board of Trade adopted a resolution to be addressed to the city council and board of control at its monthly meeting, opposing the plan of re-organization of the Montreal Street Railway, or Montreal Tramways Company. The resolution says:—"That, after duly considering the proposed amalgamation of the Montreal Street Railway Company, Montreal Park & Island Company, the Montreal Terminal Railway Company, and the Public Service Corporation, and the acquisition of these companies by the Montreal Tramways Company, together with the method by which the Tramways Company proposes to finance the same for the purpose of such acquisition, the council of the Board of Trade finds itself in complete accord with the conclusion of the report thereon of the Board of Commissioners, which states that while not objecting to the consolidation of all the existing lines in question, to be operated under one contract or franchise to be mutually agreed upon, and on such a basis as will offer an assurance that the interests of the city will be protected, the council considers that, for the reason stated, the scheme submitted to the Public Utilities Commission of the province of Quebec for their approval, is not in the interests of the city, and recommends that it should be opposed."

This resolution is a little late, in view of the fact that the merger has already been allowed by the Public Utilities Commission.

Is the Railway Franchise Perpetual.

One of the most interesting points in the judgment of the Public Utilities Commission, is that concerning the point of law between the city and the company, as to whether or not the company's franchise is practically perpetual as claimed by Mr. C. H. Cahan, counsel for the company. Chief Commissioner Hibbard, although referring to the matter, left it an open question. This point was not the one at issue in the recent argument before the commission, but Colonel Hibbard, chairman of the commission, nevertheless referred to it and said that the commission would not make any decision upon the matter. Colonel Hibbard's comments indicate that the company's position would be a fairly strong one

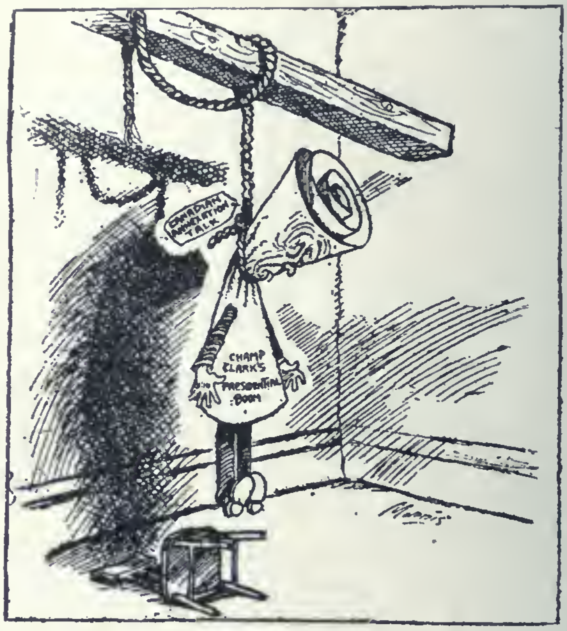
The franchise gave to the company exclusive operating rights for thirty-five years and provided that after that period the city shall have the right to expropriate the property upon giving six months' notice. Should this option not be acted upon, the franchise automatically renews itself for a period of five years, and for each period of five years thereafter, constituting, so far as the Tramways Company is concerned, what amounts to a perpetual franchise. The city's contention is that the franchise expires at the end of thirty years and that the city, if so disposed, will then be free to negotiate with another company. While the ruling of the Utilities Commission leaves this a debatable question, the ultimate decision of the point can have no immediate effect upon the fortunes of either the company or the city.

◆

AMERICAN VIEW OF CHAMP CLARK.

Last week The Monetary Times referred to Mr. Champ Clark's repeated annexation utterances, closing the reference with the following words:—

"In short, Mr. Champ Clark is tactless, and his humor is not appreciated. He should forsake the gavel in the American House and resume one of his former avocations, preferably farming, which has wonderful effect in absorbing exuberant verbosity. Mr. Champ Clark as president of the United States would be the greatest presidential error made in any country. We feel sure the people of the republic will endorse that opinion when nomination day arrives."



The accompanying cartoon entitled "The Suicide" from the Spokane Spokesman Review, tends to show that Mr. Clark has already kicked the presidential chair possibilities from under his feet.

◆

INSURANCE MEN IN COURT.

"That they did within the past three years conspire to deceive the Government inspector of insurance to obtain a license to operate the Crown Fire Insurance Company."

This is the charge against Mr. J. K. Brodie, vice-president, and Messrs. J. C. Wilgar and E. M. Carroll. Three summonses were issued in Toronto on Monday. A week's adjournment of the case was made. The insurance laws require a subscribed capital of $300,000 and a paid-up capital of $30,000 in order to bring about the formation of an insurance company, and it is alleged by the police that this company claimed its license to operate in Ontario before obtaining the necessary paid-up capital.

Messrs. E. M. Carroll and Olsen Miller are also charged with false pretences in connection with the Insurance Brokerage and Contracting Company. It is alleged that they did business in Ontario without the necessary license. Mr. Charles E. Ring was charged with conspiring with Messrs. E. M. Carroll and Olsen Miller to obtain $500 from Messrs. Phillips Bros. by false pretences.

Objection was made to Mr. W. G. Wright being appointed liquidator of the company. Mr. G. T. Clarkson has been appointed in that capacity.

The Royal Bank of Canada has opened sub-branches at Lacombe, Alta., and Blackfalds, Alta.

BRITISH COLUMBIA.

General Complaint at Western Contracts Being Awarded to American Firms—Protest Against the Companies Act.

(Staff Correspondence.)

Vancouver, November 11th.

Many contracts in Western Canada are being given to contractors in the United States. The Conservative Government of British Columbia has not hesitated to let a large paving contract to an American firm. When Granville Street was paved from the city limits to Eburne, a distance of four miles or more, last year, the government and the Point Grey municipality each paid half. The firm was the Columbia Bitulithic Company, which for purposes of convenience has offices in Vancouver, though it is virtually and thoroughly American. This is one particular instance in which the government is concerned though there are others.

The government might easily protest against the letting of large railway construction contracts to American firms, since it guaranteed the bonds of the Canadian Northern Pacific. The latest is the award to Messrs. Tuohy Brothers Company, of Portland, Oregon, of a $5,000,000 contract on the section of the Canadian Northern Railway beyond Kamloops.

With considerable development going on in British Columbia, Americans, ever on the alert, see the opportunities for business on this side of the line and are on the spot when there is big money. They either incorporate a local company, naming as directors prominent men on the right side of politics, but the real seat of operations is either in Seattle or Portland, where the head offices are located. Sometimes they register as extra-provincial companies. This expense is not large, but it enables them to take the business from Canadians who pay in every instance, not even in many cases getting labor out of it. Material and everything else is brought from the other side.

Americans Are Awarded Lumber Contracts.

It was only a few months ago that the Grand Trunk Pacific awarded immense lumber contracts to mills in Washington State, though later, perhaps having sensed the feeling of disapproval which existed, it gave a large contract to the mills at Chemainus, Vancouver Island. These mills are American owned, though operated in Canada. Even at that western people would not mind, for it would be pretty hard to award a large lumber contract to a mill that had not American capital. It is only reasonable when Americans come here and invest large sums of money that they should get a share of the business. In this instance they do, but in the instance of paving and railway contracting companies, they invest nothing, and everything they need is generally brought from the United States, so that Canadians lose in every way.

American engineering firms are getting nearly all that is going. One of the latest is the award to Messrs. L. M. Rice & Company, a Seattle firm with an office in Vancouver, of the reclamation of 30,000 acres at Sumas Lake, Chilliwack district. The cost will be about a million dollars. Here again, the provincial government, having an abhorrence of things American, will pay a portion of the cost, and the owner of the land will pay the rest.

Protest Against the Companies Act.

When the Taxation Commission resumed its sittings in Vancouver this week, Mr. E. W. Wegenast, representing the Canadian Manufacturers' Association, appeared before it to protest against the Companies Act, holding that its provisions are a restriction upon trade. Mr. Wegenast argued against the Act, advocating its repeal. He stated that if there was no legislative remedy, wiping out the offending clause, the courts would be asked to declare the act ultra vires; and failing that the provinces would be asked to retaliate against one another.

At the last sitting of the Commission in this city, representatives of the lumber industry stated that they were taxed too heavily. Mr. R. H. Alexander again pointed out that he thought the industry was paying more than its just proportion of taxes. Further, he said that remedies should be afforded as regards the assessment of income and personal property. The present system favored the business man as against the manufacturer. On a capital of $100,000, for instance, the commercial man paid $100, while the manufacturer was assessed $500, just because his capital was invested in a different manner in regard to profits.

It was stated that the present system of taxation operated against the conservation of natural resources. Coal was instanced by Mr. J. J. Plummer, of the Nicola Coal and Coke Company. Now the best coal had to be picked out and the other left, thus spoiling the mines.

Investors interested in interior development will be able to secure official information of the country lying between Ashcroft and Prince Rupert, from the report just made by Mr. R. Trendor, assistant provincial timber inspector. Mr. Trendor has completed the first trip of inspection of the timber lying in that portion of the province and incidentally has reported on the country in general. This year the cost of supplies was high, oats being $160 a ton and hay $80 a ton. Next year should see a difference, as settlers recently gone into the country will be raising large quantities of supplies.

Development of Vancouver is steadily proceeding, the latest evidence being the application by the Canadian Pacific Railway for a charter for a line to run to the northern end of the island. Active work will be begun next spring on the extension from Comox to Campbell River, the fishing resort.

PERSONAL.

Mr. Solman White, K.C., Mayor of Cobalt, Ont., is dead.

Mr. W. T. R. Preston, Canadian Trade Commissioner in Holland, has resigned.

Mr. W. A. Rothwell of Calgary has been appointed Publicity Commissioner of Bassano, Alta.

Mr. T. L. L. Lewis, the well known manager of the Northern Life Assurance Company, Winnipeg, is dead.

Mr. Crawford Gordon of Winnipeg has been appointed assistant manager of the Canadian Bank of Commerce, Winnipeg.

Mr. Arthur Hawkes of Toronto has been appointed Special Commissioner for the Department of Immigration, Ottawa.

Mr. Furniss, manager of the Levis, Que., branch of the Bank of British North America, has been transferred to Verdun, Que.

Mr. Peter Kennedy, treasurer of Lindsay, Ont., has resigned his position to become manager of the Home Bank in Lindsay.

Mr. T. W. Sheffield, formerly publicity commissioner at Regina, Sask., has taken charge of the British Investment Department of Messrs. Tracksell, Douglas & Company, Victoria, B.C.

The death has occurred at the age of 71, of Mr. Silas P. Wood, formerly manager of the British America Assurance Company and later president of the American Fire Insurance Company of New York, and manager of the New York office of the Western and British America companies.

RAILROAD AND COMPANY EARNINGS.

The following are the railroad earnings for week ended November 7th:—

	1910.	1911.	Increase or decrease.
C. P. R.	$2,267,000	$2,493,000	+ $226,000
G. T. R.	902,420	956,818	+ 54,398
C. N. R.	357,200	526,000	+ 168,800
T. & N. O. R.	22,549	39,493	+ 16,944
Halifax Electric	4,284	3,816	— 468

All departments of the Nova Scotia Steel and Coal Company show excellent outputs for October and in nearly every case they exceed the figures for September, which was a record month. The comparative outputs were:—

	Sept.	Oct.
Iron ore mined, tons	49,336	52,675
Coal mined, tons	69,128	75,521
Pig iron made, tons	7,605	7,253
Steel billets, tons	6,091	6,456
Bars and plate rolled, tons	4,133	4,718

Shipments of finished steel and forgings, October, 5,500, in September, 4,909 tons.

The sales of farm lands by the Canada Northwest Land Company during October amounted to 2,248 acres for $32,058, which is an average price of $14,34 an acre, against $13.42 last year.

There was a decrease in the amount of land sold during the month of about 3,200 acres, as the company is not pressing this land for sale, for the reason that by holding the land it will steadily increase in value, while, of course, sufficient is being sold to supply a reasonable sum to return to the shareholders whose shares have been repaid all but a dollar a share.

From January 1st, 37,441 acres have been sold for $517,983, giving an average price of $13.89, as compared with $12.13 last year.

GRAND TRUNK RAILWAY RESULTS.

Valuable Information is Contained in Directors' Report —Equipment Has Been Increased.

On June 30th, 1911, the Grand Trunk Railway had tracks and sidings aggregating 5,562 miles. There are more than 1,000 miles of branch lines of the Grand Trunk Pacific under construction in Manitoba, Saskatchewan and Alberta. These and other interesting facts are contained in the pamphlet report of the Grand Trunk Railway for the half year ended June last, just issued.

Revenue Comparison for Half-year.

The revenue for that half-year compares as follows, shillings and pence omitted:—

	June 30th, 1910.	June 30th, 1911.
Gross receipts	£3,321,636	£3,561,181
Deduct—Working expenses, being at the rate of 73.81 per cent. as compared with 73.94 per cent. in 1910	2,456,065	2,628,205
Net traffic receipts	£ 865,571	£ 932,976
Balance of income from rentals, outside operations, and car mileage	Cr. 58,089	Cr. 22,431
Total net revenue	£ 923,661	£955,407
Add—Amount received from the International Bridge Company.	16,013	16,012
Interest on bonds of Central Vermont Railway	6,507	6,506
Interest on securities of controlled lines and on St. Clair Tunnel bonds acquired by the issue of Grand Trunk four per cent. debenture stock	62,483	62,510
Balance of General Interest Account	38,302	51,937
Net revenue receipts	£1,046,966	£1,092,374

Dividends and Gross Receipts.

Adding the balance of £9,105 5s. 5d. at the credit of net revenue account on December 31st, 1910, to the surplus for the past half-year of £362,997 2s. 7d., the total amount available for dividend is £372,102 8s. od., from which the directors recommended the payment of the following dividends, viz.:—

	£	s.	d.
Four per cent. guaranteed stock	£211,811	1	11
First preference stock	85,420	15	0
Second preference stock	63,210	0	4
	£360,441	17	3

leaving a balance of £11,660 10s. 9d. to be carried forward to next half-year's account.

The following table exhibits a comparison of the receipts for the half-years ending the 30th June, 1910 and 1911.

Description of Receipts.	1910. £	1911. £	Increase. £
Passengers	884,274	944,570	00,296
Mails and express	146,426	156,656	10,230
Freight and live stock	2,186,027	2,347,954	161,927
Other receipts	104,909	112,002	7,093
	£3,321,636	£3,561,182	£239,546

Increase in Train Mileage.

The average rate per ton per mile on the entire freight business was 0.69 of a cent, compared with 0.67 of a cent in the corresponding half-year.

The working expenses, including taxes, amounted in the half-year to £2,580,641 or 72.47 per cent. of the gross receipts, as compared with £2,409,690 or 72.55 per cent.; an increase in amount of £170,951, but a decrease in the proportion to the gross receipts of 0.08 per cent.

The gross receipts for the half-year show an increase of £239,546, or 7.21 per cent.; the working expenses, including taxes, an increase of £172,140, or 7.01 per cent.: and the train mileage an increase of 832,967 or 8.72 per cent.

Expenditure on Capital Account.

The total charges to the capital account for the half-year amounted to £341,327 19s. od. Of this sum £9,077 1s. 11d. was discount and commission on four per cent. consolidated debenture stock and four per cent. guaranteed stock issued during the half-year.

The expenditure on Capital Account in respect of new works, new rolling stock, double track and land purchased, was as follows:—

	£	s.	d.
New works	112,705	0	11
New rolling stock	205,682	19	7
Double track	2,828	12	9
Land purchased	11,034	3	10
	£332,250	17	1

Equipment has been Increased.

The equipment has been increased during the half-year by the purchase of 1,000 steel coal cars, the cost of which, amounting to £205,682 19s. 7d., has been charged to capital account.

During the half-year 18 Pacific type passenger engines, 5 first-class cars, 1 steam motor car, and 2 road levellers have been built in the company's shops, and 12 freight engines and 840 box cars were purchased on revenue account.

Canada Atlantic Railway.

The following summary shows the results of the half-year's working of the Canada Atlantic Railway compared with the corresponding period of 1910:—

	30th June, 1910.	30th June, 1911.
Gross receipts	£192,977	£205,069
Working expenses	169,500	188,098
Net traffic receipts	23,477	16,971
Balance of income from rentals, outside operations, and car mileage	4,586	7,025
Total net revenue	£28,063	£23,996

The interest charges for the half-year were £65,753, against £63,029, so that there was a net revenue deficiency of £41,757, compared with £34,966 in 1910. This deficiency is debited in Account No. 8.

The number of passengers carried during the half-year was 254,062, against 253,594, an increase of 468, or 0.18 per cent.; and the passenger receipts, including mails and express receipts, were £44,185, against £42,560, an increase of £1,625, or 3.82 per cent.

The quantity of freight moved was 833,704 tons, against 749,476 tons in 1910, an increase of 84,228 tons, or 11.24 per cent.; and the receipts from freight traffic were £144,928, against £133,583, an increase of £11,345, or 8.49 per cent.

Grand Trunk Western Railway.

The following summary shows the results of the half-year's working of the Grand Trunk Western Railway compared with the corresponding period of 1910:—

	30th June, 1910.	30th June, 1911.
Gross receipts	£643,457	£661,759
Working expenses	509,571	549,482
Net traffic receipts	133,886	112,277
Balance of income from rentals, outside operations, and car mileage	Dr. 55,872	Dr. 53,263
Total net revenue	£78,014	£59,014

The net revenue charges for the half-year were £92,187, so that there was a net revenue deficiency for the half-year of £33,173, which with the net revenue deficiency of £3,225 for the half-year ending 31st December, 1910, makes a total deficiency for the year of £36,398, and deducting therefrom the credit balance at 30th June, 1910, of £4,937, there remains a net revenue debit of £31,461 at the 30th of June last, which amount is carried forward to the current year.

Passengers and Freight Carried.

The number of passengers carried during the half-year was 995,116, against 991,153, an increase of 3,963, or 0.40 per cent.; and the passenger train receipts, including mails and express receipts, were £202,176, against £198,224, an increase of £3,952, or 1.99 per cent.

The quantity of freight moved during the half-year was 1,941,374 tons, against 1,937,841 tons, an increase of 3,533 tons, or 0.18 per cent., and the receipts from this traffic were £444,898, against £430,419 in 1910, an increase of £14,479, or 3.36 per cent.

The results of the half-year's working of the Detroit, Grand Haven, and Milwaukee Railway, compared with the corresponding period of 1910, were as follows:—

	30th June, 1910.	30th June, 1911.
Gross receipts	£199,488	£205,050
Working expenses	167,654	189,230
Net traffic receipts	31,834	15,820
Balance of income from rentals, outside operations, and car mileage	Dr. 29,401	Dr. 18,524
Total net revenue	£2,433	Dr. £2,704

Some Interesting Figures.

The net revenue charges for the half-year were £36,981, against the same amount in 1910, so that there was a net revenue deficiency of £39,685, as compared with £34,548 for the corresponding period of 1910.

The number of passengers carried during the half-year was 373,757, against 371,303, an increase of 2,454, or 0.66 per cent.; and the passenger receipts, including mails and express receipts, were £55,511, against £54,685, an increase of £826, or 1.51 per cent.

The quantity of freight moved was 1,192,105 tons, against 1,140,815 tons in 1910, an increase of 51,290 tons, or 4.49 per cent.; and the receipts from freight traffic were £129,825, against £127,616 in 1910, an increase of £2,209 or 1.73 per cent.

Grand Trunk Pacific Railway.

The track has now been laid to Fitzhugh, a distance of 111 miles from Wolf Creek (the end of the prairie section), and 1,027 miles from Winnipeg and nearly 1,500 miles from Fort William on Lake Superior. Fitzhugh is within 18 miles of the summit in the Yellowhead Pass of the Rocky Mountains, and considerable grading beyond has been done as far as Tête Jaune Cache. From Prince Rupert on the Pacific Coast, the grading has been practically completed to Hazelton, a distance of 185 miles, and considerable work has been done between that point and Aldermere, a further distance of about 60 miles. The laying of the track east of Van Arsdol (the present end of the track from Prince Rupert) has been delayed owing to certain difficulties in the construction of the tunnels and the proposed bridge 16 miles below Hazelton across the Skeena River. It is expected the tunnel work will be completed by November, and there is every probability that the bridge will be finished before June of next year. The contract for the remaining portion of the main line between Aldermere and Tête Jaune Cache, a distance of 410 miles, has been let. The whole of the main line has, therefore, now been contracted for.

The branch lines, Melville to Yorkton and Canora, and Melville to Regina (the capital of Saskatchewan), have been practically completed, and satisfactory progress has been made with the branches from Regina to the United States boundary, Regina to Moose Jaw, Biggar to Calgary, Tofield to Calgary, and the Prince Albert and Battleford branches.

◆

NEWS AND NOTES.

The Graham Island Timber and Coal Syndicate is diamond drilling its coal lands on Graham Island, eighteen miles inland from Masset Inlet. A line of railway may be built and the deposits developed.

The Board of Trade at Nanaimo has been reorganized with an active membership of forty-seven. Officers are: President, Mr. Herman Mahrer; vice-president, Mr. E. H. Bird; secretary, Mr. W. F. Norris; treasurer, Mr. J. M. Rudd.

On December 9th the Union Trust Company, liquidators of the Central Canada Meat Packing Company, Limited, will sell the assets of the company. The concern was formerly known as Malcolm's Western Canneries, and its history is well known to readers of The Monetary Times. The plant is located in Medicine Hat, Alta., and is said to be equipped with all modern machinery.

Mr. J. C. L. Martigny, chief provincial ranger of the Catholic Order of Foresters, has sent a circular to every member of the order, calling attention to the increase in subscriptions. The rates have been raised according to the schedule fixed by the Fraternal Congress, which amounts to four per cent. interest to be levied on each man from the date of his entrance into the order, this increase to come into force January 1, 1913.

A large party of Manitoba men visited the Slocan district of British Columbia to look over mine prospects. The party included Premier Roblin; Hon. Hugh Armstrong and Judge Marshall, of Portage la Prairie; Messrs. W. A. Cousins, Medicine Hat; J. C. I. Bremner, Clover Bar, Alta.; Joseph H. Morris, Edmonton; L. S. Vaughan, Selkirk; R. L. Richardson, Capt. H. T. Cairns, Hugo Ross, G. H. Walton, W. J. Clubb, Chas. H. Forrester, Oswald Montgomery, A. P. Cameron, Henry Bryant and M. J. Rodney, all of Winnipeg.

PUBLIC UTILITIES COMMISSION JUDGMENT

In Montreal Street Railway Amalgamation Suit — Arrangement Not Detrimental to Public Welfare.

The Public Utilities Commission in an elaborate judgment declared last week that after having examined all the facts of the proposed merger of the Montreal Street Railway Company, the Montreal Terminal Railway Company, the Montreal Park and Island Railway Company and the Public Service Corporation, they did not see any reason to interfere with the amalgamation.

This may be considered as a final decision and the result is that the intervention of the city has been dismissed.

Text of the Judgment.

The following is the complete text of the judgment as read by Chairman Hibbard of the Public Utilities Commission:—

The Montreal Tramways Company, incorporated under Act of the Quebec Legislature, 1st George V., 2nd session, chapter 77, makes application to the Commission to approve an agreement between the company and the Montreal Street Railway Company for the acquisition of the property, rights, contracts and franchises of the latter Company, and, through it, those of the Montreal Park & Island Railway Company, Montreal Terminal Railway Company and Public Service Corporation. The proposed agreement is submitted with the application and is attached hereto. The authority of the Commission is sought in virtue of the preamble and Sec. 19 s.s. 12 of the Act above referred to.

The preamble of the Act recites, that owing to the growth of population of the Island of Montreal, and the annexation of contiguous municipalities by the city, there has come about an urgent demand for improved means of communication such as the present companies cannot supply and which can best be effected by the amalgamation of the four companies in question, namely, the Montreal Street Railway Company, the Montreal Park and Island Railway Company, the Montreal Terminal Railway Company and the Public Service Corporation, to be under the control of the Council of the City of Montreal in so far as the lines in question are in the city as now constituted or hereafter extended. Under Section 11 of the Act the Montreal Tramways Company is authorized to acquire the undertaking and property of the four companies including all of their rights, charters, franchises, etc.

Montreal Street Railway Have Controlling Interest.

Of these Companies, two, namely, the Montreal Park & Island Railway Company and the Montreal Terminal Railway Company, come under the provisions of law respecting Federal Railways and the Act in question does not purport to give them authority to enter into the proposed merger. Such authority is granted under Section 13 of the Act to the remaining two companies, namely, the Montreal Street Railway Company and the Public Service Corporation. Section 19 of the Act provides the necessary authority on the part of the Tramways Company to acquire by various titles the property, rights and holdings of other companies carrying on any business authorized to this company, and under s.s. 12, the approval of the Commission to any such agreement of acquisition is made necessary.

Application was made to the Commission that before passing upon the agreement representations on behalf of the City of Montreal and certain minority shareholders of the Montreal Street Railway Company should be heard. The Commission declared its readiness to hear such representations as might be made to it on the part of the interested municipalities, representative public bodies, the companies interested and shareholders. For this purpose the Commission sat on the 24th and 25th of October and heard argument on the part of the City of Montreal and of Honorable F. L. Beique, a large shareholder, directed against the approval of the agreement, and on the part of the Tramways Company in reply.

As will be seen upon a reference to the proposed agreement submitted, the Montreal Street Railway Company undertakes to transfer the property, rights, franchises, etc., of the remaining three companies as well as those belonging to it to the Tramways Company for the consideration stated below. The undertaking of the Montreal Street Railway Company respecting the other three companies is in virtue of its possession of an absolute or controlling interest in these companies and the transfer provides for an absolute vesting of all the property, rights, franchises, etc., of the four companies concerned.

As a consideration for this transfer the Tramways Company agrees to pay $1,147,000.00 in satisfaction of the outstanding liabilities of the Public Service Corporation, to assume all liabilities and undertakings of the remaining three companies and to provide for each five shares of the Montreal Street Railway Company outstanding, $438.75 in cash, $800.00 of five per cent. debenture stock and $100.00 of common stock. As the outstanding capital of the Montreal Street Railway Company is $10,000,000.00 at par, the foregoing would represent $8,775,000.00 in cash, $16,000,000.00 of five per cent. debenture stock and $2,000,000.00 in common stock. In order to provide the necessary cash it is proposed to issue $9,000,000.00 of five per cent. first mortgage bonds, the sale of which has been contracted for at a price of 95. In justification of this undertaking on the part of the Tramways Company it is pointed out that the stock of the Montreal Street Railway Company is worth at least $230.00 per share and has for the greater part been acquired by present holders at that price or more.

Representations of the City.

Upon the other hand it has been urged upon us that a proper valuation of the stock issued by the company is the return paid into the company, and this would be approximately $10,000,000, leaving any sum or consideration paid in excess of that sum unjustifiable and an obstacle in the way of the city of Montreal and public in securing better accommodation and reduced fares. With more force it is also urged that to incur a largely increased bonded indebtedness for the purpose of a cash payment to the shareholders and the creation of a large amount of debenture stock will seriously hamper the future financing of the company, and make it difficult for it to provide for the betterments and extensions to its service, which appear to be urgently demanded. It is also pointed out, as is a fact, that the effect of the arrangement, if carried through, will be to impose an annual interest and dividend charge upon the company in excess of what is now being paid and without any corresponding material benefit to the company. These representations were voiced by the city of Montreal as properly representing the public interest in the matter, and were further emphasized by the Honorable Mr. Beique.

Merger Would Promote Greater Efficiency.

It is admitted upon all sides that the proposed amalgamation as such is at least highly advisable, and, if brought about under proper conditions, likely to be most serviceable in promoting better means of communication upon the Island of Montreal and greater efficiency in their operation and control. This concession only lends force to the conclusions to the same effect set forth in the preamble of the act, which are obvious to all interested and concerned in such means of communication.

It is quite evident to the Commission that what is sought under the provisions of the act is the acquisition of a property which will provide practically all the means of electric or tramway communication now existing upon the Island of Montreal, with the franchises and other rights of operation, with a view to these being extended and improved as the demands of population may justify or require. The Commission also feels that its duty in respect of the proposed arrangement is to see that an unduly excessive price is not paid for the property, or the means for providing the consideration made so onerous as in either case would prejudice the public interest.

Assets and Liabilities of the Company.

To deal with the question of the value being transferred first, the certified returns of the Montreal Street Railway up to the 30th of June, 1911, show the following statement of assets and liabilities:—

Assets.

Track and overhead construction	$5,057,319.65
Land, buildings, plant and equipment	3,856,032.38
Rolling stock	4,099,035.24
Cash and other assets	5,821,404.92
	$18,833,792.19

Liabilities.

Common stock	$10,000,000.00
Bonds	4,420,000.00
Capital from other sources	1,863.00
Miscellaneous	1,508,402.68
Surplus	2,903,526.51
	$18,833,792.19

Assets Above Estimates.

It will be seen from the foregoing that in respect of physical assets alone the Montreal Street Railway Company possesses a surplus of approximately $3,000,000.00, and, so far as our investigation can go without an appraisal of all the property of the company, which is neither called for nor under the circumstances possible, we believe it to be moderate and conservative. It is, for instance, represented that the value of the company's land is taken at cost and that owing to the great growth of population and spread of activity within the city of Montreal and its neighborhood this land has greatly increased in value. We have every reason to believe this to be the case, and that the physical assets of the company might be reasonably worth from $3,000,000.00 to $5,000,000.00 in excess of the figures shown.

With a view of determining the extent of investment in renewals of rolling stock and the like, the wear and waste upon which must be considerable, the Commission called for a statement showing the expenditure upon capital account during the past five years, which is as follows:—

Tracks and overhead construction	$ 899,916.47
Buildings and land	399,941.72
Rolling stock	1,259,514.96
Power plants	209,874.09
Miscellaneous	18,035.73
	$2,787,282.97

During this period the addition to the stock liability of the company was $1,000,000.00, or considerably less than the amount expended upon rolling stock alone. The conditions point to a moderate and conservative value of assets, and the statement thereof to be well within the mark.

Franchises are Valuable.

In addition to its physical assets, the Montreal Street Railway Company holds a franchise from the city of Montreal giving it the sole right to operate a street railway system within the limits of the city, as then constituted, for a period of thirty years from the first of August, 1892. Approximately eleven years of this franchise have yet to expire, and in addition this company directly or through its subsidiary companies holds exclusive franchises for various terms in municipalities now or formerly existing, and, in the latter case, forming part of the city of Montreal as now constituted. Some of these franchises are co-existent with that in the city of Montreal, but others are of much greater duration and their mere existence would be a serious obstacle to the successful operation of a street railway service on the part of the city of Montreal or any other company or person in succession to the present company. In this connection our attention has been drawn to section 42 of the contract between the city of Montreal and the Montreal Street Railway Company. It is cognate to this enquiry, but not directly in point that we should find upon the meaning of this section of the contract which deals with the taking over of the property of the company by the city upon the expiry of the franchise, and which reads as follows—

What the Agreement Calls for.

"Article 42nd.—It is agreed between the said city and the said company that the present arrangement or contract for the establishment and operation of the said electric railway shall extend over a period of thirty years from the first of August, eighteen hundred and ninety-two. At the expiration of the said term of thirty years, and at the expiration of every term of five years thereafter the city shall have the right, after a notice of six months to the company, to be given within the twelve months precedin~ the expiration of the said thirty years, and also after a like notice of six months at the end of every subsequent five years, to assume the ownership of the said railway and all its real estate, appurtenances, plant and vehicles belonging to the company, and necessary for the operation of its line on payment of their value, to be determined by arbitrators, together with an additional ten per cent. thereon, said arbitrators to be appointed as follows, viz.: One by the company, one by the city, and the third by a judge of the Superior Court, sitting in and for the district of Montreal. (Section 36)."

Without formally ruling upon the question as a matter of law, it does at least appear to us that the agreement calls for an appraisal of the company's physical assets as the property of an active going concern with whatever value attaches thereto.

Must Consider Real Values.

It has been urged upon us that we should not take into account values arising from grants of the exclusive use of the public streets, etc., for tramway operation. We fail to see how such value can in equity be ignored. Rightly or wrongly, wisely or unwisely, such rights and exclusive franchises have been granted to one or other of the companies concerned, and for a supposedly valuable consideration. Subject to the maintenance of the service and rates required, and it is in no way contended any of the companies concerned have failed in their contractual obligations, these franchises are the undoubted property of the company interested, and their value must be taken into consideration. What that value may be we have no means of determining, but it is not an unfair test of the value of the total holdings of the Montreal Street Railway Company whether of physical property, earning powers or franchises, that the outstanding capital stock of the company is appreciated at approximately $23,000,000, according to current prices upon the stock exchange.

Importance and Consequent Value of Franchises.

As an instance of the importance and consequent value of the franchises held or controlled by the Montreal Street Railway Company, it is admitted in argument that they are such as to render the assumption and operation by the city of Montreal of that part of the company's system which would have the right to take over in 1922, a practical impossibility. As before remarked, we have nothing to do with the reasons and conditions which brought about the present state of affairs, and so far as we have to appreciate the value of the assets being conveyed to the Tramways Company we would not be justified in ignoring the rights as well as the property legally vested in the persons conveying them. As the matter has been presented to us upon that basis we are of opinion that the assets of the Montreal Street Railway and the other companies, which it is proposed to vest in the Montreal Tramways Company, are not unreasonably worth the sum of $23,000,000 in excess of liabilities to other than shareholders of the Montreal Street Railway Company.

Proposed Prices Not Unfair.

Having come to this conclusion we have next to enquire whether the price proposed to be paid, viz., in effect, $9,000,000 in bonds, $16,000,000 in five per cent. debenture stock, and $2,000,000 in common stock of the Tramways Company, or a total of $27,000,000 at par, is not in excess of the values being conveyed to that company. It is represented to us that the debenture stock will have a value not exceeding 80, and the common stock a value of not over 40. What these values may actually be we are not concerned to minutely enquire. It is admitted that the public interest is concerned in seeing that watered or fictitious values are not created to be made the basis of concessions and consideration from the public upon the score of innocent third holders.

Now, whether the proposed issues are worth slightly more or less than values quoted is not germane to this view of the matter. If worth par an excess of $4,000,000 is created which would not be justifiable, but taking into account that the bonds which are practically a first charge upon all of the company's assets to be acquired have been disposed of through a foreign financial house at 95, it would be absurd to accord a greater value to securities following these in a secondary and third degree. We have remarked that these bonds will be practically a first charge upon the company's property, but it must be borne in mind that there is an outstanding issue of some $4,420,000 of presently existing bonds, and what is proposed is to issue sufficient new bonds to redeem these as they mature, and provide the above sum of $8,775,000 for the Montreal Street Railway Company stockholders.

Whether the prices cited to us of 80 for the debenture stock and 40 for the common stock are excessive or otherwise there is no means of accurately determining. Taking into account the selling price of the bonds, viz., 95, we are disposed to think the estimate is not too low.

Public Interest Not Menaced.

Whatever, therefore, may be the actual value of the stocks to be issued to the Montreal Street Railway Company shareholders, we are of opinion they do not involve such fictitious creations of a nominal value as to be objectionable upon the grounds of public interest. We are far from implying any such reproach in the present instance, indeed we are sincerely convinced to the contrary, but as a good deal of publicity has been given to the present matter, we may be permitted to generalize somewhat beyond the scope of the record.

It has heretofore been assumed that fictitious or watered stock issues, which have found their way into the hands of investors, who have honestly paid good value therefor, should be considered by public authority where the interests of such investors are concerned. Whatever may be the force and justice of this argument as applying to issues, antedating the authority of this Commission, we do not hold ourselves bound by any such consideration or practice in respect of any issues that may hereafter be made by public utilities whose rates or other matters fall within our control.

Objection again has been taken to the fact that the proposed arrangement involves an additional annual outlay to the interest and dividend charge which has been paid by the Montreal Street Railway Company for some time past, and maintaining it as a fixed and preferred annual charge upon the earnings of the Tramways Company. The fact is that for some time past the Montreal Street Railway Company has paid an annual dividend of ten per cent. upon its ten million dollars of outstanding capital, which would amount to $1,000,000.

Question Must be Considered by Facts.

Under the proposed substitution the interest upon the new bond issue will be $450,000, and $800,000 upon the debenture stock, a total of $1,250,000, or an increase of $250,000. In our consideration of the matter no feature of it has given us greater concern than this apparent burdening down of the annual income of the company. The question, however, must be considered in the light of the facts before us, and in any consideration of public welfare and interest, the lawful demands and vested rights of those who have placed their money in the company's enterprise must be equitably dealt with.

According to the statistical statement published by the Montreal Street Railway Company to its shareholders the net earnings of the company have increased from $776,979.07 in 1900 to $1,897,250.12 in 1910, an increase of over 140 per cent. In the same time the increase of capital stock has been $4,000,000, or approximately 70 per cent. In other words the increase of net earnings has been proportionately double that of the capital liability, and the annual dividend now being paid by the Montreal Street Railway Company is undoubtedly considerably less than the net earnings of the company would justify, even allowing for the increasing percentage upon gross earnings to be paid to the city of Montreal. It is to be noted, too, that in all of the years within the period cited the increase has been consistent and steady, and indications all point to further increase of earning power in the future. Under the present conditions of the contract complaint cannot be made that the company has accumulated a surplus of $3,000,000 in preference to paying a larger dividend to its shareholders. Either policy was open to it so long as its contractual obligations were observed which is not disputed.

It is also objected, and with no small show of reason, that the annual charge, increased as it is, will have a fixed and permanent character, as opposed to a dividend annually declared from surplus earnings. It must not be forgotten, however, there is also the obvious advantage of having the annual interest and dividend charge definitely liquidated and determined, and so long as it does not exceed the free earning capacity of the company, based upon actual experience, the amount cannot be fairly questioned.

Bonds Better Than Stocks.

It must also be borne in mind that the position of the company, should the project take effect, will be such as to practically compel a policy of issuing bonds and debenture stock, in order to provide for further extensions and improvements. Unless there is a very material change in the position and prospects of the Tramway Company it is unlikely that a further issue of common stock can be made at such prices as to warrant its sale as a means of securing capital. We believe it to be a commendable policy, which aims to secure the capital required for needed extensions and improvements by the issue of bonds and debentures at comparatively low rates of interest, in preference to the issue of common stock, which may come to justifiably demand far higher rates in dividends.

It must also not be forgotten that were the Tramways Company to issue an amount of its stock exactly corresponding to the present outstanding capital stock of the Montreal Street Railway Company, viz., $10,000,000, and effect the acquisition of the latter company's property, rights, and powers upon that basis, it would be free to meet its future requirements by the further issue of common stock to its shareholders at any price not less than par, notwithstanding its far greater value. There is no authority at present existing in this province whereby the disposal of stock or bond issues of public utility companies may be scrutinized and the terms fixed. Whether such authority should be given or not is a question of policy, which we have not to consider.

Arrangement Would not Prejudice Public Welfare.

Perhaps the most serious objection we have to consider is the creation of a large addition to the bonded indebtedness of the company in order to provide payment to shareholders for their stock, which may to a great extent hamper

(Continued on Page 2153.)

BUILDING STONES IN ONTARIO.

Concrete is Taking the Place of Stone for Heavy Construction—Causes of Decline in Production.

While a considerable amount of fairly good building stone will continue to be produced from the different formations throughout Ontario, Professor W. A. Parks, in a report to the Mines Branch, Ottawa, is of the opinion that, we must look to a development of the crystalline limestones, marbles, and granites, for a regeneration of the stone industry. Concrete is taking the place of stone for all heavy construction, and is rapidly replacing it for the cheaper types of building. With increase of wealth, the highest grades of stone are demanded for buildings of a monumental character. Most of our sandstones and limestones fall short of this standard, but when more is known of the crystalline limestones and marbles they will be more largely employed for structures of the highest type.

Use of Granite.

In the erection of fine buildings in the cities, there is a growing tendency towards the use of granite, which is likewise replacing limestone for monument bases. Modern quarrying methods and machinery have largely reduced the difference in cost of quarrying and working granite, as compared with the softer stones. In consequence, we may confidently expect to see a steadily increasing demand for granite. This demand can not be met either by the quality or the amount of granite at present produced in Ontario. Is it not a reasonable assumption that some at least of the numerous deposits of granite in the province will be able to supply the demands of the future?

It cannot be denied that there is a serious decline in the production of building stone. The chief cause for this decline, and the reasons for the present condition of the industry are tabulated below:—

(1) The use of cement for heavy construction, such as the building of bridges and canals.

(2) The use of cement blocks and artificial stone for architectural purposes.

(3) The cheap importation of Indiana limestone, and Ohio sandstone.

(4) The modern custom of erecting steel buildings, and facing them with terra-cotta, glazed brick, or artificial stone.

(5) The failure of the Medina brown stone.

(6) The increasing demand for granite, to which Ontario has failed to respond.

More Companies Wanted.

(7) The high wages demanded by stone-cutters, and the difficulty of procuring a sufficient number of competent men.

(8) The fact that most of the stone quarries are in the hands of very small operators, who work them only on receiving an order. In consequence, there is always a delay in delivery, and stone of a mixed character is shipped. These same owners do not devote their time to the stone business; it is merely incidental, hence receives little attention. If there were more strong companies actively and aggressively carrying on stone quarrying as a business, the cost of stone would be reduced, and the use of concrete, for architectural purposes, restricted.

◆

ANOTHER WORKMAN'S COMPENSATION CASE.

Mr. Justice Hutchinson, at Sherbrooke, gave his decision last week in a case in which C. F. Little sued F. G. Gale, under the Quebec Workmen's Compensation Act. The plaintiff alleged that he was working for defendant at the rate of $2 per day, and while so employed met with an accident by which he was permanently and partially incapacitated from work. The plaintiff asked that the defendant be condemned to pay him the sum of $25, being half the amount of the wages he lost, and also an annual rent of $97.50.

The defendant confessed judgment for the $25, for loss of wages, and for an annual rent of $39.40. This confession of judgment the plaintiff refused. Under section 23 of the Act, the plaintiff now petitioned the court to be granted a provisional allowance of 25 cents per day.

The court held that the plaintiff was only entitled to this daily allowance provided his demand for an annual rent was proved to be correct, that would be $97.50 per year. On the other hand if the defendant's contention as to rent was correct, he was only entitled to 10 cents per day. Until the amount of the annual rent had been determined plaintiff's petition could not be granted except for the amount of 10 cents per day, and this was too small an amount to be paid daily without causing trouble and inconvenience. The petition of plaintiff was therefore, dismissed, costs to follow final result of suit.

BIRTHS, MARRIAGES AND DEATHS.

Infant Mortality is High — Deaths Show Decrease, While Marriages Increase—Some Interesting Vital Statistics.

Vital statistics are always interesting, and the fortieth annual report of the province of Ontario is no exception to the rule. The figures are for the year ending December 31st, 1909, and the percentages are based upon an estimated population of 2,233,264. If the Government printing bureau could instil a little more vitality into their publishing business, the blue book would be of far greater value.

There were returned to the Registrar-General by the Division Registrars during the year 109,459 registrations, as follows:—Births, 54,465; marriages, 22,366; deaths, 32,628. The returns from the county of York, including the city of Toronto, are:—Births, 9,765; marriages, 4,293; deaths, 6,202, or a total of 20,260, being 17.5 per cent. of those received from the province.

The following are the returns since 1899:—

	Births.	Marriages.	Deaths.	Total
1899	44,705	16,514	28,607	89,826
1900	46,127	17,107	29,494	92,728
1901	46,061	18,035	29,608	93,704
1902	47,796	18,072	27,864	93,732
1903	48,642	19,830	29,664	98,136
1904	50,265	19,789	31,290	101,344
1905	51,911	20,426	31,371	103,708
1906	51,710	19,846	32,782	104,338
1907	53,584	21,915	33,502	109,001
1908	57,155	21,058	32,714	110,927
1909	54,465	22,366	32,628	109,459
Totals	552,421	214,958	339,524	1,106,903

Registration of Births Incomplete.

The registration of births are not by any means complete. Parents continue to be negligent in the matter of registering the births of their children. They are in many instances ignorant of how much value such a record may be in the future. Physicians often fail to make the notification required by law. Perhaps in some cases the younger members of the profession are not aware of the law. Steps are being taken to inform them of their duty in this respect.

The total number of births registered was 54,465, being a decrease of 2,690 from the previous year. The rate per one thousand of estimated population is 24.4.

The French and German settlers contribute more largely to the birth-rate than any other class of our people, judging from the higher ratios in those counties settled by them.

Marriages Show an Increase.

There were 28,312 males and 26,153 females, or 108 males to every 100 females. The largest number of births occurred in the month of March, and the smallest in December. Of 364 pairs of twins, 345 were males and 383 females. Of the three cases of triplets, 5 were males, and 4 females. The illegitimate children numbered 745, of whom 434 were males, and 311 females.

The 22,366 marriages registered in 1909, represent a ratio of 10 per 1,000, as against 21,915 in 1907, when the ratio was 9.8, which was the highest record of the past ten years; the average rate for the decade was 8.6. The rate for the immediate past decade was 8.8. The high marriage rates in Nipissing, Algoma, Rainy River and Thunder Bay are more apparent than real, from the fact of the population figures being incorrect; and the same remark applies to Welland, where the opening up of new industries has caused an abnormal increase of population.

Methodists First on the List.

The county of Essex still keeps up its reputation as a marrying county; the number of marriages being 2,508, equal to a rate of 41 per thousand. This extraordinary condition of affairs keeps up from year to year, this year being the largest on record. Many couples come over to Windsor or Sandwich, from Michigan and other States for various reasons, the chief factor being the laxity of the marriage law in this province, which grants a distinct favor to non-residents as opposed to residents who select the method of publication of banns, rather than that of marriage by license.

Classifying the marriages by the denominations of both the brides and grooms, it is found that the first on the list is the Methodist, with 12,765, after which the other denominations follow in the following numerical order: Presbyterian, 9,335; Anglican, 8,146; Roman Catholic, 7,402;

Baptist, 2,927; Lutheran, 1,579; Congregationalist, 453; Hebrew, 233; Evangelical Association, 263; Salvation Army, 188.

Of the two means under which clergymen and other authorized persons can perform the marriage ceremony, 19,917 were by license and 2,447 by banns.

Decrease in Deaths.

For the year 1909, the number of deaths registered was 32,628, being 86 less than those of the previous year. The death-rate per 1,000 of estimated population is the same as that of last year, viz., 14.6. The total number of deaths in the last ten years is 310,917. The average rate for this period is 13.9 per 1,000. The 19 cities contributed 11,068 deaths.

Of the total deaths, 1,836 were still births, of whom 1,013 were males, 748 females, and 75 of sex not stated. Of the remaining 30,792, there were 16,359 males, 15,143 females, and 38 of sex not stated. March gave the highest mortality (3,158) and June the lowest (2,378).

The deaths from diseases of the respiratory system were the highest in March, being 464, and the lowest in August, 116.

Deaths from diseases of the digestive system were highest in August (658) and lowest in February, 144. Deaths from "General diseases" were nearly level all through the year, the highest being in October (with 689) and the lowest in July, when 535 were reported. Of the 30,792 deaths the ages were not stated in 478 cases, leaving the total number classified under age groups at 30,314. Of these, not including, it will be understood, still births, the number of deaths in children under one year totals 6,932. Of these 328 died of epidemic diseases, 702 of disease of the respiratory system, 1,510 of disease of the digestive system, 3,038 of other diseases of early infancy, and 406 of ill-defined cases.

Infant Mortality is High.

Further considering the deaths in early infancy, we find that after deducting the still-births (1,836) and the number in which the age is not stated (478) there remain 30,314 deaths. Of these 6,932 are in infants under one year, a death-rate of a little larger than that of last year, being 22.76 per cent. One out of every 8 children born during the year died in the first year of life.

The following tables show the deaths of infants under one year old, also births for the same period in Ontario, still births not included:—

Deaths under 1 year.	Year.	Births.
5,482	1899	43,845
6,212	1900	45,176
5,435	1901	44,953
4,852	1902	46,645
5,435	1903	47,377
5,212	1904	48,575
6,071	1905	50,288
6,867	1906	50,172
6,295	1907	51,838
6,895	1908	55,388
6,932	1909	52,629

The deaths of infants under one year old, also births for the same period in the city of Toronto, still births not included, were as follows:—

Deaths under 1 year	Year.	Births.
777	1899	3,827
880	1900	4,350
711	1901	4,270
713	1902	4,873
827	1903	4,844
903	1904	5,028
935	1905	5,553
918	1906	5,708
975	1907	6,343
1,215	1908	7,618
1,410	1909	7,531

The infant mortality under 5 years of age, excluding still-births, is 8,585, or 27.88 per cent. of the total birth-rate. In Quebec this rate is 47 per cent. of the birth-rate.

Great Deal is Preventable.

The infant mortality is much larger than it should be. A great deal of it is preventable. There is much necessity for instruction in the matter of care of infants and young children amongst our people. Of the communicable diseases, whooping-cough gives 247, diphtheria 225, measles 138 and scarlet fever 115 deaths.

Simple meningitis accounts for 207 and convulsions 343 deaths. Broncho-pneumonia has 347 and pneumonia 407 deaths. Diarrhœa and enteris (under 2 years) gives the large number of 1,316 deaths, and from 2 to 5 years 27 deaths. Diseases of the digestive system, which include the foregoing, total 1,768 deaths. Typhoid (enteric fever) caused 669 deaths.

By greater attention to sanitary matters on the part of the local authorities, aided by the efforts of the Provincial Board, the incidence of typhoid in the mining districts, e.g., Cobalt, has been much lessened, with a corresponding loss of life and attendant expense of illness. Municipalities must learn that it is impossible to pour sewage into the source of the water supplies, to allow garbage, manure, and other organic matter to accumulate; in short, to be dirty and expect to escape the consequences.

The deaths from tuberculosis of all forms numbered 2,380, a death-rate of 1 in 13. Of these 47 were infants under one year.

COMPANIES IN GAS MERGER.

The companies interested in the gas merger recently completed at Cleveland, O., are the United Fuel Supply Company, the Ridgetown Fuel Supply Company, the Northern Pipe Line Company, and the Volcanic Oil & Gas Company. In the first three companies the largest stockholders are Buffalo men, headed by Messrs. Philip Roth, R. L. Pattinson, P. A. Little, L. B. Willet and W. C. Barker, who have bought out the interests of former Ohio stockholders. The Volcanic Company, headed by Mr. D. A. Coste, is the company from which the Windsor Gas Company secures its supply.

The new organization will control franchises which have already been secured from about twenty cities and towns in Western Ontario, including Windsor, Chatham, Sarnia, Wallaceburg, Essex, Ridgetown and Blenheim.

FROM COAST TO COAST.

A branch of the Royal Bank of Canada has been opened at Tignish, P.E.I.

The name of Peerless Porcupine Mines, Limited, has been changed to Porcupine Contract Gold Mines, Limited.

The Merchants Bank of Canada has established a branch at Regina, Sask., with Mr. H. R. Belt, formerly of Carberry, Man., as manager.

The Saskatchewan Life Insurance Company will apply to the next session of the Dominion Parliament for an act of incorporation. Messrs. Barr and Sampson, Regina, are solicitors for the applicant.

In order to recover the illegal issue of certificates to the par value of $1,250,000, a proclamation appears in the Ontario Gazette bringing into operation an Act passed at the last session of the Legislature allowing the Little Nipissing Mining Company to increase its stock from $1,500,000 to $3,000,000.

At the present time there are no copper producing properties in the Maritime Provinces. Copper minerals have been found in many localities. During the last fifty years prospecting, and some development work have been done in a number of places, and shipments of small quantities of rich ores have been made at irregular intervals, from some of these localities. Some of the properties have more than once been closed down and re-opened.

All of the $1,000,000 new stock recently offered to its shareholders by the Shawinigan Water & Power Company at 108 has been subscribed. The first instalment of one-third was paid on October 30; the others are due November 15 and December 1. This brings the total capital stock up to $9,500,000, all of one class. Proceeds from the new stock issue will be used to cover part of the cost of new power development, which has been in course of construction during the past two years.

"Canada has no feeling of animosity toward the United States," said Hon. George E. Foster, Minister of Trade, at the Canadian Club banquet, New York. "We in Canada are British, and we intend to remain British until the crack of doom. We are proud of the progress that we have made, but we are not strong enough to throw down the barriers of protection. We must have population, and we cannot break down the barriers of a fair protection. Do you know that your foreign trade amounts to $40 per head, and that ours is $100 a head? That the export of Canada is $40 a head, and that yours is only $22? Do not let us go away with the idea that Canada does not want to do trade with the United States. It is only a question of how we can do it. What we want to do is to try to get the viewpoint of each other. Admiration and the desire to profit by your experience are the two feelings of Canada toward the United States."

GOVERNMENT AND GRAND TRUNK PACIFIC.

Privy Council Gives Decision in Important Case as to Obligations of the Railroad.

A decision respecting Grand Trunk Pacific obligations has been given by the judicial committee of the Privy Council. The case was the Company versus the King, being an appeal from a judgment of the Supreme Court of Canada. The dispute arose under a contract which by one of its clauses provided that for the purpose of aiding the company in the construction of the western division the Canadian Government should guarantee payment of the principal and interest of an issue of bonds to be made by the company for a principal amount equal to 75 per cent. of the cost of construction, but that principal amount was not in any case to exceed $13,000 per mile of the mileage of one section of the western division.

How the Dispute Arose.

The dispute had arisen in the following manner:—At or about the date of the contract the market price of Canada 3 per cent. stock was about par, but in February, 1904, the price had fallen to 96½ per cent., and, as the arrangement with the Canadian Government was to issue 3 per cent. bonds under clause 28, it became apparent that the proceeds of the issue of these bonds would not amount to 75 per cent. of the cost of construction; in fact, 3 per cent. bonds had been issued by the petitioners at 92½ per cent. and others at only 90 per cent.

To meet that difficulty a further contract of February 18, 1904, was entered into, which provided that the Canadian Government was to supplement for the purposes, and subject otherwise to the provisions of the contract its guarantee of the bonds of the petitioners in such manner as might be agreed upon, so as to make the proceeds of the bonds a sum equal to 75 per cent. of the cost of construction of the western division. It was agreed that the dispute should be referred to the Supreme Court for decision, and questions were submitted to that tribunal for answer. The petitioners asked and obtained special leave to appeal from its judgment.

Judgment Delivered.

Lord Macnaghten has now delivered their Lordships' judgment. His Lordship referred to the original contract, dated July 29, 1903, which was confirmed by the Dominion Act 3 Edward VII., c. 71. It provided for the construction of a line of railway between the city of Moncton, on the coast of New Brunswick, and the navigable waters of the Pacific ocean. The proposed railway was to consist of two divisions, the eastern division extending from Moncton to Winnipeg, and the western division from Winnipeg to Prince Rupert.

The eastern divison was to be constructed by the Government and to be Government property. The western division was to be constructed by the company and to belong to the company. Both divisions were to be equipped, maintained, and operated by the company. The western division was to be subdivided into sections, the "Prairie" section and the "Mountain" section.

Guarantee of Bonds.

His Lordship read paragraphs 28, 34 and 35 of the contract, which provided for the guaranteeing of the principal and interest of the bonds to be issued by the company, the guaranteeing by the Grand Trunk Railway of Canada of an issue of bonds by the Grand Trunk Pacific Railway Company, and the creation of certain mortgages to secure the issue of the proposed bonds, and went on to say that at the time when the contract of 1903 was made the market price of the 3 per cent. stock of the Dominion of Canada was about par; soon afterwards the price of the stock began to fall and it became apparent that the proceeds of the issue of the first mortgage bonds, which were to bear interest at 3 per cent., would not amount to 75 per cent. of the cost of the construction of the western division.

In view of the fall in the market price of Government stock and the consequent inadequacy of the fund intended to be provided under the guarantee of Government for the construction of the western division, a supplemental contract was made between the Government and the company. It was dated February 18, 1904. It removed the limitation of $30,000 per mile fixed by the contract of 1903 in respect to the "Mountain" section, but retained the limitation fixed in respect to the "'Prairie" section of the western division.

Notes of Supplemental Contract.

His Lordship then read paragraphs 5 and 13 of this supplemental contract modifying the contract of 1903, and observed that the form of the first mortgage bonds and the form of the second mortgage bonds were afterwards settled and ratified by Parliament, leaving, however, unaffected, the liability of the Government under the supplemental contract, whatever the liability might be.

Differences having arisen as to the interpretation of paragraph 5 of the supplement contract, it was agreed between the Government and the company that the questions at issue might be conveniently referred to the Supreme Court under the provisions of the Supreme Court Act. The Government proposed a series of questions for the consideration of the Supreme Court.

Down to One Simple Question.

The questions so proposed, which were somewhat cumbrous and diffuse, might be summed up in one simple question: Did paragraph 5 contemplate any additional liability being imposed on the company, or was it incumbent on the Government to make up the proceeds of the first mortgage bonds to their nominal or par value without recourse to the company? The Supreme Court was of opinion that the liability on the part of the Government contemplated by paragraph 5 was a secondary liability only as guarantors, that the primary liability must fall upon the company, and that it rested with the company to issue additional bonds, which the Government was to guarantee.

With the utmost deference, said Lord Macnaghten, their Lordships are unable to accept the interpretation placed by the Supreme Court on paragraph 5. It seems to their Lordships that there is nothing in paragraph 5 importing that any further liability was to be imposed on the company in respect of the first mortgage bonds, and that it falls upon the Government to implement their guarantee so as to make the proceeds of those bonds issued and to be issued equal to their par or nominal value.

Would Be Breach of Faith.

It would be a breach of faith with the Grand Trunk Railway Company to let in any further charge in priority to their security, and, as it appears to their Lordships, the company has no power to issue bonds other than those authorized by the original contract. The case was fully and ably argued on behalf of the Government. It is hardly necessary to add that the learned counsel who appeared for the Government did not argue the point which seems to be suggested in the factum of the Government, that paragraph 5 is really an illusory provision, and that it is open to the Government to evade their apparent liability by refusing to come to an agreement or abstaining from coming to an agreement with the company. Their Lordships, therefore, answer the questions proposed as follows:—Question a.—Yes. b. No. c. No. d. Substantially Yes. It is open to the Government to implement their guarantee either by a payment in cash or in any other manner which produces the same result without imposing any further liability on the company.

The full list of questions submitted in this case appeared in The Monetary Times of January 1st, 1910, page 116, but Lord Macnaghten has summed them up in one simple question noted above.

◆

FIRE INSURANCE IN CANADA.

The annual report of the superintendent of insurance on companies other than life companies shows that during the year 1910, the business of fire insurance in Canada was carried on by sixty companies, of which 25 were Canadian, 19 British and 16 American.

Cash received for premiums during the year in Canada amounted to $18,725,531, being greater than that received in 1909 by $1,676,067, and the amount paid for the losses was $10,292,393, which is greater than that paid in 1909 by $1,645,567.

The gross amount of policies, new and renewed, taken during the year by fire companies was $1,817,055,685, which is greater by $237,079,818 than the amount taken in 1909. The premiums charged thereon amounted to $24,684,292.40, being $2,390,663.15 greater than the amount charged the previous year. The rate of premiums (1.358) is somewhat lower than that of 1909 (1.431). The loss rate (54.966 is 4.24 per cent. greater than the loss rate of the previous year (50.72) and 8.67 per cent. less than the average loss rate (63.63) for the past 42 years.

◆

The following gentlemen have been elected members of the Winnipeg Stock Exchange:—Messrs. A. P. Cameron, of W. Sanford Evans & Company, Winnipeg. R. R. Counsell, of E. M. Counsell, Winnipeg. H. S. Edwards, of The Hugo Ross Realty Company, Winnipeg. W. H. Gardner, of Oldfield, Kirby & Gardner, Winnipeg. Cecil S. Gunn, of Pattinson & Gunn. J. J. Lenfesty, of Alloway & Champion, Winnipeg. H. W. Nanton, of Osler, Hammond & Nanton, Winnipeg. H. F. Osler, of Osler, Hammond & Nanton. B. K. Thompson, of Alloway & Champion, Winnipeg. The membership fee is now $500, and is likely to advance in the future in view of the demand for membership and increasing business.

NEW INCORPORATIONS.

Several Mining Companies Were Granted Charters—Thirty-eight New Concerns.

The total capitalization of the thirty-eight companies incorporated during the past week amounts to $12,495,000.

There were five companies with capital of a million dollars and over, as follows:—Digby Dome Mines Company, Brantford, $1,500,000; Seneca Porcupine Gold Mining Company, Toronto, $1,500,000; King Quick Silver Mining Company, Toronto, $1,000,000; D. L. McGibbon & Company, Montreal, $1,000,000; Canadian Hypothec and Guarantee Company, Vancouver, B.C., $1,000,000.

Incorporation has been granted to Messrs. H. S. Ross, K.C.; Robert Tashereau, K.C.; Thibaudeau Rinfret and others under the name of Canadian Bond Underwriters Limited. The new company will assist in the formation of new companies or the reorganization of going concerns, and will buy and sell Canadian bonds, and take a share of the new underwritings.

The British Canadian Construction Company, Montreal, is incorporated to build railways, etc., and capitalized at $500,000 by Messrs. A. M. Laredo, of London; Howard S. Ross, K.C., of Montreal; and P. O'Reilly, of Ottawa. This is a construction company to build the Joliette & Lake Manuan Railway, which plans to connect Montreal with the Transcontinental Railway.

The Canadian Sardine Company, Limited, Montreal, $500,000, will do a fish curing and packing business at Montreal.

The companies chartered by the provinces were as follows:—15, Ontario; 11, Quebec; 9, British Columbia; 3, Manitoba.

The following is a list of the charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kamloops, B.C.—Sunset Irrigation and Power Company, $10,000.

Prince Rupert, B.C. — Queen Charlotte Oil Fields, $500,000.

Guelph, Ont.—Good Times Fishing Club; J. H. Reed, A. M. McLaren, F. W. Dollery.

Victoria, B.C.—Canada Mosaic Tile Company, $100,000. Dollar Steamships Lines, $750,000.

Sault Ste. Marie, Ont.—North Shore Contracting Company, $500,000; H. E. Talbott, G. H. Mead, Dayton, Ohio; S. Warren, Sault Ste. Marie.

Hamilton, Ont.—Inglewood, $120,000; H. N. Kittson, H. C. Beckett, J. T. Gillard. Hamilttn Gas Mantle Company, $40,000; B. E. Webster, J. Herzog, J. L. Counsell.

Brantford, Ont.—Digby Dome Mines Company, $1,500,000; W. J. Aikens, Dunnville; H. Digby, Bay City; W. T. Henderson, Brantford. Brantford Hebrew Association; I. Lunenfeld, H. Morrison, A. Rosenfeld.

Vancouver, B.C.—Dickson & Son, $20,000. Canadian Hypothec and Guarantee Company, $1,000,000. Sterling Investments, $10,000. Pacific Heating and Plumbing Company, $10,000. Rorisons' Warehousing, $500,000.

Winnipeg, Man.—Fort Churchill Trading Company, $100,000; C. E. Williams, R. M. Myers, T. J. Allison. Sheldon Farm Company, $250,000; E. E. Hall, J. S. Loudon, H. J. Quinn. Smith Construction Company, $100,000; W. C. Vincent, J. W. Sherwin, R. Bingham.

Ottawa, Ont.—British Canadian Construction Company, $500,000; A. M. Laredo, London, Eng.; H. S. Ross, Montreal; P. O'Reilly, Ottawa. Belle Isle Park Company, $40,000; R. Chevrier, C. Perron, E. J. Labelle. Ontario Equipment Company, $100,000; F. W. Carling, N. D. Porter, J. F. Kidd.

Toronto.—Bonds, Debentures and Securities of Canada, $100,000; F. G. Waters, R. D. Ponton, Miss A. E. Elliott. King Quicksilver Mining Company, $1,000,000; W. N. Ferguson, J. T. White, H. Ferguson. Ramsay E. Sinclair, $500,000; R. E. Sinclair, G. W. Connors, T. L. Sinclair. Toronto Checker Club; W. Sloan, A. Asher, A. New. Athabaska Development Company, $40,000; G. D. McCutcheon, Calgary; A. K. Goodman, D. G. M. Galbraith, Toronto. Seneca Porcupine Gold Mining Company, $1,500,000; R. McKay, G. Grant, M. MacDonald.

Montreal.—Lachine Land Company, $100,000; G. V. Cousins, A. H. Elder, H. C. Mariotti. Orme Realty Company, $250,000; G. L. Orme, B. Rothwell, J. Bingham, all of Ottawa. La Compagnie International d'Immeubles, $100,000; M. Langlois, J. Robert, P. E. Lamarche. North American Cloak and Suit Company, $50,000; S. W. Jacobs, A. R. Hall, G. C. Papineau-Couture. Canadian Sardine Company, $500,000; W. J. Shaughnessy, C. G. Heward, A. E. Woodworth. D. L. McGibbon & Company, $1,000,000; V. E. Mitchell, E. M. McDougall, J. J. Creelman. St. Maurice Construction Company, $25,000; J. E. Aldred, H. Murray, J. C. Smith. Canadian Bond Underwriters, $100,000; H. S. Ross, R. Taschereau, T. Rinfret. Grantham Realty Company, $50,000; G. W. MacDougall, L. Macfarlane, C. A. Pope. Deschambault Electric Company, $500,000; J. A. Marion, J. E. Cote, T. J. Shallow. La Compagnie Archambault Bousquet, $20,000; A. Archambault, H. Bousquet, N. Mailloux. Modern Garage Company, $10,000; A. Berthiaume, A. Labbe, J. O. Prouix.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended November 10th:—

Nipissing, 126,800; La Rose, 160,551; McKinley-Darragh, 104,921; Buffalo, 60,000; Cobalt Provincial, 50,100; Hudson Bay, 64,583; Right-of-Way, 82,232; Cobalt Townsite, 47,167; total, 696,354 pounds, or 348 tons. The total shipments since January 1st are now 44,446,475 pounds or 22,223.2 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

NEWS AND NOTES.

The Quebec Bank has opened a branch at Herschel, Sask.

Stanfields, Limited, of Truro, N.S., has absorbed the Hewson Woolen Company, of Amherst, N.S.

The Bank of British North America has opened a branch at Verdun, Que., under the management of Mr. C. M. de R. Finniss.

The American Bankers' Association Convention Number of the Gulf States Banker was issued ten days in advance of the convention and mailed to all delegates and visitors. It is complete in every detail and is an excellent publication, which should prove of great value to the bankers especially interested and to others.

The directors of Rio have decided to ask the stockholders to ratify a by-law increasing the capital stock of the company. The story that it had been decided to dispose of the shares to a syndicate without offering them to the shareholders is incorrect. At a meeting to be held early in December the shareholders will be requested to authorize an increase in the common stock to the extent of $10,000,000, half of which will be issued immediately. The common stock of the company will then total $50,000,000, and, so soon as the preliminary arrangements are completed, Parliament will be asked to confirm.

Several members of the Independent Telephone Convention at Toronto this week suggested as a solution of the difficulty of getting long distance connection with the Bell Company, that the Ontario Government should build trunk lines or buy the Bell Telephone Company. "We are engaged in a fine business," said Dr. W. Dunn, president of the association, "the credit of telephone companies to-day is higher than ever before. They pay their bills more promptly and earn on an average from 20 to 25 per cent. of their gross capital annually. The association is not satisfied with the agreement proposed by the Bell Company for connection between them and the independent companies. There are 340 independent companies in Ontario."

ANYWHERE IN THE WORLD.

The Monetary Times, "Old as Confederation," will be sent to any address in the world, postage prepaid, for three dollars.

NIGHT WATCH SIGNAL SYSTEMS

Are Useful to the Insurance Companies—Every Box a Fire Alarm.

While it is only within recent years that central station service has become an important factor in fire protection, it has developed so rapidly that to-day the American District Telegraph Company in the United States has central stations in over 600 cities and towns, and has under protection over three thousand million dollars' worth of property. In the city of Chicago alone there are over 25,000 central station night watch and fire alarm boxes. In the Union Stock Yards there are over 1,600 night watch boxes and 162 watchmen report to a central station maintained and operated for this one industry.

The above statements were made by Mr. S. V. L. Willmot, assistant superintendent of the Dominion Messenger and Signal Company, Limited, before the Toronto Insurance Institute this week.

Mr. Willmot said that the Dominion Messenger and Signal Company is a Canadian corporation using the same devices and operating along the same lines as the American District Telegraph Company in the United States. It has offices in Montreal, Toronto, Winnipeg and Hamilton, and is the largest company in Canada operating central station service as well as the only company using exclusively devices approved by the National Fire Protection Association and installing its system as well as operating its service on standards adopted by that association. Although the Dominion Messenger and Signal Company has been operating but six years, it has under its protection in the four cities named property value of over two hundred million dollars.

Watch Night Systems.

Tracing the development of the early form of night watch system, and the approved combination night watch and fire alarm system, Mr. Willmot stated that as operated to-day the approved central station night watch system is a thorough check on the movements of the night watchman, and at the same time provides a ready means for turning in an alarm of fire at any time of the day or night. In this particular, the old clock system only went half way. If for sake of argument, we agree that the watchman was kept awake, he had no means of turning in an alarm if he found a fire. As a watchman is employed in ninety-five cases out of a hundred for the sole purpose of guarding the property against fire, the central station system not only keeps the watchman awake and on the move, but provides him with apparatus for calling in the very aid that he needs if a fire is discovered.

If a watchman fails in his signal the central station sends an officer or roundsman to the plant to ascertain the cause. If asleep the watchman is awakened; if ill or incapacitated aid is procured and the plant patrolled. Many a watchman has been found by the runner of the central station, ill, with a broken limb, or unconscious and in a serious condition or even dead. The following are actual facts which have come to our notice: The watchman was found unconscious and overcome by gas. In another he had fallen down into a pit and broken a leg. In the past six months there have been two cases of watchmen having been found dead on the premises by the roundsman from the central station. One was a case of heart failure, and the other death came through falling down an elevator shaft. These facts all reach the insured and the insurance board having jurisdiction by means of the daily report rendered by the central station.

Every Box a Fire Alarm.

A most important feature is that every box is a fire alarm box. In case of fire the watchman knows instinctively where to turn in his alarm, as he turns in his signals every hour from the same box. If he runs out to the corner to turn in an alarm from the city box he is obliged to wait the arrival of the fire department in order to direct them to the fire. All of this time might be used to advantage by the watchman in trying to extinguish the fire with hose, water-pails or such other means as might be at hand.

Another advantage is the absolute necessity for the watchman to make his rounds.

The following figures for 1910 may prove of interest, as a slight indication of the work done by the system:—

Excuses of watchmen for failures: Asleep 150; forgot 780; watchmen had left premises 163; busy at other work 707; new watchmen 43; illness 77; clock wrong 202; refused to give reason 134; miscellaneous excuses 430. Total failures 2,686. Total fire alarm signals 49.

While improvements were being made in watchmen's service, the installation of the sprinkler system was becoming more general. Its worth as a fire extinguisher and a fire stop had been thoroughly proven, and its greater use encouraged by substantial reductions in insurance rates. Along with the advantages, however, there were soon found to be some very decided disadvantages in the sprinkler. Of these weaknesses, the most important and the most harmful was the disposition of a sprinkler system to keep spouting water long after the fire which had opened the head had been extinguished. It was found that in the colder climate the water in the tank if not attended to would freeze and it was nearly an impossible task to thaw out a tank if it ever got a good start in forming ice.

It was found that gate valves were turned off and parts or even entire systems rendered valueless. Here is where the engineers of the central station stepped in and devised means for correcting these weaknesses in the sprinkler system itself.

Approved Sprinkler Supervisory System.

The object of the Sprinkler Supervisory System is not only to give a reliable alarm in the case of the opening of a sprinkler head, but also to exercise a supervision over the entire system and to keep it in perfect working order so as to be always ready for a fire. When a flow of water takes place in the sprinkler system equal to the opening of one sprinkler head a waterflow signal is transmitted to the central station, and also to the central fire hall. In addition to the response of the fire department men are sent from the central station to the risk with the keys to admit the firemen. These men are familiar with all the shut-off valves in the building so as to be able to turn off the water as soon as the fire is out and thus save all possible damage. A head can then be replaced and the water turned on again, the transmitters rewound and the plant again placed under full protection.

A list of the addresses of the employees of the firm is kept on fyle so that they can be notified by the central station. Manual boxes are also provided at the main exits of the plant so that the fire department can be summoned in the event of a fire starting in some adjacent building. In case a gate or shut-off valve should be closed a special signal is transmitted to the central station, and the reason for this is immediately ascertained. When this valve is again opened a restoration signal is transmitted to the central station, and it is known that the system is again in normal condition. Thus the danger of water being turned off and forgotten is avoided.

The scope and importance of the sprinkler was then defined, and the early automatic systems and aero or automatic compensating fire alarm systems explained. Mr. Willmot urged the necessity for central station systems.

◆

MONTREAL'S BAD FIRE RECORD.

Fire Commissioner Latulippe, of Montreal, has forwarded to the Board of Control a communication in which he makes the following suggestions for the reduction of Montreal's abnormal fire loss:

"That the authorities of the city of Montreal ask the Legislature of the Province of Quebec to include in the law regulating the office of the Fire Commissioner the following amendments:

"(A) That the Fire Commissioners be authorized to inquire not only into the origin of fires, but also into the causes of their spread, such as the installation of electric wiring or gas pipes, the nature of the construction of buildings where fire breaks out, and also the nature of the buildings to which it spreads; the water pressure and the work of the firemen—in order to determine the responsibility.

"A—(2) To impose a fine on persons who by negligence have been the cause of a fire.

"A—(3) To impose a fine on persons whose property has been burned if the amount of insurance largely exceeds the value of the property destroyed, when it is shown in the inquiry that the policy holder was in bad faith at the time of presenting the report of his assets to the insurance company.

"A—(4) To oblige all persons whose property has been burned to make a report within twenty-four hours following such fire to the office of the Fire Commissioner, and also to impose a fine on all persons who fail to observe this regulation.

"The money collected as a result of these fines (the maximum and minimum of which would be fixed by the Legislature) could be applied to the firemen's benefit fund.

"B—(1) I would also suggest that the city should appoint an officer for each fire district whose duty would consist in reaching the scene of a fire before the firemen, of examining the place carefully, and making an immediate report of his examination to the office of the Fire Commissioners. Also the appointment of an officer skilled in matters concerning fires, who would act under the instructions of the office of the Fire Commissioners."

LIFE, FIRE AND FRATERNAL INSURANCE

In Ontario—Fire Losses Paid Last Year—Weather Insurance Companies—Statistics Belated but Interesting

BY T. CLUGSTON HARRISON,

(Monetary Times' Staff).

Comprising three divisions, ten sections, and 693 pages, the detailed report of the Inspector of Insurance and Registrar of Friendly Societies for Ontario for 1910, was recently published. The volume is somewhat late in appearing, and as usual, is sadly lacking handy summaries.

There are 146 companies operating under a federal charter, and registered for transacting insurance in Ontario at December 31st, 1910. The list was made up as follows: 65 Canadian, 45 British, 34 American, and one each for France and Germany.

Joint Stock Fire Insurance Companies.

Five joint stock fire insurance companies were transacting business in Ontario last year. In comparison with their assets, their losses were 52 per cent., expenses of management 77 per cent., and liabilities 54 per cent. The following statement contains some interesting figures regarding these companies:—

Company.	Assets.	Liabilities.	Income.	Expenditure of Management.	Losses.	Total Expenditure.
Crown	$92,258	$78,282	$188,420	$43,271	$72,403	$153,543
Imperial	82,607	52,542	110,809	28,663	34,944	98,551
Merchants	145,749	89,563	153,483	41,877	58,262	118,192
Queen City	365,909	76,954	146,338	29,976	36,727	108,632
Traders	57,357	41,949	87,827	26,077	51,676	92,298

Some Interesting Statistics.

The net risk carried by the four cash mutual fire insurance companies having no joint stock capital was $97,342,223. Which is a fairly large amount in comparison to the assets which aggregate only $2,491,883.

The total receipts were $808,307, while the expenditure came to $641,273. The following are the details:—

Company.	Assets.	Liabilities.	Receipts.	Expenses of Management.	Total Expenditure.	Net Risks Carried.
Economical Mutual Fire Insurance Co.	$559,833	$ 80,407	$206,704	$44,394	$169,585	$20,350,389
Gore District Mutual Fire Insurance Co.	701,392	72,888	180,411	43,767	154,192	20,053,839
Perth Mutual Fire Insurance Co.	521,250	71,890	161,887	42,629	120,340	22,369,580
Waterloo Mutual Fire Insurance Co.	708,408	134,377	259,305	62,530	197,156	34,578,415
	$2,491,883	$359,562	$808,307	$193,320	$641,273	$97,352,223

The following table gives some details of all classes of fire insurance mutual companies at December 31st, 1910:—

Gross amount at risk on mutual plan..........................	$276,117,178
Premium notes, net unassessed	8,503,345
Surplus of general assets over liabilities......................	10,652,299
New business taken during 1910	99,775,691
Premium notes taken during 1910	3,695,388

Fire Losses Paid in 1910.

In 1901 eighty-eight companies paid fire losses in Ontario, amounting to $745,029, while in 1910, eighty-seven companies paid $1,240,761, an increase of $495,732, or 66 per cent.

A gratifying feature of the losses reported to have been caused by incendiarism, or supposed incendiarism is that during the past ten years they show a decrease of $8,415, or 24 per cent. During the same period the losses reported to have been caused by lightning, increased 139 per cent.

The following table gives the details for selected years:—

Year.	Class of Company.	Amount paid for losses caused by fire in the Province during the year, as reported to the Department of Insurance for Ont. by Provincial Licensees.	Amount paid for such losses reported to have been caused by incendiarism or supposed incendiarism.	Amount paid for such losses reported to have been caused by lightning.

---

*Caused largely by Toronto's conflagration of 1904.

Purely Mutual Fire Insurance Companies.

In 1896 there were 72 purely mutual fire insurance companies, and in 1910 there were only 69. The total assets increased from $3,644,162 in 1896 to $8,025,136 in 1910, while the liabilities decreased from $55,523 to $17,767. During the past thirty years the purely mutual fire insurance companies have paid losses amounting to $5,951,526.

The following comparative table shows by years since 1896 the total assets, liabilities, amount at risk, cost of management, and total losses paid by the purely mutual fire insurance companies:—

Year.	Total Assets.	Total Liabilities.	Total Net Amount at Risk.	Total Cost of Management.	Total Amount of Losses Paid.
1896	$3,644,162	$55,523	$109,617,060	$63,721	$187,916
1897	3,829,599	49,801	114,809,593	63,790	169,281
1898	4,097,623	63,226	121,965,359	67,544	224,747
1899	4,312,225	44,978	125,677,413	69,913	167,639
1900	4,563,701	42,111	133,274,373	65,451	219,699
1901	4,909,905	43,170	142,878,557	69,547	191,872
1902	5,263,370	33,379	150,981,746	71,022	202,472
1903	5,592,038	33,187	160,385,333	74,380	255,227

---

*The figures in this column read as cents give the average cost per $100 of insurance per annum, that is, .2291 = $22\frac{91}{100}$ cents.

Four weather insurance companies were registered to transact business in Ontario, carrying a net risk of $13,944,819. Their aggregate loss was only $4,215, while the income totalled $24,997, and expenditure $16,004.

The following are the details:—

Company.	Assets.	Liabilities.	Net amount at risk.	Income.	Expenses of management.	Loss.	Total expenditure.
Huron Weather	$80,516	$45	$1,851,592	$3,764	$1,204	$487	$1,692
Ontario Farmers'	168,973	45	6,393,780	10,065	3,917	1,741	8,184
Wellington Weather	13,009	—	246,425	790	491	97	690
Western Farmers'	121,179	—	5,453,022	10,378	3,418	1,890	5,438

A Valuable Table.

The following table gives some valuable information respecting the sixty-nine purely mutual fire insurance companies:—

At December 31st, 1910, there were 26 fraternal insurance societies registered in Ontario with a membership of 291,029. Their total assets amounted to $36,342,589, with total liabilities of $2,477,059. The amount of insurance in force was $387,945,595, and the number of certificates in force, 1,035,650. The number of claims that matured during 1910 was 2,011, and the amount of insurance benefits paid in Ontario, $2,648,013. Of this latter amount the Ancient Order of United Workmen paid $1,034,295. Disability benefits, including pensions and gratuities paid in Ontario during 1910 amounted to $63,357.

Ontario has 101 registered sick and funeral benefit societies with a combined membership of 107,285. The assets amount to $2,111,721, and the liabilities $5,984.

During 1910, 2,258 members died, and the amount of funeral benefits paid totalled $84,504. The amount of sick benefits paid to 29,800 members was $671,429, and for medical attendance $78,045, while $16,869 was paid for special relief purposes.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Rosetown, Sask.—Nov. 8th.—Number of separators have been destroyed. Loss and origin unknown.

Norwich, Ont.—Nov. 14th.—Carriage shop of Mr. Cameron destroyed. Loss about $2,000. Origin unknown.

Beamsville, Ont.—Nov. 7th.—Flour mill of Mr. R. O. Konkle destroyed. Loss about $9,000. Origin unknown.

Allanburg, Ont.—Nov. 14th.—Residence of Mr. Raymond Skinner destroyed. Loss about $4,000. Origin unknown.

Portage la Prairie, Man.—Nov. 12th.—House of Mr. N. Wisner destroyed. Loss unknown. Origin, overheated stove pipes.

Nelson, B.C.—Nov. 8th.—House in segregated district destroyed. Two women burned to death. Loss and origin unknown.

Petrolea, Ont.—Nov. 11th.—Boiler house of receiving station, 12th line, completely destroyed. Loss and origin unknown.

West Lorne, Ont.—Nov. 14th.—Elgin hotel, owned by Mr. Wm. McIntyre, destroyed. Loss about $8,000. Origin unknown.

Wilberforce, Ont.—Nov. 13th.—General store of Mr. Alex. Riley and post-office destroyed. Loss about $2,000. Origin unknown.

Port Haney, Man.—Nov. 9th.—Carter's store destroyed, together with several other stores. Loss about $25,000. Origin unknown.

Montreal, Que.—Nov. 11th.—Boarding house, 81 St. Hubert street, badly damaged. Loss and origin unknown. Two persons injured.

Victoria, B.C.—Nov. 12th.—Building of Messrs. T. N. Hibben & Company destroyed. Loss about $100,000. Origin, overheated furnace.

Niagara Falls, Ont.—Nov. 10th.—Barn and auto, owned by Mr. H. E. Walker, Lundy's Lane, destroyed. Loss about $2,000. Origin unknown.

Brockville, Ont.—Nov. 12th.—Boathouse and two gasoline launches, owned by Mr. Antoine Wendling, destroyed. Loss and origin unknown.

North Bay, Ont.—Nov. 10th.—Clothing store of Mr. Philip Adam badly damaged. Loss about $10,000; insurance, $8,500. Origin unknown.

Ottawa, Ont.—Nov. 13th.—Rivermede Golf Club house destroyed. Loss about $35,000. Origin, spark lodged between chimney and the wall.

Gretna, Man.—Nov. 12th.—Business section destroyed, also 14 horses, 15 tons of hay and 200 bushels of oats. Loss about $15,000. Origin unknown.

Rocklyn, Ont.—Nov. 10th.—Barn of Mr. John Boales, Euphrasia township, destroyed, also one horse. Loss unknown. Origin, lamp explosion.

Halifax, N.S.—Nov. 12th.—Boarding stable owned by Mr. Festus Marriott, Hollis street, destroyed; also 17 horses. Loss about $10,000. Origin unknown.

Toronto, Ont.—Nov. 14th.—Wood drying kiln belonging to Messrs. Beverley & Hillock, 91 Richmond street, damaged. Loss about $500. Origin unknown.

Davidson, Sask.—Nov. 12th.—Entire property of Mr. W. Howar destroyed, including 14 cows, 2 colts, hogs, poultry, etc. Loss unknown. Origin, cow upset lantern.

Winnipeg, Man.—Nov. 13th.—Garage of Mr. George Snow destroyed; also 5 taxicabs. Loss about $11,000. Origin unknown. Nov. 13th.—Stable, rear of 422 Maryland street destroyed. Loss about $700. Origin unknown.

Woodstock, N.B.—Nov. 10th.—Business block, occupied by Mr. J. N. Tompkins, hotel; Mr. H. E. Burtt, storeroom; Mr. George Johnston, livery; Mr. J. A. McIsaac, farm machinery, and Mr. R. S. Corbett, engineering supplies, destroyed. Boy burned death. Loss and origin unknown.

Marlbank, Ont.—Nov. 16th.—Orange hall and house destroyed. Loss and origin unknown.

Cobourg, Ont.—Nov. 16th.—Business section badly damaged. Loss about $6,000. Origin, defective wires.

Markdale, Ont.—Nov. 16th.—Messrs. Minnis Brothers sawmill and shingle mill destroyed. Loss about $6,000. Origin unknown.

Golden, B.C.—Nov. 6th.—Business section destroyed. Loss about $27,000. The individual losses are about as follows:—Mr. H. Hairsine, barber shop building, $1,000; Mr. J. A. Buckham, drugs and stationery, $10,000, $5,000 insurance; Mr. Lamontange's barber shop, $4,000; Mr. John Pratt building, $1,500, occupied as confectionery by Mrs. J. C. Tom, loss about $1,000; Kootenay Hotel Company, in buildings and damage to Kootenay house, $5,000. Origin unknown.

Belleville, Ont.—Nov. 13th.—Crook Block, corner of Front street and Victoria avenue, destroyed. Total loss about $23,000. The parties whose places of business were burned out, with losses and insurance, are as follows:—Building owned by Jacob Crook estate, loss, $9,000, insured for $6,000; Mr. B. C. Smith, pool-room, loss, $8,000, insured for $4,000; Mr. J. Rene, confectionery, loss, $3,500, insured for $3,000; Mr. C. Chester, clothing store, loss, $3,000, insured for $2,000. Origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

North Bay, Ont.—Mr. E. M. Bogart sustained loss of $2,200 on stock; insured with Hartford for $1,200.

Englehart, Ont.—The Jamieson Meat Company sustained loss of $2,000 on building; insured with London Mutual for $1,500.

Melville, Ont.—The loss sustained by Mr. John R. French was $2,000 on stock and $15,000 on buildings; no insurance.

Brockville, Ont.—The loss sustained by the Wolhausen Hat Corporation was $1,000 on stock and $1,500 on buildings. Insurance carried by 19 companies. The fire was caused by foreign substance in fur which was ignited when passing through mixer, setting fire to the machine and to the receptacle into which the fur was being blown.

Regina, Sask.—Oct. 2nd.—Mr. G. Sternar. Loss on goods, $200; loss on building, $150; cause, children playing with paper around the stove. Oct. 13th.—Mrs. Condie. Loss on goods, $10; no loss on building; cause, coal oil lamp exploded. Oct. 19th.—Mr. Fred Bessai. Loss on goods, $100; loss on building, $400; cause, clothes caught fire from the stove; no insurance. Oct. 31st.—Mr. N. Neda. Loss on building, $40; insurance $1,000; cause, overheated furnace and dirt in hot air pipes.

BRITISH NATIONAL INSURANCE BILL.

Aim of the Scheme—Opinions of the Bill—German Experiment Has Stood Test of Time.

A most interesting sketch of the British National Insurance Bill was given to the Insurance Institute of Toronto this week by Mr. Roy Stephenson, of the Manufacturers' Life Insurance Company. The bill has two parts explained Mr. Stephenson.

The first part deals with health insurance, the second part with unemployment insurance. It is as if two quite separate bills had been joined under one title. Part I. has already received considerable attention in parliament. Many amendments have been carried, but for the most part, these alterations are in details only, and the passage of this part without radical change seems assured. The unemployment insurance scheme is a novelty—a much riskier proposition.

The institution of state-managed insurance schemes is a most important development of modern social economy. The civil service of New Zealand for forty years past, has included a life insurance department conducted quite like a private mutual office. Advertising literature is issued, and the whole colony is vigorously canvassed by agents, who in open competition with all other companies secure a large part of the business. Other governments have tried schemes of various kinds and have met with various degrees of success. The greatest of all present day systems is that of Germany, founded on the Sickness, Accident and Invalidity Acts of 1883, 1884 and 1889. It is the German system which occupies pre-eminently the attention of British parliamentarians, economists, and insurance men to-day, for after that system is being modelled Part I. of the British National Insurance Bill.

May Replace Unsatisfactory Poor Laws.

It is hoped that the successful operation of this bill (with such extensions as may prove needful) will gradually replace to a large extent the unsatisfactory Poor Laws. The aim of this part is three-fold: (1) To provide some indemnity for loss of wages during sickness or disability of any kind. (2) To provide competent medical attendance. (3) To inaugurate an aggressive campaign against preventible diseases especially consumption.

Everybody of either sex or any nationality, under sixty-five years of age, employed according to the definition, will be insured compulsorily. The definition includes all persons in the United Kingdom or on any ship of the United Kingdom, employed under contract of service of whatever kind, also outworkers as defined under the Factory and Workshop Act, 1901; also boatmen, cab drivers, etc., using rented vehicles. That is the rule. The exceptions include all persons in naval and military service, certain branches of the civil service and school teaching, for whom provision has been otherwise made; all persons not manual laborers in receipt of a regular salary exceeding £160 per year, and agents on commission working for more than one employer; also all persons employed for no pecuniary wage by small agricultural holders, children employed by their parents, wives by their husbands, etc., etc.

Have Power to Reduce Number of Exceptions.

Persons of casual occupation, such as gardeners, jobbers, dressmakers and washerwomen, executing small orders on their own account, are excluded, but employees of any club such as golf caddies, are included. It was thought necessary to include as far as possible all casual occupations, as their exclusion would tend to encourage their growth. All persons will be exempted who can prove themselves possessed of a pension of £26 per year, or dependent on someone else for livelihood. The Insurance Commissioners will have power to reduce the number of exceptions as they see fit.

Evidently this definition includes the great mass of the wage earning population. The estimate is that nearly 14,000,000 people will come in at the start on May 1, 1912, and that this figure will have increased by the 1927 anniversary to about 17,000,000. It must be pointed out here that these estimates are based on the census of 1901. Careful allowance has been made for a date eleven years later, but in so far as the adjusted figures are discredited by the 1911 census, will the estimates be falsified. Mr. Stephenson then discussed fully the administration and benefits of the bill.

Opinion of Mr. Lloyd George.

At the end of his speech, when introducing the bill into the Commons, Mr. Lloyd George said:

"I do not pretend that this is a complete remedy...... against the acute distress which now darkens the homes of workmen wherever there is sickness and unemployment. Before you get a complete remedy for these social evils you will have to cut deeper. But I think it is partly a remedy ......meanwhile till the advent of a complete remedy, the scheme does alleviate an immense mass of human suffering. ......I appeal to the House of Commons to help the government not merely to carry the bill through, but to fashion it; to strengthen it where it is weak, to improve it where it is faulty. I am sure if this is done we shall have achieved something which shall be worthy of our labors."

It is no exaggeration to say that the Chancellor's invitation as to refashioning of the bill, has met with enthusiastic response. From all sides, advice, objections, and suggestions of amendment have flooded in. It is impossible to refer to these in detail, but it is necessary to notice the attitude of the parties directly affected. In the first place, the feeling of the wage earning public, who stand to gain whatever is to be gained, is not very coherent. At first the Labor Party consistently backed the bill. More recently a division has taken place and one section is openly obstructing it. The employers of labor were at first disposed to resent the large direct contribution demanded of them.

Have No Defence.

But they have searched in vain for a defence. The justice of the provision has been debated for years. Its inclusion as a cornerstone of the bill was no surprise, and it passed without challenge in parliament. The fact is the verdict of German experience on the matter is convincing. The German employers, who at the commencement of their system were bitterly antagonistic, are now its strongest allies. To-day they acknowledge that their expenditure is amply repaid by the increased efficiency of the workmen. It has worked out that little or none of this expenditure has been transferred to the consumers' prices, and certainly the employers profits have suffered no diminution. A somewhat similar result has followed the adoption of the Employers' Liability Act right in England.

The cardinal grievances of the doctors have been satisfied. They are supporting the bill.

The German experiment has stood the test of time. It has never lacked criticism, but the consensus of present day opinion is distinctly approving. Its success is the strong rock on which confidence in the British scheme is built. But the conditions of Germany are not the conditions of Britain and the British scheme is bolder. One has said that its success or failure depends on its administration. Another, that the future will reveal perhaps its greatest weaknesses at points whose vulnerability is now least suspected.

On May 1st, 1912, the second experiment will be made, perhaps.

GRAND TRUNK SECURITIES.

The Financial News, London, Eng., discussing the position of Grand Trunk Railway issues in the British market, says: On balance, Trunk ordinary and preference stocks have improved moderately. It may be noted, in passing, that the new scrip certificates for Trunk ordinary will be ready shortly, and should have the effect of rendering the stock still more popular in a speculative sense. These scrip certificates are based on the American plan, and are not bearer securities in the strict sense of the word, although they may pass by delivery without a transfer. The holder may at any time register himself on the books of the company in Montreal.

SHOE COMPANY WELCOMES INVESTIGATION.

An appeal by the United Shoe Machinery Company is pending against the judgment of the Superior Court refusing a writ of prohibition to prevent the board of investigation from proceeding. On this appeal the company made an application for an interim order staying proceedings until the appeal should be heard on the merits. This application was made to a Judge in Chambers and was referred to the full court, where Mr Casgrain said: "After consultation with my clients, I have come to the conclusion to withdraw the present petition for leave to stay proceedings until the final judgment." The application for an investigation has heretofore been resisted, three separate appeals having been taken from three separate decisions of a Judge of the Superior Court, two of which were decided against the company, the third being still pending. There has also been an application for leave to appeal to the Privy Council, which was refused.

MUNICIPAL BOND NOTES.

Vancouver may have Commission Form of Government.

Pembroke, Ont., is a good market town and distributing point for lumbering supplies. The assessed value for taxation is $2,755,365, while the estimated value is $3,305,000. The debenture debt amounts to $303,838, which is reduced annually $10,000. The net debt totals $158,791, and the estimated value of assets is placed at $365,000. The rate of taxation is, general 10 3-10 mills and school 7 7-10 mills. The population is about 6,000. The last issue of $65,000 4½ per cent. 30-year debentures were sold at over par.

Finances of New Liskeard.

The finances of New Liskeard, Ont., are in a satisfactory condition. The total appropriation for the year was $34,056, which sum will be realized by the payment of the taxes for the current year. The total expenditure up to October 20th has been $22,443, which leaves a margin of $11,613 for the final two months of the year, from which must be deducted $2,000, which is still owing to the School Board. In addition to the appropriation to be realized by this year's taxes, there has been $8,309 realized by the town from various sources outside the taxes of 1911. Over seven thousand of this sum is accounted for by payments on arrears of taxes, this amount being a very creditable portion of the arrears to be taken in.

For the two months to come, the largest payments will be $9,000 on account of debentures, and $2,000 for school purposes.

Bank Inspected Waterworks.

The Banque Provinciale which recently purchased the Hull, Que., $225,000 debentures, have made an inspection of the waterworks system and fire fighting apparatus of the town and found everything satisfactory.

The city council of Vancouver has approved the draft of the proposed commission form of government and amendments to the city charter are to be made at the January session of the legislature, the new system to come into force one year later. The amendments provide for four commissioners at a salary of $7,500 each and a mayor at a salary of $10,000.

Plenty in Saskatchewan.

The village of Plenty, Sask., was incorporated in May. The assessment in June showed $111,810 worth of assessable property, and the debentures now offering are the first issue. Almost every line of business is represented, but there are still openings for several businesses. The taxes for this year amount to $1,290. Proceeds of the debentures are to be used for building sidewalks, street grading, fire protection, providing water supply, municipal property and the purchase of a cemetery. Plenty is situated in a first-class farming district.

Eight bids were received for the Trenton, Ont., $8,900 5 and 10-year 5 per cent. debentures, which were awarded to Mr. A. E. Bywater, Trenton. The other offers were from Toronto bond firms.

For the $102,000 5 per cent. 30-year debentures of Medicine Hat, Alta., ten offers were received. As previously noted the award was made to the Canadian Debenture Corporation, Toronto.

The township of Normandy, Ontario, which is advertising for tenders for $6,000 4½ per cent. 20-year school debentures, has no debt. No debentures have been issued since the $80,000 railway debentures twenty-eight years ago.

"The bare statement," says the London Financial Times, "that the City of Montreal has appointed the Bank of Montreal its financial agents covers a good deal more than might be thought at the first glance. The vice of municipal borrowings in Canada is the devotion paid to the loan tender system. Under these circumstances the municipalities refuse to recognize any accredited financial agents and prefer to receive tenders in the open market for any loan they may offer.

"It is argued that this system produces the cheapest price for their loans from the borrowers' point of view.

"At times when money is cheap and conditions for loan issuing are favorable this view may be justified, but conditions are not always favorable, and then the fact that a municipality has no particular financial agents places it in rather a difficulty.

"In the middle of last month the city of Montreal wished to raise an important loan, and asked for tenders for the same. The Morocco crisis rendered such an operation difficult, and consequently not a tender was offered to the municipality. In fact no one had any reason to look specially after the affairs of the corporation, and as a result no one would strain a point to assist its finances.

"Taking warning from this experience the Municipal Council have done the right thing. The Bank of Montreal, which has been its bankers for nearly a century, has now been appointed financial agents, and, therefore, that important bank will have an active voice in the decision as to what form of borrowing shall be conducted by the municipality in order to raise the funds necessary for its various schemes."

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Harsch, No. 2221, $1,200. S. Olson, Provost.
Ryley, No. 1866, $2,500. C. M. Watson, Ryley.
Gleichen, No. 103, $3,000. W. Rose, Gleichen.
Calumet, No. 1233, $1,000. C. Paulsen, Asker.
Headley, No. 2423, $1,700. L. Gulmon, Minda.
Wainwright, No. 1658, $3,500. H. V. Fieldhouse.
Chornik, No. 2343, $1,200. S. Hrynyk, Musidora.
Innisfail, No. 210, $3,500. L. C. Harry, Innisfail.
Kinnaird, No. 2530, $1,000. W. J. Barber, Kitscoty.
Okotoks, No. 178, $1,400. D. J. Downey, Okotoks.
White Star, No. 2445, $2,000. W. S. Jacobs, Muncon.
Cora Lynn, No. 2012, $500. H. N. Lyster, Cora Lynn.
Crowfoot, No. 2393, $1,900. H. G. Scheer, Strathmore.
Lethbridge, No. 51, $6,500. C. B. Bowman, Lethbridge.
Lethbridge, No. 51, $8,500. C. B. Bowman, Lethbridge.
High Valley, No. 2503, $1,800. C. V. Nunnemaker, Peerless.
Herbert Spencer, No. 2522, $1,600. Van R. Chase, Irricana.
St. Louis R.C., No. 21, $15,000. L. P. O. Neol, Medicine Hat.
North Edmonton R.C., No. 19, $3,000. V. Mooney, North Edmonton.

EMERGENCY BANK CIRCULATION.

Regarding the article in last week's Monetary Times on emergency bank circulation, it was the intention of the writer of that story to have a proviso inserted that extra circulation provided on a basis of 50 per cent of the reserve fund be limited to 50 per cent. of the paid-up capital, or, in other words, that when the reserve equalled the paid-up capital, its utility as a means of providing further circulation was to cease, in order to guard against disproportionate enlargements with the sole object of creating a basis for note issues. This explanation arrived too late for insertion last week.

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended November 17th, 1910; November 9th, and November 16th, 1911, with percentage change:—

	Nov. 17, '10.	Nov. 9, '11.	Nov. 16, '11.	Chg. %
Montreal ...	$42,388,307	$62,602,050	$58,214,075	+ 37.3
Toronto	33,796,200	45,730,526	40,759,682	+ 20.6
Winnipeg ...	29,291,167	37,824,522	36,067,122	+ 23.1
Vancouver ..	9,863,904	13,298,334	11,908,573	+ 20.7
Ottawa	4,266,272	5,110,098	5,204,285	+ 21.9
Calgary	3,596,842	5,873,246	5,254,744	+ 46.0
Quebec	2,809,348	3,592,016	3,206,918	+ 14.1
Victoria	2,462,075	3,389,369	2,757,784	+ 11.9
Hamilton ..	2,268,534	3,027,116	2,900,209	+ 27.8
Halifax	1,633,389	2,190,112	2,163,449	+ 32.4
St. John	1,560,353	1,843,275	1,661,824	+ 6.4
Edmonton ..	1,765,641	3,332,522	3,400,839	+ 92.6
London	1,385,267	1,555,645	1,418,724	+ 23.8
Regina	1,425,716	2,380,958	1,744,399	+ 22.3
Brandon	683,527	1,004,906	860,905	+ 25.9
Lethbridge .	659,900	813,990	716,554	+ 8.4
Saskatoon ..	916,600	2,197,036	2,012,988	+118.5
Total	$140,773,042	$195,762,721	$180,253,074	+ 28.1
Brantford ..	....	617,750	552,611	
Moose Jaw ..	....	1,328,666	1,503,248	
Fort William	....	76,980	555,596	

The Saskatoon clearing house returns for the month of October were incorrectly furnished us recently as being $3,561,323, whereas the actual volume of clearings of that progressive city last month was $6,561,005. The Saskatoon clearing house is one of the latest additions to the list, but it is making extraordinary strides.

REJECTION OF MUNICIPAL BOND OFFERS.

Action of Many Civic Authorities of Late is Evoking Criticism.

BY H. M. P. ECKARDT.

There is at present among the bankers a disposition to criticize the policy followed by a number of the municipalities in regard to the marketing of their bonds. What is complained of is the persistent unwillingness of municipal councils, sometimes large and sometimes small, to part with their bonds at the prices that are offered. In discussing the subject with me a few days ago a Montreal banker thus explained the attitude of the municipal councillors to whom I have referred. "They feel, because they got a better rate two years ago or one year ago, that to accept the rates offered now would be making a bad bargain for the citizens; and consequently they fall back upon the banks and ask to have the bonds carried until conditions improve in the money market."

The weakness of this position, as assumed by the municipal officers in question, lies in the assumption by them that money market conditions will improve within a reasonable time. Whether a time will come, within the next year or year and a half, in which Canadian municipalities may float their debentures at lower interest cost than at present is open to question. There are plenty of circumstances which apparently point to the continuation of a higher interest cost upon municipal borrowings.

Rates of Interest Have Risen.

Rates of interest generally have been rising for the past two years. One of the reasons for the rise is to be found in the higher cost of living. Increase of expenses has compelled the investing classes to look for a higher rate of interest or income upon the securities they buy. In banking and investment circles it is said that while the municipalities have been unwilling to meet market conditions in this matter industrial bonds have been supplanting their debentures to a certain extent in the favor of investors. There are many people now buying industrial bonds netting them 5½ and 6 per cent. who would not look at such securities two years ago. Perhaps they would not now be inclined to take the greater risk connected with industrial bonds if they could get municipal bonds which would meet their views in the way of the rate of yield on the investment.

Needless to say when municipal officers elect to refuse the offers made for their bonds or debentures in the expectation or belief that better offers will be forthcoming in six months or less, they are constituting themselves experts in finance. It is not often the case that the parties who have charge of the finances of the small towns and cities of Canada are qualified to pass judgment on the probable course of the investment market six months in advance. The best experts in Montreal, Toronto, New York and London hesitate to pronounce on conditions that far in advance.

It is well known that in most of the cases those municipalities which in the last year or two followed the policy of holding off and holding off have in the end secured less than they might have had at first for their bonds. In the meantime they were obliged to pay higher interest rates for the temporary loans which tided them over.

The banker with whom I discussed the matter referred to the several minor municipalities in Ontario which within the last year called once, twice, and three times for tenders for debentures, and on each occasion rejected all the offers made. He emphasized the fact that these particular municipalities have, by their repeated rejection of bids, lessened the number of bond houses that will bid for their securities in future; and with two or three firms bidding instead of seven or eight, they are not likely to get such good offers as they otherwise would.

When all these circumstances are considered it certainly seems that those municipalities which put their bonds on the market and accept the best price offered are pursuing the wiser course and acting in the best interests of the citizens. Usually it is a pure gamble or speculation whether interest will move up or down. It is as likely to move one way as the other. If they sell at once the competition among the banks and bond houses is reasonably certain to bring them fair prices.

Demands for Credit.

There is another point to be remembered. It applies more particularly to periods like the present during which the banks are confronted with extraordinary demands for credit. When a municipality refuses to accept the tenders made for its debentures and has recourse to a temporary loan from its bankers, its policy in so doing may result in a contraction or curtailment of the credits allowed to the business men in the municipality. For example, if a bank branch carrying the municipal account has already a large total of discounts and is called upon to advance a further sum to the municipality, $50,000 or $60,000 or more, the grand total of the branch's advances rises to a formidable sum, and the central management may not be disposed to acquiesce in requests for further loans which may perhaps be desired quite legitimately by the business interests in the municipality. In other words, the municipal policy tends to prevent its own industries and trades getting the full amount of credits desired by them.

◆

AMALGAMATED ASBESTOS COMPANY.

Bonds are in Doubtful Position—First Evidence of Trouble.

Although it has been no secret for some time past that the earnings of the Amalgamated Asbestos Company were exceedingly disappointing, and that it would be difficult to provide the interest on the bonds, it was hoped that it would not be necessary to actually default upon the payment. This hope is now shattered, the directors having officially decided to pass the interest, which is due on December 1st. A complete official announcement will shortly be made regarding a plan of reorganization which is under consideration. One suggestion seems to be that the $8,000,000 bonds will be replaced by $2,000,000 5 per cent. bonds and $6,000,000 income bonds, which latter are evidently equivalent to preferred stock. The price of the bonds has already reduced to about 33 1-3 per cent. of par, so that to diminish the issue to 25 per cent. of its total is not making matters a great deal worse than they are at present. In fact, this whole Amalgamated Asbestos mix up is the very worst that Canadian financiers have got into for many a day.

This company was formed early in 1909. It was a consolidation of companies supposed to own about 75 per cent. of the dependable asbestos property in the well-known Black Lake region of the province of Quebec. The list of names of the directors, showing Mr. E. B. Greenshields as president, and including bankers and business men of the highest reputation, was one of the strongest ever put out in Canada, and of itself inspired confidence. Some of those who had been familiar with the asbestos business for many years declared that the deal was wrong from the very start, but the public paid little heed of this, for the reason that it was considered that altogether new conditions would be brought about under the splendid leadership which was indicated by the personnel of the directorate. Things went along well for the first year, as far as could be seen. The preferred dividends were shown in the financial statement as being more than earned. Difficulties then began to appear, and the stock gradually sold at low figures. The common stock of the company had sold above 30, and the preferred stock possibly in the vicinity of 98. The bonds also had sold up to about 90 or better.

The first evidence of trouble was the passing of the preferred stock dividend somewhere about the middle of 1910. President Greenshields also resigned and Mr. McDougall took his place. Messrs. Cramp, Mitchell & Shober, of Philadelphia, the syndicate managers, then called up all the payments on the bonds, and the price of these ran down to around 70. Later a report for a partial period of the year was presented. The evidence of this report was that the bond interest was not being earned for the period covered. Since that, there has been a gradual decline in the price of the securities. The bonds are now selling around 35, the common stock around 2½, and preferred possibly around 10. The common stock is only a joke, and is not worth a cent on the dollar. The preferred stock, being not an overly large issue, might, in the course of years, come in for recognition, but is of little consequence save as a speculative venture.

Bonds In Doubtful Position.

Even the bonds are in an exceedingly doubtful position, although some scheme may be devised between the large interests to rescue them from the position to which they have fallen. On the whole, the situation is bad. The present management of the industry has been doing its utmost to get matters into better shape, but circumstances apparently are against them. A lot of money has been lost to the subscribers, and any suggestions that may be made for the betterment of conditions will be received with much interest.

Messrs. Cramp, Mitchell & Shober are trying to formulate a scheme which, it is feared here, will not be acceptable to Canadian and English holders. A recent circular to those who purchased from the firm mentioned announces that a bondholders' protective association has been formed, subject to the deposit of $1,500,000 bonds, and it is now stated that more than the requisite amount has been received, and that the negotiations are now going on with some of the large bondholders. It would seem that it requires 75 per cent. of the bondholders to take any action altering the bond issue.

OVERSEAS MARKET MORE ACTIVE.

Canadian Northern Railway Issue Follows Grand Trunk Flotation—Criticism as to Lack of Information.

There is still complaint in London that sufficient information is not given in the majority of the prospectuses of Canadian flotations made there. Of the Toronto Power Company's offering of £821,917 4½ per cent. consolidated debenture stock, one authority says: "The prospectus is inclined to dwell more on future estimates than on details of past working. There is no statement of the underwriting contracts, if any, regarding the issue." And of the Alberta Land Company's issue of £200,000 5 per cent. debenture stock it is said: "The purchase price of the property is not stated in the announcements; its value is put at £517,449, but this is only an estimate, presumably of the directors, and no proper valuation appears. The share capital is $1,500,000 but it is not stated whether this has been issued and, if so, what assets represent it. Without further information, the debentures cannot be recommended." Information is what the investor needs and the legitimate thirst of the British investor for details is without equal.

Another Land Issue.

An issue will shortly be made overseas of £150,000 5 per cent. debentures of the North Coast Land Company, Vancouver, carrying an option certificate for one share of $5 in capital stock of 25 shillings per share for every pound of debentures held.

Another Canadian real estate enterprise is being floated in England, this time at Liverpool, namely, the Liverpool-Western Canada Land Company, capital £75,000, to acquire 13,900 acres of Northern Alberta land, and the Banfield Canadian land syndicate, and also several Vancouver town lots. There are signs that this land company business is being overdone in England.

Application has been made to the London Stock Exchange to list Algoma Central and Hudson Bay Railway £350,000 fives, on the London Stock Exchange, and application for a special settling day for Dominion of Canada Trust Corporation £500 shares, and Canadian Oil Producing and Refining Company £11,000 shares.

Canadian Northern Railway.

A new issue of Canadian Northern Railway £1,400,000 4 per cent. stock, guaranteed by the Province of British Columbia is being issued in London at 99 by Lloyds Bank and the Canadian Bank of Commerce.

The following is a list of the Canadian Northern Railway securities:—

Description	Amount Outstanding	Date of Redemption	Interest, Rate %

British Columbia Mortgages

In placing any surplus funds your first thought should be—security. The careful investor is wary of mining and oil shares, because no security is usually given.

No safer form of investment exists to-day than first mortgages. Ours are placed on improved city properties in Vancouver and farms in Saskatchewan and Alberta. Our valuations are made by experts and are very conservative.

No loan is placed for more than 50% of appraised value. All loans are approved by board of directors. The company insists on the payment of a portion of principal at end of third year, interest payable half-yearly. Titles are searched and certified by our solicitors.

We guarantee to net you SIX PER CENT., making all collections and attending to minor details without charge. Let us tell you more about our Guaranteed First Mortgages.

ONTARIO.

Provincial Loan of $1,000,000.

THE GOVERNMENT OF THE PROVINCE OF ONTARIO, under the authority of Chapter 4, of the Statutes of Ontario, 1911, invites subscriptions from the public for a loan of $1,000,000 on bonds of the Province of Ontario, or "Ontario Government Stock."

The bonds will be dated 1st November, 1911, and payable on the 1st November, 1941, in denominations of $1,000 each, with coupons attached for interest at the rate of four per cent. per annum, payable half-yearly on the 1st May and 1st November in each year, at the office of the Provincial Treasurer, Toronto, or at the offices of the Bank of Montreal, in Montreal, Canada, and in New York, N.Y., at the holder's option. Bonds will be made payable to bearer, but on request will be registered in the office of the Provincial Treasurer and endorsed as payable only to the order of certain persons or corporations, and on request of holders will be exchanged for "Ontario Government Stock" at any time.

The issue price during the month of November, 1911, will be 102 for each $100, and after the 30th day of November, 1911, the issue price will be 102 and interest accrued from the 1st November, 1911.

ALL BONDS AND INSCRIBED STOCK ISSUED UNDER THE AUTHORITY OF THE SAID ACT ARE FREE FROM ALL PROVINCIAL TAXES, CHARGES, SUCCESSION DUTY AND IMPOSITIONS WHATSOEVER.

Purchasers of Stock or Bonds will be required to send certified cheque with the application, payable to the order of the "Provincial Treasurer of Ontario."

This loan is raised upon the credit of the Consolidated Revenue Fund of Ontario, and is chargeable thereupon.

A. J. MATHESON,
Provincial Treasurer.

Treasury Department, Parliament Buildings, Toronto, 1st November, 1911.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

A syndicate of British capitalists has been formed to erect large cement works on Saanich Arm, B.C., with a daily capacity of 2,000 barrels.

The British North American Dry Dock and Shipbuilding Company, Limited, has been incorporated with a capital of $1,000,000. The company will make application for subsidies for the construction of the largest dry dock in the world at Quebec.

The citizens of London, Ont., will probably vote on the proposal to guarantee the bonds of the North Midland Traction Company line, which is being promoted to run from London to Stratford, via St. Mary's. In January last the people voted favorably on the plebiscite to guarantee the bonds, but the city council and the company differed when an attempt was made to define the rights the city should have in regard to the building of the road, issuing of bonds, etc.

WESTERN CANADA.

Threshing Operations Have Been Suspended — Banks and Loan Companies Are Hopeful— In the Wheat Markets.

Monetary Times Office,
Winnipeg, November 14th.

The sharp wintry weather has stopped threshing operations all over the West. The late harvest and inclement weather of the fall have left much threshing still undone, and the prospects are now poor for a big proportion being threshed before spring. While Manitoba was well through with the work, the other two prairie provinces have not been so fortunate. In the majority of places in Saskatchewan and Alberta there is fully fifty per cent. of the crop still in the stook, representing some 35,000,000 to 40,000,000 bushels of wheat in the western fields under a heavy snow blanket. Shipments to the lake terminals continue in immense volume, and elevators find difficulty in handling all the trade offered. The Canadian Pacific Railway is making arrangements to open one of the older elevators at Fort William belonging to the company, which will relieve congestion to some extent.

Banks and Loan Companies are Hopeful.

Business in general has suffered little or no check through the break in the weather, and work is to be continued on many of the larger buildings now in course of erection, during the winter. Collections are reported to be fairly satisfactory considering the backward state of the marketing of the crop. In cases where the grain has been marketed and returns received, payments are being made without difficulty, but in other instances farmers are handicapped through their inability to get their grain threshed and put on the market. With such an enormous quantity of the crop still on the farmer's hands and the dismal prospects of much more threshing being accomplished for the present, it remains to be seen to what extent obligations will be met, but banks and loan companies look forward with hopefulness to the outcome, particularly in so far as Manitoba is concerned. It is generally expected that the receipts for all purposes will not be so large as last year at this period.

In the Wheat Markets.

Up till mid-week markets maintained a steady and stronger tone, and prices began to take an upward trend, but an unexpected weakness developed at the week's close. The effect of the storms in the West was offset by bearish British news with lower cables while shipments from the Argentine were also in large volume. The decline also took place in face of lower receipts locally, bad weather reports, and an enormous percentage of the crop still in the fields. The drop was attributed by some to the investigations as to the rumored corner in wheat in Chicago, and by others wholly to the lack of export demand, but the general view is that there is no adequate reason why present prices for our wheat should not hold, and possibly even advance, if an export demand can be developed.

On our local market the cash demand during the week showed some improvement, but while quantities of lower grades are being exported, no large orders are being placed for the higher grades. In view of the abnormal receipts of low grade stuff it is considered surprising that our market has held so firmly. The Winnipeg Grain Exchange has decided to clear trades in commercial grades of wheat, which will permit the open grades in Nos. 4, 5, 6 and feed, to be cleared through the local clearing house. This will do away with the uncertainty about grades which seems to affect the export demand, and is to some extent responsible for the present dullness in that line.

Lack of Enquiry for Wheat.

While there is a lack of enquiry for our wheat abroad, the situation is not thought to be bearish. World's shipments are running considerably less than for corresponding period a year ago, while the wheat on passage is also a long way behind. There is an increase in American shipments, but a heavy decrease in Russian and Danubian exports. The Argentine crop is still the strongest bear factor in the situation, and although there are reports of partial frost damage, the prospects are for an enormous yield in that country, barring accidents.

VISIT TO MAPLE LEAF MILLING COMPANY'S PLANT.

A large party of brokers, bankers, business men, engineers and newspapermen, are leaving Toronto this morning by special train to visit the plant of the Maple Leaf Milling Company at Port Colborne. The Maple Leaf mill is a fine example of a well-built mill in an ideal location. The financial men will examine the position in relation to the value of the company's stock and future prospects; the engineers will cast their eyes into the technical features of the plant, while the newspapermen will act as official recorders of the trip.

◆

TRAVERS ASSUMES FULL RESPONSIBILITY.

On the charge of conspiring, confederating and agreeing with W. R. Travers to secure by false pretences the certificate for the Farmers Bank, Messrs. J. R. Stratton and J. J. Warren surrendered to the sheriff last Thursday and elected to be tried by a county judge instead of before a judge and jury. The case arose out of a loan of $100,000 made to Travers and the Farmers Bank by the Trusts and Guarantee Company.

A number of witnesses were called, the principal one being W. R. Travers, formerly general manager of the defunct bank. He was examined at length by Mr. DuVernet, for the Crown, and by Mr. Watson and Mr. Rowell, acting respectively for Messrs. Stratton and Warren.

Travers said that the men who had organized the bank had approached him and asked him to assist them in the promotion of the institution. There had been a sufficient number of subscribers to stock, but there was not enough money for the required deposit with the Government. There had been about $150,000 paid in, there was a promise of $20,000, and he then set out to secure the other $80,000. Two banks and a large brokerage office were approached, but he could not arrive at terms with them, and he went to the Trusts and Guarantee Company.

He had a number of interviews with Mr. Warren, and only on one occasion did he see Mr. Stratton. This time it was only for a minute, and Mr. Stratton said that the manager of the company, Mr. Warren, had the handling of the whole thing. He and Mr. Warren came to an agreement by which Travers was to get $80,000, as a loan, giving as security $105,000 worth of different farmers' notes, paying a bonus of $1,000 and ten per cent. interest. Travers said that he had made the loan for thirty days, as he thought that he would be able to pay it back when the money was returned by the Government. The other loan of $20,000 which he made was because of a broken promise from another party, and for this loan he gave the same kind of security. This made $100,000 in all.

A number of other witnesses were called. Among them were Mr. Knight, of the Canadian Bankers' Association, and Mr. Thomas Lawson, of the Department of Finance, at Ottawa, who produced records.

STOCK EXCHANGE MEMBERS

A Guide for the Investor

We have just completed a Booklet on Canadian Bonds and Debentures that should be invaluable to every investor.

It gives full particulars regarding the principal bond issues that are listed on the Montreal and Toronto Stock Exchanges.

Every Canadian bond investor should have a copy of the Booklet on file.

We will be pleased to forward copy free on request.

PARLIAMENT OPENED.

The Duke of Connaught opened Parliament at Ottawa on Thursday. The speech from the Throne referred to the continued and increasing prosperity of the Dominion, and to the fact that despite poor harvest weather, the crop would likely prove a record one.

"The advantages," it continued, "that would result from a wider exchange of products between the various countries of the Empire are undoubted, in view of the wonderful variety and extent of those productions, and negotiations have been opened for improved trade arrangements with the British West Indies and British Guiana, which should prove advantageous to these colonies, as well as to this Dominion.

"The importance of providing our country with better highways is manifest. A bill will be introduced for the purpose of enabling the Dominion to co-operate with the provinces in the accomplishment of this desirable object."

The speech then forecasted greater expenditure on the encouragement of agriculture and the appointment of a tariff commission.

Hon. T. S. Sproule is the new speaker.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

The monthly statement of the British Board of Trade shows that the imports in October increased £2,804,498 over those of the same month last year, and the exports gained £5,855,071. The subjoined table shows the trade in October this year and last year:—

	1910.	1911.
Imports	£58,010,622	£60,815,120
Exports	37,691,232	43,546,303
Excess of imports	£20,319,390	£17,268,817
From Jan. 1 to Oct. 31.		
Imports	£545,257,782	£550,249,001
Exports	356,268,276	374,724,190
Excess of imports	£188,989,506	£175,524,811

◆

And now comes the news that China may default on bond interest.

Chairman James Leitch, of the Ontario Railway and Municipal Board, who has granted a suburban railway with franchise for a single track, the right to build 8,005 feet of switches, despite the adverse opinion of his two colleagues, should sit at the feet of Judge Mabee for five minutes.

Workmen's Compensation

Contractors' Bonds	**Automobile Liability**
Personal Accident and Sickness Insurance	**Teams Liability**
Employers' Liability	**Elevator Liability and Industrial Insurance**

OUR MOTTO: Prompt and Just Treatment of Claims.

WORKMEN'S RIGHTS

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan. 3

LIFE ASSURANCE COMPANIES

The Chief Difficulty

that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

More Policyholders in Canada than any other Canadian company.

THE UNION LIFE ASSURANCE COMPANY
Head Office, TORONTO, Canada

UNION BANK: PROPOSED TRANSFER OF OFFICE TO WINNIPEG.

As noted in last week's Monetary Times, the question of the transfer of the head office of the Union Bank of Canada from Quebec city, where it is now located, to Winnipeg, will be submitted to the shareholders for decision at the next annual meeting. Honorable John Sharples, president of the bank, has issued a circular to the shareholders in which he states:—

"The rapid expansion of the bank's business necessitates ever increasing watchfulness and care on the part of its executive officers. We have now 245 branches, of which 159 are situated West of the great lakes, and the result of experience fully shows the desirability of having more central supervision than is possible under existing conditions. As we have only two offices east of Quebec, the head office is at present located at almost the extreme eastern end of the bank's chain of branches. Your directors have given this matter very grave consideration for two years past, and are unanimously of the opinion that the best interests of the shareholders will be served by removing the head office from the city of Quebec to Winnipeg, which is about midway between its eastern and western operations. Application will be made to the Federal Parliament at its next session for an Act amending the charter of the bank, changing its head office to the city of Winnipeg, at such time as the shareholders, having signified their approval, shall authorize your directors to give effect to such change. A resolution will be submitted to the shareholders at their next annual meeting to be held on December 18th, asking them to ratify the recommendation of your directors, and to empower them to take the necessary steps to change the head office of the bank to the city of Winnipeg when they deem the time opportune."

The Prudential Investment Co., Ltd.

HEAD OFFICE - VANCOUVER, B.C.

Authorized Capital - - $2,000,000
Subscribed Capital - - 1,090,000
Assets of over a Million Dollars
Paid-up Capital, $780,000 Reserve, $250,000

Owing to the fact that the ordinary stock of the Company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchange, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C., or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. STOCK BONDS INVESTMENT SECURITIES

FROM COAST TO COAST.

The Eastern Townships Bank will locate at Lethbridge, Alta.

The Imperial Bank of Canada have opened a branch at Rocky Mountain House, Alta.

A Buffalo smelting company may construct a plant costing $200,000 in Port Colborne, Ont.

The Canadian Pacific Railway may purchase the entire peat plant owned by the government at Alfred, Ont.

The Lethbridge, Alta., street car system, which will be ten miles in length, will probably be completed by August, 1912.

The ratepayers of Bridgeburg have passed a by-law to grant the Lantz Manufacturing Company of Buffalo a fixed assessment of $5,000 for five years, and to supply them with water at $10 a year.

The Protectorate Life Assurance Company of Canada, will apply at the next session of parliament for an act continuing the powers of the company to do business and extending the time within which the company may obtain a license to carry on business. Mr. O. E. Culbert, Ottawa, is solicitor for the applicants.

The Royal Exchange Assurance, of Montreal, has been licensed to transact in Canada the business of accident, sickness, and automobile insurance, in addition to its present business of fire insurance.

Mr. Charles E. Ring, of Toronto, has been arrested. He is alleged to have underwritten the fire insurance policies secured by Messrs. Carroll & Miller of the Insurance Brokerage and Contracting Company who were arrested last week, and are awaiting trial.

A prominent mining engineer of British Columbia writes as follows from Victoria: There is every prospect of a revival in mining throughout the province. But unfortunately the promoter of wild-cat enterprises is on the alert, and it is difficult to persuade the investing public that mining is a good and safe business proposition instead of a wild gamble. A couple of good and well-conducted undertakings will do a world of good.

The Provincial government will shortly advertise for competitive plans, open to the world, for the new parliament buildings for the province of Manitoba, to be erected here at an estimated cost of $2,000,000. Preliminary sketches are required, and five prizes of $2,000 each are offered. Winnipeg architects are memorializing the government to confine the competition to the British Empire. A Montreal firm won a similar competition for the Saskatchewan buildings.

THE GREAT NORTHERN LIFE INSURANCE COMPANY.

The ostensible promoter of the Great Northern Life has apparently made considerable use of Winnipeg names. While the prospectus already commented upon by Canadian Finance is anonymous, various names of good business standing in Winnipeg are freely used in the stock-selling canvass—but not always with authority. A well known local banker, said to be considerably interested, was phoned by our contemporary anent the matter. His language is usually moderation itself—but on this particular occasion the wire fairly hummed as he expressed his opinion of the methods employed by the gentleman from across the line. As to the antecedents of the aforesaid visitor, sufficient to say that they give scant assurance of the "conservative and profitable management," of which the prospectus prates. If there are Winnipeg business men of standing interested in the project, they would be well advised to abandon present methods of promotion. Their very anonymity indicates them to be not altogether satisfied that these methods are in keeping with their own reputations.

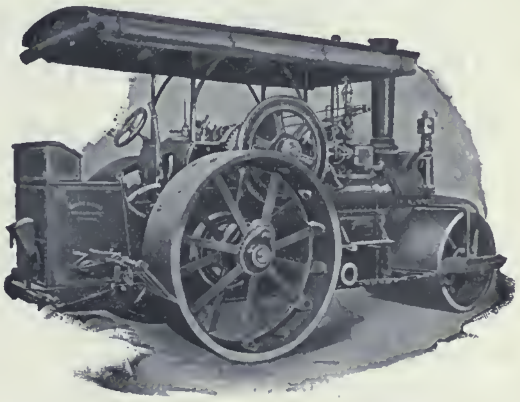
The Waterous
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to none.

Ask the man on the machine.

CANADA WEST TRUST COMPANY LIMITED

Head Office—VICTORIA, B.C. Reference= Merchants Bank of Canada. Branch Office—VANCOUVER, B.C.

PORT MANN

Port Mann has been officially announced as the Pacific Coast terminal of the Canadian Northern Railway Company's transcontinental line. We hold large tracts of land at this point, within the area selected by the railway company for its townsite. We would be pleased to send you reliable maps and general information relative to this new scene of development in British Columbia. As one of the pioneer investors at Port Mann, we believe you will be well advised to consult us before making any investments at this place.

With branch offices in various parts of the Province we are in touch with many good opportunities for investments that you might care to hear about.

Place funds for investment in the very heart of Canada's richest agricultural district on personally selected farm mortgage securities, not to exceed 40% actual valuation. Values will continue to increase. Profitable rates quoted on application.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur St.

TOWN PLANNING AND IMPROVEMENT.

Here is a list of suggestions for town planning, advanced by Mr. T. H. Mawson, an expert, who lectured in Toronto last week:—

Avoid haphazard building. Estimate the course of the city's likely development. Study the growth and origin of cities, coupled with reverence for the historical.

Study man and human nature, impression of the civic spirit and the individuality resulting therefrom. Do not cultivate the artistic at the cost of the comfort and well-being of the people.

Undertake civic improvement in a broadminded spirit, and with the co-operation of the surveyor, architect, sanitary and hygienic engineer, town planner, medical health officer, sociologist, and practically every man in the city or town. Seek advice from all available interested persons, and follow such as suits the planner's inclination.

Prepare a series of plans of park systems, street railway lines, fire stations, water mains, schools and workingmen's houses, to show the man in the street the essential connection beween the practical and the æsthetic.

Provide for the motor cars which have come to stay. Use diagonal streets, radiating from the congested parts of the city, for street railway lines in the middle, sunk to a depth of from 10 to 14 feet, and a roadway on either side. In planning a park system, interfere with nature as little as possible, and make art take a second place.

Aim at setting apart lands for the future, especially in the outskirts of the city. Preserve existing natural beauties of park lands, rather than create artificial beauties. Preserve the banks of rivers for the public, and make them beautiful.

Equip the streets, parks and gardens for utility and adornment. Do not waste money in gaudy ornaments, which look old and dilapidated when the newness wears off. Space houses far enough apart to be beneficial and artistic. Avoid the monotony of rows of houses.

LIFE ASSURANCE

The London and Lancashire Life and General Assurance Association, Limited,
of London, England,
offers excellent opportunities to young men desirous of permanently connecting themselves with a thoroughly reliable life company.
HEAD OFFICE FOR CANADA
164 St. James St. **Montreal**

A brewery to cost $100,000 may be located in Calgary.

The Niagara, St. Catharines and Toronto Railway may extend its line from Port Colborne to Fort Erie, and from that place to Niagara Falls.

The terms of the recent merger of Messrs. Stanfield's, Limited, and Hewson Woolen Company, of Amherst, N.S., are said to be that the shareholders of the latter company will receive par for their stock together with the current half-yearly dividend.

An offer of $13,000,000 for the business of Messrs. J. R. Booth Company is said to have been made by a British syndicate of capitalists and refused. Messrs. Booth control the water power of Chaudiere Falls and also large timber limits.

The Accountants Association of Hamilton recently held an interesting meeting, when Mr. Matchett gave a lecture upon accounting for joint companies. The lecture was replete with much valuable information. During the season the association will be favored with lectures on business investigations, auditing, cost accounting, law, higher accounting, etc., by Messrs. Arthur K. Bunnell, C.A., Ralph E. Young, F.C.A., G. U. Stiff, F.C.A., C. S. Scott, F.C.A., John Farmer, K.C., J. M. Telford, barrister, and others.

At a recent meeting of the Montreal city council the question of the relation of the city and fire insurance companies to the fire commission, was discussed. A letter from representatives of the companies was read, asking that no action be taken until the companies had been heard, and this was agreed to. The city has been paying the whole cost of the fire commission, owing to several of the companies having refused to pay their share of the upkeep. Under the present statutes it was found impossible to force payment, owing to the fact that they are indefinite as to method of assessment and other details. It is probable that the city will ask the legislature at the next session to enact new legislation which will cover the case and force the fire insurance companies to pay their share of the cost of the fire commission, which amounted this year to about $10,000.

PUBLIC UTILITIES COMMISSION JUDGMENT.

(Continued from Page 2117.)

its future financing. It can only be said that the present and probably future net earnings of the company will undoubtedly provide interest and sinking fund for a substantial increase of the bonded debt, and that if future borrowings are conservatively applied they may be expected to provide fruits of their own.

As a final consideration we must not overlook that we have to do with a merely modified right ot an aggregation of shareholders to deal with their property as they may deem best, and that while public interest must be a paramount consideration, that interest must be shown to be seriously and aversely affected to justify the interference of public authority with proprietary rights. It cannot be doubted that the exercise of our veto upon the proposed arrangement would be to seriously delay, and it might be, for the time being jeopardize, a reorganization of the insufficient and variously constituted means of transport upon the Island of Montreal, and retard the advent of a service which the growth of population with increasing urgency demands. In conclusion we fail to see in the proposed arrangement such prejudice to public welfare as, taking the foregoing considerations, and the limitations upon our authority into account, would justify us in rejecting it.

Make Money Earn Its Way

No attention is paid by many people to the investment of small sums of money. It is allowed to remain idle. To get the most out of life, people must work—so with money. It should be made to more than earn its own way.

To some this may not have occurred to be worth while; to others it is not known that excellent bonds, affording absolutely safe and profitable investment, are issued in denominations of $100 and $500. Any number can be purchased from us, yielding splendid interest return. Full particulars upon request.

We give the same attention to large and small orders.

We are glad to receive inquiries about investments.

Write to-day.

INVESTMENT AND LOAN COMPANIES

Conservative Investments

An Object Lesson from France

It is generally accepted as a fact that there are proportionately more investors in France than in any other country. The reason usually given for this condition is the extreme conservatism of the French. With these thrifty people the rule seems to be "Safety first; interest afterwards."

The best interests of the individual and the Nation would be promoted if our people, instead of venturing their savings in speculative propositions where it is so often lost, were to cultivate this attribute of the thrifty Frenchman, and invest in securities which will be permanently safe.

Among the most convenient of such absolutely safe investments are the Bonds of this Corporation. They are a Legal Investment for Trust Funds, and may be had in sums of One Hundred Dollars and upwards.

Send for specimen Bond, copy of Annual Report, etc.

UNFORTUNATE PRESSED BRICK COMPANY.

On another page appears a letter from Mr. L. F. Willan, fiscal agent of the Manitoba White Granite Pressed Brick Company, of Winnipeg. Therein, he takes exception, in breezy language, to the criticisms of The Monetary Times respecting the stock flotation of that company. Readers of this journal know that the assertion regarding our alleged desire to "ruin the financially weak," while we "shelter the capitalist," is due to lack of knowledge on his part. Our desire, carried out to the letter, for nearly half a century, has been to protect the investor, no matter whether the stock salesman is a peer of the realm or a financial cipher. Mr. L. F. Willan complains that we use our position to curry favor with financial concerns, "which might be tempted to advertise in your paper," forgetting that his company was so tempted, and that The Monetary Times did not succumb to the temptation. Still, these points are aside from the main issue. What are the facts regarding the Manitoba White Granite Pressed Brick Company, and the Vancouver and the Calgary companies with similar names? Mr. Willan was fiscal agent for all three concerns.

The Pacific Pressed Brick Company, Limited, was promoted about three years ago. Colonel W. B. Dickie, who hailed from the United States, disposed of certain patent rights of the Steger brick to this company. Mr. L. F. Willan was the fiscal agent. The stock was sold. Exit Mr. Willan. Last month, the shareholders met and it was explained that the company had been capitalized at $100,000 in shares of one dollar each, that 20,000 of the shares went to the promoters and about $15,000 of the money collected on stock subscriptions went to canvassers. There was also $12,365 still unpaid on stock which had been subscribed. The net result was that there are now liabilities of $32,000 and no money to meet them.

In the company's statement, dated March 18th, 1911, the following items appear:—

Incorporation expense	$ 280 50
Legal expense	164 30
General expense	590 81
Preliminary and formation expenses	12,000 00

In addition is an item: "Col. Dickie, less unpaid, $12,815." The result was that Colonel Dickie, Mr. L. F. Willan and his stock-selling associates managed to do pretty well in this promotion.

For the sake of argument, we will admit Mr. Willan's statement that his connection with the company commenced and ended with the selling of the stock. But, unfortunately, Mr. Willan's solicitude for the investor was not as keen as it might have been. While the Vancouver Pressed Brick Company was floundering in the quicksand, Mr. L. F. Willan appeared in Calgary as the acting secretary and broker of the Alberta Pressed Brick Company, Limited, with head office in that city. The authorized capital was $100,000, in shares of one dollar each; the company was said to control the patent rights for the manufacture of the Steger brick in Alberta. In short, the Calgary company had the same amount of capital, the same division, the same Steger brick, and the same fiscal agent. We assume that Mr. Willan was well repaid for the stock of the second pressed brick company which he sold. Exit Mr. Willan.

Then the Alberta company went wrong, and our information is that Mr. Willan on June 5th was asked to resign. The shareholders held a meeting recently to consider the discouraging position of the company. How their balance sheet looks, we do not know, but that it is as equally interesting as the Vancouver statement is practically certain.

For the sake of argument, we will admit once more that Mr. Willan's connection with this company commenced and ended with the selling of the stock. But, unfortunately, Mr. Willan's solicitude for the investor again was not as keen as it might have been. While the Alberta company was floundering in the quicksand, Mr. L. F. Willan appeared in Winnipeg as the fiscal agent of the Manitoba White Granite Pressed Brick Company, Limited, with headquarters in that city. The authorized capital was $125,000, in shares of one dollar each; the company was said to control the rights, this time, of the Stefar, and not the Steger, brick. In short, slightly bigger capital, a slightly different name for the brick, and the same fiscal agent. We assume once more that Mr. Willan has been, or hopes to be, well repaid for the stock he has sold, or hopes to sell, of the third pressed brick company.

Admitting that Mr. Willan and his agents drew a trifle of $12,000 as stock commissions in the case of the Vancouver company, and probably the same amount in the case of the Calgary company, and possibly a small sum in the case of the Winnipeg company, and supposing also that he had nothing to do with the actual breakdown of the first two concerns, does Mr. Willan think he is making for himself a reputation as a stock salesman? He forgets that to be associated with financial mud in any way is bad business. The Monetary Times has nothing to withdraw, and would advise Mr. Willan to make his final exit from the pressed brick stock selling game. By the way, who engaged that gentleman to sell the stock of the Calgary and the Winnipeg companies?

OF THE WESTERN CROPS.

The Western crops this year have been most disappointing. There is little gained by feigning blindness to the facts. Early in the season, everything pointed to a harvest of 200,000,000 bushels of wheat. But the weather was sullen and obstinate. It played every trick in its repertoire, but at the wrong time. The sun smiled when the tears of the clouds were needed. Moisture came when heat was desired. Cold winds swept the green stalks when gentle zephyrs should have been touching lightly the golden heads. These conditions threw the threshing work late into the season. To fill the cup of bitterness, a slice of winter was handed in a month too early.

Mr. Fowler, the secretary of the North-West Grain Dealers' Association, estimating the total spring wheat yield at 178,280,000 bushels, says but seventy per cent. of this is threshed, and sixty per cent. of what is threshed grades No. 4 and under, leaving only fifty million bushels of contract grades. Fifty million bushels are left in the stook or stack, and Mr. Fowler thinks little of this will prove marketable, even if it can be threshed before spring.

Up to November 1st, 67,905,000 bushels had been inspected or was in store, while another 24,000,000 bushels were retained by farmers for seed and feed.

The oat crop estimate is 187,335,000, of which only seven and a half million bushels have been inspected. Much of the oat crop will be fed in the sheaf.

These are sorry statements and a hard blow at early and well-founded anticipations. But we must face the facts. The Western crop is small, and is grading low. It is futile to imagine that success crowned the efforts of the Western grain-growers this year. Through no fault of theirs, the crop is thoroughly disappointing. These cold actualities will not dishearten. There remain our vast and undeveloped natural resources, the constantly increasing crop area, the incoming stream of population, the heavy inflow of capital, the industrial activity, railroad construction in strips of hundreds of miles, and, above all, Canadian enterprise and faith in the future, despite the weather's disagreeable mood during 1911. Climate is not to be the boss.

TUBE RAILWAYS FINANCIALLY UNSUCCESSFUL.

In London, England, with a population as great as that of the entire Dominion, tube railways have proved a financial failure. An agreement merging the tube and the omnibus companies is being signed there, in the hope that less competition may create at least a little profit. It is said that New York is the only city in which tube railways pay. There the conditions are ideal for that form of transportation—congested area in one direction. While the population of Toronto, where it is proposed to expend $5,000,000 on a tube system, has doubled in a comparatively short period, the area of the city has also doubled, making unfavorable conditions for underground railways.

Toronto needs better transportation, but a tube railway is the least desirable method of solving the problem. It only touches the fringe of the matter. The city authorities are bent on purchasing the street railway system at the expiration of the company's franchise, or before. If the company will not or cannot build new lines, the city can build at least 100 miles of them with the $5,000,000 needed for tube construction. That would be an almost immediate addition to the service. Tubes for Toronto are a fad, and would prove an expensive one. The ratepayer who takes an intelligent interest in city affairs will vote against the proposal on New Year's Day.

BIG GOLD SHIPMENTS.

The total shipments of gold to Canada from New York this year have been $21,050,000. The heavy shipments during the past few days originated with Messrs. N. W. Harris & Company, of Boston and New York, in connection with the bond flotation of the Montreal Tramways Company. The amount of the bond sale was $10,445,000, and this deal is probably the largest, aside from railroads, that has been negotiated with United States capital. On Friday last week, seventy kegs of American eagles and double eagles, each containing $50,000, in all $3,500,000, were received in Montreal from the sub-treasury office in New York. The day before $3,000,000 came in, a total altogether of $6,500,000. Further shipments will follow until $10,000,000 of gold has been transferred.

The financial arrangement of the merger is such that each share of Montreal Street Railway stock receives in exchange from the Montreal Tramways Company $87.75 in cash in addition to other securities, the money negotiation requiring $8,750,000.

Altogether, the transaction made quite a ripple in the money market.

FISCAL AGENTS FOR CITY FLOTATIONS.

The sale of municipal securities by the public tender medium is well when the amount is so small that the loan could not be placed in the London market. Ninety to one hundred thousand pounds is about the smallest amount suitable for a public issue in London, but when a Canadian loan is to be floated there, unquestionably the tender system is hopelessly wrong and indefensible. Everyone in London, who is disinterested and has an intelligent knowledge of the circumstances, unhesitatingly condemns this now purely Canadian method. Several Canadian cities have placed themselves at a serious disadvantage in this respect by their persistence in failing to follow the example of other important borrowers. If the floating of the loans of these mistaken cities were placed in the hands of a properly qualified fiscal agent, their credit would be much higher.

We recall that a leading city—the name shall be spared—accepted a tender for £1,000,000 of stock a few years ago, but were unable to make delivery, as the loan required legalizing by the provincial legislature. Certain market interests repudiated the purchase in consequence, and it looked as if the matter would be taken into court. Had that occurred, and, whether the municipality would have succeeded or not, it is not at all improbable that city's securities would have been struck off the stock exchange list. In order to prevent the city from making such a disastrous mistake, a strong financial institution stepped in and took the loan, losing money by doing so, we believe, but to a certain extent saving the city's credit.

Our big cities must know that the London market is too delicate for trifling. For the sake of their credit, they should appoint well-qualified fiscal agents who know market conditions, and consequently can dispose of securities at the proper moment, and who are on the spot to protect a city's credit.

SMALL CHANGE.

The investor needs to be upon his guard these days. An unusually large number of doubtful offerings are being made.

* * * *

Some one in London is apprehensive that all is not well in the Canadian situation. That may be, but ninety-two per cent. can be marked O.K.

* * * *

A bear weighing 600 pounds has been shot near Kingston, Ontario. The report that it will be sent in asbestos wrapping to the Montreal Stock Exchange is incorrect.

* * * *

The real enthusiast is a man of whom we hear at Edmonton, who is ready at any moment to tell how much the city has grown in the past twenty minutes and how much it will grow in the next half hour.

* * * *

Who is mayor of the town? a visitor to Oakville, Ontario, asked the driver of the conveyance from station to town. "I am," was the reply. Wherein we find true democracy in that enterprising town on the shores of Lake Ontario.

A busy staff is engaged with the annual number of The Monetary Times, which will be published at the year end. It will contain 176 pages supplementary to the regular number of pages, and will be the biggest and, we hope, the most valuable issued from this office during the past forty-four years.

* * * *

Hope beats eternal. Listen to this, from the report of the Casey Cobalt Mining Company's meeting in London, England. "The story of this mine has been one of intermittent hopes and fears. I think we can gather some little hope from this report. What I consider to be a most hopeful thing is that we have apparently a large amount of low-grade ore available. There is another hopeful point, and that is . . . the line which will give us power, and I consider it a most hopeful thing." The trouble is that hope is invariably nice, but not always nourishing.

* * * *

Why should any Canadian hesitate regarding a substantial contribution to the greatest navy in the world, that of the British Empire? Those who need nautical frills for Canada can have them in the shape of Niobes, but we need not enter the warship building contest of nations. Great Britain is leader in that competition, and must always be for the sake of its existence and that of its overseas empires. Canada has not asked to step from without the circle of Empire, nor has any intention of doing so. Therefore, we are vitally interested in the maintenance of the supremacy of the British navy. Our contribution should be vessels of value and at the command of the British admiralty. It is easy to express sympathy, but practical assistance counts.

PRICE OF GAS IN MONTREAL.

Consumption Per Capita—Public Utilities Commission May Investigate.

Monetary Times Office,
Montreal, November 25th.

Gas is being sold in Toronto at 70 cents per thousand while in Montreal the price is $1.00 per thousand. It is known that the cost of producing and delivering gas in Toronto is cheaper than in Montreal, but the disparity in cost is, in no way, the equivalent of the disparity in the price being charged. The question will shortly be taken up by the Public Utilities Commission in Montreal. Officials of the company have declared their willingness to lay their case before the public. Gas is being sold in Toronto cheaper than in any other city on the continent, and the cost of coal from which it is made is greater in Toronto than in many cities where the price is lower than in Toronto. As against 70 cents in Toronto, gas sells at 80 cents in Boston, Brooklyn, Chicago, Cleveland, Detroit, Milwaukee, New York and St. Louis. It would seem that Montreal is paying from 25 per cent. to 40 per cent. more than other cities in America.

Officials of the Montreal Light, Heat & Power Company, which company includes the Montreal Gas Company, say that conditions in Montreal are such as to compel a much higher price for gas. The Montreal Gas Company no longer uses Canadian coal, the Canadian article not containing sufficient quantities of gas-giving qualities. Consequently the coal must be purchased in the United States. On this must be paid duty and high freight rates, bringing the cost to nearly twice as much as in the city of Cleveland, where apparently the value is $2 less per ton. This coal has better producing qualities than that which is purchased at a much higher figure in Montreal. Toronto is able to secure coal at $3.25 a ton, which is much under Montreal.

Consumption of Gas Per Capita.

Another element apparently in the cost of gas is the quantity produced and consumed. Montreal stands at the bottom of a list of large cities, the figures representing the consumption per capita in each of the cities mentioned.

New York	9,375	feet per capita.
Toronto	8,000	“
Boston	7,477	“
Detroit	7,000	“
Washington	6,020	“
Baltimore	4,541	“
Montreal	2,740	“

When asked why the annual consumption per capita in Montreal should be so much smaller than in the other cities mentioned, an interesting answer was given. This was that the consumption of gas increased in proportion as the inhabitants of the city occupied their own residences. The inhabitants of Montreal do not generally own their own residences. The flat system prevails here to some extent and this does not conduce to ownership by the individuals occupying them. A very large proportion of the citizens of Toronto live in their own homes. New York would be situated very much as is Montreal. Nevertheless, the annual consumption of gas per capita in New York is considerably greater than in Toronto. This hardly carries out the explanation given by the company, which may be perfectly correct.

Another drawback in Montreal is that the amount of gas delivered per mile of pipe is exceedingly small. Baltimore, for instance, supplies 6,000,000 feet of gas to every mile of pipe, while Montreal supplies only 3,500,000 for each mile. For both the above reasons the company claims that it is very difficult to produce and deliver gas in Montreal at a low cost.

Company Charge Too Much.

If the consumers were asked to explain why the consumption of gas is so low in Montreal and why the delivery of gas per mile is lower than in other places they would declare that the company charges too much for it. If the Montreal Gas Company will reduce its price to 70 cents, as in Toronto, the annual per capita consumption of gas will go away up immediately in Montreal.

The company mentions that the revenue from each consumer in Toronto is $30, while in Montreal it is but $10 per annum. It was argued that the capital investment in Montreal produced a smaller revenue dollar for dollar. The argument is also advanced, that the difficulties of delivering gas in Montreal are greater than in Toronto and other places, owing both to the colder climate and to the rocky nature of the ground in Montreal. The cold weather materially lessens the amount of gas delivered at the burner. These physical conditions unquestionably would necessitate an increased cost in Montreal, though to what extent is another question.

Toronto Has No Competition.

That the Toronto company has not had to meet competition, whereas in Montreal the Montreal Gas Company was formerly faced by competitors and had to expend about $1,000,000 to meet the competition.

The price of gas has been reduced to $1.00 from $1.20 during the past two years, and during the next year it will be reduced to 95 cents. A case may be argued before the Public Utilities Commission of the province of Quebec at Montreal before long, when some of the points mentioned may be further dealt with.

Financing of Dominion Steel Corporation.

While the directors of the Dominion Steel Corporation were holding their meeting, it was stated that a proposition from British and French financial interests was being considered and also that previous to this, negotiations had been going on with the United States Steel Corporation, which negotiations had been called off owing to the action taken by the United States Government against the corporation. It was also rumored that the directors would raise more capital.

It would appear that the weakness was occasioned by the rumor that French and British interests were trying to gain control. As a rule, a rumor of this character has the opposite effect upon the market and the market sold when it became clear that the subject under consideration concerned a scheme for financing, solely. The directors practically came to the conclusion that instead of selling the $6,000,000 bonds which are in the treasury, it would be better to issue preferred stock.

Although the story concerning the negotiations with British and French interests for control was denied, it was evident that arrangements of some character had been going on, inasmuch as in the official statement issued by Mr. Plummer, it was stated that the directors were being influenced in their action by the interest which London and Paris would take in the issue.

Company Asked to Give Certain Rights.

The company had been asked to give certain rights to common stock in connection with the sale of the new preferred, whenever that point might be reached, and it was not unlikely that this might lead to considerable investment in the common stock abroad. Manifestly this has reference to London and Paris. No definite conclusion seemed to have been reached at the meeting, but it is evident that the directors are entirely in favor of carrying out the programme outlined.

Montreal does not appear to have taken to the proposed method of financing, although the raising of this extra money will be advantageous to the company, as it can be expended in many profitable directions—probably in connection with the development of the coal areas which are now returning excellent profits to the company.

The Dartmouth Electric Light Company has changed hands, and the plant will be remodelled and enlarged. Eventually the Nova Scotia Power Company may acquire control of the Dartmouth concern.

Messrs. Mitchell & Ryerson, insurance brokers, Toronto, have issued the first calendar for the coming year. It is a reproduction of Mr. William Thorne's beautiful painting, "Looking into the Future," and will probably rank as one of the best calendars of the season.

The Acadia Fire Insurance Company has declared a dividend of 25 per cent. The past year's operations are reported profitable. The company was organized forty-nine years ago, and has been uniformly successful and profitable. During that time nearly $900,000 in dividends have been paid. The paid-up capital of $200,000 has been increased from profits to $400,000, and a large surplus remains. It requires excellent management to make profits in fire underwriting in this country.

The securities of Tooke Bros., Limited, were called for the first time on the local exchange on Wednesday, the preferred stock selling at 87, and later at 86½, and the common at 37½. Messrs. Creak, Cushing & Hodgson, the company's auditors, in their certificate covering the earnings for the year 1910 and 1911, show earnings for the twelve months ending May 31st, 1910, of $109,406, and for the twelve months ending May 31st, 1911, of $105,762.31. These earnings show the preferred dividend earned almost twice.

MUST NOT USE NAME, "GRAND TRUNK PACIFIC."

Americans Benefit by Salmon Conservation—Electricity for Mines.

(Staff Correspondence.)

Vancouver, November 18th.

A judgment of considerable interest to companies in Canada is that of Mr. Justice Clement, given in the supreme court here on Wednesday. It was an injunction restraining all firms, outside a certain six, from using the names of "Grand Trunk" or "Grand Trunk Pacific." When the Grand Trunk Pacific Railway Company started construction of its line to this coast, numerous hotels, real estate, transfer and other companies were organized in Vancouver that used the names of either the Grand Trunk Pacific or Grand Trunk. The railway company started an action to prove that such firms were not entitled to the use of its name, the right being possessed only by the Grand Trunk Pacific Telegraph Company, the Grand Trunk Pacific Developing Company, Limited the Grand Trunk Pacific Coast Steamship Company Limited, the Grand Trunk Pacific Terminal Elevator Company Limited, the Grand Trunk Pacific Branch Lines Company and the Grand Trunk Pacific Dock Company.

Specific action was taken against the Grand Trunk Pacific Transfer Company of Vancouver, the defence being that as a charter had been granted by the registrar of joint stock companies, they had a right to do business under the name selected. The judge held that they had not, and issued an injunction restraining all firms from using the names mentioned.

Americans Benefit by Salmon Conservation.

The figures of the salmon pack, as given three weeks ago in The Monetary Times, is excellent corroboration of the contention of the Fraser River packers that the hatcheries and conservation methods of the Canadian authorities are for the decided advantage of the Americans. "We hatch, they catch," is the contention. The Puget Sound pack this season was placed at 1,350,000 cases, and of the whole of British Columbia, including the Fraser River, Skeena River and Rivers Inlet, 750,000 cases. The Americans packed 600,000 cases more, or nearly 100 per cent., and decidedly more than 100 per cent. of the pack on the Fraser alone. Yet the fish packed by the Americans were all bound to the Fraser River, there being no spawning waters that empty into Puget Sound.

In their course from the sea, the salmon pass through American waters, and taking advantage of this every wholesale method of catching is employed. Close seasons are unobserved, the regulations in regard to the operation of huge purse seines are overlooked, there are numerous traps on the surface of the water. Little wonder it is that the pack of salmon this season with the Americans has been the best yet, for few fish get a chance to reach the Fraser. It was for this reason that the Dominion Government did not insist on the observation of the close season from August 25th to September 15th this year. Canners here contended that if the resource was to be exhausted, then Canadians ought to get what they could. This may not sound right, but those who understand conditions see nothing else to suggest.

Electricity for the Mines.

Electricity is to be used as a motive power in the operation of the mines of the Canadian Collieries, (Dunsmuir), Limited, and $1,600,000 will be spent by the company in the development of a waterpower on the Pundlege River, in new equipment and improvements. Apropos of the discussion in this column of the awarding of contracts to American firms, the contract for the work on Pundlege River, to cost $500,000, has been awarded to Messrs. Grant, Smith & Company. Improvements at the mine involve a considerable outlay. Three 159 horse-power boilers are to be installed in the Extension mine; a new tipple has been built at No. 7 mine; a similar tipple at No. 4 mine will replace the old one; seventy-five new cottages are being completed at No. 7 mine for the miners; and hoists and other equipment are being got ready for the time when electricity will be used. The total coal output of the companies' properties has been increased ten per cent. during the past year, being now between 3,500 and 4,000 tons daily, but the demand still exceeds the supply. Preliminary tests were made by warships of the Pacific squadron of the United States of this coal, and these were satisfactory. Further tests are to be made shortly.

Dock and Shipbuilding Company.

Capital has been subscribed in London and Paris for the Port of Vancouver Dry Dock and Shipbuilding Company, which absorbed the Vancouver Drydock and Shipbuilding Company, with a total capitalization of $1,500,000. As pointed out previously, the dock will be located on the north arm of Burrard Inlet, and the contract for the erection has been granted to Messrs. Harrison & Company, of Manchester and London, who will deliver the dock here, while William Hamilton & Company, of Port Glasgow, Scotland, will prepare the steel and machinery to be used in connection therewith. The drydock will be 550 feet in length, 80 feet beam, capable of lifting a vessel 600 feet long and 15,000 tons dead weight. Most of the shipping here at present is of medium type, and the dock will be constructed in two sections, which, when necessity arises, can be joined together, with a capacity to accommodate any ship. The Dominion Government has subsidized this concern to the extent of $1,142,000 at three and a half per cent. for twenty-five years.

BULLY AND THE BOY.

Fiscal Agent of the Manitoba Pressed Brick Company Hurls Some of the Company's Products at The Monetary Times.

The following is a copy of a letter, received from Mr. L. F. Willan, fiscal agent of the Manitoba White Granite Pressed Brick Company, Limited, Winnipeg:—

"Editor, Monetary Times,

"Sir,—In your issue of November 11th, 1911, you make a most underhand attack upon me without any justification whatsoever.

"You state therein that perhaps I can throw some light on the matter of the preliminary expenses of forming the 'Pacific Pressed Brick Company, Limited,' Vancouver, and you cast a slur upon me because of the present failure of the company.

"I am only too pleased to give you such information as I possess and I trust you will be fair enough to me to publish this answer to your query as I certainly have no object in hiding my position.

"Colonel W. B. Dickie of Vancouver, the promoter of the company (who, I am surprised to find you do not refer to) engaged me to sell stock to the amount of $80,000.00 on a contract to pay me 15%.

"I sold the stock and received my commission.

"The other expenses mentioned in your article are the usual incorporation expenses which in any event are not chargeable to me.

"Now as far as the 15% which I received for selling stock is concerned, this is quite an ordinary rate and when you take into consideration the payment of from 8% to 12% to sub-agents, costs of advertising, &c., this amount will not leave a very large margin.

"As regards the condition of affairs of the company now, surely you do not hold me responsible. The brick system was installed, the management was in the hands of the company's directors, and, if through mismanagement, lack of market, etc., the company expended over $50,000 of the capital which I had raised for them, I cannot be held responsible for that.

"My connection with the company commences and ends with the selling of stock. Colonel Dickie will no doubt explain to you the reason for the failure of this concern.

"It was he who had the contract with Colonel E. D. Steger of Bonham, Texas, he who had the plant installed by Joseph Farrier, he who obtained the board of directors of responsible Vancouver business men, he who received a bonus of 20,000 shares for promotion, and yet you attack me in a scandalous, underhand manner, relying, I presume, on the position secured by collective capital—against the individual who may not be financially in a position to bear the expense of proceedings against you. You are on a par with the bully against the weaker boy, assuming in arrogant manner a position which enables you to write sensational articles in your paper by which you may bring about the ruin of the financially weak while you shelter the capitalist.

"You have asked me to throw some light on the Vancouver concern. I have given you all the information I can be expected to furnish, and if you have a sense of decency, publish it, and withdraw the remarks made in the issue of your paper referred to and do not use your position to oppress for the purpose of currying favor with financial concerns, which might be tempted to advertise in your paper.

I am, etc.,

L. F. Willan,

Late Fiscal Agent of the Pacific Pressed Brick Company, Limited, Vancouver."

[This letter is commented upon in the editorial columns,—Editor Monetary Times.]

BRICK, LIME, STONE, CEMENT.

Paving Brick Not Generally Used—Older Ontario Limestone Formations—Other Clay Products.

In presenting statistics regarding materials of construction, including building brick, lime, stone and cement, it is difficult to separate entirely the data pertaining solely to them, so far as labor and wages are concerned, for the reason that in many cases other branches of manufacture are carried on, and other articles produced, from the same raw material and with the same workmen. For instance, drain tile is quite commonly made in brickyards, comparatively few tileyards being carried on as distinct from yards in which brick is made. The burning of lime is usually a separate industry, but is sometimes associated with the quarrying of limestone for construction or other purposes. Again, the small limekiln operated by a farmer or his sons on his own land still survives in some localities, and in such cases it is generally impracticable to assign any definite number of days as having been spent at the limekiln, or any definite sum paid out or earned for labor.

This occasionally happens with brick as well, so it is stated in the Ontario Bureau of Mines Report. The evolution of brick-making, lime-burning and quarrying industries, however, is proceeding on the same lines as that of practically all other industries; small producers are disappearing through the pressure of competition, or by the familiar process of "merging" or "consolidation," which relieves the market of too many rivals for business. The larger concerns, however, have advantages from a statistical point of view; more accurate records are kept, and business details, are as a rule, well looked after. The manufacture of cement is almost wholly a distinct industry, and is not subject to the difficulties mentioned.

Common Building Brick.

The number of common building brick made in Ontario in 1910 was 304,988 thousand, worth $2,374,287, as compared with 246,308 thousand, worth $1,916,147 in 1909—an increase in both number and value of over 23 per cent. The average value placed upon the output in 1910 was exactly the same as in 1909—$7.78 per thousand. There was a very active demand for brick throughout the year, the city yards in particular being barely able to supply the requirements of the building trade, and this condition of affairs is likely to extend into 1911. For the most part, the cities and towns of Ontario are made of brick, the manufacture of which has been much improved of late years, and which lends itself to variety and novelty in building effects more readily than stone, while being less subject to fire than wood.

Pressed brick, averaging in cost $10.37 per thousand, were made to the number of 44,204,295, the value being $458,596. For the moment, popular taste seems to have veered from the smooth, almost polished surface of the first-class pressed brick with its uniformity of coloring, which sprang into demand a number of years ago, to the rougher, less regularly formed hard-burned brick now in favor, in which all shades of color are not only permissible, but desired. In 1909, 53,166,941 pressed brick were turned out, valued at $490,571.

Paving Brick Not Generally Used.

The use of paving brick has not become so general as at one time appeared probable. A good vitrified brick makes a durable, easily repaired roadway, but it is undeniably noisy, and to this disadvantage, more than to any other feature, appears to be due the slow progress paving brick has made towards popularity. In 1909, 4,607,620 were produced in Ontario, valued at $73,700, while last year, the output fell to 3,799,025, worth $70,648.

The total value of all kinds of brick made in 1910 was $2,903,531, in the manufacture of which, including tile, 3,559 men were employed, receiving as wages $1,423,751. The average yearly wage per man was therefore $400. In 1909 it was only $303, and it is therefore evident that the brickmaking season, which for the most part extends over the months of late spring, summer and early autumn only, was last year stretched out to an unusual length.

Older Ontario Limestone Formations.

The limestone formations of older Ontario are widespread; indeed, the soil on which resides much the greater portion of the Province's population is underlaid by limestone, and this fact ensures an ample supply of lime throughout the settled part of Ontario at reasonable cost. The newer districts which have so far been opened up for settlement are not on the whole so well provided for in these respects, especially those regions where the pre-Cambrian rocks are hidden, in some places scantily enough, by the sandy and gravelly deposits of glacial origin. In the so-called clay-belt, however, the southern extension of which is traversed by the Temiskaming and Northern Ontario Railway, and the main body by the Transcontinental line, the geological and soil conditions of older Ontario are more nearly repeated, and settlers in these regions need fear scarcity neither of lime nor brick.

In 1910 the lime-kilns of Ontario produced 2,889,235 bushels of lime, valued at $474,531, a somewhat larger output than in 1909, when the figures were given us 2,633,500 bushels, valued at $470,858.

Of building and crushed stone the production last year had a value of $761,126, as compared with $660,000 in 1909. Much of the stone is used in the construction of buildings, the better qualities in the superstructures and the rougher or less valuable sorts in the foundations, and the broken or crushed material is utilized for pavement foundations, macadamized roads, and when of limestone, for flux in blast furnaces. High-grade carbonates of lime are used also for certain chemical purposes, among others, the manufacture of lime-sulphur solutions for the spraying of fruit trees, etc. Dolomite carrying a high percentage of magnesia is also used in making Epsom salts.

List of Marble Companies.
